Ontario Energy Board

Dear Kristen Walli
Board Secretary

RE: EB-2011-0118

This e-mail is to advise th at I would like to participate as an "INTERVENOR" in the proceedings of this Written Hearing from Hydro One Network Inc. regarding a six month exemption from the timelines that they presently are suppose to conform to for the Micro-Embedded Generators.

I also did put a request in for this to become an Oral proceeding, which I am hoping the Ontarion Energy Board will permit.

If you have a problem with me becoming an Intervenor then I would request the position of Observer - but I do prefer to be an Intervenor.

Wayne L. McLelllan

Subject: EB-2011-0118

Dear Kristen Walli

I just got off the phone and thought I would send additional info for my INTERVENOR application I just sent you:

Wayne L. McLellan
338 Lamon Drive - RR#2
Parkhill, ON
N0M2K0
Phone: 1-519-294-0249

My interest in being an intervenor is that I presently have a solar panel system ready to be hooked up - I have a lot of money tied up into this project and have since December 2010. Now Hydro One Network is applying for a Six (6) Month Exemption from the Timelines for the connection of our Micro Fit Project.

I am not completely sure how this is going to affect my project - but would simply like to be able to hear about it - give the Board my time frames that have already taken place.

We have been time and time again been given the run around and I think the OEB needs to hear this - I do not believe that the exemption from these timelines will help the thousands of us that are carrying this big debt. We are talking \$100,000.00 per unit, which will represent millions of dollars.

I would like to put in cost for this time
I would also only need to be addressed in English.

I would also like to request that this be an ORAL hearing rather than a written hearing.

If there is any other information you require please do not hesitate to contact me

Wayne McLellan
