**Board Staff question 1**

Preamble

Kitchener-Wilmot Hydro Inc. ("Kitchener-Wilmot") filed an application dated June 14, 2011 with the Ontario Energy Board for a licence amendment granting an extension in relation to the mandated date for the implementation of time-of-use ("TOU") pricing rates for certain Regulated Price Plan ("RPP") consumers.

Kitchener-Wilmot has applied for an extension to its June 2011 TOU pricing date and requested a new date of January 31, 2012 for approximately 7,500 General Service <50kW customers. Kitchener-Wilmot states the extension is necessary due to an issue with certain three phase meters for these customers that are delivering suspect interval data due to improper time-alignment of the consumption intervals.

Questions

- a) Please confirm the status of Kitchener-Wilmot's smart meter deployment, including meters with suspect data, for its General Service <50kW customers and TOU implementation as of July 1, 2011.
- b) Are there any other factors (internal and/or external) that Kitchener-Wilmot has identified that may hinder its ability to comply with their requested mandatory TOU date?
- c) Please provide the details of and rationale for Kitchener-Wilmot's proposed TOU billing implementation schedule for the General Service <50kW customers, including:
  - i. billing cycle dates
  - ii. number of customers on each billing date.
