Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
PO Box 2319
2300 Yonge Street, 27th floor
Toronto, ON M4P 1E4

Dear Ms. Walli:

**Re: Toronto Hydro-Electric System Limited's ("THESL")
Interrogatory Responses
OEB File No. EB-2011-0120**

Please find attached THESL's responses to selected interrogatories in the above-noted proceeding. The accompanying Index lists the schedule numbers of the responses that have been filed to date.

Also attached are corrections to the following responses that were previously filed:

Tab 1, Schedule 30
Tab 1, Schedule 31

THESL has now responded to all interrogatories from Parties in this phase of the proceeding.

Should you have any questions, please feel free to contact me at 416-542-2729 or at aklein@torontohydro.com

Yours truly,

[original signed by]

Amanda Klein
Senior Regulatory Counsel

:AA/acc

cc: J. Mark Rodger, Counsel for THESL, by electronic mail only
Applicant and Intervenors of Record for EB-2011-0120, by electronic mail only

INDEX OF INTERROGATORY RESPONSES FILED

Tab 1	Ontario Energy Board Staff (<i>Total of 32</i>)	
	Schedules - <i>filed Sep 20</i>	8, 9, 10, 13, 30, 31
	- <i>filed Sep 22</i>	5, 6, 7, 14
	- <i>filed Sep 30</i>	1, 2, 11, 12, 16, 19 to 21, 24 to 28,
		32
	- <i>filed Oct 3</i>	3, 4, 15, 17, 18, 22, 23, 29
Tab 2	Electricity Distributors Association (<i>Total of 5</i>)	
	Schedules - <i>filed Sep 20</i>	2, 3, 5
	- <i>filed Sep 22</i>	1, 4

21		- <i>filed Oct 3</i>	5, 6 to 9, 11, 12, 15, 16

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 3:**

2 **Reference(s):** **City of Toronto Telecommunication Tower and Antenna**
3 **Protocol, internet link provided in Vol1/Notice of Motion, page**
4 **31, line 3**
5

6 “Telecommunication Antenna – means the components, either individually or in
7 combination, needed to operate a wireless communication network for the purpose of
8 radio telecommunications, including but not limited to: cell sites; transmitters; receivers;
9 signaling and control equipment; and an equipment shelter containing electronic
10 equipment and which is not staffed on a permanent basis and only requires periodic
11 maintenance but does not include a telecommunication tower.”
12

13 To THESL’s knowledge, does this definition cover the equipment that CANDAS is
14 proposing should be attached to electric utility poles? If so, in THESL’s view, have
15 CANDAS members complied with the requirements of this Protocol?
16

17 **RESPONSE:**

18 It appears to THESL that the definition covers the equipment being proposed by
19 CANDAS for pole attachments. It is not within THESL’s knowledge whether CANDAS
20 members have complied with the requirements of this Protocol.

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 4:**

2 **Reference(s):** **City of Toronto Telecommunication Tower and Antenna**
3 **Protocol, Section 3(a): “determine emission levels in**
4 **compliance with Safety Code Six”**
5

6 (a) What emissions are addressed by Safety Code Six?

7 (b) In THESL’s view, do the wireless attachments proposed by CANDAS result in any
8 issue of compliance with Safety Code Six?
9

10 **RESPONSE:**

11 a.) "Safety Code Six" refers to safety limits issued by Health Canada for human
12 exposure to radiofrequency electromagnetic energy in the frequency range from 3
13 kHz to 300 GHz.¹ Safety Code Six has also been adopted by Industry Canada in
14 CPC-2-0-03 for purposes of protecting the general public related to
15 radiocommunication and broadcasting antenna systems..
16

17 b.) It is THESL's understanding that the wireless attachments proposed by CANDAS
18 would produce radio emissions that would need to comply with Safety Code Six.

¹ *Limits of Human Exposure to Radiofrequency Electromagnetic Energy in the Frequency Range from 3 kHz to 300 GHz, Safety Code 6 (2009)*. Available at: http://www.rfsafety.com/PDF%20Files/Health%20Canada%20Safety%20Code%206%20Standard_2009.pdf.

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 15:**

2 **Reference(s):** **Affidavit of Mary Byrne**

3 **Section 29 – “In addition to this, THESL has historically**
4 **charged prospective telecom attachers a \$95 application charge**
5 **to recover its costs of processing those applications.”**
6

7 Has THESL historically applied the charge of \$95 uniformly to both wireline and
8 wireless attachment applications?
9

10 **RESPONSE:**

11 Yes. Please see the response in Tab 6, Schedule 15.

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 17:**

2 **Reference(s):** **Affidavit of Mary Byrne**
3 **Section 29 – “In addition to this, THESL has historically**
4 **charged prospective telecom attachers a \$95 application charge**
5 **to recover its costs of processing those applications.”**
6

7 Are the costs to process a wireless attachment consistently different from the costs to
8 process a wireline attachment? If so, how do they differ?
9

10 **RESPONSE:**

11 The costs to process a given telecommunications NDA depends on a variety of factors,
12 including:

- 13 (a) the quality of the application, such as whether it includes all the required
14 information;
15 (b) the complexity of the application, including the amount of make-ready work it
16 requires and the extent to which it is similar to historical applications; and
17 (c) the total volume of applications during the time that the application is submitted
18 and processed.
19

20 As a general matter, wireless applications take more time to process, so have higher costs
21 associated with them. As Ms. Byrne notes in her affidavit at paragraph 47, the increased
22 safety and operational strain that wireless attachments place on THESL also results in
23 increased costs that THESL absorbs as indirect costs of hosting these attachments. While
24 THESL charges attachers for make-ready work in the ordinary course, the additional
25 complexities posed by wireless attachments (discussed in Ms. Byrne’s affidavit) means

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 that THESL staff and crews must, in general, spend more time and effort making special
2 accommodation for those wireless attachments on THESL Poles. This inevitably
3 increases THESL's operating expenses. For example, and as noted in Ms. Byrne's
4 affidavit at paragraph 41, due to the non-uniform nature of wireless attachments and the
5 case-by-case demands that they place on any given THESL pole, it is difficult to develop
6 internal standards and operating procedures in order to streamline the administrative
7 process of reviewing applications and attaching this emerging technology to THESL
8 Poles.
9

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 18:**

2 **Reference(s):** Affidavit of Mary Byrne
3 Section 36 – “Although the wireless pole attachments are like
4 individual “mini systems”, from THESL’s experience, all
5 wireless attachments also have a “wired” component as they
6 require power supplies involving low-voltage electrical
7 connections and also need to be connected to communications
8 cables.”

9
10 Please indicate what alternative sites are, to your knowledge, available that would
11 provide the same degree of access to the required power supply and communication
12 cables for wireless equipment attached to THESL’s poles?

13
14 **RESPONSE:**

15 Please see Section 3 of Mr. Starkey's affidavit. Please also see *Outdoor Distributed*
16 *Antenna Systems and their role in the Wireless Industry*, Industry Report, LCC
17 International, Inc., filed by CEA in this docket on September 2, 2011.

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 22:**

2 **Reference(s):** Affidavit of Mary Byrne
3 Section 43: “Another concern THESL has is regarding the
4 variability of wireless attachment configuration (including that
5 the equipment often does not fit within the communications
6 space) and the quantity of equipment that must be attached to
7 any given THESL Pole. This means that wireless attachments
8 tend to require more frequent and onerous make-ready work
9 as compared with wireline attachments. Depending on the
10 composition of the distribution equipment (and possibly other
11 NDAs) on any given THESL pole, accommodating a wireless
12 attachment may require creating additional space on a pole by
13 moving around existing equipment, or in some cases, replacing
14 the pole altogether.”
15

16 Please indicate if the full actual cost of “make-ready” work, including the engineering
17 and project management costs are recovered by THESL from the applicant before such
18 attachments are approved/allowed?
19

20 **RESPONSE:**

21 Direct costs are recovered for the work done by the design and line staff, as well as any
22 materials used. As THESL does not allocate common costs to discrete projects, costs of
23 management time such as supervisors and engineers are not captured. Please also refer to
24 the response in Tab 6, Schedule 15.
25

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 23:**

2 **Reference(s):** Affidavit of Mary Byrne
3 Section 43: “Another concern THESL has is regarding the
4 variability of wireless attachment configuration (including that
5 the equipment often does not fit within the communications
6 space) and the quantity of equipment that must be attached to
7 any given THESL Pole. This means that wireless attachments
8 tend to require more frequent and onerous make-ready work
9 as compared with wireline attachments. Depending on the
10 composition of the distribution equipment (and possibly other
11 NDAs) on any given THESL pole, accommodating a wireless
12 attachment may require creating additional space on a pole by
13 moving around existing equipment, or in some cases, replacing
14 the pole altogether.”
15

16 If the answer to Question 22 is yes, and the costs related to “make-ready” work are being
17 fully recovered, why is this of concern to THESL?
18

19 **RESPONSE:**

20 Please also refer to the response in Tab 6, Schedule 15. THESL has a very large capital
21 program underway. Make-ready and other work related to NDAs creates an additional
22 strain on limited resources and accordingly, requires THESL to divert those resources
23 away from its distribution function.

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

INTERROGATORY 29:

Reference(s): Affidavit of Mary Byrne

Section 46: “Further, THESL’s experience is that wireless companies prefer to have their attachment antennas mounted on THESL Pole tops. However, installing wireless antennas on pole tops above energized electric facilities, creates a number of additional safety and operational concerns, including: a. pole top attachments require workers to pass through energized lines to work on those attachments, posing a safety risk to those workers operating on THESL Poles

How many antennas have been installed on THESL pole tops with the pole line carrying medium voltage (MV) circuits?

RESPONSE:

THESL has reviewed its records and could find no evidence of THESL poles which have antennas installed on or above the separation space. Please see also the response in Tab 5.1, Schedule 11.

**RESPONSES TO
ENERGY PROBE RESEARCH FOUNDATION
INTERROGATORIES**

1 **INTERROGATORY 1:**

2 **Reference(s):** **Starkey Affidavit, p.21-22**

3

4 Mr. Starkey states the “economics associated with wireless attachments like DAS
5 attachments” differ from those of traditional cable attachments due to “barriers to entry
6 “that exist with respect to alternatives supporting traditional wireline
7 attachments but are absent from wireless attachments.”

8 a) Please confirm that Rogers Cable (or the appropriate Rogers cable television affiliate)
9 is currently burying its overhead cables in some parts of Toronto.

10 b) Does this indicate that underground cabling was and is a viable alternative to pole
11 attachment? If not, why not?

12 c) Given this viability, as long as underground cabling is more costly than pole
13 attachment, it not the case that attaching cable television wires to hydro poles was
14 more a matter of “convenience” than “necessity”?

15 d) Does Mr. Starkey believe that high reproduction cost is the main reason not to require
16 a cable company to install its own poles?

17 e) Does Mr. Starkey believe that it is aesthetically more acceptable for a cable company
18 to use hydro poles rather than build its own poles?

19 f) Other things equal, why is it more aesthetically acceptable for a DAS to use non-pole
20 attachments than pole attachments?

21

22 **RESPONSE:**

23 a) Mr. Starkey cannot confirm the statement with direct personal knowledge, nor has
24 Mr. Starkey researched/analyzed facts pertinent to the question. Nonetheless, it

**RESPONSES TO
ENERGY PROBE RESEARCH FOUNDATION
INTERROGATORIES**

1 would not surprise Mr. Starkey if Rogers buried some portion of its CATV plant
2 rather than attaching those facilities to utility poles. Burying CATV cable is not
3 an uncommon practice.
4

5 b) With respect to wireline attachments, in some circumstances, burying cable or
6 using underground conduit may be an alternative to using overhead suspension
7 via utility poles. However, Mr. Starkey understands from THESL that in Ontario,
8 wireline attachers may opt either for attachments to existing distribution poles or
9 to carry wireline equipment in underline ducts. As a practical matter, where there
10 are no existing distribution poles (such as in the case of an underground
11 distribution system), then the only option is for wireline attachers to share duct
12 space.
13

14 c) CATV providers (and telecommunications providers) generally use a combination
15 of underground and aerial cable in distributing their outside plant. In some cases,
16 costs for one are more expensive than costs for the other (when all factors are
17 considered). The extent to which a given carrier chooses one over the other out of
18 "convenience" rather than "necessity" is likely to be a route-by-route decision,
19 where both options are available. As noted in (b) above, practically speaking, it is
20 often the case in Ontario that wireline attachers do not have the ability to choose
21 "convenience" over "necessity".
22

23 d) High reproduction costs are one of the factors that erect barriers to the
24 proliferation of multiple aerial suspension alternatives for wired communications

**RESPONSES TO
ENERGY PROBE RESEARCH FOUNDATION
INTERROGATORIES**

1 systems. The extent to which it is the "main" reason is likely dependent upon a
2 number of variables including the congestion characteristics of available right-of-
3 way, the type of alternatives that exist, etc.

4

5 e) It is Mr. Starkey's understanding that erosion of preferable aesthetics and other
6 potential harms citizens might be subjected to as a result of multiple aerial
7 suspension alternatives are generally governed by municipalities or other
8 government organizations who answer directly to the affected citizens. Like all
9 other complex decisions, decisions regarding aesthetics are often tempered by cost
10 considerations as well as the availability of desired goods and services and are best
11 evaluated by those that will be impacted.

12

13 f) It is not Mr. Starkey's opinion that it is necessarily "more aesthetically acceptable
14 for a DAS to use non-pole attachments than pole attachments" as assumed in the
15 question. Mr. Starkey does note that various non-utility pole attachments detailed
16 in the CEA's expert evidence appear to be designed specifically to address
17 aesthetic concerns.

18

**RESPONSES TO
ENERGY PROBE RESEARCH FOUNDATION
INTERROGATORIES**

1 **INTERROGATORY 10:**

2 **Reference(s):** **Yatchew affidavit, p. 31, line 16**

3

4 Professor Yatchew states “that wherever power poles are owned by private sector
5 companies, there is no issue of transferring a valuable asset from the public sector to the
6 private sector. That is not the case in Ontario.”

7 a) Kindly elaborate on this paragraph as it is not clear how it relates to the previous
8 paragraph in Professor Yatchew’s affidavit.

9 b) Is Professor Yatchew saying that problems of access would not arise if the poles
10 were privately owned rather than publicly owned?

11

12 **RESPONSE:**

13

14 a) In the event that it is in the interest of the utility and the ratepayers to lease a
15 portion of utility assets, it should be at fair market value, if at all possible.

16

17 It is for the same reason that THESL should not be required to lease spare office
18 space at other than market rents, it should not be required to lease pole space at a
19 fraction of its value. To do otherwise would constitute an undue transfer of wealth
20 to a private company.

21

22 b) Issues relating to access and pricing may also arise if the utility were to be
23 privately owned. However, the issue of wealth transfer from a public utility to a
24 private company would not be present.

**RESPONSES TO
ENERGY PROBE RESEARCH FOUNDATION
INTERROGATORIES**

1 **INTERROGATORY 11:**

2 **Reference(s):** **Byrne affidavit, p.5**

3

4 Does Toronto Hydro attach any of its wires to poles of other wireline services such as
5 Bell Telephone, Rogers, etc. in Toronto?

6

7 **RESPONSE:**

8 Yes. For example, THESL has a joint use agreement with Bell.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 11:**

2 **Reference(s):** **Byrne, para. 7**

3

4 In relation to safe limits of approach, Ms. Byrne states “safe limits of approach are
5 defined and practiced on the overhead distribution system such that a zone of separation
6 is required between high voltage equipment and any other attachments”

7 a) Does the attachment of antennas on the top of a distribution pole violate any
8 applicable objective safety standards, requirements etc., including those that pertain
9 to zones of separation?

10 b) Would antennas installed at the pole top fall within the parameters of CSA22.3 No. 1
11 Section 5.10.2.2(c)? If no, please explain the reasons why not.

12 c) Do the ESA and any other applicable standards require that the power space be used
13 exclusively by the electricity distributor? If “no”, do ESA standards require
14 separations between supply conductors and other equipment attached to poles?

15 d) Are there any pole top antennas, of any kind, currently attached to the top of THESL
16 poles? If “yes”, provide a list of each such antenna, the type of antenna (i.e. use –
17 Wi-Fi, DAS, SCADA, etc.), its location, when it was installed and the owner thereto.

18

19 **RESPONSE:**

20 a) Any antenna installed on a THESL Pole top would be required to meet applicable
21 “objective standards”, including those published by the CSA. In any event, and as
22 stated throughout the affidavit of Ms. Byrne, THESL has safety, operational and cost
23 concerns associated with wireless attachments, including the location (pole tops)
24 where wireless attachers would prefer to mount their antennas.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 b) CSA22.3 No. 1 Section 5.10.2.2(c) provides the basic parameters for installing
2 antennas on pole tops, however pursuant to O.Reg. 22/04, THESL is authorized to
3 create company-specific standards over and above the basic parameters.

4
5 c) The ESA does not have standards of this nature. Standards such as CSA 22.3 No. 1
6 require separations and clearances between supply conductors and other equipment
7 attached to poles.

8
9 d) THESL does not have records that capture the scope of the information requested by
10 this interrogatory with respect to type, number, owner and location of wireless
11 antennas. THESL is in the process of gathering such data in the ordinary course, but
12 due to the time-consuming nature of the project, it is not possible to have this data
13 available for the purposes of the present proceeding.

14
15 As a general matter, THESL is not aware of any wireless antennas installed in or
16 above the separation space on a primary distribution THESL Pole. THESL currently
17 owns some secondary poles which suspend streetlights and secondary voltage
18 distribution conductors, but do not carry primary voltage.

19
20 THESL has become aware that there are a very small number of legacy installations
21 in the form of antennas on or near pole tops on secondary poles owned by THESL.
22 There is no agreement between THESL and THTI to permit the attachment of these
23 legacy installations to THESL Poles. While it is not clear on the basis of the
24 information that THESL currently has, THESL believes that these wireless
25 attachments were inadvertently permitted by THESL front line staff when THTI was

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

- 1 setting up its wireless communications business. THTI sold its telecommunications
- 2 business to Cogeco in 2008.
- 3

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 13:**

2 **Reference(s):** **Byrne, para. 9**

3

4 In this paragraph Ms. Byrne addresses how “the various pieces of electrical distribution
5 equipment can exert a substantial load on THESL Poles.”

6 a) When performing structural analysis and wind loading calculations, what factors does
7 THESL consider?

8 b) If the results of the structural analysis are acceptable and the attachments comply with
9 applicable standards, are there any other engineering or regulatory reasons why the
10 attachment should not be permitted?

11 c) Do certified professional engineers review all attachment applications received by
12 THESL?

13 d) What are the minimum education and training qualifications for THESL staff that
14 review and, ultimately, approve or reject the attachment applications?

15 e) Does THESL permit or has THESL ever permitted attachments (including cable and
16 equipment) in the unusable space below the communications space? If “yes”,
17 describe any such attachments, attachment methods, location on the pole, owners of
18 such attachments and the number of each type of attachment.

19

20 **RESPONSE:**

21 (a) THESL follows the CSA 22.3 No. 1 when calculating pole loads.

22 (b) Regarding engineering reasons that are relevant to THESL’s determination as to
23 whether an attachment should be permitted on a THESL Pole, see Affidavit of Ms.
24 Byrne, at paragraph 18(d) and (e). Regarding regulatory reasons to (not) permit an

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 attachment on a THESL Pole, THESL complies with the CCTA Decision. Please see
2 also the response in Tab 5.3, Schedule 1.

3 (c) See affidavit of Ms. Byrne, at paragraph 18(c).

