Dear Ms Walli:

Re: EB-2010-0332 - GEC IRs to HONI - clarification

GEC IR# 8 states: "The Long Term Electricity Plan calls for targeting of all cost-effective CDM."

The correct reference is to the draft supply mix directive which states:

"The Plan shall seek to exceed and accelerate the achievement of these CDM targets if this can be done in a manner that is feasible and cost-effective."

Sincerely,
