Regarding
EB-2011-0063

I am writing this letter to become an intervener on above file.
We have a serious medical issue that needs to be addressed in regards to the above mentioned file.
Our daughter has severe epilepsy, and I am concerned for her health and safety. I am waiting to receive medical advise from her neurologist and will send to your office. The buzzing from some light receptacles can and have induced seizures. We also just took possession of this home and were not advised at the time of purchase about said proposal. If this proposal had been disclosed this home would not have been purchased, re: my daughter's epilepsy.