4 (d) The THESL staff who review and approve or reject telecommunications attachment
5 applications are Certified Power Line Persons.

6 (e) Yes, THESL permits various non-communications NDAs such as decorative and
7 temporary attachments including banners or flower baskets to attach below the
8 communications space. Please refer to THESL Standards 23-1100, 2100 and 2200 in
9 Tab 5.1, Schedule 1, Attachment 1 for dimensions and details. THESL permits a
10 limited number of power supply boxes for wireline telecommunications customers to
11 be attached below the communications space. Please see the response in Tab 1,
12 Schedule 21 and THESL Standard 23-3550. As noted in the response in Tab 5.1,
13 Schedule 7, THESL does not have records that capture the specific number of
14 attachments on each given distribution pole (including such power supply boxes), nor
15 does it have precise records regarding the number of traffic attachments, police
16 cameras or temporary decorative attachments put up by business improvement areas
17 on its primary distribution poles. THESL is in the process of gathering such data in
18 the ordinary course, but due to the time-consuming nature of the project, it is not
19 possible to have this data available for the purposes of the present proceeding.

20

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 15:**

2 **Reference(s):** **Byrne, para. 16**

3

- 4 a) Do non-communications attachments on power poles present physical impediments to
5 pole workers accessing or climbing the poles?
- 6 b) Are line crews trained to navigate around non-communication attachments?
- 7 c) Explain how navigating around non-communications, non-distribution attachments
8 (“NDAs”) differs from navigating around communications NDAs?
- 9 d) CCTV carriers install power supplies in the unused portion of the pole, the
10 communication space and the separation space. Does THESL categorize these types
11 of power supplies as communication or non-communications NDAs?
- 12 e) Would splice enclosures installed by the ILEC’s or CLEC’s in the unused portion of
13 the pole, in the communication space or in the separation space, be considered
14 communication or non-communications NDAs?
- 15 f) Provide a list of all non-wireline (i.e. fibre, cable or other) NDAs attached to THESL
16 poles and, for each such NDA, describe:
- 17 (i) The geographic location of each NDA
- 18 (ii) The specific type of NDA attachment (e.g. surveillance camera, Wi-Fi
19 antenna, battery unit, DAS antenna, etc.)
- 20 (iii) The owner of each NDA
- 21 (iv) The size, weight, dimensions and other physical specifications of each NDA
- 22 (v) The attachment location of each NDA on the pole (distribution space,
23 communication space, unusable space, etc.)
- 24 (vi) The attachment method (e.g. through bolt, metal band, in-line (i.e. on-cable,
25 etc.)

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 (vii) The rates charged for each type of NDA
- 2 g) Provide a list of all wireless attachments that are used in conjunction with electricity
- 3 distribution such as SCADA antennas or other SCADA equipment, and, for each such
- 4 attachment, describe:
- 5 (i) The geographic location of each wireless attachment
- 6 (ii) The specific type of wireless attachment
- 7 (iii) The owner of each wireless attachment
- 8 (iv) The size, weight, dimensions and other physical specifications of each
- 9 wireless attachment
- 10 (v) The attachment location on the pole of each wireless attachment (distribution
- 11 space, communication space, unusable space, etc.)
- 12 (vi) The attachment method (e.g. through bolt, metal band, in-line (i.e. on-cable,
- 13 etc.)
- 14 h) Does THESL publish standard terms and conditions pertaining to non-communication
- 15 attachments?
- 16 i) Provide a pro forma copy of one attachment agreement in respect of non-
- 17 communication attachments.
- 18 j) Provide a copy of THESL's policies governing the attachment of non-communication
- 19 equipment.
- 20 k) Provide a copy of THESL's construction guidelines pertaining to non-communication
- 21 attachments.
- 22 l) Provide a copy of the pro forma permit application pertaining to non-communication
- 23 equipment.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 m) Is any wireless equipment, including equipment associated with wireless attachments,
2 currently attached outside the communications space on any THESL pole? If “yes”,
3 provide:

4 (i) The geographic location of each such wireless attachment

5 (ii) The specific type of such wireless attachment

6 (iii) The owner of each such wireless attachment

7 (iv) The size, weight, dimensions and other physical specifications of each such
8 wireless attachment

9 (v) The attachment location on the pole of each such wireless attachment (distribution
10 space, communication space, unusable space, etc.)

11 (vi) The attachment method (e.g. through bolt, metal band, in-line (i.e. on-cable, etc.)
12

RESPONSE:

14 a) NDAs on THESL Poles may limit pole climbing and bucket mobility, and can make
15 work such as stringing conductors more difficult and time consuming for THESL.
16 When performing work such as pole replacements or removals, attachments are an
17 additional project dependency in the project planning and execution, and can delay
18 this work.
19

20 b) During their apprentice and other training, as well as on-going work, THESL staff are
21 taught how to work around NDAs on poles. Please see also the response in Tab 5.1,
22 Schedule 5, part (b).
23

24 c) All attachments (whether or not communications attachments) create an encumbrance
25 on THESL Poles that THESL crews must navigate around.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

d) THESL does not consider CCTV NDAs to be communications NDAs.

e) CANDAS has not defined what an ILEC or CLEC is, which is required in order for THESL to answer this question. THESL believes that this refers to splices that are made in-line (i.e. along the wireline), and are not installed on the pole, and therefore THESL does not consider these to be NDAs.

f) Please see also the response in Tab 5.1, Schedule 7. THESL does not have records that capture the geographic location of each NDA, the specific type of NDA attachment, the size, weight, dimensions and other physical specification of each NDA (other than as detailed in THESL's standards, attached as Exhibit "A" to CANDAS Byrne IR 1), the attachment location of each NDA on the pole, nor the attachment method. THESL is in the process of gathering such data in the ordinary course, but due to the time-consuming nature of the project, it is not possible to have this data available for the purposes of the present proceeding.

Regarding (iii), the specific owner name of NDAs is not relevant to this proceeding, and in any event confidential. The non-wireline attachments, by type, are as follows:

TYPE	TOTAL NUMBER
transit shelters	297
DAScom wireless antennae	105

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

rectifier	170
transit equipment	443
baskets, banners, lighting	1968
traffic signs and signals, police cameras	No Data

Regarding (vii), the rate applied to telecommunications attachments on THESL primary distribution poles is \$22.35. Others are not relevant to this proceeding, and in any event, confidential.

g)

Refer to the two lists:

- SCADA equipment, attached as Attachment 1
- Radio equipment, attached as Attachment 2

h) Yes. See THESL Standards Section 23. Standards 23-1100 through 2500 provide information for how temporary and decorative attachments are made.

i) DAScom is a current THESL customer and has numerous examples of attachment agreements within its possession.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 j) See THESL Standards Section 23. Standards 23-100 through 2500 give the
2 information for how temporary and decorative attachments are made. Standards 23-
3 3500 and 3900 show the installation for traffic sensors and Enbridge rectifier power
4 supplies, respectively. THESL does not have any further written policies.

5

6 k) See answer to (j) above.

7

8 l) DAScom is a current THESL customer and has numerous examples of permit
9 applications within its possession.

10

11 m) Yes. Please see the responses in Tab 1, Schedules 19 and 20. See also see the
12 response in Tab 5.1, Schedule 11, part (d), as well as (f) above. Please see CANDAS
13 Evidence Larson for the specifications and placement of DAScom equipment.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 17:**

2 **Reference(s):** **Byrne, paras. 20-21**

3

- 4 a) Were any of the positions that have created in 2009 to handle telecommunications
5 attachment requests permanent positions? Were any of the employees hired in 2009
6 part of THESL's permanent headcount?
- 7 b) Were any of the positions mentioned in paragraph 21 positions for professional
8 engineers?
- 9 c) What qualifications did the interns have and what training did they receive from
10 THESL?
- 11 d) Provide the date of hire for each position mentioned in paragraph 21, the duration of
12 the associated contract and the respective functional roles.
- 13 e) Did any CANDAS member, or any other attachment applicant, offer to provide
14 resources, additional funding, or manpower to assist the existing staff to expedite
15 Cogeco or DAScom attachment applications? If so, was this offer accepted by
16 THESL? Why or why not?
- 17 f) If THESL application fees do not cover the cost of hiring required additional
18 resources, why does THESL not increase the application fee?
- 19 g) If THESL relies on short term (4 month) co-op students and interns to perform the
20 functions needed to process the applications, would it not be possible to train the
21 carriers engineers and staff to perform the majority of the work that would have
22 otherwise been done by interns and temporary contractors? If not, why not?

23

24 **RESPONSE:**

- 25 a) See affidavit of Ms. Byrne at paragraph 21.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 b) No.

2

3 c) The intern was a student enrolled in a university engineering program.

4 The intern received training in the departmental processes, such as the computer
5 programs, as well as how to administer the paperwork and filing of permit applications.

6

7 d) Summer student – May 2009 – 4 months

8 Fall student – September 2009 – 4 months

9 Intern student – May 2010 – 12 months

10 Contract staff – August 2010 – ongoing

11

12 For a description of the “functional roles” of the interns, see THESL response to (c)
13 above as well as items (b) and (c) noted in paragraph 18 of Ms. Byrne’s affidavit.

14 Intern students also perform various on-demand administrative tasks to assist the
15 department supervisor. Contract staff have been responsible for processing permits,
16 and in particular, performed duties related to items (b) through (e) noted in paragraph
17 18 of Ms. Byrne’s affidavit.

18

19 e) Yes. In the spring of 2011, an offer from Cogeco, to pay for additional resources
20 (such as the costs of contract staff to process permits) was accepted, however, Cogeco
21 has yet to provide a purchase order that THESL can invoice against.

22

23 f) THESL developed the \$95 application charge in 2006 on the basis of best estimates
24 for cost recovery regarding processing telecommunications attachments permits at
25 that time. Please see the response in Tab 6, Schedule 15.

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

- 1 g) No. THESL does not grant access to its internal computer systems to clients as it
- 2 cannot give any one client access to the files of any other client.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 18:**

2 **Reference(s):** **Byrne, para. 22**

3

4 In discussing the “make ready” work, Ms. Byrne states that “conductors may need to be
5 raised or lowered to increase the amount of space available for communications
6 attachments.”

7 a) If a pole is replaced with a new pole that has five additional feet of height, how much
8 additional space beyond the two feet is available for communications NDAs?

9

10 **RESPONSE:**

11 None. THESL Construction Standard 23-3100 (as indicated in Tab 5.1, Schedule 1,
12 Attachment 1) limits the communications space on THESL poles to two feet, regardless
13 of the height of the Pole. In addition, the rate established in the CCTA Decision assumes
14 two feet of communications space.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 19:**

2 **Reference(s):** **Byrne, para. 18**

3

4 The process described in paragraph 18 of Ms. Byrne's evidence is materially different
5 from the process that is set forth in the Distribution Pole Attachment Agreement between
6 DAScom and THESL dated August 1, 2009.

7 a) Explain the reasons why.

8 b) Were DAScom and other legacy attachers notified of these changes in process? If so,
9 when and how were such notifications made?

10

11 **RESPONSE:**

12 a) CANDAS has not indentified any of the ways in which the two processes allegedly
13 differ. In any event, THESL disagrees with the premise of the question: the process
14 is not materially different. Further, paragraph 18 is not intended to highlight any
15 differences in specific contracts that may have evolved over time. For example, some
16 older contracts contain language requiring an application to be sent in on floppy disk.

17

18 b) Please see response in (a) above.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 20:

Reference(s): Byrne, para. 22

Ms. Byrne states “[If] make ready work requires excavation in the roadway (including sidewalks) for example, THESL must obtain a permit from the City of Toronto.”

- a) What kinds of “make ready” work require roadway excavation?
- b) Who is responsible for conduit and duct placement up to and on to the pole?
- c) In 2010 and 2011, how many third party attachments required “make ready” work that involved excavation and municipal permitting?
- d) Explain the effect of the size of the communications space as it relates to adjusting (raising or lowering) conductors.
- e) By raising or lowering conductors, does the size of the communications space change?
 - (i) If “yes”, explain exactly how it changes.
 - (ii) If “yes”, what is the range in the change of size (smallest/largest) and what is that range dependent upon (e.g. size of pole, amount of distribution equipment on the pole)?

RESPONSE:

- a) Pole replacements and anchoring are examples of make ready work that requires roadway excavation.
- b) Generally, the owner of the asset is responsible for placement of that asset. For example, if the conduit and duct are customer assets, then the customer is responsible for the placement work in relation to those assets.
- c) In 2010 and 2011 (to date) there have been 96 make-ready requests that will require

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 roadway excavation and municipal permitting.
- 2 d) THESL Standards provide that the communications space remain consistently two
- 3 feet in size. Moving the conductors may be possible in some instances, to ensure that
- 4 the minimum separations and clearances are maintained, according the THESL
- 5 Standards. Please see THESL Standards in Tab 5.1, Schedule 1, Attachment 1.
- 6 e) No. Please see response to (d) above.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 21:

Reference(s): Byrne, paras. 23-24

- a) Describe the “operational and safety burden” referenced in the following statement at paragraph 23: “THESL is therefore required to take on a considerable ongoing operational and safety burden related to NDAs.”
- b) In respect of paragraph 24, please explain how the extra “layer of notification protocols” differs as between wireless and wireline attachers.

RESPONSE:

- a) Depending on the position of the wireless attachments on the THESL pole safety may be affected. It is THESL’s view that certain wireless attachments can present a safety hazard regardless of the manner in which the THESL pole is approached. Please refer to the affidavit of Ms. Byrne at paragraph 46. Attachments make climbing poles more difficult, and can also pose a challenge for ‘bucket work’, making it harder to reach the work area. For example, attachments may limit which side of the pole the work can be approached from. Where NDAs protrude from the pole, this may require THESL crews to climb around or over top of the attachment, and/or make it difficult for the bucket to approach the work area.

Further, the increase in the volume of attachments has required THESL to bring on additional staff and incur additional costs. Please see also the response in Tab 6, Schedule 15. Attachments create an additional dependency for planned or unplanned work that requires poles to be replaced. In practical terms, this means that designers or line staff on-site must determine the attachments affected by the work, and then notify Ms. Byrne’s department to have the attachment owners notified, so that the

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 attachment owner can move their attachments. THESL is not able to remove the old
2 pole, and complete the job, until the attachments have been moved. Attachment pole
3 transfers that are not completed by the attachment owner in a timely fashion require
4 follow up and have generated City and customer complaints.

5
6 And finally, attachments installed incorrectly require follow up to ensure they don't
7 become safety hazards, or to correct the safety hazards that have been identified.

8

9 b) Ms. Byrne's affidavit didn't suggest that there was a difference. As noted at Ms.
10 Byrne's affidavit at paragraph 24 under the sub-heading of "Non-Distribution
11 Attachments Generally", "When THESL undertakes such activities, it often must
12 remove equipment from THESL Poles temporarily in order to complete repairs, or in
13 cases where it is replacing a pole, permanently remove equipment from the displaced
14 pole. THESL must coordinate with attachers to see that this work is done safely and
15 properly, which requires adding an additional layer of notification protocols to
16 THESL's operating procedures. These are costs that THESL itself absorbs." The
17 more attachments and attachment clients on THESL poles means that THESL must
18 be in a position to coordinate more notification protocols, as a given situation
19 requires.

20

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 22:**

2 **Reference(s):** **Byrne, para. 25**

3

4 In this paragraph, Ms. Byrne discusses how “[I]n 2010 for example, the CSA adopted
5 provision 7.1 in its standard regarding Overhead Systems. Pursuant to provision 7.1, the
6 CSA provides that distributors should use a non-linear calculation methodology for pole
7 analysis during the application process”.

8 a) Did Cogeco submit fibre attachment applications to THESL in respect of the Toronto
9 DAS Network, prior to the incorporation of provision 7.1 into the CSA standard?

10 Were such applications grandfathered by THESL? If not, why not?

11 b) CSA provision 7.1 allowed for the use of linear analysis during the period of
12 transition. Did THESL, nevertheless, apply this new standard to applications in
13 progress?

14 c) Did THESL’s application of CSA provision 7.1, to pending attachment applications
15 despite the transition provisions, delay the processing of such application?

16

17 **RESPONSE:**

18 a) THESL does not itself apply the CSA standard to NDA telecommunications
19 applications, but instead requires that the applicant certify that the application is in
20 compliance with the applicable standards and legislation.

21

22 b) Please see response in (a) above.

23

24 c) Where the prospective attacher is compliance with its obligations to have a
25 professional engineer approve and certify the manner of attachment in accordance
26 with applicable law, then CSA provision 7.1 does not materially affect THESL’s

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

1 NDA application processing times.

2

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 24:**

2 **Reference(s):** **Byrne, para. 28**

3

4 In discussing the CCTA decision, Ms. Byrne states, “[T]HESL has granted wireline
5 attachers access to THESL Poles on the basis of those attachments fitting within the
6 communications space on THESL Poles and assuming approximately 2.5 attachments per
7 pole.”

8 a) With respect to the photographs on slides 1 through 6 (attached):

9 (i) Confirm that the attachments depicted are CATV power supplies attached to
10 THESL poles.

11 (ii) Identify the space or zone on the pole (e.g., communications space, other) in
12 which the equipment enclosures are installed?

13 (iii) Is it THESL’s view that all equipment enclosures in the photographs are
14 “uniform in design” and size?

15 (iv) If there are variations in the size of the equipment enclosure, list each size and
16 provide its specifications.

17 b) As compared to the wireless attachment applications that THESL reviewed and
18 approved for installation in respect of the Toronto DAS Network, are DAScom
19 attachments larger, smaller or approximately the same size as the equipment
20 enclosures shown in the slides?

21 c) If the equipment shown in the photograph is CATV equipment that is installed
22 outside the communications space, explain the conditions under which THESL
23 granted wireline access for these attachments.

24 d) Is it THESL’s position that the CCTA Decision pertains to CATV equipment?

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 e) Confirm that the DAS equipment configurations that were the subject of each of
2 DAScom's attachment applications in respect of the Toronto DAS Network were
3 virtually identical from application to application.
- 4 f) Does THESL limit the number of attachers in the communications space? If "yes",
5 what is the maximum permissible number of attachers?
- 6 g) If the response to (f) is "yes", explain the circumstances under which THESL would
7 exercise its discretion to waive this constraint.
- 8 h) Does THESL limit the size of the communications space to two feet? If "yes", does
9 this limitation pertain to all poles? Under what circumstances, if any, would THESL
10 exercise its discretion to expand the defined communication space on a particular
11 pole?

