Dear Mr. Fallis

**Re: Proposed 500 KV Transmission Line – Bruce to Milton  
OEB File No. EB-2007-0050**

Ontario Power Generation Inc. (OPG) is in receipt of your letter dated March 10, 2008, addressed to Mr. J. Hankinson, President & CEO, in connection with EB-2007-0050, which is an application by Hydro One Networks Inc. for an order or orders granting leave to construct a transmission reinforcement project between the Bruce Power facility and the Milton Switching Station. Your letter included a lengthy list of interrogatory questions for OPG and a request that OPG provide immediate assistance by responding to those questions.

The Ontario Energy Board's Procedural Order #5 allows for intervenors who would like information and material from the applicant, which is in addition to the written evidence filed by the applicant with the Ontario Energy Board, to request such information from the applicant by written interrogatories filed with the Ontario Energy Board and delivered to the applicant. As an intervenor in this proceeding, OPG has not filed any evidence and is neither required nor expected to respond to any interrogatories.

Accordingly, OPG will not be responding further to your request.

Sincerely,

Jonathan Myers  
Associate Counsel, Law Division
