ONTARIO ENERGY BOARD

O & B. ~~Walli~~
att ~~Kristen Walli~~

This is our second letter regarding Hydro One's application to build a second 500 KV transmission line E of the existing corridor Bruce to Milton, which will pass through our property. We wish to be informed of all proceedings of this application as they would apply to our property and request that no decision be made that would affect us without oral dialogue with us. As well we feel we need to be consulted in the Environmental assessment process since changes environmentally have occurred on our property resulting from the construction of the first corridor.

We have no objection to Hydro One having early access to the land in question as long as we are informed well ahead of time because we will have cattle on pasture on such lands at various times of the year