12

RESPONSE:

14 a)

- 15 (i) No. THESL has visually inspected each of the locations CANDAS' identifies in
16 this interrogatory. Of the site photos provided:

- 17 • Pole No: P23 (Bell) Location: Oregan Trail & Lomar Dr (on south side
18 of corner) is not a THESL pole;
- 19 • Pole No: P312 Location: Martin Grove Rd & Burnhamthorpe Rd (2nd
20 pole east of Martin Grove on south side) is a rectifier;
- 21 • Pole No: P1400 Location: Kipling & Eglinton (4th pole south of
22 Eglinton on the west side) is a rectifier;
- 23 • Pole No: P4515 Location: Kipling & Eglinton (3th pole west of
24 Kipling on south side) is a Toronto Hydro Communication and Control
25 units for SCADA;

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 • Pole No: P5458 Location: 5450 Dundas St West (west of 5450 Dundas
2 St W on the north side) is a Toronto Hydro Communication and
3 Control units for SCADA;
4 • Pole No: P5280 Location: Dundas St West & Acorn Ave (1st pole east
5 of Acorn Ave on the north side) is a Toronto Hydro Communication
6 and Control units for SCADA;
7 • 30 Cummer Ave: actual address is 61 Cummer and the pole shown in
8 CANDAS' photo has been replaced. New pole hosts Toronto Hydro
9 Communication and Control Unit for SCADA; and
10 • The remaining are CATV power supplies attached to THESL Poles
11
12 (ii) The CATV power supplies are attached to THESL poles immediately below the
13 communications space
14
15 (iii) The CATV power supplies are uniform in design and size. The other
16 attachments are non-communications attachments.
17
18 (iv) n/a
19
20 b) THESL's experience is that DAScom attachments are larger than the CATV equipment
21 shown in the slides CANDAS provided in relation to this interrogatory.
22
23 c) THESL is mandated to grant wireline attacher access to THESL Poles pursuant to the
24 CCTA Decision. THESL has agreed to allow this ancillary equipment related to
25 wireline attachments mandated by the CCTA Decision on the basis that the
26 equipment is an necessary and incidental component of the wireline system. The
27 CCTA Decision does not mandate THESL to grant wireless attachers access to
28 THESL poles.
29

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1

2 d) Yes, THESL's position is that the CCTA Decision applies to CATV wireline
3 attachments. THESL has, in turn, allowed equipment that is a necessary and
4 incidental component of the CATV wireline system to attach to its poles.

5

6 e) While DAScom applications have all been similar to each other, they are not similar
7 to the various other types of telecommunications attachments that THESL has been
8 asked to host.

9 f) THESL does not limit the number of "attachers" in the communications space per se,
10 but THESL does limit the number of telecommunications attachments on any given
11 THESL pole to three (within the communications space). Please see Standard 23-
12 3100 in Tab 5.1, Schedule 1, Attachment 1.

13

14 g) THESL's policy is to follow its standards. See response to (f) above.

15

16 h) Standard 23-1100 limits the communications space on any THESL Pole to two feet.

17

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 25:**

2 **Reference(s):** **Byrne, para. 29**

3

4 “THESL has historically charged a \$95 application charge to recover its costs of
5 processing those applications”

6 a) Is this application fee established or approved by the OEB?

7 b) If “no”, are there any reasons why THESL could not unilaterally vary (i.e., increase
8 or decrease) this fee?

9 c) How/where is the revenue received in the form of attachment application fees
10 reflected in THESL’s cost of service rate application?

11

12 **RESPONSE:**

13 a) No. However, if the Board determines that it will regulate rates for wireless
14 attachment pole access and considers that the \$95 charge really has the nature of a
15 rate rather than recovery of demand billable costs, Board approval of a specific
16 service charge would be required. If the Board determines that it will not set rates for
17 wireless attachment pole access, application fees would be a matter of commercial
18 negotiation between the parties.

19 b) Please refer to the response a).

20 c) Attachment revenue is included with other revenue offsets as presented in Exhibit I1,
21 Schedule 1, pages 1 and 2 and Schedule 3 of THESL’s 2012-2014 EDR Application
22 in the OEB docket no. EB-2011-0144.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 26:**

2 **Reference(s):** **Byrne, para. 32**

3

4 In discussing the number of wireline attachment requests received by THESL, Ms. Byrne
5 states as follows: “[A]ccordingly, and assuming an approximately even distribution of
6 Cogeco’s wireless-supporting applications as between 2009 and 2010, the more accurate
7 number of stand-alone wireline requests that THESL received for those years was 734
8 and 662 respectively.”

9 a) Do the 734 and 662 figures include Cogeco attachment applications only? If “yes”,
10 of these, how many were applications that were resubmitted following initial rejection
11 by THESL?

12 b) Describe the differences, if any, between how THESL processes attachment
13 applications for the fibre components of wireline telecommunication installations and
14 the fibre component of wireless telecommunication installations.

15 c) Describe the differences, if any, between how THESL processes attachment
16 applications for the fibre component of DAS installations and how it processes
17 applications for the fibre component of other telecommunication networks.

18

19 **RESPONSE:**

20 a) As stated at paragraph 32 of Ms. Byrne’s affidavit, in 2009 and 2010, THESL
21 received 886 and 813 wireline attachment applications respectively. The 734 and 662
22 figures represent the remainder of wireline applications for those years, once
23 CANDAS’ stated number of Cogeco wireless-supporting wireline applications are
24 subtracted from these gross figures. THESL considers a resubmission of a rejected
25 application to be a new application request, and does not track whether any particular

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

- 1 application is a resubmission of a rejected application.
- 2 b) THESL follows the same process for both. Please see the affidavit of Ms. Byrne at
- 3 paragraph 18.
- 4 c) THESL follows the same process for both. Please see the affidavit of Ms. Byrne at
- 5 paragraph 18.
- 6
- 7

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 28:**

2 **Reference(s):** **Byrne, paras. 34-35**

3

4 Ms. Byrne describes wireless attachments as “mini-systems” that include “power supply
5 cabinets or boxes, cable to connect the cabinet to the antenna, cable to feed back into the
6 communications network and possibly a meter for electricity service.”

7 a) Confirm that, with the exception of the cable connection between the cabinet and the
8 antennae, CATV networks also require the components enumerated above?

9

10 **RESPONSE:**

11 a) Not confirmed.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 29:

Reference(s): **Byrne, para. 36**

Ms. Byrnes states that “from THESL’s experience, all wireless attachments also have a ‘wired’ component as they require power supplies...”

a) How many different entities have submitted wireless attachment applications since 2009?

(i) Provide a list of all these entities, including THESL’s affiliates and subsidiaries.

(ii) Provide an example of each type of attachment in respect of which THESL received an application (whether approved or not) in the period 2009 to the present.

b) Do any THESL affiliates own or operate wireless equipment that is currently attached on a THESL pole?

c) If “yes”, list these entities by name and identify the type of attachments and number of each type of attachment attached to each THESL pole.

d) Do THESL affiliates who own or operate wireless equipment on THESL poles do so in accordance with pole attachment agreements?

e) Provide a copy of the Pole Attachment Agreement between THESL and Cogeco in respect of its “One Zone” internet service offering.

f) Does THESL’s “no wireless” policy pertain to the wireless attachments of Cogeco / One Zone and the TTC? If “yes”, is it THESL’s intention to decline to renew the applicable pole attachment agreement upon the expiration thereof? If “no”, explain why not.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **RESPONSE:**

2 a)

3 (i) DAScom.

4 (ii) See CANDAS Evidence Larson for a sample DAScom drawing.

5

6 b) THESL has reviewed its records and could find no evidence of THESL affiliates
7 owning or operating equipment attached to a THESL pole. Please also see the
8 response in Tab 5.1, Schedule 11.

9

10 c) Not Applicable.

11

12 d) Not Applicable.

13

14 e) THESL has no such agreement.

15

16 f) Please see in Tab 5.3 Schedule 1. TTC attachments are not telecommunications
17 attachments and therefore different considerations apply. In any event, THESL
18 reviews matters of contractual negotiation on a case-by-case basis, and declines to
19 speak to future contingent events in this regard. THESL does not have an
20 agreement with Cogeco in respect of One Zone.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 30:

Reference(s): Byrne, para. 37

“Wireless attachments also require THESL to feed a power supply, at a lower voltage, off the pole itself.”

- a) Does the variability of wireline attachment configurations (including the non-fibre components of such configurations) require a case-by-case consideration by THESL?
- b) Is it more or less time consuming for THESL to deliver power to a meter on an LDC pole or to a location off the pole?
- c) Would it consume less THESL time and resources to deliver power to a wireless attachment on an existing power pole, or to a wireless attachment on a nearby non-THESL owned pole?
- d) Can distribution service be delivered from a transformer on one pole to equipment on an adjacent pole using secondary overhead cable? If “no”, please reference the CSA or ESA standard (or any other) that prohibits this method of delivery.
- e) Which wireline attachments, other than DAS attachments, require THESL to a power supply?

RESPONSE:

- a) THESL disagrees with the premise of this question. As noted in Ms. Byrne’s affidavit at paragraph 27, wireline attachments are largely uniform in design. Most wireline attachments do not require an electricity service, whereas most wireless (and all DAScom) do. Accordingly, for most wireline attachments, determination of how to feed power is not needed.

b) A response to this interrogatory would depend on the specific circumstances under

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 which a request for electricity service was made, including the particular physical
2 configurations and locations of the poles, distribution equipment and other
3 attachment(s) – CANDAS has specified no particular circumstances. THESL reviews
4 all attachment permit applications, and all requests for electricity service individually
5 and on a case-by-case basis.

6

7 c) The above-referenced paragraph speaks to the issue that all wireless attachments also
8 require electricity service, which is one way in which those attachments are different
9 from other types of attachments. Attachments that require electricity service – i.e.
10 wireless - require additional THESL resources to be dedicated to the attachment (and
11 maintenance) process. See also the response in (b) above.

12

13 d) In some cases, maybe, however that would depend on the specific circumstances
14 under which a request for electricity service was made, including the customer rate
15 class, available and required voltage, as well as physical configurations and locations
16 of the pole (if the system is not underground in that location), distribution equipment
17 and other attachment(s).

18

19 e) CATV systems are wireline telecommunications attachments that require THESL to
20 feed a power supply.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 31:**

2 **Reference(s):** **Byrne, para. 40**

3

4 “Wireless attachments create unique issues that affect the safety, adequacy, reliability and
5 quality of electricity service.”

6 a) What issues arise for wireless attachments that do not also arise for all other forms of
7 NDAs or other equipment routinely installed on power poles?

8

9 **RESPONSE:**

The above-referenced statement is a preamble to Ms. Byrne’s explanation to this
question, which can be found at paragraphs 40-46 in her affidavit.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 32:**

2 **Reference(s):** **Byrne, para. 41**

3

4 In this section, Ms. Byrne discusses the “non-uniform nature” and the “case by case
5 demand” of wireless attachments.

6 a) Which, if any, of the following types of attachments – traffic signals, streetlights,
7 signs, banners, transformers and distribution equipment – are evaluated on a pole by
8 pole or case by case basis?

9

10 **RESPONSE:**

11 a) All of the above-noted attachments (both NDAs and distribution equipment) are not
12 communications attachments and not relevant to this proceeding. As noted
13 throughout the affidavit of Ms. Byrne (see for example, paragraph 33), THESL has a
14 variety of safety, operational and cost concerns with hosting wireless attachments as a
15 result of the material differences between them and wireline attachments.

16

17 THESL reviews attachment permit applications on a case-by-case, pole-by-pole basis,
18 and THESL’s own distribution equipment is subject to THESL’s design standards
19 and considerations.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 33:**

2 **Reference(s):** **Byrne, para. 43**

3

4 a) Is a greater amount of “make ready” work required in respect of poles with wireless
5 attachments than is required in respect of wireline attachments placed in the
6 communications space?

7

8 **RESPONSE:**

9 a) This question is answered in paragraph 43 of Ms. Byrne’s affidavit. In particular,
10 “Another concern THESL has is regarding the variability of wireless attachment
11 configuration (including that the equipment often does not fit within the
12 communications space) and the quantity of equipment that must be attached to any
13 given THESL Pole. This means that wireless attachments tend to require more
14 frequent and onerous make-ready work as compared with wireline attachments.
15 Depending on the composition of the distribution equipment (and possibly other
16 NDAs) on any given THESL pole, accommodating a wireless attachment may require
17 creating additional space on a pole by moving around existing equipment, or in some
18 cases, replacing the pole altogether.”

19

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 34:

Reference(s): Byrne, paras. 44-45

- a) How does THESL define “pole clutter”?
- b) What type of attachments comprise “pole clutter”?

RESPONSE:

- a) By “pole clutter”, THESL means a situation where the quantity and quality of NDAs on its poles give rise to operational and safety concerns for THESL. Ms. Byrne speaks to some of the effects of pole clutter at paragraphs 44 and 45 of her affidavit. In particular:

“44. Once a wireless attachment is in place on a THESL Pole, the size and quantity of equipment may make it very difficult if not impossible for THESL workers to climb THESL Poles safely. This “pole clutter” may also create obstructions for THESL workers when performing pole maintenance in the ordinary course and during emergency repairs, meaning that additional THESL resources and protocols are required.

45. Such “pole clutter” may also increase wear and tear on THESL Poles, which accelerates THESL Pole deterioration. THESL Poles were not designed or installed with bearing the additional load of wireless attachments in mind. Pole attachments, if designed or installed incorrectly, can overload or damage a pole. Further, to the extent that wireless attachers may require holes to be drilled through THESL Poles to mount wireless communications attachments below the distribution zone, this could incrementally weaken those THESL Poles.”

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

- 1 b) Please see response to (a) above.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 35:**

2 **Reference(s):** **Byrne, para. 44**

3

4 “Once a wireless attachment is in place on a THESL Pole, the size and quantity of
5 equipment may make it very difficult if not “impossible for THESL workers to climb the
6 THESL Pole safely.”

7 a) In carrying out their duties, what percentage of the time do THESL workers or
8 THESL contractors climb THESL poles as opposed to working from a bucket or
9 boom truck?

10 b) What is preferable from a safety perspective: climbing a pole or performing
11 maintenance and other line work from a bucket or boom truck?

12 c) Do power pole line workers shut off primary and secondary power when working in
13 the energized zone?

14

15 **RESPONSE:**

16 a) Please see the response in Tab 1, Schedule 25.

17

18 b) Please see the response in Tab 1, Schedule 25.

19

20 c) No.

21

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 36:**

2 **Reference(s):** **Byrne, para. 45**

3

4 “THESL poles were not designed or installed with bearing the additional load of wireless
5 attachments in mind.”

6 a) Provide the engineering analysis that demonstrates that the combined vertical and
7 lateral loads of three transformers is less than the vertical and lateral load of the
8 wireless attachments that were installed by DAScom in respect of the Toronto DAS
9 Network.

10 b) Do the Toronto DAS Network nodes installed on THESL poles comply with the
11 standards issued by the pole manufacturer?

12 c) Provide the basis for the statement that “THESL poles were not designed or installed
13 to support wireless attachments”, including documentation from the pole
14 manufacturer.

15 d) Explain how the load of wireless attachments attached to a pole is different from the
16 load of any other equipment attached to a THESL pole.

17

18 **RESPONSE:**

19 a) Ms. Byrne never claimed that “the combined vertical and lateral loads of three
20 transformers is less than the vertical and lateral load of the wireless attachments that
21 were installed by DAScom in respect of the Toronto DAS Network.” The above-
22 referenced sentence is extracted from paragraph 45, which reads as follows:

23

24 “Such “pole clutter” may also increase wear and tear on THESL Poles, which
25 accelerates THESL Pole deterioration. THESL Poles were not designed or

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 installed with bearing the additional load of wireless attachments in mind. Pole
2 attachments, if designed or installed incorrectly, can overload or damage a pole.
3 Further, to the extent that wireless attachers may require holes to be drilled
4 through THESL Poles to mount wireless communications attachments below the
5 distribution zone, this could incrementally weaken those THESL Poles.”
6

7 THESL understands from CANDAS’ Larson evidence (Exhibit “D”, PDF page
8 number 60 of 313) that the typical weight of DAS equipment is given as 89.65kg.
9 The range of weight for THESL transformers is between 380kg and 725kg, meaning
10 that three have a combined weight of between 1140kg and 2175 kg.
11

12 **b)** Pole manufacturers do not issue standards.
13

14 **c)** Please see response in (b) above. THESL poles are long life assets, many of which
15 were installed many years ago. The large majority of THESL Poles were installed
16 prior to 2000 and could not have reasonably anticipated the introduction of wireless
17 attachments. Whereas wireline attachments generally run along the pole line and fit
18 within the communications space, wireless attachments are effectively free standing
19 mini-systems consisting of several additional pieces of generally larger and non-
20 uniform equipment that exceeds the communications space. Please see the affidavit
21 of Ms. Byrne at paragraphs 34-39.
22

23 **d)** Ms. Byrne never claimed that “the load of wireless attachments attached to a pole is
24 different from the load of any other equipment attached to a THESL pole.” Please see
25 response in (a) above. Each new load added to a THESL Pole triggers a review of
26 that pole and requires THESL to bring that pole up to current standards. In the case

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 of communications attachments that THESL is not mandated to attach to its poles –
2 such as wireless telecommunications attachments – THESL has safety, operational
3 and cost concerns associated with accommodating these attachments. See affidavit of
4 Ms. Byrne at paragraphs 40-55.
5

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 37:**

2 **Reference(s):** **Byrne, para. 46**

3

4 “antennas and other equipment could fall onto energized electric facilities”

5 a) How many reported instances of antennas falling on energized electric facilities have
6 been reported in Canada? In the U.S.?

7

8 **RESPONSE:**

9 a) THESL is not aware of industry numbers on these incidents, or if any of these
10 incidents are reportable.

11
12 In Ontario, the criteria for reporting incidents is contained in O.Reg. 22/04, as
13 follows:

14 (a) any electrical contact that caused death or critical injury to a person,
15 (b) any inadvertent contact with any part of a distribution system operating at 750
16 volts or above that caused or had the potential to cause death or critical injury to a
17 person,

18 (c) any fire or explosion in any part of a distribution system operating at 750 volts
19 or above that caused or had the potential to cause death or critical injury to a
20 person, except a fire or explosion caused by lightning strike;

21

22 Accordingly, antennas could fall onto energized equipment and cause problems or
23 failures of the electrical distribution system, but go unreported.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 38:**

2 **Reference(s):** **Byrne, para. 46**

3

4 a) Describe how the grounding of an antenna system represents an additional
5 engineering complication that could put THESL line workers at risk.

6

7 **RESPONSE:**

8 a) As stated in the affidavit of Ms. Byrne at paragraph 46(d), “the installation of pole top
9 antennas complicates the grounding that is required, and may create a higher risk of
10 phase-to-ground faults, which could put THESL workers and the public at risk.”

11

12 Under O. Reg 22/04, THESL is required to effectively ground these attachments.

13 Every additional antenna attachment mounted on a THESL Pole top above the
14 primary zone therefore creates an incremental opportunity for phase-to-ground faults.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 3:

Reference(s): **Starkey, page 4, lines 27 to 29**

In Mr. Starkey's conclusions, he states that "A functioning market for the placement and maintenance of wireless equipment on stand-alone towers, rooftops and other non-power pole structures exists and is growing".

- a) Confirm whether it is Mr. Starkey's contention that DAS networks on utility poles effectively compete with other wireless networks (including DAS) that may be located on towers, rooftops and non-power pole structures? If this is not Mr. Starkey's contention, Mr. Starkey is to provide a detailed justification for his answer.
- b) Confirm whether it is THESL's position that maintaining competition in the wireless market is not in the public interest.
- c) Confirm whether it would be Mr. Starkey's contention that economic practicability is not a factor in determining whether mandated access to a given good, service or facility is required.
- d) Assuming that DAS networks are established in Canada, clarify whether it would be Mr. Starkey's view that the rate of growth in the establishment of macrocell sites would stop, slow down, reverse or remain unchanged? Provide relevant statistics, reports or other evidence that supports Mr. Starkey's conclusion.
- e) State whether in Mr. Starkey's view, the same holds true for the United States. Provide relevant statistics, reports or other evidence that supports Mr. Starkey's position.
- f) Can Mr. Starkey explain why the Canadian government imposed mandated antenna tower sharing rules on all Canadian mobile carriers as a Condition of Licence to support the entry of new entrant mobile wireless carriers?

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **RESPONSE:**

2 a) Confirmed.

3

4 b) THESL takes no position for the purposes of this proceeding with respect to the
5 question of whether competition in the wireless communication services market is in
6 the public interest. With respect to the market for the siting of wireless
7 communications attachments, THESL's position is that competition in that market is
8 or will be sufficient to protect the public interest.

