I am opposed to the granting a 6 month exemption to Hydro 1. Hydro 1 knew what their obligations are. They feel that a 6 month exemption will be sufficient time to clear up the backlog. What about new applications? Are they going to refuse new applications for 6 months?

People are investing large sums of money to have solar projects built on their property. Since Hydro 1 is way behind, these people are not making money.

If I was in non compliance with the law I could be criminally charged. This could result in being sent to prison. Why is it okay for Hydro 1 to be in non compliance of their agreement?

We have old nuclear reactors. The coal fired plants have been shut down or are in the process of being shut down. In a few years Darlington Nuclear Generating station is going to start its refurbishment. The 2 new reactors for Darlington will take many years to build. Especially since Japan had an earthquake and damaged a nuclear reactor. So we need to get these solar projects up and running now. Thank you very much for your time.
