

EB-2011-0115

**NOTICE OF APPLICATION AND HEARING
FOR LEAVE TO CONSTRUCT TRANSMISSION FACILITIES
FOR THE DETOUR LAKE POWER PROJECT
(Phase II – Island Falls to Pinard TS)**

Detour Gold Corporation (“Detour”) has filed an application with the Ontario Energy Board (the “Board”) dated April 19, 2011 under sections 92 and 97 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15, Schedule B (“the Act”). Detour is seeking an order of the Board granting leave to construct a transmission line and associated facilities from Pinard TS to the Island Falls area, where it will connect to a previously approved transmission line supplying the Detour Lake Mine, located 180 km northeast of the Town of Cochrane. Detour also seeks an order approving the form of easement agreement provided in the application. Detour Gold Corporation is a Canadian gold exploration and development company headquartered in Toronto.

On July 23, 2010 Detour filed an application (EB-2010-0243) with the Board for leave to construct a 138 km 115 kilovolt (“kV”) transmission line connecting the Detour mine site to the provincial grid line C3H at Island Falls (“the Phase I line”). The Board issued a Decision on November 24, 2010 granting Leave.

The work which is the subject of this application involves building a new 38 km 230 kV transmission line from Pinard TS to the area of the Island Falls connection point of the Phase I line; severing the connection of the west end of the Phase I line to line C3H at Island Falls, and re-connecting the Phase I line to the proposed new 230 kV line from Pinard TS. Additional work includes modification of the Pinard TS switchyard and other ancillary work performed by Hydro One Networks Inc. The complete circuit, approximately 176 km, will be operated at 230 kV.

The Board has assigned **File No. EB-2011-0115** to this application.

Detour submits that the project is required to ensure a dependable power supply for the Detour Lake Project, and projects a 95 MW load when the mine is fully operational. Detour has indicated that Phase II includes alterations to Pinard TS to be carried out by Hydro One, but the applicant is not seeking approval for this work in this application. Other than the Pinard TS modifications, Detour will construct, own and operate the facilities. The applicant has indicated that it has filed with the Board a separate application to become a licensed transmitter in Ontario.

Detour advises that temporary and permanent land rights are required during construction and over the life of the project to accommodate the proposed transmission facilities. A map showing the location of the proposed facilities and route is included with this Notice. The scheduled in-service date is April 2012.

Board Jurisdiction

For any leave to construct application under section 92 of the Act, section 96(2) of the Act provides that when determining if a proposed work is in the public interest, the Board jurisdiction is limited to consideration of:

- where applicable and in a manner consistent with the policies of the Government of Ontario, the promotion of the use of renewable energy sources.
