Toronto On M4P 1E4
Attention Board Secretary
From
Mrs. Valerie Negus
485 Haldimand Rd.#20
Hagersville.Ont.
N0A1H0
905 768 3997

I realize that Ontario is installing solar and wind farms to give Ontario Green Energy, but at this time, I have a concern about the installation of Overhead 230,000 volt transmission lines. I request that the Ontario Energy Board takes the following into consideration.

As provided by the applicant Samsung has admitted that these lines have electrical fields and magnetic fields also ground currents. in Appl-LTC-20110413 on page 26 tab 3 schedule 1 6 of 7. As per the Green Energy Act 2009.

I am asking for a hearing under Sub Section (2) on the grounds that engaging in the Grand Renewable Energy Project in accordance with Renewable Energy approval will cause,
A) a serious harm to human health or
B) serious and irreversible harm to plant life and animal life or to the natural environment.
Also according to the Canadian Charter of Rights & Freedoms require that the municipality protect the "health, safety and security of person" sub section 7 & 24 also similar is found in the "Environmental Protection Act"

I ask this for each and every landowner on Haldimand Road #20 and adjacent roads for your consideration in this important matter.

I see no reason why this line could not run on farm land the way Hydro One had done in the past.. These towers at 230,000 volts criss cross Ontario but you don't notice them for Hydro One lines run across farms which is much safer than parallel to a busy traffic corridor, over residential property. Another way may be to bury the cable... thankyou Valerie Negus

Letters are beeing sent to:
