

WELLAND HYDRO-ELECTRIC SYSTEM CORP.

P.O. Box 280 950 East Main Street, Welland, Ontario L3B 5P6 Telephone 905-732-1381 Fax 905-732-0266

February 5, 2008

Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
P.O. Box 2319 27th Floor
2300 Yonge Street
Toronto, ON M4P 1E4

Dear Ms Walli:

Please find enclosed the following materials in regards to the revised 2008 Distribution Rate/Retail Transmission Rate Application for Welland Hydro-Electric System Corporation:

- Distribution Rate Manager's Summary - 2 hard copies
- Transmission Rate Manager's Summary - 2 hard copies
- Revised Transmission Rate Analysis - 2 hard copies
- Response to Board Staff Comments - 2 hard copies
- Revised 2008 IRM Model - 2 hard copies; and
- CD containing electronic copies of the two Manager Summaries and Response to Board Staff (Word), revised 2008 IRM Model (Excel), revised Transmission Rate Analysis (Excel), and Revised Application (PDF).

In addition, an email was sent to Boardsec@oeb.gov.on.ca containing all documents and files. An electronic copy of the revised application has been filed using the OEB's E-filing services.

Yours very truly,

Wayne Armstrong
Director of Finance
905-732-1381 Ext 234
warmstrong@wellandhydro.com

Welland Hydro-Electric System Corp.
Manger's Summary
2008 Electricity Distribution Rate Application – Revised
EB-2007-0855

Overview

On September 28, 2007 the Ontario Energy Board (“OEB”) issued filing instructions for adjusting distribution rates effective May 1, 2008 for all electricity distributors that are not filing a Cost of Service application. On October 30, 2007 Welland Hydro-Electric System Corp. (“Welland Hydro”) filed a completed 2008 IRM Model based on distribution rates which the OEB declared “interim” effective October 1, 2007 as a result of rate application EB-2007-0663.

On December 24, 2007 the OEB issued its Decision and Order for EB-2007-0663 approving Welland Hydro’s revised distribution rates effective October 1, 2007. In the decision the OEB states that “Upon approval of the proposed Tariff of Rates and Charges... Welland Hydro will have to amend its 2008 rates application filed using the 2nd Generation IRM methodology so that its May 1, 2008 distribution rates will be based on the distribution rates approved in this Decision”. Approval of the revised Tariff of Rates was received from the OEB on January 30, 2008.

As a result, Welland Hydro is resubmitting its 2008 IRM Model using information from the revised 2007 IRM, 2006 EDR, and 2006 OEB Tax models. This document will review the impact on distribution rates excluding any recommended changes to Retail Transmission Rates which will be dealt with separately.

2008 Incentive Regulation Mechanism Distribution Rate Adjustments

The 2008 IRM has five mechanisms which could impact current rates charged to Welland Hydro-Electric System Corp.’s customers. A description of each mechanism and their impact are as follows:

- 1) Price Escalator (GDP IPI) Minus Average annual expected Productivity Gain (X)

The model currently includes a price escalator of 1.9% and a productivity gain of 1.0% which results in a 0.9% increase in both monthly and volumetric distribution rates. The final price escalator will be based on data published by Statistics Canada early in 2008. The OEB will adjust the model once the final rate has been published.

2) Adjustment for the transition to the common deemed capital structure (K)

The OEB has determined that a common deemed capital structure of 60% debt and 40% equity will replace the four capital structures currently in place. The change will be phased in over a three year period or until a Cost of Service Application is filed. As a result, Welland Hydro-Electric System Corp.'s current deemed capital structure of 50% equity and 50% debt is being revised to 53.3% debt and 46.7% equity for 2008 rate setting. This results in reduced base revenue requirements and a corresponding 0.4% reduction in both monthly and volumetric distribution rates.

The Total Price Cap Adjustment for Welland Hydro-Electric System Corp. is 0.5% comprised of 0.9% inflation/productivity less 0.4% due to change in capital structure.

3) Regulatory Asset Recovery

Rate riders for the recovery of regulatory assets will be removed from rates effective May 1, 2008. This charge currently accounts for approximately 2% of Residential ,General Service less than 50kw, Unmetered Scattered Load and Street Light customer's monthly billings. Reductions to other customer class's monthly billings include 1.3% for General Service 50 to 4999kw, 0.3% for Large Users, and 5.6% for Sentinel Lights.

4) Approved Incremental 2007 CDM Funding

Welland Hydro-Electric System Corp.'s 2007 rates do not contain any amounts for CDM Funding. As a result, this mechanism will have no impact on current rates.

5) Smart Meter Adder

The 2008 IRM model removes the current smart meter adder of \$.27/mth prior to calculating any effect of the Total Price Cap Adjustment. The model uses the existing \$.27/mth by default to re-incorporate the smart meter adder into 2008 rates. However, the model allows the OEB to implement a new value for this rate adder if required by a subsequent decision of the board.

Bill Impacts

The 2008 IRM Model includes a bill impact analysis, which provides bill impacts for changes in distribution rates only. The Regulated Price Plan ("RPP") prices do not reflect the recently announce price reduction effective October 1, 2007. Prices may also change when the board announces new RPP pricing effective May 1, 2008. The analysis

also excludes the recently announced reduction in Goods & Services Tax (“GST”) from 6% to 5% effective January 1, 2008.

