Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
PO Box 2319
2300 Yonge Street, 27th floor
Toronto, ON M4P 1E4

Dear Ms. Walli:

**Re: Toronto Hydro-Electric System Limited's ("THESL")
2011 Electricity Distribution Rates Application – Draft Rate Order ("DRO")
OEB File No. EB-2010-0142**

On August 23, 2010 THESL filed a rate application with the Ontario Energy Board ("Board") for distribution rates to be effective for 12 months beginning May 1, 2011. On July 7, 2011, the Board issued its Partial Decision and Order (the "Decision"). In accordance with the Decision, THESL submits the attached DRO for the Board's approval. The Excel version of Appendix A, the Revenue Requirement Work Form, is also being submitted by electronic mail to the Board and to the Intervenor listed in Appendix A of the Decision, together with a PDF version of the DRO submission.

Yours truly,

[original signed by]

Toronto Hydro-Electric System Limited

EB-2010-0142

Draft Rate Order for 2011 Rates

Introduction

On August 23, 2010 Toronto Hydro-Electric System Limited ("THESL") filed a rate application with the Ontario Energy Board ("Board") for distribution rates to be effective for 12 months beginning May 1, 2011 (the "Application"). On March 25, 2011 THESL filed a Settlement Proposal with the Board in connection with the Application. The positions of the Parties to the Settlement Proposal reflected substantial agreement on 29 of the 34 issues on the Approved Issues List with complete settlement on 23 issues, partial settlement on six issues, and no settlement on five issues. The unsettled issues were limited to the manner of regulation that would apply to THESL, expenditures relating to greening the fleet, expenditures related to electric vehicle ("EV") charging stations, clearance of deferral accounts, and cost allocation and rate design matters. It was agreed by the Parties that all issues accepted in the Settlement Proposal were subject to any adjustments that would arise from the Board's decision on the unsettled issues.

On March 29, 2011 at the commencement of the oral hearing, the Board accepted the Settlement Proposal. On July 7, 2011 the Board issued its Partial Decision and Order in the proceeding, (the "Decision"). THESL submits that this Draft Rate Order ("DRO") complies with the direction given in the Decision and properly reflects the Board's Order.

Derivation of Service and Base Distribution Revenue Requirements

THESL has completed the Revenue requirement Work Form using the approved amounts from the Decision (Appendix A). The Work Form generally sets out the derivation of the revenue requirement showing the amounts in the Application, and adjustments as per the Settlement Proposal and the Board's Decision. The adjustments noted below are those made relative to the Settlement Proposal amounts as provided for in the Decision.

Rate Base

2011 Net Fixed Assets

The net fixed assets of \$2,001.5 million provided for in the Settlement Proposal remain unaffected by the Decision.

Working Capital

The working capital allowance for 2011 is \$296.74 million, an increase of \$0.03 million from the \$296.71 accepted in the Settlement Proposal. This is a result of the increase in OM&A of \$0.2 million for research on the impact of electric vehicle charging on the distribution system.

Total Rate Base

The Total Rate Base for 2011 is therefore \$2,298.23 million, as compared to \$2,298.20 million in THESL's Settlement Proposal.

Operating, Maintenance and Administration and General ("OM&A") Expenses

As noted earlier, the Board's Decision increased the OM&A component of THESL's Revenue Requirement from \$237.8 million, as accepted in the Settlement Proposal, to \$238.0 million, to account for an additional \$0.2 million for research on the impact of electric vehicle charging on the distribution system.

Depreciation and Amortization Expense

The 2011 depreciation expense of \$138.8 million remains unaffected by the Decision.

PILs

THESL's 2011 PILs is \$11.8 million, which increased by a negligible amount of \$862 as a result of changes to working capital and rate base.

Cost of Capital

THESL 2011 Cost of Capital is \$159.4 million, which increased by a negligible amount of \$2,197 as a result of changes to working capital and rate base. The cost of capital parameters (i.e., Return on Equity, Short- and Long-Term debt rates) are set according to the Board's Cost of Capital guidelines.

Service Revenue Requirement

The Decision results in an increase to the Service Revenue Requirement of \$0.2 million, from \$547.9 million as reflected in the Settlement Agreement, to \$548.1 million.

Base Distribution Revenue Requirement

Deducting revenue offsets of \$26.0 million (as reflected in the Settlement Proposal) from the Service Revenue Requirement yields a Base Distribution Revenue Requirement of \$522.0 million, an increase from the \$521.8 reflected in the Settlement Proposal.

