Dear Madame:

**Re: EB-2011-0027: Summerhaven Wind, LP (the "Applicant")  
Undertaking TCJ1.1 – Confidential Information**

Further to the OEB's Practice Direction on Confidential Filings (November 2006), the Applicant hereby requests that the enclosed response (the "Confidential Response") to Undertaking TCK1.1 (the "Undertaking") from the technical conference, remain confidential. Capitalized terms not defined herein have the meaning ascribed to them in the Application.

The Undertaking requires the Applicant to provide a map of the lots affected by the Application, "showing where land rights have been acquired versus where they have not, and type of agreement, and also showing where municipal right of way runs."

The Confidential Response can be described as a two-page colour coded map (the "Map") showing the names of the property owners and PIN identification numbers of the lots that are directly affected by the proposed Transmission Line. The lots are also colour coded in order to classify the lots into one of four categories:

- (i) Current Transmission Agreement,
- (ii) Current Overhang Agreement,
- (iii) Pending Transmission Agreement,
- (iv) Pending Overhang Agreement,

thereby demonstrating the status of negotiations with the respective landowners. The Applicant is providing a non-confidential version of the Map for public disclosure (see Exhibit 'A'), which identifies the lots affected by the proposed Transmission Line, but which has the names and PINs removed and does not indicate the status of negotiations with the respective landowners.

The request for confidentiality is being made in order to protect the privacy of the landowners and the confidential nature of the negotiations that are taking place with respect to the affected lots.

All of which is respectfully submitted,

McCarthy Tétrault LLP