The removal of the Regulatory Asset Recovery will more than offset the Total Price Cap Adjustment and will result in reduced total monthly billings to all Welland Hydro-Electric System Corp.’s customers. Price reductions range from 0.2% to 5.6% with most reductions averaging 1.8% to 2.5%. The actual amount of reduction is dependent upon the customer class, the peak demand (kW), and total power consumed (kWh).

Z Factors or Other Adjustments

Welland Hydro-Electric System Corp. confirms that there are no Z-factor or other adjustments being requested in this application.

Conclusion

Welland Hydro-Electric System Corp. submits that the anticipated bill impacts in this application are reasonable and that no mitigation measures are necessary. In light of all of the foregoing, including the minimal bill impacts arising out of its proposed 2008 distribution rate adjustments, Welland Hydro-Electric System Corp. requests that the OEB adjust its rates in the manner set out in the 2008 IRM Model submitted.

Sheet 2 - 2007 Rate Classes

Are you changing the descriptions of any of your Service Classifications? YES NO
Service Classifications, including descriptions, can be found on your Board Approved 2007 Tariff of Rates and Charges.

Instructions:

(In some instances, rate classifications may differ from service classifications. The following table accounts for those differences.)

Using the pull-down list in column B, choose the classes that match those on your Board-Approved 2007 Tariff of Rates and Charges, are found under sub-heading "Monthly Rates and Charges". (If a Rate Classification needs to be added to the pull-down list, please contact the Board.)

Indicate which Rate Classifications exist using the pull-down menu in column C.

Changes made to the Class names will affect the rest of the model.

Upon completion, press the update button.

Sheet 4 - Smart Meter Information

The smart meter plan rate adder is a monthly service charge for metered customers equivalent to an amount of \$0.30 per month per residential customer for utilities that do not have a plan. A different amount applied to utilities who had a smart meter plan that was modified in accordance with the Decision with Reasons RP-2005-0020 / EB-2005-0529.

Please identify the customer classes and sub-classes that the smart meter funding incremental adjustment applies to by inserting the smart meter rate adder into column D. For most utilities, the rate adder can be located in the Board-approved 2007 IRM model. Clicking the cursor on the Residential cell should show the formula for the monthly service charge including the smart meter adder. The adder is the same for all metered classes and sub-classes of a distributor.

Leave column F blank, and the model will by default use the existing rate adder in the following calculations. If a new value of the rate rider is required by a subsequent decision, Board staff will enter the appropriate values in column F.

Sheet 9. - Z-Factor Rate Rider Adjustment

Is the Applicant seeking Board approval for other rate adjustments? YES NO

Z-Factor rate riders being applied for as part of the 2008 IRM rate adjustments should comply with Section 3.5 and Appendix C of the *Report of the Board on Cost of Capital and 2nd Generation Regulation Mechanism for Ontario's Electricity Distributors*, issued December 20, 2006 ([link](http://www.oeb.gov.on.ca/documents/cases/EB-2006-0088/report_of_the_board_201206.pdf)). Rate riders applied for should comply with the eligibility requirements. A distributor should also file adequate support for its proposal.

In columns C and D below, insert the Z-Factor rate riders associated with the rate adjustment. Provide a brief explanation about the nature of the rate adjustment.

Instructions

(Remember, green cells are input cells)

1. Enter your desired consumption in both kWh and kW (if needed) into the green cells beneath the class name.
2. The Debt Retirement Charge (DRC) has been set at \$0.07. The figure can be overwritten if your LDC bills a different amount for the DRC.

Instructions

(Remember, **green cells** are input cells)

1. Enter your desired consumption in both kWh and kW (if needed) into the green cells beneath the class name.
2. The Debt Retirement Charge (DRC) has been set at \$0.07. The figure can be overwritten if your LDC bills a different amount for the DRC.

Welland Hydro-Electric System Corp.
Manger's Summary
2008 Retail Transmission Rates/ Rate Riders

Retail Transmission Rate Analysis

In October, 2007 the OEB issued the Ontario Uniform Transmission Rate Order (EB-2007-0759). The new wholesale transmission rates are expected to decrease by an average of approximately 12%. As a result, the OEB has asked distributors to review Retail Transmission Rates ("RTR") charged to customers. Welland Hydro-Electric System Corp. is currently experiencing unfavorable variances of approximately \$33,867/mth for total RTR-Network and RTR-Connection charges. The revised lower transmission rates will result in favorable monthly variances of approximately \$20,409/mth starting in November 2007.

Welland Hydro-Electric System Corp. recommends revising Retail Transmission Rates to reflect the lower Wholesale Transmission rates effective May 1, 2008. In addition, Welland Hydro-Electric System Corp. recommends introducing a Retail Transmission Rate Rider to collect outstanding variances as of December 31, 2006 (audited statements) plus interest on these amounts through April 30, 2008. The total amount to be collected is approximately \$447,370 and will be collected over a two year period.

The proposed rate changes and the introduction of a rate rider will have little or no impact on total Retail Transmission charges billed to all customer classes. Customer Impact sheets have been provided which take into account the effects of the 2008 IRM and Retail Transmission Rates. Details of the above are included in the attached Wholesale versus Retail Transmission Rate Analysis document.

Welland Hydro-Electric System Corp. would also recommend that retail Network and Line & Transformation charges and rate rider be reviewed during the rebasing process which is scheduled to occur in 2009.
