Dear Jessy Serrao/Kirsten Walli/Board Secretary/Board Members

RE: PO1_GRWLP_20110617, Intervenor Status Request Confirmation, Quinn Felker, for EB-2011-0063: Application for Leave to Construct Transmission Facilities for Grand Renewable Wind LP

The purpose of this letter is to confirm that I am requesting intervenor status on behalf of both my wife and myself.

Though I have many concerns with this project and remain opposed (though I am not at all opposed to a buried transmission line), I believe that I will be able to participate constructively in the proceedings and will limit any submissions to matters that fall directly within the board's jurisdiction.

To date, GRW has not been able to provide sufficient detail regarding the project in order for me to rule out the likelihood that I will require intervenor status. The design has not been completed yet to a stage where proposed pole placement has been finalized or which side of the road the facility is proposed to be placed can be confirmed by GRW.

My investment in this process so far had been limited mainly to time spent and I expect that it will continue in this way. I should not need to claim expenses related to the process as long as I am asked only questions which I would likely be capable of answering without research and not asked questions with legal or liability implications, or required to travel.

I would like to be informed of all proceedings and be able to participate and am confirming my intention. Please contact me using the following information:

Quinn Felker
