

**UNDERTAKING**

**Undertaking**

TO PROVIDE DATE OPA PROVIDED AVOIDED COST NUMBERS TO HYDRO ONE.

**Response**

The source for the avoided supply costs is the OPA's IPSP filed in Q3 2007 reference: EB-2007-0707 Exhibit I, Tab 22, Schedule 28, Attachment 1 - TRC Test Results, Sheet "Total AC". A component of the avoided supply cost (generation capacity costs) was subsequently updated by the OPA in Q1 2009.

This updated information was incorporated into Hydro One's cost-effectiveness analysis.
