Re: File **EB-2007-0050 Bruce to Milton Project**

Dear Sir/Madam: *203/5*

Please be advised that we are requesting **intervenor status** regarding the Leave to Construct Proceedings.

We own a property that is to be impacted by this project. It will have major short term and long term impacts on our quality of life and financial well being.

Current Impact: We are both retired and have owned our land for 15 years. As well as maintaining our home, we have made considerable investment in landscaping and maintenance of the property. We are active conservationists and want to maintain a natural rural way of life. We have kept the bulk of our wetlands untouched and encourage a variety of wildlife. We are also allotted a financial land tax benefit due to land Classification. This project would greatly disturb the natural balance of the wetlands. It also would contravene existing protected areas. How can this be? Further to this hundreds of our mature trees would have to be cut down. This would also result in construction disruption during the clearing of trees and building the towers.

In addition to the impact on the land itself, it would impact our lifestyle. The new tower will be practically in our backyard. This would no longer be the tranquil scene and peace we left the city for. An additional concern would be the health hazard of having this equipment so close. We have many grandchildren and pets who have open country to play in. Safety due both from the electromagnetic field around the lines or closeness to the towers may create health hazards. Another key concern is the effects of construction on our water source. We are on well water and any shift in the land may cause damage to the well and the quality of our water.

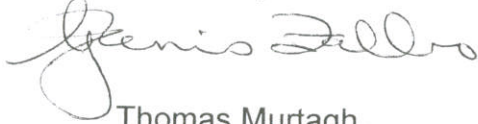

Future impact is our financial status. As retired individuals this is our financial security for future needs. Come the time we need to downsize and move, this property was to pay for our future quality of life. This project will without a doubt devalue our land and our ability to maintain our current standard of living.

As to costs, if costs occur due to the hearing, we would definitely expect compensation to cover these expenses as this situation is a result of the applicants plans and not ours.

Our preference would be an oral hearing as discussion and resolution will be resolved more efficiently.

We trust we have completed this to your specifications. If you require more information or a different format, please do not hesitate to contact us.

Sincerely,

Thomas Murtagh,
Glenis Falbo
