**NOTICE OF APPLICATION AND HEARING
FOR LEAVE TO CONSTRUCT TRANSMISSION FACILITIES
FOR THE DETOUR LAKE POWER PROJECT
(Phase I – Island Falls to Detour Lake)**

Detour Gold Corporation (the “Applicant” or “Detour”) has filed an application with the Ontario Energy Board, (the “Board”) dated July 20, 2010 under section 92 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15, Schedule B. The Applicant is seeking an order of the Board granting leave to construct transmission facilities to re-connect the Detour Lake Mine, located 185 Km northeast of the Town of Cochrane, to the provincial grid at Island Falls in the district of Cochrane. Detour Gold Corporation has 100% ownership of the Detour Lake Power Project. Detour Gold Corporation is a public Canadian gold exploration and development company headquartered in Toronto.

The project site was previously serviced by a 115 kilovolt (“kV”) transmission line that connected to the provincial grid at Island Falls. However, on completion of the former mining activities, the transmission line and related facilities were removed. The work which is the subject of this application involves building a new 142 km 230 kV single circuit overhead transmission line on the existing right-of-way. The circuit will be operated initially at 115 kV. The work also involves constructing the necessary associated facilities to connect the mine to the provincial electrical grid. These include a transformer station at the Detour Lake mine and a switching station at Island Falls to connect to the transmission grid. The Applicant has indicated that no new access corridors will be needed to construct the transmission line.

Detour submits that the project is required to ensure a dependable power supply for the Detour Lake Project, and it projects a 20 MW load during construction, and a forecasted demand of 120 MW when the mine is fully operational.

The Applicant has indicated that a second phase to this project, and a further application, is anticipated later this year, extending the line from Island Falls to the transmission grid at Pinard, west of Fraserdale, Ontario. The line would then be operated at 230 kV. The construction of this second phase is not a part of this application.

A map showing the location of the proposed facilities and route is included with this Notice.

The Applicant advises that land rights are required during construction and over the life of the project to accommodate the proposed transmission facilities. Detour will construct, own and operate the facilities. The scheduled in-service date is September 2011.

The Board has assigned File No. EB-2010-0243 to this application.
