

UNDERTAKING J10.10

Undertaking

To provide timeline for Darlington refurbishment as described in 2008 business plan presentation.

Response

The slide below presents the timeline for Darlington refurbishment from the 2008 business plan presentation. It was a very preliminary schedule noted as “indicative.”

At the end of 2008, OPG Management decided not to seek approval to move to the Definition Phase of the project until further analysis was performed and additional information was available. Throughout 2009 OPG further developed its understanding of plant condition, completed technical assessments, made decisions on steam generator replacement, reviewed operating experience of other refurbishments and refined its costs estimates and business case summary.