Cost Allocation and Rate Design Matters

Revenue-to-Cost Ratios

The Board determined in its Decision that THESL should calculate its starting revenue-to-cost ratios by customer class in accordance with the Board's June 2010 Filing Guidelines for Transmission and Distribution Applications (the "Guidelines"), and with the March 31, 2011 Report of the Board (in EB-2010-0219) as it relates to the treatment of transformer ownership allowance.

THESL has recalculated the starting revenue-to-cost ratios excluding the Transformer Ownership Allowance from both the costs and revenues, as directed. The resulting revenue-to-cost ratios are within the Board's Guidelines for all classes except the large user class which showed a revenue-to-cost ratio of 116.5, which is above the upper end of the range for that class of 115. Accordingly, a small (\$0.3 million) reduction in the revenue responsibility of that class was made, with the offsetting adjustment applied to the residential class (which is least affected by the additional revenue responsibility). The resulting revenue-to-cost ratios, before applying the Transformer Ownership Allowance costs, are all within the Board's guidelines. The Transformer Ownership Allowance amounts were then applied to the three classes where customers own their own transformers (the GS 50-999 kW, GS 1000-4999 kW and Large User classes) resulting in the final revenue-to-cost ratios.

Table 1 below shows THESL's revenue to cost ratios as proposed and as recalculated to reflect the Board's Decision (a complete calculation is shown in Appendix B, Schedule 1):

Table 1: Revenue to Cost Ratios

	Originally Proposed (including TOA)	Decision – "Starting Point"	Decision - Adjusted to meet guidelines (excluding TOA)	Decision - Adjusted to meet guidelines (including TOA)	Board Guidelines
Residential	92.0	88.7	88.8	88.8	85-115
GS<50 kW	100.0	97.5	97.5	97.5	80-120
GS 50-999 kW	113.9	117.7	117.7	117.4	80-180
GS 1000-4999 kW	111.1	124.1	124.1	121.1	80-180
Large Users	104.0	116.5	115.0	113.0	85-115
Streetlighting	77.7	71.3	71.3	71.3	70-120
USL	86.1	82.5	82.5	82.5	80-120

Foregone Revenue Rate Riders

THESL requested, and was granted, rate implementation effective August 1, 2011. This produces a period of three months from May 1 to July 31 during which 2010 rates prevailed instead of 2011 rates. As a result, for each rate class a foregone revenue amount is generated (negative or positive, depending on the rate change), equal to the forecast billing units for those three months times the difference in class rates, i.e., 2011 minus 2010. In accordance with the Decision, THESL has calculated temporary Foregone Revenue Rate Riders by class to recover this foregone revenue over the period August 1, 2011 to April 30, 2012.

Appendix B, Schedule 2, Derivation of Foregone Revenue Rate Riders, shows the derivation of those rate riders by class. The class billing units for the three month period of May through July are from the monthly billing unit forecast underlying the corresponding annual forecast. The foregone revenue by class (exclusive of interest) is determined as the product of those billing units and rate differential (i.e., the difference between the 2010 rates and the 2011 12-month base rates, exclusive of existing rate riders). That foregone revenue by class is then divided by the balance of the 2011 annual billing units to derive a rate rider effective from August 1, 2011 to April 30, 2012. In the result, there is no change to the total 2011 forecast billing units for any class, and the total approved 2011 revenue requirement by class is recovered on a prospective basis the way it normally would be.

The fixed and variable components of the class rate riders are set to mirror the ways in which the revenue was initially foregone, so that if n% of the class revenue was foregone as a result of the difference in the variable rates between 2010 and 2011, the same n% of the foregone revenue is then recovered through the variable portion of the rate rider for that class.

Disposition of Regulatory Asset Recovery Accounts ("RARA") Credit Balance

The Board approved the disposition of the Late Payment Charges deferral account (1508) over a 21-month period from August 1, 2011 to April 30, 2013. The Board had previously approved the recovery of an amount of \$7,525,589 from ratepayers in its decision in EB-2011-0295. The calculation of the rate riders, developed according to the decision, is shown in Appendix B, Schedule 3.

The Board allowed the recovery from ratepayers of the amount of \$3.05 million from the IFRS deferral account (1508), which is 50% of the account balance, and disallowed recovery of the remaining balance of \$3.05 million.

