Subject: NOTICE OF APPLICATION AND WRITTEN HEARING - EB-2011-0118

Dear Siir/Madam,

I wish to provide notice that I wish request observer status WRT the subject hearings.

I do not fully understand the meaning behind the paragraph of subject document regarding "Interim Order" or the reference to "making a submission on that request for immediate relief with regards to Hydro One's request to immediately and temporarily relieving them of their obligations under Section 6.2.6 and 6.2.7.

As I am presently within days of completing my electrical work for my project, and will in fact be requesting connection very shortly, does this mean that Hydro One will no longer have to connect my project within the present 5 day guidelines after notice and all approvals are provided to them?

If that is the meaning behind that paragraph, then I do wish to apply for "immediate relief" from their proposed submission so that my project will not unnecessarily be delayed while this matter is pending the results from their requested hearing. I have been working on this project for the last 6 months. Being so close to completion of such a long drawn out process of approvals and installations, I would adamantly object to relieving Hydro One of the present connection timelines and delaying the final connection process for up to 6 months! I can not afford to carry this project for an additional period of up to 6 months without obtaining the income that this project will supposedly generate. The possibility of delaying or denying connection for up to 6 months would create a major financial burden on myself and my family if this were to occur. I see this possible delay as being completely unfair to suddenly apply to those who are so close to completion of their projects. Can I please get some clarification on whether I am interpreting the subject letter correctly and if it is possible to obtain "immediate relief" under these circumstances.

Sincerely.

Tracey A' Poyton
