SCHEDULE A

STATEMENT OF WORK

1. BACKGROUND:

The Recipient has applied to both NRCan under the ecoENERGY program and the Ministry under the OSTHI program, each of which are intended to provide approved applicants with financial assistance for the installation of their solar thermal systems.

2. OBJECTIVE/PURPOSE:

The objective of the Project is to provide renewable solar thermal energy for water heating.

3. DESCRIPTION/SCOPE:

The Recipient shall purchase equipment that is on the List of Accepted Collector(s) maintained by NRCan as part of its ecoENERGY Program:

Number of Accepted Collectors: «Number_of_collectors»

Manufacturer of the Accepted Collector: «Collector_Manufacturer»

Model Number of the Accepted Collector: «Collector_Model»

- 3) Following the completion of the installation and the activation of the system comprised of the Accepted Collector(s) and any ancillary and associated equipment and materials, the Recipient will have the system commissioned by a professional engineer, technologist or solar technician, having a valid accreditation certification that is customarily recognized and accepted in Ontario, that certifies in the Commissioning Report that the system meets the prescribed technical criteria defined under the ecoENERGY and OSTHI programs and the Equipment is found to be fully operational and installed in accordance with good engineering practices.
- 4) The Recipient will then submit the Payment Request Form and Commissioning Report to NRCan.

4. BENEFITS:

The Ministry recognizes the important contribution that renewable energy technologies can make to cleaning the air, reducing greenhouse gas emissions and increasing sustainable energy supply. The Ministry has, therefore, established the OSTHI Program which is intended to contribute additional funding for approved applicants under Canada's ecoENERGY Program for Renewable Heat program that are also approved under the OSTHI program, with a view that the use in Ontario of renewable thermal systems for space heating and cooling and water heating will be increased. This will contribute to a long-term reduction in air emissions and also improve Ontario's clean energy supply. The Project supports those objectives.
