

AMPCO Interrogatory #010

Ref:

Issue Number: 4.3

Issue: Are the proposed in-service additions for regulated hydroelectric projects appropriate?

Interrogatory

Please provide the Post Implementation Review report for the SAB 1 G7 project.

Response

The Post Implementation Review ("PIR") for the Sir Adam Beck I Generating Station G7 Frequency Conversion project has not yet been performed. PIRs are typically completed six months to one year after a project is completed. The Niagara Plant Group is targeting completion of the PIR by the end of 2010.
