

**Donald D. Rennick Interrogatories  
Late Payment Penalties (LLP) Recovery  
Toronto Hydro Electric System Limited (THESL)  
OEB file No: EB-2010-0295**

1. Table 2 on Page 6 of the supplementary evidence letter dated November 12, 2010

Please explain why you are contemplating, in the event that the OEB allows recovery of the settlement amount, that a monthly rate (ie. Residential rider \$.53) be charged for each 30 day period. This would result in the overcharging of customers in all classes in the amount of \$28,863.74.

In addition, please explain the reasoning that a uniform rate of \$.88/customer per 30 days would be a reasonable solution. Residential customers would pay approx 66% more than their allotted share of the recovery if this method were adopted.
