

My name is David Link. I first became aware of the "Notice of application and written hearing application for leave to construct transmission facilities for Grand Renewable Wind LP" (ref. EB-2011-0063) in the late evening of Thursday, April 21, 2011. Personal matters have not permitted me the time to respond until now.

I own property on the northeast corner of Mt. Olivet Road and Haldimand Road 20. My property borders property intended for the proposed solar array, collector substation, and transmission line as shown on the map provided with the above application. As a result, I wish to apply for intervenor status in this matter.

I am somewhat dismayed that the time frame to respond to this notice has been so short and falls over the Easter holiday period, and trust that in the interest of fairness you will grant my request.

I am not currently representing any group.

I would also request the right to seek an award of costs as may be permitted in this matter.

Yours truly,
David Link