9

10 c) The question is unclear as to the information requested, especially as it relates to the
11 "require[ment]" at issue. Presumably the question is meant to reference the extent to
12 which a facility is an "essential facility" as described by the CCTA Decision at page
13 3. Mr. Starkey understands that a primary factor in evaluating the "essential" nature
14 of a facility is consideration of barriers to entry that may exist relative to the
15 development or existence of alternatives. "Economic practicability," depending upon
16 what CANDAS means by that term, could be an issue in evaluating barriers to entry
17 when considering potential alternative sources of supply. However, to the extent
18 alternatives to the facility being evaluated already exist in the marketplace, the
19 importance of "economic practicability" to any other singular potential alternative
20 would carry less weight.

21

22 d) Clearly, the rate of growth for macro sites, as impacted by the establishment of DAS
23 networks in Canada, would depend upon numerous factors, including (but not limited
24 to), the rate of growth for DAS, the rate of growth in demand for wireless services in
25 general, and perhaps data transmissions particularly, the concentration of growth in

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 any one geographic area, etc. Mr. Starkey has not developed a model (nor is he
2 aware of any existing model) that would evaluate the correlation between growth
3 rates in macro site versus DAS network deployment.

4

5 e) Please see response in (d) above.

6

7 f) Reference Policy Framework for the Auction for Spectrum Licenses for Advanced
8 Wireless Services and other Spectrum in the 2 GHz Range, Industry Canada,
9 November 2007 available at:

10 <http://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf08833.html>.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 4:

Reference(s): Starkey, page 5, lines 20 to 22

Mr. Starkey states that “[b]oth definitions of “attachment” and “communications space” and the way they are used by the Board in its CCTA Decision, help make clear that wireless antennae and supporting structure were not considered, especially as it relates to the attachment rental rate.”

a) Clarify Mr. Starkey’s understanding of the term “Canadian carrier” and in particular, whether it would be Mr. Starkey’s understanding that the term includes wireless carriers?

b) State whether in Mr. Starkey’s view, wireless carriers existed at the time of the CCTA Order?

c) Confirm whether it would be Mr. Starkey’s view that the CCTA Order extends only to the attachment of technologies and equipment of Canadian carriers that existed at the time that the CCTA Order was rendered?

RESPONSE:

a.) Mr. Starkey understands that the term "Canadian Carrier" as used by the OEB in its March 7, 2007 *Decision and Order* in RP-2003-0249 (hereafter "*CCTA Decision*"), is the same as the definition included at Telecommunications Act (S.C. 1993, c. 38), Part 1, 2(1):

“Canadian carrier” means a telecommunications common carrier that is subject to the legislative authority of Parliament;

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1
2 However, as is discussed in part c.) below, Mr. Starkey understands that this term
3 was qualified in the CCTA Decision by the types of attachments that were the
4 proper subject of that Decision.

5
6 b.) Mr. Starkey is aware that wireless carriers, including those that would be
7 considered Canadian Carriers, existed at the time of the *CCTA Decision*.

8
9 c.) Mr. Starkey does not hold the view that the *CCTA Decision* "extends only to the
10 attachment of technologies and equipment of Canadian carriers that existed at the
11 time that the CCTA Order was rendered." Mr. Starkey does note, however, that
12 the *CCTA Decision* does not appear to use the term "attachment" without bounds.

13
14 The *CCTA Decision* was intended to adjudicate matters that could not be agreed
15 upon by the parties in their August 19, 2004 *Settlement Agreement*. The OEB did
16 not, in its *CCTA Decision*, disturb agreements reached cooperatively in the
17 *Settlement Agreement*, but instead, lists seven "issues before this Board in his
18 proceeding." The *CCTA Decision* then goes on to direct parties how those seven
19 issues should be accounted for in negotiations leading to terms and conditions
20 applicable to attachments.¹ None of those seven issues address the extent to
21 which equipment necessary to support wireless providers should be included in
22 the definition of "Attachment" to which the rates and conditions addressed in the
23 *CCTA Decision* apply (e.g., see *Settlement Agreement*, Appendix B, Article 1 -
24 Definitions). Yet, the definition of "Attachment" in the *Settlement Agreement*

¹ CCTA Decision, pg. 10.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 includes the following language: "Attachment excludes wireless transmitters and
2 power line carriers." Clearly, the definition also includes the notation that this
3 portion of the definition is "Not Agreed" to by certain of the parties. Yet, the
4 extent to which this exclusion in the definition of Attachment should remain, or
5 not, was not discussed or decided by the OEB's *CCTA Decision*, in part,
6 apparently, because the parties did not raise it as one of the enumerated questions
7 to be decided by the OEB.
8

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 5:

Reference(s): **Starkey, page 6, lines 15 to 16**

Mr. Starkey states that "Communications Space means a vertical space on the pole, usually 600 mm in length, within which Telecommunications Attachments are made."

- a) The term "usually" is used in the definition. Describe instances where the communications space may be larger than 600 mm in length.
- b) Explain the discrepancy between Mr. Starkey's references following the above-referenced citation (*I.e.* page 7, lines 1-2), which refer to "typical" poles and the estimate in the CCTA Order of approximately 2 feet of communications space on a typical distribution pole.
- c) Assuming that applicable ESA and safety clearances are maintained, confirm whether in Mr. Starkey's experience, there are instances where equipment is placed in the unused space below the communications space. Describe these instances as well as Mr. Starkey's prior experience with matters concerning the placement of equipment of utility poles.

RESPONSE:

- a.) At this section of Mr. Starkey's testimony he is citing the definition of "Communications Space" agreed to by the parties in the October 19, 2004 *Settlement Agreement* which was relied upon by the OEB in its *CCTA Decision*. With that in mind, it appears that the communications space is likely restricted to 600 mm (1.97 feet) absent subsequent agreement among interested parties.
- b.) No discrepancy appears to exist.

24

c.) Please see the response in Tab 1, Schedule 21 and Tab 5.1, Schedule 13.

Mr. Starkey's "prior experience with matters concerning the placement of equipment of [sic] utility poles" can be summarized as follows:

- (i) Mr. Starkey has on numerous occasions worked both with CATV and telecommunications providers in estimating costs associated with attaching various types of equipment to poles. These engagements often include review and analysis of the equipment at issue, the nature of the target pole infrastructure, the existence of multiple attachments and/or attachers and myriad other factors that impact suspending facilities on utility, communications or other pole infrastructure.
- (ii) In his prior employment with regulatory agencies, Mr. Starkey often worked with aerial cable issues. For example, with the Missouri Public Service Commission, Mr. Starkey was assigned to the engineering detail responsible for auditing the Commission's "bonding and grounding" rules aimed at ensuring reliable telecommunications services by Missouri's incumbent local exchange carriers. This assignment included months of field visits auditing multiple carriers' aerial plant, including the manner by which that plant was suspended on available poles (both utility poles, communications poles and mixed use poles), review of other, non-telecom facilities that shared those same poles and the diligence of the regulated

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 utility in properly bonding and grounding that equipment per the
2 Commission's rules.
3
- 4 (iii) Mr. Starkey has studied and stays abreast of pole attachment issues in the
5 United States both at the state and federal level and is often called upon by
6 his clients to assist in issues related to pole attachment rules, terms and
7 conditions.
8

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 6:**

2 **Reference(s):** **Starkey, page 8, lines 1 to 2 and Figure**

3

4 Mr. Starkey refers to the definition of "joint pole" as found in the 2002 edition of
5 Newton's Telecom Dictionary.

6 a) Indicate whether wireless carriers' attachments on poles were common in 2002, at the
7 time of publication of this definition in the Newton Telecom Dictionary?

8 b) Confirm whether one or more mobile carriers or the FCC is using the 2002 edition of
9 the Newton Telecom Dictionary as a source of reference to define communications
10 space on a pole?

11

12 **RESPONSE:**

13

14 a.) Wireless carriers' did not commonly attach equipment to utility or
15 communications poles in 2002.

16

17 b.) Mr. Starkey can neither confirm nor deny the request as he has not studied
18 whether any "mobile carrier" or the FCC uses the 2002 edition of the Newton
19 Telecom Dictionary as a source of reference. Mr. Starkey does note, however,
20 that the FCC has time and again made clear that the "communications space" is a
21 finite space below the safety space ("neutral space") and the space reserved for
22 electric distribution and transmission ("supply space").

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 9:

Reference(s): Starkey, Section II(B), pages 10-13

Mr. Starkey states that there are no “typical” or “standard” equipment or attachment process for wireless equipment. Mr. Starkey states that wireless attachments are generally much larger and substantially more complex than traditional attachments.

a) Describe in detail the standard equipment or attachment process for wireline carriers’ equipment. For clarity, “wireline carrier” includes both telecommunications carriers and cable (CATV) carriers:

(i) Include all standards, calculations performed, and typical installations that apply to CATV and associated installations including cable facilities and related equipment (e.g. Cable TV boxes or batter units).

A. Specify their size, weight, pole attachment method and location on the pole.

(ii) Include all standards, calculations performed and typical installations that apply to copper and fibre deployments.

(iii) Include all standards, calculations performed, and typical installations that apply to power supplies or similar functions.

A. Specify their size, weight, attachment method and location on the pole.

(iv) Include all standards, calculations performed and typical installations that apply to any other types of attachments.

A. Specify their size, weight and attachment method and location on the pole.

b) Describe Mr. Starkey’s understanding of the type of attachments required for a DAS

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 deployments and how they differ from typical wireline carriers' deployments
2 (including associated equipment attached to poles).

3 (i) Specifically, compare how a fibre attachment for DAS differs from a wireline
4 carrier's attachment.

5 (ii) Specifically, compare how a "node" attachment for DAS differs from various
6 wireline carriers' equipment attachments.

7 c) Confirm whether Mr. Starkey characterizes an attachment for purposes of providing
8 WiFi as a wireless or wireline attachment?

9

10 RESPONSE:

11 a) (i) to iv)

12 Please see the affidavit of Ms. Byrne at paragraph 18 and the response in Tab 5.1,
13 Schedule 1, Attachment 1.

14 To the extent that this interrogatory is intended to ask the question generally and
15 universally, the information requested is not within the reasonable scope of the
16 witnesses' knowledge, unduly onerous relative to its probative value, and in any
17 event, not relevant.

18

19 b) See Mr. Starkey's evidence at pages 10-21.

20

21 c) Mr. Starkey would consider a Wi-Fi antenna and supporting equipment as a wireless
22 attachment.

23

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 10:

Reference(s): **Starkey, page 11, pole attachment diagram**

- a) On the diagram shown on Page 11 of Mr. Starkey's evidence, clarify whether the equipment box and power meter are depicted in the communications space or in the unused space?
- b) If this is not the case or if Mr. Starkey is unsure,
- (i) Describe where THESL or Mr. Starkey would propose to place the attachments
- (ii) What is typical of THESL for these attachments.
- (iii) What is permitted by THESL for these attachments.
- c) Assuming that the antenna is placed at the pole top, confirm whether it would be Mr. Starkey's understanding that other than the fibre optic cable, there would not be any other DAS component in the communications space.

RESPONSE:

- a) The power meter and equipment box in the diagram appear to be located in the portion of the pole generally referred to as the "clearance space."
- b)
- i) It is Mr. Starkey's understanding that THESL has not developed a general set of procedures or standards related to wireless attachments. Please see the response in Tab 5.1, Schedule 1.
- ii) Please see the response in (b)i above.
- iii) Please see the response in (b)i above.

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

- 1 c) It appears for the DAS attachment(s) illustrated on page 11 of Mr. Starkey's
- 2 Affidavit, that the only component placed within the communications space is the
- 3 fiber optic cable.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 12:

Reference(s): **Starkey, page 12, lines 5 to 7**

In response to the question 'How do Wireless Attachments Compare to Traditional Attachments,' Mr. Starkey states "Wireless attachments of the type diagrammed above are generally much larger and substantially more complex than traditional attachments, whether used for telecommunications carriers or CATV companies."

a) Advise as to the types of attachments that are used by telecommunications common carriers or CATV companies (other than the actual wireline attachment) and the location of each attachment type on the pole.

b) Advise as to specifically what wireline and wireless equipment was used in Mr. Starkey's comparison of traditional attachments of wireless attachments? Provide hardware specifications and manufacturer information that was used for this comparison and the drawings or wireless attachment specifications referred to in reaching this conclusion.

c) In the proceeding leading up to the CCTA Order, did the Board consider that wireline carriers require equipment to be attached to poles other than simply the wire, co-ax cable and fibre transmission facilities themselves?

d) If so, is any of the wireline carrier's equipment placed (i) at the pole top, (ii) in the neutral or supply space or in the "unused space" on the pole below the communications space?

e) Is the 'unusable space' unusable by the LDCs themselves for the placement of their distribution lines and electrical components? If so, state the reasons for this.

f) Other than the potential placement of wireless 'equipment', what possible uses are there for the unusable space?

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 g) If traditional wireline carrier or distribution equipment is placed in the unused space,
2 how is the placement of equipment in the unused space by traditional attachers
3 different from the placement of wireless carriers' equipment in the same space?
4 h) Assuming the antenna is installed in the communications space and attached to the
5 same point as the wireline attachment used to host the fibre cable that connects the
6 DAS nodes, would this result in more than one attachment point on the pole.
7 i) Is there any reason why it would not be possible or practical to use a single
8 attachment point, *e.g.* in the communications space, to host an antenna bracket and
9 wireline attachment?
10 j) If the antenna was installed in the communications space on the field side (*i.e.* the
11 back, not the road side) of the pole, would this interfere in any material way with the
12 wireline carrier's attachments, if any? If so, explain in detail.

13

RESPONSE:

- 14
15 a) Objection, the question is overly broad to the extent it requests Mr. Starkey to list and
16 explain all types of attachments that any telecommunications carrier or CATV
17 company might attach to a pole (even its own poles), and thereafter explain where
18 such attachments might be appended to the pole. Notwithstanding the objection, see
19 the response in Tab 5.1, Schedule 1.
20
21 b) See pages 7-10 of Mr. Starkey's evidence regarding wireline attachments within the
22 communications space. See pages 10-19 for a general discussion of the types of
23 wireless attachments considered within the context of the referenced evidence.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 c) Mr. Starkey has not located any record evidence suggesting the Board contemplated
2 attachment of wireline equipment outside of the communications space as discussed
3 at pages 17-20 of Mr. Starkey's evidence.
- 4 d) Not applicable.
- 5 e) Please see the written evidence and accompanying attachments of Mary Byrne.
- 6 f) Please see the response in (e) directly above.
- 7 g) Objection, the question is vague and ambiguous with regard to the differences Mr.
8 Starkey is requested to explain. Clearly, one difference is that a wireless attachment
9 is likely to include an antenna whereas the other types of attachments contemplated
10 by the question would not. See Mr. Starkey's evidence at page 10-19 for a description
11 of other differences.
- 12 h) Likely, yes, given that the antenna would also require power and other supporting
13 equipment that would be placed elsewhere on the pole.
- 14 i) Please see the response in (h) directly above.
- 15 j) It is possible that an antenna attached via sidearm to the field side would allow it to
16 occupy space that is not otherwise being used by wireline attachments (given that
17 most wireline carriers prefer to road-side of the pole). However, Mr. Starkey notes
18 that the DAS antenna is but one piece of equipment that would likely need to be
19 attached to the pole in order to support a DAS network node. The remaining
20 equipment would almost certainly need to be affixed outside the communications
21 space at each location.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 16:

Reference(s): Starkey, Section II(B), Page 17

Mr. Starkey states that wireless attachments are not confined to the “communications space” within which wireline attachments are generally found.

a) Describe the location on the pole where wireline carriers’ attachments are generally found, including any associated equipment.

(i) With respect to CATV amplifiers, specify

A. their location on the pole and if several different configurations are used, specify all.

B. how the CATV amplifiers are powered

C. how the CATV amplifiers are connected to other facilities *e.g.* coaxial cables

D. any meters or other associated equipment.

(ii) With respect to T1 amplifiers, specify

A. their location on the pole and if several different configurations are used, specify all.

B. how the T1 amplifiers are powered

C. how the T1 amplifiers are connected to other facilities *e.g.* coaxial cables

D. any meters or other associated equipment.

(iii) With respect to power supplies or battery back up units, specify

A. their location on the pole and if several different configurations are used, specify all

B. how they are powered

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 C. how they are connected to other facilities e.g. coaxial cables
2 D. any meters or other associated equipment.
3 (iv) With respect to any other wireline attachments, specify
4 A. their location on the pole and if several different configurations are
5 used, specify all
6 B. how the CATV amplifiers are powered
7 C. how the CATV amplifiers are connected to other facilities e.g.
8 coaxial cables
9 D. any meters or other associated equipment.
10 (v) With respect to any WiFi attachments, specify
11 A. their location on the pole and if several different configurations are
12 used, specify all
13 B. how the various components are powered
14 C. how the various components are connected to other facilities *e.g.*
15 coaxial cables
16 D. any meters or other associated equipment.
17 b) Describe the location on the pole where non-distribution equipment is generally
18 found, including any associated equipment.
19

20 RESPONSE:

- 21
22 a.) Attachments made by CATV and wireline communications providers are
23 generally found within the "communications space" of a joint use pole. Wireline
24 providers generally prefer to place attachments on the "road side" of the pole for
25 ease of access and maintenance. With respect to the specific pieces of equipment

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 described it subparts (i) through (v), Mr. Starkey states that the same answer
2 would apply. However, there are myriad types, manufacturers and models of
3 CATV amplifiers, T1 repeaters, and various support equipment (e.g., battery
4 backup equipment). For this reason, THESL objects generally to each of the
5 question's 20 individual subparts because they are vague and ambiguous as to
6 exactly what piece of equipment Mr. Starkey is being asked to describe. Further,
7 asking Mr. Starkey to provide a comprehensive analysis of where/how each type
8 of equipment, in its various forms, would attach to a pole is overly burdensome
9 given its potential probative value to issues pertinent in this proceeding.

10
11 Notwithstanding the objection above, Mr. Starkey states that he was able to find
12 examples of this equipment and how it is typically attached to a joint use pole,
13 some even within his own neighborhood. Mr. Starkey has provided various
14 examples below:
15

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

(iii) Wi-Fi Attachment³

b.) Please refer to the response in Tab 5.1, Schedule 1, Attachment 1 (*Section - 23: Foreign Attachments, Index of Standards.*)

³ Mr. Starkey took this picture within approximately 1 mile from his home.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 17:**

2 **Reference(s):** **Starkey, page 17, lines 18 to 23**

3

4 Mr. Starkey states:

5 Not only do these attachments use portions of the pole heretofore reserved for clearance
6 or distribution facilities, they also require coordination between multiple pieces of
7 equipment attached at varying points on the pole (e.g., pole-top antenna, management
8 equipment below the neutral/separation space, battery back-up, etc.), oftentimes
9 connected to low voltage power and coordinated with wireline attachments (e.g. fiber
10 optics).

11 a) Provide a specific reference from the ESA standards or other applicable safety
12 standards, if any, which indicates the unused space on the pole is “reserved for
13 clearance.”

14 b) Is reservation of the unused space reserved by THESL only?

15 c) If this space is reserved for clearance, are there any attachments that are allowed in
16 this space?

17 d) List all types of attachments on THESL poles in both the unused and useable space,
18 including CATV, ILEC and municipal-owned equipment, signage.

