Re: EB-2010-0245  
Costs Awards in the OEB ECPA Proceeding

Summitt Energy is writing in response to the OEB's letter dated February 1, 2011 where it requested feedback from licensed suppliers as to whether they had concern with the public disclosure of their market share information in the Board's decision on awarding costs and the apportionment of those costs. Summitt Energy agrees with the OEB's proposal that it should act as a clearinghouse for the purposes of the payment of cost awards to eligible participants in order to keep its market share data confidential.

Summitt's market share/customer enrolment data filed quarterly with the OEB is done on a confidential basis and since Summitt is not a publicly traded company this information would not otherwise be publicly disclosed. Summitt is of the opinion that should its market share information be made public, it may suffer undue loss because its competitors would be able to use the information to inform their pricing and marketing strategies to Summitt's detriment.

Sincerely,
