Re: Project EB - 2007-0050
Project EB - 2007-0051
Bruce - Milton Power Line

This is a request to be kept informed of proceedings of these projects as I received your registered letter and package Thursday, April 26, 07. I attended the Community Information session at Hanover, May 1, 2007 and registered there to be kept informed of all proceedings as well.

The construction of the line is important for all the people of Ontario and am willing to cooperate with all parties

My biggest concern is Camp Creek runs through my wood lot property - where the towers will be placed, construction equipment, and any damage to the wood lot and designed wetland.
