Subject: Six Month Exemption on Timelines for Microfits

Hello,

We administer approximately 100 microfit contracts for our customers. At the time WE DO NOT SUPPORT this exemption for hydro one. We feel that the process is already been very delayed with poor planning from Hydro One, and an extension of this will only make the effects worse for our customers. Some customers will have to wait up to 6 months for connection, and thus their capital is tied up for that long; all due to poor planning on hydro one's part.

Please acknowledge that we do not support the exemption.

Thanks,

Kerry Fraser
