Dear Madame:

**Re: EB-2011-0027: Summerhaven Wind, LP ("Summerhaven")
Request from Capital Power re additional reply period**

Capital Power's letter dated June 3, 2011 requested the Board to depart from Procedural Order 6 and its standard practice to either require Summerhaven to file submissions in chief or to allow Capital Power to file rebuttal submissions "depending on the position taken by Summerhaven on [the issue of] a common connection point." Summerhaven does not see the need for these departures and respectfully requests that the Board keep the original hearing schedule in place.

Summerhaven's position on the common connection point was provided at the technical conference in this proceeding and Summerhaven has nothing further to add to that position. As a result, Summerhaven would not have anything further to state in submissions in chief. Should Capital Power or another intervenor make submissions that require a response, Summerhaven will address them in the normal course. There is no need to provide special treatment in this regard.

All of which is respectfully submitted,

McCarthy Tétrault LLP
