Re: Amended "Leave to Construct" Application EB-2007-0050

Dear Board Members:

We, the joined owners of East Part Lot 2, Concession 5, Municipality of West Grey, would be directly affected by the Potential Route Refinement alternate 1 of the Bruce to Milton Transmission Corridor north of Hanover.

We were shocked to find out at the November 19, 2007 Hydro One information meeting, that there were alternate routes suggested this far outside the existing Hydro corridor.

We only bought this property one and a half years ago, and at the time, having turned down three other properties because they were too close or right under a Hydro corridor, we felt safe to be far enough away not ever to have to concern ourselves with a potential Hydro easement.

Potential Route Refinement Alt. 1 would consume approximately **half** of our hardwood bush and wetland.

For that reason we hereby apply for intervenor status seeking costs for legal representation if this alternate is chosen.

Your reply is appreciated

Yours truly,

Bernd Pollex, Gerd Pollex