19

20 **RESPONSE:**

21

22 Mr. Starkey has been advised by THESL that the portions of THESL Poles which are
23 reserved for clearance or distribution facilities is determined by reference to THESL
24 standards as well as external guidelines such as CSA Standard 22.3 No. 1. Please see
25 Tab 5.1, Schedule 1, Attachment 1, as well as section 5.10 of CSA Standard 22.3 No. 1.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1

2 b) If by “unused space” CANDAS means the “clearance space”, then this space is
3 not reserved by THESL for its own use.

4

5 c) Please see the response in Tab 5.1, Schedule 13, part (e) for NDAs that THESL
6 permits to be attached to THESL Poles below the communications space.

7

8 d) For a list of all NDAs that THESL permits to attach within the clearance,
9 separation and communications spaces on THESL poles, please see the responses
10 in Tab 5.1, Schedule 13, part (e) and Schedule 15.

11

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 18:**

2 **Reference(s):** **Starkey, page 18, lines 4 to 12**

3

- 4 a) Did THESL review the “As-built” drawing referenced on page 18 of Mr. Starkey’s
5 Affidavit prior to it being built?
- 6 b) Did THESL approve this drawing?
- 7 c) Did THESL allow this equipment to be attached to a THESL pole?
- 8 d) If the answer to (b) or (c) is yes, explain why this structure was acceptable to THESL,
9 particularly in relation to its “substantially larger” size and extension beyond the
10 communications space.
- 11 e) Could the attachment(s) described be minimized on the pole if a pole top antenna was
12 permitted?
- 13 f) Describe whether the attachment configuration simply ‘extends 8 feet’ on the pole or
14 if it actually occupies 8 feet (line 11), thereby precluding other attachments within
15 that 8 foot space.

16

17 **RESPONSE:**

18

- 19 a) Yes.
- 20 b) Prospective attachers are responsible for creating and certifying their own
21 drawings. THESL granted Permit 2009-00784 for this proposed installation, as
22 shown in the drawing.
- 23 c) Yes.
- 24 d) THESL does not agree that the structure was “acceptable” to THESL. Please see
25 the response in Tab 5.3, Schedule 1.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

THESL had advised Mr. Starkey of the following:

THESL entered into a contract with DAScom dated August 1, 2009 (the "Contract") which provided that THESL would process DAScom's permit applications for a defined list of "attachments" in accordance with that agreement. In particular, the Contract provides that:

"Proposed Attachment" means any material, apparatus, equipment or facility owned, in full or in part, or controlled and maintained by the Licensee that Licensee is requesting permission from the Owner to Affix, without limitation:

- (i) Overlashed cable;
- (ii) Service Drops Affixed directly to the Owner's poles;
- (iii) Service Drops Affixed In-span to a Strand or Messenger supported by the poles of the Owner;
- (iv) Attachments owned by the Licensee that emanate from a cable not owned by the Licensee;
- (v) Messenger or Strand;
- (vi) Cable Riser/Dips; and
- (vii) Power Supply/Rectifiers; and
- (viii) other equipment as may be approved by the Owner, in its sole discretion."

Pursuant to negotiations between THESL and DAScom and the wording in the Contract as noted above (specifically subsection (viii) of the definition of "Proposed Attachment"), THESL expected that if DAScom wished to attach

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 equipment not specifically enumerated in the Contract, that it would advise and
2 seek approval from THESL's senior management of same.

3

4 In fact, CANDAS submitted permit applications for wireless equipment that was
5 not specifically enumerated in the Contract (the "Unauthorized DAScom
6 Attachments"), and THESL front line permit processing staff did not appreciate the
7 distinction between this non-enumerated equipment and that which was
8 enumerated in the Contract. THESL front line staff accordingly processed permit
9 applications for wireless equipment, subject to it satisfying the permit application
10 process requirements in the ordinary course.

11

12 The DAScom attachment that is the subject of this interrogatory is one such
13 Unauthorized DAScom Attachment. THESL has stated that it intends to continue
14 to issue permits in accordance with the terms of the Contract. Please see letter
15 from THESL to DAScom dated February 5, 2010, attached as Attachment 1.

16

17 e) No. A pole top antenna is by definition on the pole.

18

19 f) The DAScom equipment as shown in the drawing occupies the communication
20 space and precludes any other attachments where that equipment is attached. It
21 may not be possible to attach other communications wires while maintaining the
22 clearances and separations required in the THESL Standards.

Attention: Oliver M. Valente

Dear Mr. Valente:

Re: Agreement for Licensed Occupancy of Power Utility Distribution Poles
("Agreement")

Further to our meeting, please be advised that Toronto Hydro-Electric System Limited will continue to entertain applications for permits and process those applications in accordance with the terms of the Agreement and to exercise its discretion as described in the definitions of Attachment and Proposed Attachment as it relates to wireless and other equipment.

Yours truly,

Lawrence D. Wilde

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 19:**

2 **Reference(s):** **Starkey, page 19, line 1 to page 20, line 10**

3

4 Under the heading “The CCTA Decision Contemplates Small Attachments Within the
5 Communications Space” in answer to the question Do the wireless pole attachments
6 described by CANDAS appear to be consistent with the pole attachments provided for in
7 the CCTA decision?” Mr. Starkey answers “No”.

8 a) Confirm whether in Mr. Starkey’s view, wireline attachments associated with
9 wireless systems, such as DAS, are covered by the CCTA Order.

10 b) Explain whether Mr. Starkey’s testimony applies to Ontario generally, Toronto
11 proper, or to the greater Toronto area. Specify each instance in which the geographic
12 area referred to is ambiguous, unspecified or incorrectly stated.

13 c) Identify statements, if any, in the CCTA Order or in ESA standards to the effect that
14 the power space is to be used exclusively by the LDC?

15 d) Confirm that ESA standards define separations needed between supply conductors
16 and other equipment to be attached to the poles.

17 e) In Mr. Starkey’s view, are all pole top antennas inherently out of compliance with
18 relevant safety code?

19 f) Would the placement of pole top antennas increase the range of each antenna and
20 therefore reduce the total number of antenna necessary to cover the same area?

21 (i) If not, explain what Mr. Starkey means at page 10, line 20 of his Affidavit,
22 where he states: “The placement of these antenna in relation to the
23 propagation properties of the equipment at issue is an attempt to provide
24 necessary RF signal to as many potential customers as possible”.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 g) Mr. Starkey observes that “CANDAS’ proposal does not provide any limits, or even
2 expectations, as to the pole space used by any particular wireless attachment.”
- 3 (i) Explain how this could be the case since CANDAS provided the drawings of
4 the nodes that were approved by THESL prior to the adoption of their no
5 wireless policy.
- 6 (ii) Were these drawings, in Mr. Starkey’s opinion, not representative of the type
7 of equipment DAS companies and wireless attachers would likely place on
8 utility poles? Explain the basis of Mr. Starkey’s opinion.
- 9 h) Did the CCTA Order specifically contemplate the addition of CATV power supplies
10 and other similar hardware used by wireline carriers?
- 11 (i) Explain and cite references.
- 12 (ii) If not, explain the basis upon which this equipment is being permitted on
13 utility poles.
- 14 (iii) If so, what was the Board’s treatment of this equipment?
- 15 (iv) Does this equipment differ materially in size or shape from equipment such as
16 battery units and optical converters used to provide wireless services?
- 17 (v) Is this equipment more or less aesthetically pleasing than wireless equipment?
- 18 (vi) Did the CCTA Order allow for attachment of this equipment outside the
19 communications space?
- 20 (vii) Are CATV power supplies and other similar hardware used by wireline
21 communications attachers attached on THESL poles outside of the
22 communications space? If so, where on the poles is this type of equipment
23 permitted?
- 24 i) Confirm whether Mr. Starkey agrees or disagrees with the following: CATV power
25 supplies and other similar hardware used by wireline communications attachers are

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 equivalent or substantially similar, to wireless equipment (e.g. optical converters and
2 battery units) required for DAS in that (a) the equipment is invariably attached to the
3 continuous wireline facilities/cables, (b) it is necessary to fully effectuate and (c) use
4 the wireline facilities/cables and it is at intermittent points along the fibre route. If
5 Mr. Starkey does not agree, explain.

6 j) Confirm whether Mr. Starkey agrees or disagrees with the following statement:
7 Therefore, in essence a DAS network is simply a fibre network with intermittent
8 equipment attached to it in order to fully utilize that fibre network. If Mr. Starkey
9 does not agree with this statement, explain the basis of the disagreement.

10

11 **RESPONSE:**

12 a.) Mr. Starkey believes that wireline attachments fitting the definition of
13 "attachment" in the Settlement Agreement are "covered" by the *CCTA Decision*.

14

15 b.) The cited portion of Mr. Starkey's affidavit does not include a geographic
16 component for which a reasonable answer could be provided to the question.
17 Instead, it generally discusses what was described as the "communications space"
18 within the *CCTA Decision*.

19

20 c.) Mr. Starkey has not stated that " the power space is to be used exclusively by the
21 LDC." Mr. Starkey's Affidavit at the cited location, as well as other portions of
22 his Affidavit, describe how the CCTA Decision contemplated attachments only
23 "within" the communications space (i.e., excluding the "supply" or "power"
24 space).

25

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 d.) Mr. Starkey understands from his discussions with Ms. Byrne that CSA Standard
2 C22.3 No. 1 would apply in this circumstance, which standard is adopted pursuant
3 to Ontario Regulation 22/04 (*Electrical Distribution Safety*).
4
- 5 e.) No. Mr. Starkey has provided no indication that he believes pole top antennas are
6 out of compliance with any safety code.
7
- 8 f.) Though many factors are involved, as a general principle, placement of the same
9 antenna at higher elevation (all else equal) will increase the range within which
10 devices can utilize radio waves transmitted by the antenna.
11
- 12 f.) i Not applicable.
13
- 14 g.) i CANDAS takes the position that the *CCTA Decision* encompasses wireless
15 attachments primarily because the *Decision* applies to any Canadian Carrier.
16 CANDAS' request for relief in its application encompasses all possible wireless
17 attachments, and is not in any way restricted to the particular DAS attachments
18 explained in the drawings included in CANDAS' evidence. While that drawing is
19 helpful to understand a particular attachment configuration, CANDAS has simply
20 not addressed factual issues relating to what other times of wireless attachments
21 could be included within its requested order.
22
- 23 g.) ii Please see the response in part (g)i above.
24

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 h.) The *CCTA Decision* contemplated attachments meeting the definition of
2 "Attachment" at Appendix B of the *Settlement Agreement* upon which the *CCTA*
3 *Decision* was based. To the extent a CATV power supply is "equipment or [a]
4 facility owned by the Licensee which the Owner has approved for Affixing to
5 poles or other equipment," it would meet the definition of attachment as
6 contemplated by the *CCTA Decision*.
7
- 8 h.) i Please see the response in (h) above.
9
- 10 h.) ii Please see the response in (h) above.
11
- 12 h.) iii Please see the response in (h) above.
13
- 14 h.) iv As a generality the answer is "no," though various manufacturers and equipment
15 types are likely to vary materially.
16
- 17 h.) v Mr. Starkey does not find one type of equipment versus the other to have
18 substantially disparate aesthetic characteristics.
19
- 20 h.) vi Mr. Starkey is of the opinion that the *CCTA Decision* did not prescribe what is
21 "allowed," but instead, what is obligatory. The *CCTA Decision* does not appear to
22 require attachments outside the "communications space."
23
- 24 h.) vii –Mr. Starkey understands from his discussions with Ms. Byrne that yes, this type
25 of equipment is permitted in or below the communications space.

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

- 1
- 2 i.) Not confirmed. Mr. Starkey believes the statement purposefully ignores the fact
- 3 that the CATV equipment listed is required only periodically throughout a CATV
- 4 route. The vast majority of CATV pole attachments will not require the presence
- 5 of this additional equipment, whereas, a DAS attachment will require this type of
- 6 equipment (and other, additional equipment) at each location.
- 7
- 8 j.) Not confirmed. Please see the response in part (i) directly above.
- 9

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 22:

Reference(s): **Starkey, page 22, lines 1 to 4**

Under the heading, WHY ARE THE ECONOMICS ASSOCIATED WITH WIRELESS ATTACHMENTS LIKE DAS ANTENNAE DIFFERENT FROM TRADITIONAL CABLE ATTACHMENTS? Mr. Starkey's states "The primary difference is the "barriers to entry" that exist with respect to alternatives supporting traditional wireline attachments but are absent for wireless attachments. The primary theory supporting regulated rates, terms and conditions for utility pole attachments is the notion that utility poles represent an 'essential facility.'"

- a) Identify the specific barriers to entry that exist for wireline attachers that do not exist for wireless?
- b) Are the cost and timing of securing entitlements, permits and authorizations a factor for wireline attachers when evaluating these barriers to entry?
- c) Is the cost to implement networks using alternate facilities a relevant factor when deciding if and when a barrier to entry is significant enough to classify utility poles as essential facilities?
- d) If cost, timing, approvals are not factors, list what factors are viewed by the Board as decision metrics associated with these barriers to entry.
- e) When deciding to place overhead lines and poles
 - (i) Did the LDCs have the option to place their facilities underground?
 - (ii) Did the ILEC and CATV companies have the option to place their facilities underground?
 - (iii) If the answer to either (i) or (ii) is yes, explain factors that may have contributed to the decision to place lines overhead.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 f) Did either the ILEC or CATV companies attempt to place all new poles instead of
2 using existing facilities owned by LDCs?
- 3 g) Was the addition of new poles contemplated by the Board in the CCTA Order? State
4 the Board's conclusion in this regard.
- 5 h) If wireline companies have options to use these alternate methods of placing their
6 facilities, (*i.e.* installing them below ground), how can overhead lines be essential
7 only for wireline and not for wireless carriers?
- 8 i) Were the expense and timing associated with placing CATV cables underground
9 considered by the Board during the proceeding leading up to the CCTA Order?

10

11 **RESPONSE:**

- 12
- 13 a.) Please see pages 22-23 of Mr. Starkey's affidavit.
- 14
- 15 b.) Yes.
- 16
- 17 c.) The availability of alternative methods of entry, and costs associated with those
18 alternatives, are a factor in evaluating the presence of an essential facility.
- 19
- 20 d.) Not applicable.
- 21
- 22 e.) i THESL's distribution system was developed over the past 100 years to meet the
23 growing electricity demand in its service territory. This question is entirely
24 hypothetical in that it assumes that THESL, or its predecessors, had a choice
25 when placing its distribution plant above ground or underground. This was not
26 always the case over the 100 year history of the utility. THESL's distribution
27 plant does consist of both above ground and underground infrastructure. Absent

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 environmental, legal/regulatory or other constraints undoubtedly present in some
2 circumstances, LDCs currently have the option of installing underground plant.

3
4 e.) ii Absent environmental, legal/regulatory or other constraints undoubtedly present
5 in some circumstances, ILEC and CATV companies have the option of installing
6 underground plant.

7
8 e.) iii Terrain, environmental factors, safety and other operational factors, economics,
9 etc.

10

11 f.) Objection. The question is vague and ambiguous as to which ILECs or CATV
12 operators the question is referring to. If the question is intended to ask about all
13 ILECs and/or all CATV operators, than it is overly broad and unduly burdensome
14 to ask that Mr. Starkey evaluate what each such provider might have considered.

15

16 g.) The Board appears to have addressed this issue with respect to wireline
17 attachments with the following statement found at page 3 of the *CCTA Decision*:
18 "Duplication of poles is neither viable nor in the public interest."

19

20 h.) Please see Section 3 of Mr. Starkey's affidavit. See also *Outdoor Distributed*
21 *Antenna Systems and their role in the Wireless Industry*, Industry Report, LCC
22 International, Inc., filed by EDA in this docket on September 2, 2011.

23

24 i.) Mr. Starkey did not see any reference to those issues in the portions of the record
25 he reviewed.

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 23:**

2 **Reference(s):** **Starkey, Section III, page 22**

3

4 Mr. Starkey states:

5 The primary difference is the "barriers to entry" that exist with respect to alternatives
6 supporting traditional wireline attachments but are absent for wireless attachments. ...

7 For example, the right to attach cables to a single utility pole would be of little value to a
8 telecommunications or CATV provider without the right to further extend the cable to
9 additional poles.

10 a) In relation to a wireline telecommunications network, describe what corresponds to
11 point A and point B in the illustration on page 22.

12 b) Are wireline telecommunications and CATV infrastructure always attached to utility
13 poles? If not, to what other structures are they attached?

14 c) In an area with existing utility poles, would it be reasonable to force a wireline
15 telecommunications or CATV provider to deploy or augment its network by
16 constructing new underground conduit or ducts, ground furniture, or other structures?

17 d) Discuss the factors that will dictate whether in an area with existing utility poles, a
18 wireline telecommunications or CATV provider will deploy or augment its network
19 using the existing network of utility poles, underground conduit or ducts, ground
20 furniture, or other structures.

21 e) In the diagram provided at page 22 of Mr. Starkey's Affidavit, could Points A and B
22 be considered representative of DAS nodes?

23 (i) If not, explain in detail why.

24 (ii) If so, is it equally true that the right to attach wire or cable to a single utility
25 pole in a DAS network would be of little value without the right to further

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 extend the wire or cable to additional poles?

2 f) Indicate whether Mr. Starkey agrees that one of the major challenges and barriers to
3 entry for a new wireless carrier is wireline connectivity/backhaul?

4 (i) If Mr. Starkey does not agree, describe in detail the basis of this conclusion.

5 Specifically address the issue in any case where several of the competitors are
6 wireline providers.

7

8 RESPONSE:

9 a) Point A and Point B are generic locations simply meant to indicate that the pole
10 structure supports cables in a route between two specifically designated points on a
11 map.

12

13 b) No. Generally, such facilities may either be placed in conduit/duct (underground
14 facilities) or buried directly below ground level. They may also be attached in short
15 spans to racking or other structure in or around buildings.

16

17 c) The Board did not believe so. Please see the response in Tab 5.2, Schedule 22, item
18 (g).

19

20 d) Terrain, environmental factors, safety and other operational factors, economics, etc.

21

22 e) They were not intended to be. Please see the response in (a) above.

23 (i) Please see the response in (e) directly above.

24 (ii) Objection, the question is vague and ambiguous. Notwithstanding the vague

25 nature of the question, Mr. Starkey responds as follows: If DAS must rely upon

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 fiber optic cable to backhaul traffic to core network elements (which current
2 configurations apparently do), then access to a utility pole for placement of a DAS
3 antenna (and supporting equipment), without the ability to access fiber optic cable
4 would appear to provide little value to the DAS operator.
5
- 6 f) Mr. Starkey agrees that backhaul is a major issue (i.e., challenge) for any wireless
7 carrier.
8 (i) Not applicable.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 29:

Reference(s): Starkey, page 27, lines 6 to 9

Mr. Starkey states “The City of Toronto maintains a database similar to that managed by Industry Canada that identifies potential sharing sites. At present, the database includes 140 pages of company names, location addresses, city ward numbers and antenna heights. These data identify more than 7,000 antennas operating within the city of Toronto.”

- a) Mr. Starkey to advise how many different entities control the 140 pages of the potential sharing sites in the City of Toronto’s database.
- b) How many different entities own the utility poles, comprised of hydro poles, lampposts and streetlights with overhead wires (classified as distribution poles) in public right of way in Toronto?
- c) Given the high number of unique owners of all of macro sites on the list, would macro site owners be able to assert monopoly control on these assets?
- d) Would the small number of owners of the utility pole with distribution wires attached be able to assert monopoly control on these assets?
- e) Of all of the owners cited in Mr. Starkey’s reference, how many of the total number of sites are owned and/or controlled by the existing wireless service providers or incumbents?
- f) Do Canadian incumbent wireless carriers willingly share their antenna tower sites?
- g) Based on this figure, how many of these sites have been made available for leasing to the new entrant wireless service providers?
- h) Has the OEB, CRTC or any third party initiated any formal actions or procedures to ensure that incumbent carriers share their antenna towers.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 i) Of all of the wireless sites, indicate the number of locations that have spare capacity
2 to host additional wireless carriers?

