

POLLUTION PROBE INTERROGATORY #1

INTERROGATORY

Reference: Exhibit A, Tab 1, Schedule 3

Please provide Enbridge's best estimate for the percentage of its annual natural gas throughput volumes that is used for space heating.

RESPONSE

EGD does not have the total throughput volume for space heating. However, EGD's total Rate 1 throughput volumes for 2009 were 4 745.5M m3 and space heating would account for the vast majority of that total volume. In addition, there would be additional space heating volumes in other rate classes.
