7	
8	For each of Hydro One's OPA-contracted province-wide CDM programs, please provide
9	the following information:
10	
11	a) cumulative* annual energy savings (MWh) per year;
12	b) number of participants per year;
13	c) potential number of participants per year;
14	d) annual budgets broken out according to:
15	i) financial incentives for customers; and
16	ii) other;
17	e) TRC ratio;
18	f) PAC ratio; and
19	g) free-rider rate estimates and copies of the reports that support these free rider rate
20	estimates;
21	
22	For example, assuming that the program saved 100 kWh in 2011 and an incremental 200
23	kWh in 2012, but only 90 kWh of the 2011 savings persisted in 2012, then the cumulative
24	annual energy savings in 2012 would be 290 kWh (i.e. $90 + 200$).
25	
26	<u>Kesponse</u>
27	Undre One is not in the negition to provide any additional information shout the ODA
28	contracted programs beyond the avidence we've already provided in our submission
29 20	contracted programs beyond the evidence we've alleady provided in our submission.

Pollution Probe INTERROGATORY #7 List 1

4 Interrogatory

6 Reference: Exhibit C, Tab 1, Schedule 2

Please provide the avoided cost estimates (with respect to both energy and capacity) that Hydro One uses to calculate the cost-effectiveness of its CDM programs. Please provide a break-out of these estimates by year, season, time of day, generation, transmission, and distribution.

12

1

2 3

5

7

Please also provide a break-out of the generation mix assumptions that are embedded in the avoided cost estimates (i.e. the percentage of the avoided capacity and energy supply that is solar, wind, biomass, water power, simple cycle gas, combined-cycle gas, combined heat and power,, nuclear power, and imports).

17

Please also provide copies of the reports that support Hydro One's avoided costestimates.

20

21 **Response**

22

Hydro One used the avoided cost estimates included in the OPA's latest version of their
 Conservation Program Resource Planning Tool (v3.3) to calculate the cost-effectiveness
 of our CDM programs. The table below shows the avoided costs used in the various
 cost-effectiveness tests:

	Avoided Energy Cost by Season and Time-of-Use Period (2007 \$/MWh)							Avoided Capacity Cost (2007 \$/kW-yr)			
		Winter		Summer			Shoulder		Gon	Tv	Dv
Year	On Peak	Mid- Peak	Off- Peak	On Peak	Mid- Peak	Off- Peak	Mid- Peak	Off Peak	Gen		DX
2008	71.48	68.32	35.74	73.41	59.46	34.34	38.23	29.26	133.10	3.40	4.30

4 Interrogatory

⁶ Reference: Exhibit B, Tab 1, Schedule 2, p. 3; and Exhibit C, Tab 1, Schedule 2, p. 57

Please explain in detail why Hydro One is not proposing to offer a Double Returns
program also to its residential and small volume customers.

10

1

2 3

5

7

11 **Response**

The application of Double Return Plus to residential and small volume customers will require significant program redesign in order to account for the differences in rate and billing structure, enabling technologies, and customer class characteristics. Hydro One will continue to explore opportunities for extending this initiative to a wilder range of demand-billed customers and will come forward with new proposed initiatives as appropriate.