3 j) Can Mr. Starkey explain if the database of sites for wireless siting maintained by the
4 City of Toronto refers or not to the same sites identified in the Industry Canada
5 database? Provide examples.
6

RESPONSE:

7
8 a.) The City of Toronto's database listing referenced by Mr. Starkey appears to have
9 been generated from the Industry Canada ALS database. Neither the 140 page
10 listing nor the ALS database, as accessible to the general public, identify the
11 entities that own or otherwise control the sites of the referenced 7,000 antennas.
12

13 b.) THESL has advised Mr. Starkey that to THESL's knowledge, these types of pole
14 are owned by THESL, THESI, the City of Toronto, and various groups such as
15 the Business Improvement Associations. There are also poles owned by TTC.
16 There may be other pole owners that THESL is not aware of.
17

18 c.) Please see the response in part a) above.
19

20 d.) Objection. The question posed is vague, ambiguous and calls for speculation.
21 More information as to the hypothetical being posed would be required to provide
22 a reasonably accurate answer.
23

24 e.) Please see the response in part a) above.
25

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 f.) Mr. Starkey cannot speak to the "willingness" of each "Canadian incumbent
2 wireless carrier" in complying with Industry Canada rules to share siting
3 infrastructure. Presumably, to the extent they comply with applicable rules, they
4 have made a decision that doing so (i.e., sharing) is better aligned with their
5 interests than not doing so.

6
7 g.) Objection, the question as posed is vague and ambiguous. The reference to "this
8 figure" is unclear and not defined. Notwithstanding this objection, Mr. Starkey
9 responds as follows:

10
11 If the phrase "this figure" refers to the "the total number of sites...owned and/or
12 controlled by the existing wireless service providers or incumbents" as sought in
13 part e), Mr. Starkey has not provided such a figure. See response to part e) above.

14
15 h.) THESL objects to this question as overly broad, unduly burdensome, and not
16 reasonably calculated to lead to the discovery of admissible evidence. As posed,
17 the question's scope includes "any formal actions or procedures" by "any third
18 party" without any time limitation, which could include, for example, any
19 complaints that might have been lodged over the past several decades by
20 broadcasters or other non-wireless service providers seeking access to antenna
21 towers. Notwithstanding this objection, THESL responds as follows:

22
23 Under current Canadian law, Industry Canada retains authority over tower
24 facilities used to support radiofrequency communications. Please see the

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 response in Tab 2, Schedule 1-1 for discussion of Industry Canada's antenna
2 sharing policies and procedures.

3
4 i.) Objection, the question as posed is vague, ambiguous, overly broad, and calls for
5 speculation. Notwithstanding this objection, THESL responds as follows:

6
7 If the term "all of the wireless sites" refers to the locations of the 7,000 antennas
8 identified in the City of Toronto's listing referenced by Mr. Starkey, Mr. Starkey
9 does not possess the information to determine specifically how many of those site
10 locations have spare capacity to host additional wireless carriers. The City of
11 Toronto's database listing referenced by Mr. Starkey appears to have been
12 generated from the Industry Canada ALS database. Neither the 140 page listing
13 nor the ALS database, as accessible to the general public, provide information
14 concerning available spare capacity at those sites. Nevertheless, it is Mr.
15 Starkey's understanding that antenna site sharing or collocation is relatively
16 common. Please see the response in Tab 5.3, Schedule 27, part (c).

17
18 j.) See response to part a) above. However, note that the Industry Canada ALS
19 database contains antenna licensing and location information for all of Ontario,
20 rather than just Toronto. Based on the records contained in the ALS database,
21 there are currently 4,289 Cellular/PCS/AWS antenna sites within Ontario as a
22 whole, as compared to the 1,343 sites that are within 25 kilometers of the center
23 of Toronto, as presented in Attachment MTS-04 to Mr. Starkey's September 2,
24 2011 Affidavit. See Attachment 1 to this data response for a listing of all

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

Attachment 2
(1 page)

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 33:**

2 **Reference(s):** **Starkey, section III, page 33**

3

4 Mr. Starkey states:

5 Rogers intends that traditional 3G and 4G macro cell sites
6 will comprise the largest portions of its wireless network,
7 with smaller, low powered cells (WiFi and Femtocells in
8 this example) delivering coverage in certain densely
9 populated (or dense demand) areas as a compliment to the
10 larger, more traditional macro sites. Note that Rogers does
11 not indicate that it will rely upon DAS to further its
12 wireless capacity needs, instead, it intends to rely upon
13 WiFi offload and femtocell technology (both of which are
14 direct substitutes for the DAS network CANDAS described
15 below): [diagram omitted]

- 16 a) Provide evidence that the Figure reproduced at page 33 actually refers to the network
17 deployment plans of Rogers Communications.
- 18 b) Provide evidence that Rogers Communications does not intend to deploy outdoor
19 DAS systems anywhere.
- 20 c) Provide evidence that Rogers Communications intends to rely on WiFi and femtocells
21 to further its capacity needs, as stated by Mr. Starkey at lines 5 to 7 on page 33.
- 22 d) Would a Heterogeneous Wireless Network deployment look different for an
23 established, incumbent, spectrum-rich carrier versus a new entrant with limited
24 spectrum? Would such a new entrant use more small cells than an established,
25 spectrum-rich incumbent carrier.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 e) Would it exist in high-density areas where it would be a large cluster of small cells?

2 How would these be sited and connected?

3 f) Would a wireless carrier that also has a wireline and/or CATV division potentially
4 deploy small cells differently than a carrier without such relationships?

5 g) To Mr. Starkey's knowledge, in the last 12 months, has THESL been in discussions
6 or otherwise engaged in any way with any third party, including incumbent wireless
7 carriers, regarding attachments on THESL poles for any purpose?

8
9 **RESPONSE:**

10 a) The cited materials are included in a report entitled *Operator Spectrum Requirements*
11 *for Mobile Broadband* that Rogers sponsored and incorporated into its February 28,
12 2011 comments to industry Canada in Canada Gazette Notice No. SMSE-018-10. In
13 its comments and report, Rogers described the steps it was taking to expand its
14 network capacity throughout Canada and that despite its efforts additional spectrum
15 would be necessary for Rogers at some point.¹ As is depicted at p.33 of Mr. Starkey's
16 evidence, the report indicates the steps Rogers and other carriers are generally taking
17 to expand their capacity as follows:

18
19 Operators are pursuing all avenues for expanding capacity including the
20 deployment of additional cell sites, offloading onto alternate networks such as
21 Wi-Fi and femtocells, using spectrally more efficient technologies such as 3GPP
22 Long Term Evolution (LTE), and phasing out less efficient technologies through
23 incentives to subscribers to upgrade their handsets.²
24
25

² See Operator Spectrum Requirements for Mobile Broadband at P.5.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 b) Mr. Starkey's evidence states "Rogers does not indicate that it will rely upon DAS to
2 further its wireless capacity needs." Rogers' comments describe use of femtocells,
3 Wi-Fi offload, deployment of LTE and the addition of cell sites but do not discuss
4 DAS or any plans it has to employ DAS. Mr. Starkey does not take the position that
5 Rogers "does not intend to deploy outdoor DAS systems anywhere."
6
- 7 c) See Rogers' comments and report as discussed in response to (a) and (b) above.
8 Additionally, Rogers has launched a Wi-Fi calling plan for its business customers that
9 off-loads voice traffic as discussed in Mr. Starkey's evidence.³
10
- 11 d) Objection. The question is vague and ambiguous as it relates to what constitutes a
12 "spectrum-rich" carrier versus a carrier with "limited spectrum" (e.g., all carriers have
13 limited spectrum). That said, given that incumbent carrier networks have evolved
14 over many years, they are more likely to be dominated by traditional, macro cell sites
15 rather than newer technologies such as picocells, femtocells, DAS, and Wi-Fi, which
16 have been deployed only recently.
17
- 18 e) This question is vague and ambiguous and cannot be answered as stated. Mr. Starkey
19 does not understand what is being asked.
20
- 21 f) Yes. It has been Mr. Starkey's experience that network operators typically leverage
22 existing assets, personnel, systems and relationships as they address business needs
23 and customer demands. As a result, two different companies, each with different

³ See, for example, <http://thenextweb.com/ca/2011/03/12/rogers-launches-wi-fi-calling-in-canada-for-business-customers/>. See also, http://www.rogers.com/web/content/add-ons/callingservices?tab1_content&submenu5.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 assets, personnel and relationships may choose to address a similar "problem"
2 differently based upon their relative strengths.

3
4 g) Mr. Starkey has no knowledge regarding the extent to which the referenced
5 discussions have or will taken place.

6

7

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 44:**

2 **Reference(s):** **Starkey, page 48, line 7 to page 49, line 3**

3

4 When questioned, CAN EXISTING MUNICIPAL INFRASTRUCTURE BE USED TO
5 SUPPORT DAS ANTENNAS? Mr. Starkey answers “Yes it can” and proceeds to
6 discuss the DAS networks established in the City of Chicago.

- 7 a) How can a comparison be drawn between the City of Chicago that owns its own
8 streetlights but does not own hydro (LDC) poles (these belong to the utility ComEd,
9 which is unaffiliated with the city) and the City of Toronto, which owns Toronto
10 Hydro, the entity that owns the LDC poles and THESI, which owns and controls both
11 the distribution and non-distribution streetlights?
- 12 b) In Ontario, do any other cities similarly own their Hydro generation, distribution
13 infrastructure and/or streetlights?
- 14 c) Strictly as it relates to the City of Toronto, THESI and THESL, how can Mr. Starkey
15 conclude that municipal infrastructure can be used as an alternative, if access to all of
16 these poles is under the new no wireless policy?
- 17 d) Does Mr. Starkey believe that US wireless markets are substantially similar to
18 Ontario wireless markets?
- 19 (i) If not, explain why.
- 20 (ii) If not, also explain why Mr. Starkey continues to reference markets in the US
21 for comparison to Ontario (and/or Toronto).
- 22 (iii) If so, should both markets be regulated similarly?
- 23 e) Does Toronto have similar ordinances to Chicago?
- 24 f) Do other Toronto area towns have similar ordinances to Chicago?
- 25 g) Do all municipalities in Ontario have similar ordinances to Chicago?

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 h) What are the cost differences between 1 km of micro trenching and hanging 1 km of
2 overhead fiber?

3
4 **RESPONSE:**

5
6 a.) Objection, the question is vague and ambiguous as it includes assumptions
7 without providing any support. For example, the question appears to assume that
8 the only municipal infrastructure capable of supporting wireless equipment are
9 LDC poles and streetlights. This assumption ignores traffic signal infrastructure,
10 signage and other municipal infrastructure.

11
12 b.) In Ontario, I understand that electricity generation is typically not directly owned
13 by municipalities, distribution is sometimes indirectly owned by municipalities;
14 streetlights are typically owned by municipalities.

15
16 c.) Please see the response in (a) above.

17
18 d.) i The markets are similar.

19
20 d.) ii Not applicable.

21
22 d.) iii Not necessarily. While market forces may be similar, it is widely accepted that
23 local jurisdictions have the authority to impose regulation that is appropriate in
24 their unique circumstances. Otherwise there would be no basis for local

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 municipalities or regional regulatory authorities to impose regulation that differs
2 from other jurisdictions where similar market activities are taking place.

3
4 e.) Mr. Starkey has not done an extensive review of either Chicago or Toronto city
5 ordinances to be able to determine whether Toronto's ordinances are, in all
6 circumstances, similar to ordinances in Chicago. That said, Mr. Starkey was not
7 able to find a Toronto ordinance similar to Municipal Code of Chicago Chapter
8 10-29-040.

9
10 f.) Please see the response in (e) above.

11
12 g.) Please see the response in (e) above.

13
14 h.) Objection, the question cannot be answered in its current form. Variations in
15 terrain, regulations and myriad other variables for which no information is
16 provided in the question would need to be considered to provide a reasonable
17 answer. Furthermore, it is not clear to Mr. Starkey how this question is relevant
18 given that THESL does not oppose the applicability of the CCTA Decision to
19 wireline, including fiber, attachments.

20

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 4:

Reference(s): **none provided**

(a) Did THESL consult with any Canadian Carrier, including DAScom, Public Mobile, Rogers, Telus and Bell, prior to adopting its “no wireless” policy?

(i) If yes, with whom did THESL consult?

(ii) If yes, what feedback was received and from whom?

(b) Was the THESL Letter served on affected and interested parties? If not, why not?

(c) As of August 13, 2010 how many separate parties had wireless equipment attached to THESL poles? Provide the names of such parties, the number of poles attached to, the type of the equipment so attached, and the date on which those parties first started attaching wireless equipment to the THESL poles.

(d) Is it THESL’s intention to decline to review all attachment agreements with the parties identified in response to (c) at the expiry of their pole attachment agreements with THESL?

(e) Is it THESL’s intention to require all parties, identified in response to (c), to remove their wireless attachments from THESL poles at the expiration of the attachment agreement?

(f) Has THESL had any negotiations or discussions with any of the parties who have attached wireless equipment with respect to terms and conditions on which attachment will be available in the future?

RESPONSE:

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 (a) THESL disagrees with the premise of this question. THESL has not adopted a “no
2 wireless” policy. Please see the response in Tab 5.3, Schedule 1.
3
- 4 (b) THESL’s letter was addressed to the Ontario Energy Board and as it was not filed
5 in the context of any proceeding, so THESL had no obligation to serve on any
6 particular parties.
7
- 8 (c) To produce this information would require an exhaustive examination of THESL’s
9 records and cannot be completed within the timelines of this proceeding. The
10 information has questionable relevance and would be overly burdensome to
11 produce relative to its probative value (if any).
12
- 13 (d) THESL reviews matters of contractual negotiation on a case-by-case basis, and
14 declines to speak to future contingent events in this regard.
15
- 16 (e) Please see the response in (d) above.
17
- 18 (f) THESL is unable to interpret this question as worded.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 5:**

2 **Reference(s):** **none provided**

3

4 (a) Prior to the adoption of the “no wireless” policy, had THESL entered into any form of
5 agreement or other arrangement of any type that allows for wireless equipment, antennas
6 and / or wireline attachments associated with wireless antennas similar to DAS to any
7 type of THESL owned or controlled distribution poles? If yes, please provide any such
8 agreements.

9 (b) Subsequent to the adoption of the “no wireless” policy, did THESL enter into any
10 agreement or other arrangement, of any type, permitting the attachment of antennas and /
11 or wireline attachments associated with wireless antennas on THESL poles? If yes, please
12 provide any such agreements.

13 (c) Subsequent to the adoption of the “no wireless” policy, has THESL approached, or
14 been approached by, any third party to enter into an agreement to permit wireless
15 attachments to THESL owned or controlled poles of any kind (e.g. distribution,
16 streetlight, etc.) or to otherwise allow wireless attachments to THESL poles? If yes,
17 please explain in detail any such discussions and provide any evidence thereof including
18 agreements, business terms or other arrangements.

19 (d) Prior to, or subsequent to, the adoption of the “no wireless” policy, has THESL
20 approached any third party to enter into an agreement to manage, control, use, supervise
21 or otherwise facilitate wireless attachments on THESL poles, whether for THESL’s
22 benefit or a third party’s benefit? If yes, please describe, in detail, any such discussions
23 and provide evidence thereof, including agreements, business terms or other
24 arrangements.

25 (e) Do any third parties currently have any wireless attachments on THESL owned or

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 controlled poles? If yes, provide all applicable agreements regarding these attachments
2 and describe, for each third party,

3 (i) What type of wireless attachment is located on the poles

4 (ii) The total number of each type of wireless attachment located on the poles

5 (iii) The attachment rate, and all other applicable fees, paid by such third party

6 (iv) The permitted term of each wireless attachment

7 (v) Whether there are also wireline attachments associated with any of the
8 wireless attachments

9 (vi) The number of associated wireline attachments

10 (f) Subsequent to, or as a result of, THESL's adoption of the "no wireless" policy, has
11 THESL terminated or otherwise allowed any attachment agreement to expire? If yes,
12 please provide all attachment agreements in place between THESL and each entity that
13 has attached wireless equipment or antenna systems to THESL poles that have been
14 canceled or terminated by THESL as a result of its "no wireless" policy.

15 (g) If THESL is unable to terminate any attachment agreements due to the terms
16 contained therein, please provide details from each of these agreements including the
17 term and termination provisions included in each agreement.

18 (h) Does THESL allow third parties to attach equipment of any kind to THESL poles
19 without the benefit of an attachment agreement? For the purposes of this question,
20 attachments include any and all attachments made by, but not limited to, municipalities,
21 affiliates, subsidiaries (either wholly or partially owned) or any other entity that THESL
22 may allow to attach to distribution poles without a formal, written agreement. If yes,
23 please

24 (i) Disclose each entity with the informal ability to attach to THESL owned or
25 controlled distribution poles

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 (ii) Disclose each entity that attaches any component or piece of equipment with
2 wireless capabilities of any type, kind or nature
- 3 (iii) Provide examples of drawings or specifications as provided by each entity
4 whose equipment has any wireless capability
- 5 (i) Either prior to or immediately following the adoption of THESL's "no wireless"
6 policy, did THESL approve and / or allow any wireless equipment or antenna systems to
7 be placed on any THESL owned or controlled distribution poles? If yes, please explain in
8 detail and provide any supporting documentation related to
- 9 (i) The name of the entity that was allowed to attach
- 10 (ii) Examples of their installations
- 11 (iii) The total number of poles onto which each entity was approved to attach
- 12 (iv) The total number of poles onto which each entity ultimately did complete
13 their attachments
- 14 (j) Does THESL or any THESL affiliate permit the attachment of any form of wireless
15 equipment or antenna systems (including, but not limited to, SCADA, SmartGrid, WiFi
16 and mobile communications) on any of THESL's distribution poles?
- 17 (i) If yes, please list each type of wireless equipment and include all hardware
18 specifications for each component, photos and locations of each type of wireless
19 installation on THESL poles.
- 20 (ii) If yes, please explain how each type of wireless attachment could be attached
21 to alternative structures including, but not limited to, buildings, cell towers, or
22 other structures. If these wireless attachments could not be attached to alternative
23 structures, please explain the reasons why not.
- 24 (k) In the event THESL allows or has allowed wireless equipment to be placed on
25 THESL owned or controlled poles (either under an attachment agreement or informally),

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 regardless of whether such wireless attachments are owned by THESL or by a THESL
2 affiliate or by a third party, or whether such wireless attachments are for THESL's own
3 use, third party use or public use, please describe

4 (i) THESL's policy going forward in relation to placement of THESL's SCADA,
5 SmartGrid, Mobile Communication or other wireless network elements to be
6 installed in the future

7 (ii) THESL's policy regarding existing attachment agreements with any Canadian
8 Carrier and the placement of wireless equipment under current attachment
9 agreements

10 (iii) THESL's plan to renew or terminate all forms of commercial attachment
11 agreements with Canadian Carriers as they become eligible for termination

12 (iv) THESL's policy in relation to THESL's affiliates related to allowing wireless
13 attachments, either informally or under attachment agreement, since the effective
14 date of THESL's "no wireless" policy
15

RESPONSE:

16
17

18 (a) THESL disagrees with the premise of this question. Please see the responses in
19 Tab 5.3, Schedule 1 and Tab 5.1, Schedule 11.
20

21 (b) THESL disagrees with the premise of this question. Please see the responses in
22 Tab 5.3, Schedule 1 and Tab 5.2, Schedule 18. THESL has not entered into any
23 agreement permitting wireless attachments to THESL Poles. As noted in the
24 response in and Tab 5.1, Schedule 18 16, part (a), THESL is not able to tell on the
25 face of wireline applications which applications are to support wireless.