The Board approved the disposition of the other deferral and variance accounts as proposed. THESL has calculated carrying charges on the balances in these accounts through to the end of July

2011 using the Board's prescribed deferral and variance account carrying charge rates. The principal and carrying costs are shown in Appendix B, Schedule 4.

The calculation of the rate riders for the disposal of the approved deferral and variance accounts is shown in Appendix B, Schedule 5. The allocation and disposition of these amounts are in accordance with the Board's guidelines in the Electricity Distributors' Deferral and Variance Account Review ("EDDVAR") report.

Retail Transmission Rates

THESL has updated the Retail Transmission Service Rates based on new wholesale rates as per the Board's January 18, 2011 Decision in Hydro One's EB-2010-0002 application seeking changes to the uniform provincial transmission rates. The calculation of the Retail Transmission Service Rates is shown in Appendix B, Schedule 6. THESL has reflected these rates on its Tariff Sheet in the DRO.

Revenue Reconciliation

A revenue reconciliation, showing proposed rates, approved billing units, and resulting revenue is shown in Appendix B, Schedule 7.

Draft Tariff

THESL's proposed Draft Tariff Sheet is attached as Appendix C.

Bill Impacts

Appendix D contains the bill impacts, by rate class, resulting from the rates set out in the Draft Rate Order. The base rates for the comparison are the rates currently in effect. The bill impacts reflect RPP prices that take effect May 1, 2011 and incorporate the LPP rate rider which will be collected over 21 months.

For a residential RPP customer consuming 800 kWh per month, the distribution portion of the monthly bill will decrease by 2.1%. On a total bill basis (which includes transmission and commodity costs) the impact is approximately a decrease of 0.4%. For a General Service RPP less than 50kW customer using 2,000 kWh, the distribution impact is a decrease of 1.3%, and the total bill impact is a decrease of approximately 0.8%.

PROPOSED TARIFF OF RATES AND CHARGES

Effective and Implementation Date August 1, 2011

**This schedule supersedes and replaces all previously
approved schedules of Rates, Charges and Loss Factors**

EB-2010-0142

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account where the electricity is used exclusively in a separately metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Bulk-metered residential buildings with up to six units also qualify as residential customers. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

EB-2010-0142

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand at each location is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by THESL and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

**This schedule supersedes and replaces all previously
approved schedules of Rates, Charges and Loss Factors**

EB-2010-0142

microFIT GENERATOR SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Ontario Power Authority's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

MONTHLY RATES AND CHARGES – Delivery Component

**This schedule supersedes and replaces all previously
approved schedules of Rates, Charges and Loss Factors**

EB-2010-0142

RETAIL SERVICE CHARGES (if applicable)

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

Retail Service Charges refer to services provided by THESL to retailers or customers related to the supply of competitive electricity and are defined in the 2006 Electricity Distribution Rate Handbook.

Establishing Service Agreements		
Standard charge (one-time charge), per agreement per retailer	\$	100.00
Monthly Fixed Charge, per retailer	\$	20.00
Monthly Variable Charge, per customer, per retailer	\$	0.50
Distributor-Consolidated Billing		
Standard billing charge, per month, per customer, per retailer	\$	0.30
Retailer-Consolidated Billing		
Avoided cost credit, per month, per customer, per retailer	\$	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, regardless of whether or not the STR can be processed	\$	0.25
Processing fee, per request, applied to the requesting party if the request is processed	\$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year		no charge
More than twice a year, per request (plus incremental delivery costs)	\$	2.00

PROPOSED TARIFF OF RATES AND CHARGES

Effective and Implementation Date August 1, 2011

**This schedule supersedes and replaces all previously
approved schedules of Rates, Charges and Loss Factors**

EB-2010-0142

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Billing Determinant:

The billing determinant is the customer's metered energy consumption adjusted by the Total Loss Factor as approved by the Board and set out in this Schedule of Rates.

(A) Primary Metering Adjustment	0.9900
(B) Supply Facilities Loss Factor	1.0045
Distribution Loss Factors	
(C) Customer less than 5,000 kW	1.0330
(D) Customer greater than 5,000 kW	1.0141

Total Loss Factors

Secondary Metered Customers	
(E) Customer less than 5,000 kW (B)*(C)	1.0376
(F) Customer greater than 5,000 kW (B)*(D)	1.0187
Primary metered customers	
(G) Customer less than 5,000 kW (A)*(E)	1.0272
(H) Customer greater than 5,000 kW (A)*(F)	1.0085
