Dear Ms. Walli:

Re: Grimsby Power Incorporated
2011 Electricity Distribution Rate Application

Grimsby Power Incorporated (Grimsby Power) has performed an extensive review of its ability to submit a full cost of service electricity rate application as per the Board's filing requirements issued on May 27, 2009 for rates effective May 1, 2011. As a result of this review it is Grimsby Power's determination that the application cannot be assembled in time for a rate application submission in August 2010.

Grimsby Power is advising the Board that it will not be filing a cost of service rate application for rates effective May 1, 2011.

Board correspondence to all Licensed Electricity Distributors dated April 15, 2010 advised LDC's that the Board would consider applications to align the rate year with the fiscal year given appropriate justification.

Grimsby Power's intention will be to file a cost of service rate application as per the Board's requirements for rates effective January 1, 2012. This effectively delay's Grimsby Power's cost of service rate application by eight months and will provide time to compile an effective and well documented application.

Grimsby Power regrets any inconvenience to the Board as a result of this delay.

Regards,

Doug Curtiss

Doug Curtiss, P.Eng.
