Attn: Board Secretary

Re: Notice of Application and Hearing File No.EB-2011-0027

After review of the proposed Notice of Application and Hearing to the Ontario Energy Board File No. EB-2011-0027 regarding Summerhaven Wind LP, I am providing the following concerns with the proposed routing of the 9 Km circuit transmission line, particularly lots 11 and 12, Concession 5 & 4, Jarvis.

Glenfred Gaswells Ltd. owns and operates a natural gas collection and distribution system in the Jarvis area. There are four gas wells located within lots 11 and 12 of the proposed transmission line route, including an underground high pressure gas distribution system that crosses the proposed path in various locations. Glenfred Gaswells Ltd hereby requests the board to hold an oral meeting in order to ensure the proponent has identified the associated risks, developed proper work plans, risk mitigation and contingency plans if the proposed routing will be granted approval. This may also lead to unknown costs born by Glenfred Gaswells Ltd, to be compensated by Summerhaven Wind (NextEra Energy Canada).

Please note notification from the applicant was received March 10, 2011.

Sincerely,

Fred Reicheld, President
Glenfred Gaswells Ltd.
