Subject: EB-2011-0226 system costs

Board Secretary,

I respectfully request that the increase in cost recovery rates be denied.
As a retiree I can barely maintain payments with the increases in the costs of natural gas, transportation and the delivery charges.
How can 5 years of increases be approved while the economy is flat or in a recession?
I feel these costs should be kept at the rate of 2012, \$100.9 million, for the next five years just like my income.

Respectfully,
Kathy Trussell
