Has the Ontario Government and Hydro 1 lost all of their senses ? My Hydro bill has increased by 1/3 in the last two billings, from \$90.00 to \$160.00. Now Kingston Hydro suggests a further increase of approximately \$7.17. I will not attempt to itemize Mr. McGuinty's record of tax increases or "rate rises" nor would I try and list the "outstanding" CEO's of Ontario Hydro, appointed by the various governments of Ontario, who were paid millions to vacate that position as well as collect obscene pensions if still alive. When the delivery charges, taxes and debt repayment far exceed the cost of the product itself something is very wrong. I urge you to write off the debt repayment charges which do not appear to ever be repayable and cease the HST on our Hydro bills and not increase the consumers costs further yet as suggested. It is time the corporation recognizes who was responsible for the shambles made of Hydro 1 and it was most certainly not the customer. Yes I object to any further rate increases.
