**NOTICE OF APPLICATIONS AND COMBINED HEARING
ELECTRICITY DISTRIBUTION RATE CHANGES**

West Perth Power Inc.
and
Clinton Power Corporation

West Perth Power Inc. ("West Perth Power") and Clinton Power Corporation ("Clinton Power") filed cost of service applications with the Ontario Energy Board (the "Board") on June 15, 2010 and June 18, 2010 respectively, under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15 (Schedule B), seeking approval for changes to the rates that West Perth Power and Clinton Power charge for electricity distribution in their respective service areas, to be effective July 1, 2010. The Board has assigned the applications file numbers EB-2010-0121 and EB-2009-0262 respectively.

There are several common elements in these applications. To effect a more efficient process and pursuant to section 21(5) of the *Ontario Energy Board Act* the Board has determined that the review of these applications will be combined into one proceeding, while maintaining the separate identification of each of the applications. The Board's decision on these applications may have an effect on all of West Perth Power's and Clinton Power's customers.

Any change to West Perth Power's and Clinton Power's distribution rates will cause West Perth Power's and Clinton Power's delivery charges to change. Delivery charges are one of four regular items on residential and general service customers' electric bills and vary depending on the amount of electricity consumed.

West Perth Power indicates that if the application is approved as filed, Residential customers consuming 800 kWh per month would experience an increase of approximately 13.2% in their current delivery charges. This is a \$4.23 per month increase on their total bill. General Service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW would experience an increase of approximately 7.7% in their current delivery charges. This is a \$4.95 per month increase on their total bill.

Clinton Power indicates that if the application is approved as filed, Residential customers consuming 800 kWh per month would experience an increase of approximately 44.1% in their current delivery charges. This is a \$12.23 per month increase on their total bill. General Service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW would experience an increase of approximately 54.7% in their current delivery charges. This is a \$32.80 per month increase on their total bill.

This change to the delivery component of the bill is separate from other potential changes to electricity bills, which could include changes to the electricity component charges, changes to transmission charges and changes to other charges included on the bill. These applications deal only with the potential change in the delivery component of the bill that may result from changes in the delivery rates.