24
25
26

- (c) THESL disagrees with the premise of this question. Please see the responses in Tab 5.3, Schedules 1 and 31. To the extent that this interrogatory seeks information regarding THESI streetlighting assets, THESI is not a party to this proceeding and therefore the information sought is not relevant.
- (d) THESL disagrees with the premise of this question. Please see the response in Tab 5.3, Schedule 1. As stated at paragraph 21 of Ms. Byrne's affidavit, THESL hired seven contract staff in 2010 to process telecommunications NDAs.
- (e) THESL disagrees with the premise of this question. Please see the responses in Tab 5.3, Schedule 1 and Tab 5.1, Schedules 11, 15 and 16. To the extent that this interrogatory seeks further information than provided (in THESL's responses to interrogatories, including those noted above), then production of this information is unduly onerous relative to its probative value and/or irrelevant to this proceeding.
- (f) THESL disagrees with the premise of this question. Please see the responses in Tab 5.3, Schedule 1 and Tab 5.2, Schedule 18.
- (g) Please see the responses in Tab 5.2, Schedule 18 and in particular, THESL's agreement with DAScom. THESL has no agreements for wireless attachments on THESL poles.
- (h) THESL's policy is to have agreements in place with all third party NDA attachers

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 and where these do not exist at present, THESL is seeking to establish such
2 agreements. THESL does have agreements in place with all telecommunications
3 attachers who attach their equipment on primary distribution THESL Poles.
4 Please see the response in Tab 5.1, Schedule 11.

5

6 (i) THESL disagrees with the premise of this question. Please see the responses in
7 Tab 5.3, Schedule 1 and (h) above. Please also see the response in Tab 1,
8 Schedule 12 regarding number of DAScom/Public Mobile attachments to date.

9

10 (j) See THESL response to CANDAS Byrne IR 1 and 15. To the extent that this
11 interrogatory seeks further information, THESL declines on the basis that
12 production of this information is unduly onerous in relation to its probative value,
13 irrelevant and/or in any event, confidential.

14

15 (k)

16 (i) The noted attachments are non-communications attachments and are not
17 relevant to this proceeding;

18 (ii) Please see THESL Standards in Tab 5.1, Schedule 1, Attachment 1 as well as
19 the response in Tab 5.3, Schedule 1. THESL reviews matters of contractual
20 negotiation on a case-by-case basis, and declines to speak to future contingent
21 events in this regard.

22 (iii) Please see the response in (ii) above.

23 (iv) THESL disagrees with the premise of this question. Please see the response
24 in Tab 5.3, Schedule 1. No THESL affiliate has wireless attachments on
25 THESL poles.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 6:

Reference(s): **none provided**

(a) Please list all third parties that have any “non-distribution attachments” (“**NDA**s”) on THESL owned or controlled poles. For each third party, please include

(i) What type of wireless attachment is located on the poles

(ii) The total number of each type of wireless attachment located on the poles

(iii) The attachment rate, and all other applicable fees, paid by such third party

(iv) The permitted term of each wireless attachment

(v) Whether there are also wireline attachments associated with any of the wireless attachments

(vi) The number of associated wireline attachments

(vii) Any applicable agreements with such party that allows NDAs

(b) Please provide engineering drawings and specifications of all NDAs currently attached to THESL poles.

(c) Explain how each type of NDA attached to THESL poles could have been attached to alternative structures including, but not limited, buildings, cell towers, or other structures. If they could not have been reasonably been attached, please explain why.

(d) Please provide engineering drawings and specifications of all non-wireline attachments currently attached to THESL poles and the location of all such attachments on THESL poles. For clarity, non-wireline attachments includes all equipment related to or used in conjunction with wireline attachments such as power supplies, rectifiers, cable TV boxes, etc.

(e) As it relates to Figure 2 of page 3 of the Appendix to the THESL Letter, please provide:

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

(i) a list of all non-wireline (i.e. fibre, cable or other) NDAs attached to THESL poles including:

A. The geographic location of each NDA

B. The specific type of NDA attachment (e.g. surveillance camera, Wi-Fi antenna, battery unit, DAS antenna, etc.)

C. The owner of each NDA

D. The size, weight, dimensions and other physical specifications of each NDA

E. The attachment location on the pole of each NDA (distribution space, communication space, unusable space, etc.)

F. The attachment method (e.g. through bolt, metal band, in-line (i.e. on-cable), etc.)

RESPONSE:

(a)

TYPE	TOTAL NUMBER
Wireline	83,258
transit shelters	297
DAScom wireless antennae	105
rectifier	170
transit	443

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

equipment	
baskets, banners, lighting	1968
traffic signs and signals, police cameras	No Data

1

2

3

Regarding (i) and (ii), see category labelled “DAScom wireless antennae” in the above chart. Please see the response in Tab 5.1, Schedule 11.

5

6

Regarding (iii), the rate applied to telecommunications attachments on THESL primary distribution Poles is \$22.35. Others are not relevant to this proceeding, and in any event, are confidential.

8

9

10

Regarding (iv), once the attachment is on a THESL Pole, the term of the attachment is provided for in the agreement. All wireless attachments currently on THESL primary distribution Poles are DAScom attachments, and THESL’s contract with DAScom provides that the term of the agreement continues through midnight on December 31, 2014.

11

12

13

14

15

16

Regarding (v) and (vi), please see the responses in Tab 5.1, Schedule 16 and 27.

17

18

Regarding (vii), the information requested is not relevant to the current

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 proceeding, production of it is unduly onerous relative to its probative, and it is, in
2 any event, confidential.

3
4 (b) It is not possible for THESL to produce the requested information within the
5 timelines of this proceeding. In any event, production of such information in
6 unduly onerous relative to its probative value.

7
8 (c) THESL believes that wireless attachers have other alternatives available. See
9 evidence of Dr. Yatchew and Mr. Starkey. THESL is mandated to grant wireline
10 attachers access to THESL Poles pursuant to the CCTA Decision, which assumes
11 that such THESL Poles are an “essential facility” for those attachers. Other
12 NDAs are non-communications NDAs and are not relevant to this proceeding. In
13 any event, a more detailed response to this question would depend the
14 circumstances, and no particular facts or circumstances have been provided in this
15 interrogatory.

16
17 (d) It is not possible for THESL to produce the requested information within the
18 timelines of this proceeding. In any event, production of such information in
19 unduly onerous relative to its probative value.

20
21 (e) Please see the responses in Tab 5.1, Schedules 7 and 15.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 7:**

2 **Reference(s):** **none provided**

3

4 (a) Does THESL or its shareholder have an ownership interest in any company or entity
5 that offers any form of wireless or wireline communications services (as those terms are
6 commonly used)? If yes, please provide the name(s) of such entities.

7 (b) Does One Zone (formerly, Toronto Hydro Telecom) currently operate any wireless
8 infrastructure on any THESL owned or controlled distribution poles? If yes, indicate the
9 total number of wireless attachments on distribution poles, street lighting poles with
10 overhead wires and street lighting poles owned or controlled by THESL.

11 (c) If one or more One Zone wireless attachments are located on THESL owned or
12 controlled distribution poles, please provide drawings, specifications and attachment
13 methodology for these attachments on each pole type.

14 (d) How, if at all, do One Zone's wireless attachments differ in any material respect to the
15 previously approved wireless hardware specifications submitted to THESL for
16 attachment of wireless equipment by DAScom.

17 (e) Please describe how One Zone's attachments to THESL owned or controlled
18 distribution poles could have been accomplished on other suitable infrastructure such as
19 roof tops, solar panels, and towers.

20 (f) Please describe the current operational and business relationship, if any, between
21 THESL and One Zone / Cogeco and provide copies of all agreements between these two
22 parties.

23

24 **RESPONSE:**

25 (a) No.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1

2 (b) Please see the response in Tab 5.1, Schedule 11.

3

4 (c) Please see the response in Tab 5.1, Schedule 11.

5

6 (d) Please see the response in Tab 5.1, Schedule 11.

7

8 (e) Please see the response in Tab 5.1, Schedule 11. THESL does not have sufficient
9 information on the technical features of this equipment to permit a response to this
10 interrogatory. As noted in THESL's response in Schedule 5.1, Schedule 27, part
11 (a), it is THESL's understanding that DAScom has entered into an agreement with
12 Public Mobile (perhaps via Extenet, which is not a "Canadian carrier" as defined
13 within the Telecommunications Act) to put up all of the attachments necessary to
14 build Public Mobile's telecommunications network, and that one or both of these
15 parties has entered into an agreement with Cogeco to put up the wireline
16 component of this network. THTI was acquired by Cogeco.

17

18 (f) THESL has searched its records and located no agreements with Cogeco regarding
19 One Zone.

20

21

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 10:**

2 **Reference(s):** **THESL's June 2011 Letter, Section 5**

3

4 "CANDAS does not represent a public interest that is in any way relevant to the Board's
5 mandate. CANDAS represents a consortium of commercial private interests. The public
6 interest in this proceeding centres around: (i) ensuring that LDCs and electricity
7 ratepayers are not subsidizing a private business model and otherwise undermining a
8 competitive market; (ii) ensuring that the safety and reliability of the distribution system
9 is not compromised; and (iii) ensuring that scarce pole attachment space is appropriately
10 value and efficiently allocated among numerous competing demands for that very limited
11 space."

12 (a) Please provide examples of how the introduction of wireless equipment and antennas
13 would compromise the safety and reliability of the distribution system in a way that is
14 different from the installation of

15 (i) Cable TV equipment and wireline attachments

16 (ii) Electricity distribution hardware including transformers, capacitors, breakers,
17 power conductors or other hardware routinely installed on distribution poles

18 (iii) Copper cables, splice enclosures and power supplies

19 (iv) Traffic control boxes, security cameras, public safety hardware

20 (v) SCADA or SmartGrid systems

21 (vi) WiFi equipment and antenna systems

22 (b) What is the estimated number of attachment positions available for each pole type
23 owned or controlled by THESL?

24 (c) What percentage of the poles currently owned or controlled by THESL have
25 attachments? Please provide a breakdown by pole type and identify the number and type

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 of attachments.
- 2 (d) What percentage of the poles currently owned or controlled by THESL have
3 attachments in the communication space? Please provide a breakdown by pole type and
4 identify the number and type of wireless attachments.
- 5 (e) What percentage of the poles currently owned or controlled by THESL have wireless
6 attachments? Please provide a breakdown by pole type and identify the number and type
7 of wireless attachments.
- 8 (f) What percentage of THESL owned or controlled poles have attachments, wireline,
9 equipment or otherwise, in the “unusable space” or otherwise in the space below the
10 communication space?
- 11 (g) Does THESL object to the placement of equipment such as optical converters or
12 battery backup in the “unusable space” or otherwise to the space below the
13 communication space provided appropriate Electrical Standards Association (“ESA”) and
14 other safety guidelines are met? If yes, please explain why THESL objects to placing
15 equipment in the “unusable space” under such conditions.
- 16 (h) Is there any equipment which THESL believes could be acceptable to place in the
17 “unusable space”? If yes, what equipment and under what conditions?
- 18 (i) What percentage of poles does THESL believe are at full capacity and could not
19 support additional attachments if “make-ready” work or additional support, e.g. guy
20 wires, were added?
- 21 (j) Based on the number of poles owned or controlled, or to be owned or controlled by
22 THESL, please explain how the use of approximately 790 poles that were to be used for
23 the wireless attachments of DAScom’s Toronto DAS Network would greatly impact the
24 available attachment space on THESL poles.
- 25 (k) Does THESL believe that there could be more than three attachments in the

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 communications space provided ESA and other safety guidelines were met and the
2 as-built structure would pass structural and wind loading analysis?

3 (l) Has THESL evaluated options for increasing the number if attachments on the
4 distribution poles including;

5 (i) Use of standoff brackets that convert a single attachment to 3 or more wireline
6 attachments

7 (ii) Overlashing multiple cables onto a single messenger cable

8 (iii) Increasing the available communication space on taller poles through power
9 “make ready” engineering and commonly used construction standards and
10 practices

11 (iv) Allowing wireline carriers or antenna attachments to be made on the field
12 side of the pole as opposed to the road side of the pole (pole boxing)

13 (v) Use of the “unused space” for placement of wireless equipment with antennas
14 on the field side of the pole so as to not consume any existing attachment points
15 on the road side of the pole

16 (vi) Decreasing space between wireline attachments to allow for additional
17 attachments or any other means of making reasonable accommodation to all
18 Canadian Carriers making applications to attach

19 If yes, please describe the research that was performed and provide any studies that were
20 produced as a result, including specific references to ESA 22/04, that resulted in their
21 exclusion from consideration. If not, please explain for each numbered section, why
22 these methods haven’t been considered?

23 (m) What is THESL’s criteria for efficiently allocating “scarce pole attachment space”
24 among numerous competing demands? Please provide the decision metrics THESL uses
25 to determine if and when poles are available and who can attach to poles if they are

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 available.

2 (n) Does THESL have any written or unwritten policy regarding reservations of
3 attachment space in the communication space? If yes, which entities are entitled to a
4 reserved space on all or some number of poles?

5 (o) Provide copies of the distribution pole attachment agreement(s) as between Toronto
6 Hydro (as it then was) and Toronto Hydro Telecom (as it then was).

7 (p) Provide copies of the distribution pole attachment agreement(s) as between THESL
8 and Cogeco in respect of the One Zone network.

9 (q) Provide copies of the distribution pole attachment agreement as between THESI and
10 Cogeco in respect of One Zone attachments to poles that are to be transferred to THESL.

11 (r) Do any existing attachers have a contractual right to reserve space on THESL poles?
12 If yes, please disclose who these entities are and what process is used when a Canadian
13 Carrier requests access to poles with available space that are reserved by others with a
14 contractual right to use the available attachment points.

15

16 RESPONSE:

17 (a) THESL disagrees with the premise of this question. In particular, THESL never
18 stated that “the introduction of wireless equipment and antennas would
19 compromise the safety and reliability of the distribution system”, except to the
20 extent that THESL has safety, operational and cost concerns with hosting wireless
21 attachments (which is detailed in the affidavit of Ms. Byrne – see in particular
22 paragraphs 40-55).

23

24 (b) THESL standards do not speak to an estimated number of attachment positions
25 available for each THESL Pole. THESL standards speak to the number of

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 telecommunications attachments allowed on any given THESL Pole: which is
2 three, within the communications space. Please see Standard 23-3100 in Tab 5.1,
3 Schedule 1, Attachment 1.
4
- 5 (c) Please see the responses in Tab 5.1, Schedules 2, 7 part (d) and 15.
6
- 7 (d) Please see the response in Tab 5.1, Schedule 7.
8
- 9 (e) Please see the response in Tab 5.1, Schedule 6.
10
- 11 (f) Please see the responses in Tab 1, Schedule 21; Tab 5.2, Schedule 17; and Tab
12 5.1, Schedules 7 and 15.
13
- 14 (g) THESL cannot answer this question in the abstract. THESL reviews attachment
15 applications on a case-by-case basis (including examining the attachment type and
16 whether the CCTA Decision applies), and before approving any such application,
17 would need ensure that all internal and external standards are met.
18
- 19 (h) Please see (g) above as well as the response in Tab 1, Schedule 21.
20
- 21 (i) Please see the response in Tab 5.1, Schedule 7, part (d). Whether any given
22 THESL pole could not support additional attachments if “make-ready” work or
23 additional support were added, is considered on a case-by-case basis.
24
- 25 (j) Please see the responses in Tab 5.1, Schedules 2 and 7. Placement of wireless

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 ancillary equipment requires connection of that equipment via wireline
2 attachments to the rest of the operator's network, and will therefore create the
3 need for an incremental wireline attachment for all those mini-systems.

4

5 (k) No. Please see (b) above.

6

7 (l)

8 (i) No.

9 (ii) No.

10 (iii) No. Please see (b) above and the CCTA Decision.

11 (iv) No.

12 (v) No.

13 (vi) No. THESL has had no need to evaluate this.

14

15 (m) THESL does not currently have an explicit procedure for "allocation" of THESL
16 Pole Space. THESL processes applications for NDAs on a first-come-first-serve
17 basis while following its current Standards and processes. See affidavit of Ms.
18 Byrne, at paragraph 18, as well as the response in Tab 1, Schedule 1.

19

20 (n) No.

21

22 (o) The information sought is not relevant to this proceeding and in any event, is
23 confidential.

24

25 (p) THESL does not have any records of an agreement with Cogeco in respect of One

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

1 Zone.

2

3 (q) THESI is not a party to this proceeding and therefore the information sought is not
4 relevant.

5

6 (r) No.

7

8

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 11:**

2 **Reference(s):** **THESL's June 2011 Letter, Section 5**

3

4 How many poles does THESL control or own? Please provide a breakdown of pole type
5 (distribution, street Light, etc.) and please provide a detailed assessment of:

6 (a) The scarcity of pole attachment space and include current pole counts

7 (b) Pole counts by number of existing attachments not counting spaces reserved for future
8 use

9 (c) Pole counts by number of existing attachments including spaces reserved for future
10 use

11 (d) THESL's interpretation of the definition of communication space

12 (e) The maximum number of wireline attachments available in the communications space
13 based on THESL's interpretation of the meaning of "available communications space"

14

15 **RESPONSE:**

16 Please see the response in Tab 5.1, Schedule 7, part (d).

17 (a) Please see the response in Tab 5.3, Schedule 10.

18

19 (b) Please see the response in Tab 5.3, Schedule 10.

20

21 (c) Please see the response in Tab 5.3, Schedule 10. THESL does not reserve space.

22

23 (d) THESL's definition of the communication space is what THESL understands is
24 used by the Board; namely, the space above the clearance space and below the

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

- 1 separation space, which is two feet on a typical pole. Please see Standard 23-
2 3100, attached in Tab 5.1, Schedule 1, Attachment 1.
- 3
4 (e) Please see the response in Tab 5.3, Schedule 10. Please see Standard 23-3100,
5 attached in Tab 5.1, Schedule 1, Attachment 1.
- 6

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 12:**

2 **Reference(s):** **none provided**

3

4 Were there any notices of safety hazard or other related notices issued for any wireless
5 attachment which contributed to the adoption to the “no wireless” policy? If yes, please
6 provide copies of such notices, correspondence that accompanied such notices and copies
7 of any approved electrical inspections for any wireless location in which a safety
8 violation was noted.

9

10 **RESPONSE:**

11 No. THESL disagrees with the premise of this question. Please see the response in Tab
12 5.3, Schedule 1.

13

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 13:

Reference(s): THESL Letter, paragraph 5

The THESL Letter defines “wireline attachments” as “any and all pole attachments consisting of wire, cable, or optical fibre, suspended from poles and running continuously between successive poles, used for the purposes of providing electricity distribution or telecommunications services to the public”. The THESL Letter does not mention power supplies, interconnect equipment, splice enclosures, control boxes, battery backup attachments or any of the non-linearly installed hardware placed by electricity distributors.

(a) Does THESL consider all non-linear attachments to be wireless attachments? If no, please clarify how the attachments that are routinely installed by electricity distributors, cable TV companies, ILEC’s and municipalities are materially different, particularly in size, shape, weight or other physical specifications.

