Dear Ms. Walli:

**Re: Request for Intervenor Status and Cost Award Eligibility  
OEB Initiative to Develop Electricity System Reliability Standards  
Board File No. EB-2010-0249**

I am writing pursuant to the Board's letter dated August 23, 2010 regarding the above consultation to respectfully request that the Board grant AMPCO participation status in this consultation. I am also requesting that the Board confirm AMPCO's eligibility for an award of costs in this matter.

AMPCO is a not-for-profit consumer interest advocacy organization. AMPCO's members represent a cross-section of Ontario's major industries: forestry, chemical, mining and minerals, steel, petroleum products, cement, automotive and manufacturing and business consumers in general. AMPCO members are major investors, major employers and a major part of communities in which we operate, across Ontario.

AMPCO, and its member companies, are well known to the Board. AMPCO participates in many proceedings, working groups, consultations and initiatives of the Ontario Energy Board (OEB). AMPCO has participated in previous consultations regarding Proposed Amendments to the Distribution Code. AMPCO has been granted intervenor status and cost award eligibility in these proceedings.

AMPCO is interested in issues related to the price, adequacy, reliability and quality of electricity service. With respect to this initiative, AMPCO would like to assist the Board in establishing regulatory requirements related to system reliability standards.
