## To whom it may concern:

As a resident of Haldimand furthermore of Haldimand Road 20 I am very concerned on not only the safety of these transmission lines (cancer, voltage) but also their appearance. After reading an article in one of our local papers a few months back I have learned that there are other sites that these lines can be constructed on such as old railway lines or through participating farmers land, it also mentioned that other provinces example Quebec do not even allow such towers to be erected on this type of road.....

I would also hope you consider all of the transmission lines to be buried underground, we will already have very large wind turbines to destroy our wonderful landscape please do not also add these to our ongoing problems in Haldimand!
