Subject: Re: Become and Observer attention time sensitive

Thank you for your timely response. I do wish to apply for Observer status regarding the document EB-2011-0217. Our farm operation/property could be directly impacted by the decisions made. The transmission towers, according to information from the Hydro One survey results posted and from public discussions concerning the new Wind Project in Southeastern Kent County with Samsung Renewable Energy and Pattern Energy will run along the perimeter of our property. We want to be cognisant of the decisions considered. Presently the Hydro One Transmission Station is situated in the center of the junction of 3 (approximately) 50 acre fields.

Subject: Become and Observer attention time sensitive

According to the document EB-2011-0217, I have 2 days to apply to become an Observer. How to I obtain my Observer status? I have just sent my request for a site user ID/password as well.
