Dear Ms. Walli:

Re: Lakeland Power Distribution Ltd.  
2008 Incentive Regulation Mechanism (2008 IRM) Rate Application  
Board File Number EB-2007-0884

Please find attached Lakeland Power Distribution Ltd. responses to Board Staff Interrogatories for the above proceeding.

Yours truly,

Margaret Maw  
CFO  
Lakeland Power Distribution Ltd.

**2008 Incentive Rate Mechanism Application  
Ontario Energy Board Staff Interrogatories for  
Lakeland Power Distribution Ltd. — EB-2007-0884**

**Ref.: 2008 IRM Model, Sheet 3**

**1. Monthly Rates and Charges for General Services Less than 50 kW**

The fixed and volumetric rate riders for the General Services Less than 50 kW do not include the descriptor “z factor – Storm Damage Cost Recovery – effective until August 31, 2008” as do the rate riders for Lakeland Power’s other rate classes.

**This was an error when copying the description from the Residential Class to the other classes, the General Services Less than 50 kW was inadvertently missed.**

**2. Monthly Rates and Charges for Unmetered Scattered Load**

A review of Lakeland Power’s current 2007 Board approved Tariff of Rates and Charges indicates that the service charge for the Unmetered Scattered Load class is applied on a “per connection” basis, however Lakeland Power’s 2008 model does not reflect this.

**The IRM model came preset with the description ‘Service Charge’ and the assumption was this was the only descriptor to use if it was a monthly charge. Agree that it should state in brackets (per connection).**

**3. Monthly Rates and Charges for Sentinel Lighting**

A review of Lakeland Power’s current 2007 Board approved Tariff of Rates and Charges indicates that the service charge for the Sentinel Lighting class is applied on a “per connection” basis, however Lakeland Power’s 2008 model does not reflect this.

**The IRM model came preset with the description ‘Service Charge’ and the assumption was this was the only descriptor to use if it was a monthly charge. Agree that it should state in brackets (per connection).**

**4. Monthly Rates and Charges for Street Lighting**

A review of Lakeland Power’s current 2007 Board approved Tariff of Rates and Charges indicates that the service charge for the Street Lighting class is applied on a “per connection” basis, however Lakeland Power’s 2008 model does not reflect this.

**The IRM model came preset with the description ‘Service Charge’ and the assumption was this was the only descriptor to use if it was a monthly charge. Agree that it should state in brackets (per connection).**
