Enbridge QRAM – Q1 2011

EB-2010-0347

BOARD STAFF INTERROGATORIES

Reference: Exhibit Q1-3, Tab 4, Schedule 8, pages 1-4

Preamble:

For the Rate 100 rate class, the proposed unit rates found at page 1 of the above referenced exhibit do not reconcile with the supporting exhibits found at pages 2-4.

Question 1

Please explain the reasons for these differences.

Preamble:

Since there are no projected volumes for Rate 100 in 2011, it would appear that Enbridge is proposing to use the unit rates applicable to Rate 6 as a proxy for the purpose of establishing the Gas Cost Adjustment Rider (Rider C) for Rate 100.

Question 2

Can you please confirm that this is the case? If so, please provide the rationale supporting this approach and demonstrate that doing so would not generate variances in the PGVA if a customer was to take service pursuant to Rate 100 in 2011.