(b) What non-linear telecommunications equipment (i.e. equipment not attached directly on a fibre/cable, e.g. cable boxes, battery backup, etc.) are attached to THESL poles?

(i) Please provide a breakdown, by type, of the number of all non-linear telecommunications equipment attached to THESL poles

(ii) Please describe the varying size, weight, shape and other physical specifications of each of these attachments

(iii) Please explain how those specifications differ from the varying size, shape, weight and other physical specifications of wireless attachments

(c) Are all non-linear telecommunications equipment attached on THESL poles (i.e. equipment not attached directly on a fibre/cable, e.g. cable boxes, battery backup, etc.)

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 installed exclusively in the communication space? If no, where else are they typically
2 installed on distribution poles?

3 (d) Are any non-linear telecommunications equipment on THESL poles installed
4 routinely in the “unusable” space of the poles? If yes, please describe

5 (i) The types of such equipment that are allowed in the “unusable space” on
6 THESL poles. Please include hardware specifications, drawings, height, weight
7 and other specifications of wireless attachments

8 (ii) How each piece of such equipment is attached to the pole, including whether
9 such attachment methodologies include through bolts, stainless steel bands or
10 clamping options

11 (e) Are any non-linear telecommunications equipment on THESL poles routinely
12 installed elsewhere on the pole besides the electricity distribution space, “unusable” space
13 or communication space? If yes, please describe for each type of equipment with
14 reference to

15 (i) Where on the pole such equipment is attached

16 (ii) Specifications, drawings, height, weight and other specifications of wireless
17 attachments

18 (iii) How each piece of equipment is attached, including whether such attachment
19 methodologies include through bolts, stainless steel bands or clamping options
20

RESPONSE:

22 a) THESL does not consider all non-linear attachments to be wireless attachments. To
23 the extent that the above-mentioned list is intended to encompass non-
24 communications attachments, they are not relevant to this proceeding. Regarding

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 wireline communications attachments, please see the response in Tab 5.1, Schedule
2 24.

3

4 (b) (i) and (ii) Please see the responses in Tab 1, Schedule 21 and Tab 5.1, Schedule 11.

5 (iii) The DAScom equipment has more components and takes up more vertical space
6 and more volume on the pole.

7

8 (c) Please see response in (b) above.

9

10 (d) No. Please see response in (b) above.

11

12 (e) No. Please see response in (b) above.

13

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 14:

Reference(s): **none provided**

(a) Assuming there is variability in the non-linear telecommunications equipment, please explain how linemen are able to safely navigate and work on poles with these varying types of equipment?

(b) Explain how, using the same techniques, training or other methods described above, linemen would be able to safely navigate and work on poles with similarly varying types of wireless equipment? If they would not be able to safely navigate and work on these poles, explain why.

RESPONSE:

(a) THESL has historically hosted a very small number of non-linear telecommunications equipment.. Please see the responses in Tab 1, Schedule 21 as well as Tab 5.1, Schedules 1 and 5.

(b) THESL has safety concerns with hosting wireless attachments on THESL Poles as discussed at paragraphs 40-46 of Ms. Byrne's affidavit. Please also see the responses in (a) above and in Tab 5.1, Schedule 38.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 15:**

2 **Reference(s):** **THESL Letter, paragraph 1**

3

4 The THESL Letter states “[THESL] wishes to inform the board that, in light of many
5 safety and operational concerns about the attachment of wireless telecommunications
6 equipment to its pole infrastructure that are set out in this letter and its appendix, THESL
7 has adopted a policy not to attach such equipment to its poles.” The following questions
8 address a certain pole outside of 700 University Avenue, Toronto, Ontario. Photos are
9 provided for ease of verification.

10 (a) Is this pole owned by THESL or by THESI?

11 (b) Is this pole a THESI pole or, is it one of the poles that will be transferred to THESL?

12 (c) Is the apparatus at the pole top a wireless antenna system?

13 (d) Who owns the antenna system attached to the pole?

14 (e) If the attached apparatus is permitted by THESL under an agreement, please provide a
15 copy of the agreement that governs this installation.

16 (f) Does THESL intend to renew the attachment agreement for this pole when it expires?

17

18 **RESPONSE:**

19 (a) According to THESL records, the pole is owned by the Toronto Transit Commission.

20 (b) n/a

21 (c) This information is not within THESL’s knowledge.

22 (d) This information is not within THESL’s knowledge.

23 (e) n/a

24 (f) n/a

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 16:**

2 **Reference(s):** **THESL Letter, “There are Substantial Physical Differences**
3 **Between Wireline and Wireless Attachments”, paragraph 1**
4

5 “Both systems [wireline and electricity distribution] are largely composed of wire
6 conductors which must run continuously between successive poles and terminate at the
7 premise of customers in order to provide service.”

8 (a) Are the wireline attachments used to interconnect DAS nodes materially different
9 from wireline attachments used to interconnect cable TV equipment mounted to poles?

10 (b) Are wireline attachments used to interconnect DAS nodes materially different from
11 ILEC telephone cables used to interconnect splice enclosures for fibre optic subscriber
12 line interfaces?

13 (c) Are the dimensions of splice enclosures or cable TV equipment that are mounted in
14 the “unused space” on poles materially different than the wireless equipment installed in
15 the “unused space” on the poles (other than the antenna)? If yes, how are they different?
16

17 **RESPONSE:**

18 (a) Yes. Please see the response in Tab 5.1, Schedule 27, part (b).
19

20 (b) Yes. Please see the response in Tab 5.1, Schedule 27, part (b).
21

22 (c) Yes. The CATV power supply boxes are individual units. The DAScom wireless
23 equipment is a system comprised of several components apart from the antenna
24 which collectively are substantially larger than CATV power supply boxes. Please
25 see the responses in Tab 1, Schedules 19 and 21.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 17:**

2 **Reference(s): Physical Characteristics of DAS Network equipment**

3

4 Does THESL agree that the pole attachments of the Toronto DAS Network that were
5 installed on THESL poles were smaller (in width, height, depth and weight) than the
6 equipment that is routinely attached to THESL poles for cable TV enclosures, pole
7 mounted splice enclosures and cable TV power supplies? If no, explain why not.

8

9 **RESPONSE:**

10 No. Please refer to the response in Tab 5.3, Schedule 16.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 18:**

2 **Reference(s):** **THESL Letter, “There are Substantial Physical Differences**
3 **Between Wireline and Wireless Attachments,” paragraph 2**

4

5 “In contrast [to wireline or electricity distribution], as a category, wireless
6 communications attachments are distinctly different from wireline attachments, and
7 within their category they are highly variable in size and configuration”.

8 (a) How many different versions of wireless attachments has THESL evaluated?

9 (i) Please provide specifications or drawings that were reviewed by THESL in this
10 regard

11 (ii) Please explain where the examples of wireless attachments (or drawings
12 thereof) were obtained

13

14 (b) With respect to the nodes applications filed by DAScom for the Toronto DAS
15 Network, describe how the equipment comprising each node varied as between nodes,
16 having regard to:

17 (i) Size

18 (ii) Weight

19 (iii) Configuration

20 (iv) Attachment method

21 (v) Location on the pole

22 (vi) Other material variations

23 (c) Are there any physical differences between non-wireline cable TV equipment

24 attachments on THESL poles and the Toronto DAS Network wireless attachments (other

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 than an the RF characteristics of the antenna)? If yes, please describe these physical
2 differences.

3 (d) How many different types of cable TV equipment attachments are installed on
4 THESL poles? Please describe and provide examples of each type of equipment.

5 (e) Please describe any physical differences between ILEC splice enclosures installed on
6 THESL poles and the Toronto DAS Network wireless attachments (other than an the RF
7 characteristics of the antenna).

8 (f) How many different types of ILEC splice enclosures are installed on THESL poles?
9 Please describe and provide examples of each.

10 (g) Are there any material physical differences between ILEC splice enclosures installed
11 on THESL poles and cable TV equipment attachments installed on THESL poles?

12 (h) How many different non-wireline components are installed on THESL poles in
13 relation to electric service distribution?

14 (i) If there are differences between the types of equipment installed by cable TV, ILECs,
15 municipalities or other attachers, please describe how THESL was able to work around
16 these variables as it relates to

17 (i) Attachment requirements and specifications

18 (ii) Safety and other engineering considerations

19 (j) How would THESL's training of line crews change if wireless attachments were
20 permitted on THESL owned or controlled poles?

21 (k) Does THESL provide training for line crews for working on poles with THESL's
22 SCADA or communications equipment?

23 (i) If yes, are there measurable differences between commercial wireless systems
24 and wireless communications systems used by THESL or other electricity
25 distributors that would require materially different training for crews

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 (ii) If yes, please describe what differences exist and how the current training
2 programs are lacking or would need to be improved or changed
3

4 **RESPONSE:**

5 (a) THESL declines this interrogatory on the basis that its wording is too vague and
6 ambiguous to answer.
7

8 (b)

9 (i) Size – No variation

10 (ii) Weight – DAScom submissions show two different types of antenna, of
11 different weights. Attached as Attachments 1 and 2 are two drawings that
12 illustrate this difference.

13 (iii) Configuration – No variation

14 (iv) Attachment method – Steel bands on concrete poles, bolts on wood poles.
15 Attached as Attachments 3 and 4 are two drawings that illustrate this
16 difference.

17 (v) Location on the pole – No variation.

18 (vi) Other material variations - None.
19

20 (c) Yes. Please see the response in Tab 5.3, Schedule 16.
21

22 (d) THESL is aware of the CATV power supplies, but does not have a database of any
23 variations of this equipment. Please see the response in Tab 1, Schedule 19 and
24 THESL Construction Standards 23-3400 and 23-3550 in Tab 5.1, Schedule 1,
25 Attachment 1.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1

2 (e) THESL believes that the acronym “ILEC” refers to the in-line splice enclosures
3 used by telecommunications providers. THESL is not aware of any such
4 attachments existing on its poles.

5

6 (f) Please see (e) above.

7

8 (g) Please see (e) above.

9

10 (h) Approximately 9 different types:
11 - hardware used in pole framing
12 - insulators
13 - risers
14 - transformers
15 - switches
16 - surge arrestors
17 - grounding
18 - guying
19 - SCADA or data gathering devices

20

21 (i) Please see the responses Tab 5.1, Schedules 5 and 15.

22

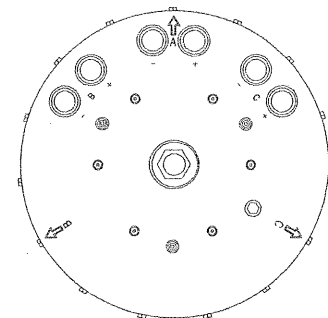

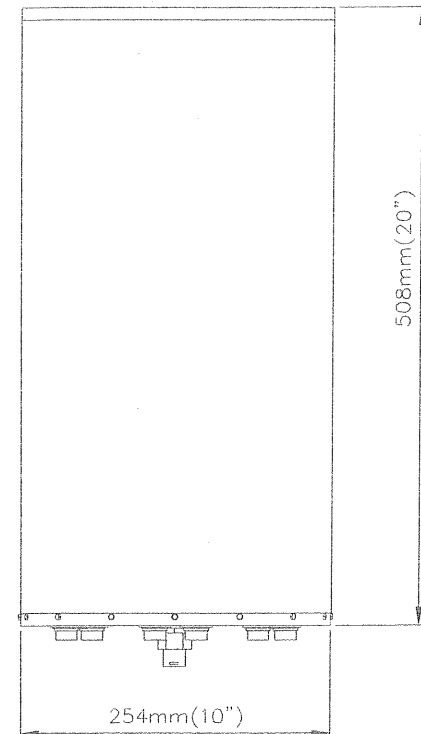

23 (j) Please see (i) above.

24

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 (k) THESL provides training for line crews with respect to all attachments that are
- 2 known to exist on THESL poles. That training pertains to identification of the
- 3 equipment and its physical and electrical characteristics, as well as how to safely
- 4 work with or around the various types of attachments.

ROW GROUND CONSTRUCTION NOTES:

- 120 / 240 POWER REQUIRED FOR 3-WIRE SERVICE
- CONTRACTOR TO REMOVE/CLEAN ALL DEBRIS, NAILS, STAPLES, OR NON-USED VERTICALS OFF THE POLE.
- ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH CITY OF TORONTO REQUIREMENTS.
- ALL LANDSCAPING TO BE RESTORED TO ORIGINAL CONDITION OR BETTER.

STANDARD GROUNDING NOTES:

- GROUND TESTED AT 5 OHMS OR LESS.
- 20mm X 2.0m ROD, CAD WELD BELOW GRADE.
- #6 GROUND AND BOND WIRE.
- WOOD MOLDING STAPLED EVERY 1.0m AND AT EACH END.
- GROUND ROD PLACED 1.0m MIN FROM POLE.

STANDARD CONDUIT NOTES:

- FOR UNDERGROUND USE SCHEDULE 40.
- FOR RISERS USE SCHEDULE 80.
- PLACE 50mm GALVANIZED STEEL CONDUIT FOR ANY CONDUIT UNDER 80mm, CONVERT 100mm DASCOM CONDUIT TO 80mm AT BASE POLE.
- GC TO STUB UP POLE 250mm W/80mm POWER CONDUIT, POWER CO.
- ALL CONDUIT WILL BE EQUIPPED WITH ROPE.

STANDARD TRENCHING NOTES:

- MAINTAIN 1.02m MINIMUM COVER FOR ELECTRICAL CONDUIT.
- MAINTAIN 750mm MINIMUM COVER FOR COMMUNICATIONS CONDUIT

ROW UTILITY POLE CONSTRUCTION NOTES:

- NO BOLT THREADS TO PROTRUDE MORE THAN 40mm.
- FILL ALL HOLES LEFT IN POLE FROM REARRANGEMENT OF CLIMBERS.
- ALL CLIMB STEPS NEXT TO CONDUIT SHALL HAVE EXTENDED STEPS.
- CABLE NOT TO IMPEDE 38cm CLEAR SPACE OFF POLE FACE (12:0000).
- 90° SHOET SWEEPS UNDER ANTENNA ARM. ALL CABLES MUST ONLY TRANSITION ON THE INSIDE OR BOTTOM OF ARMS (NO CABLE ON TOP OF ARMS).
- USE CABLE CLAMPS TO SECURE CABLE TO ARMS; PLACE 50mm EXTENET CABLE ID TAGS ON BOTH SIDES OF ARMS.
- USE 90° CONNECTOR AT THE CABLE CONNECTION TO OMNI DOWN ANTENNAS.
- PLACE GPS ON ARM WITH SOUTHERN SKY EXPOSURE AT MINIMUM 2.0m FROM TRANSMIT ANTENNA, WHICH IS 610mm AWAY FROM CENTER OF POLE.
- USE 10mm CABLE ON ANTENNAS UNLESS OTHERWISE SPECIFIED.
- FILL VOID AROUND CABLES AT CONDUIT OPENING WITH FOAM SEALANT TO PREVENT WATER INGRESS.

ROW GROUND CONSTRUCTION NOTES:

1. 120/240V POWER REQUIRED FOR 3-WIRE SERVICE
2. CONTRACTOR TO REMOVE/CLEAN ALL DEBRIS, NAILS, STAPLES, OR NON-USED VERTICALS OFF THE POLE.
3. ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH CITY OF TORONTO REQUIREMENTS
4. ALL LANDSCAPING TO BE RESTORED TO ORIGINAL CONDITION OR BETTER.

STANDARD GROUNDING NOTES:

1. GROUND TESTED AT 5 OHMS OR LESS.
2. 20mm X 2.0m ROD, CAD WELD BELOW GRADE.
3. #6 GROUND AND BCND WIRE.
4. WOOD MOULDING STAPLED EVERY 1.0m AND AT EACH END.
5. GROUND ROD PLACED MINIMUM 1.0m FROM POLE.

STANDARD CONDUIT NOTES:

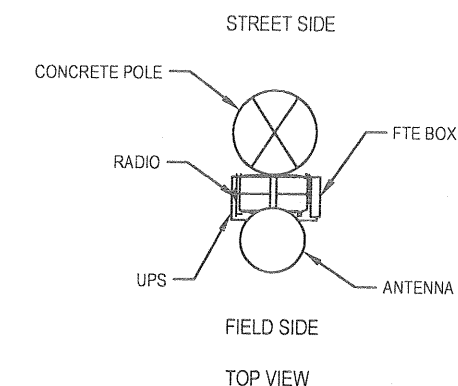

1. FOR UNDERGROUND USE SCHEDULE 40.
2. FOR RISERS USE SCHEDULE 80.
3. PLACE 50mm GALVANIZED STEEL CONDUIT FOR ANY CONDUIT UNDER 80mm, CONVERT 100mm DASCOM CONDUIT TO 80mm AT BASE POLE.
5. GC TO STUB UP POLE 250mm W/80mm POWER CO. CONDUIT, POWER CO.
6. ALL CONDUIT WILL BE EQUIPPED WITH ROPE.

STANDARD TRENCHING NOTES:

1. MAINTAIN 1.0m MINIMUM COVER FOR ELECTRICAL CONDUIT.
2. MAINTAIN 750mm MINIMUM COVER FOR COMMUNICATIONS CONDUIT

ROW UTILITY POLE CONSTRUCTION NOTES:

1. NO BOLT THREADS TO PROTRUDE MORE THAN 40mm.
2. FILL ALL HOLES LEFT IN POLE FROM REARRANGEMENT OF CLIMBERS.
3. ALL CLIMB STEPS NEXT TO CONDUIT SHALL HAVE EXTENDED STEPS.
4. CABLE NOT TO IMPEDE 38cm CLEAR SPACE OFF POLE FACE (12.0000).
5. 90° SHOE T SWEEPS UNDER ANTENNA ARM. ALL CABLES MUST ONLY TRANSITION ON THE INSIDE OR BOTTOM OF ARMS (NO CABLE ON TOP OF ARMS).
6. USE CABLE CLAMPS TO SECURE CABLE TO ARMS; PLACE 50mm EXTENET CABLE ID TAGS ON BOTH SIDES OF ARMS.
7. USE 90° CONNECTOR AT THE CABLE CONNECTION TO OMNI DOWN ANTENNAS.
8. PLACE GPS ON ARM WITH SOUTHERN SKY EXPOSURE AT MINIMUM 2.0m FROM TRANSMIT ANTENNA, WHICH IS 610mm AWAY FROM CENTER OF POLE.
9. USE 10mm CABLE ON ANTENNAS UNLESS OTHERWISE SPECIFIED.
10. FILL VOID AROUND CABLES AT CONDUIT OPENING WITH FOAM SEALANT TO PREVENT WATER INGRESS.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 19:

Reference(s): THESL Letter, “Safety is Compromised,” paragraph 5

“Wireless communications attachments outside the distribution space also have the potential to impede safe and efficient access to both distribution equipment and other wireline attachments particularly in situations involving planned emergency restoration work which occurs frequently on THESL’s system.”

(a) How is this situation unique to wireless equipment attachments and not other attachments occupying an area outside the distribution space on a pole?

(b) How would a wireless attachment located on the field side of a distribution pole impede the access of a lineperson working in a bucket truck located on the road adjacent to the distribution pole?

RESPONSE:

(a) See affidavit of Ms. Byrne at paragraphs 40-46, THESL response to Board Staff IRs 19 and 21, THESL response to CANDAS Byrne IR 15(a). Non-communications attachments are not relevant to this proceeding.

(b) When attachments are on both sides of the pole, there is no open side for the line staff to work on or approach from. Attachments on both sides trap the pole, so that when it is necessary to perform certain work such as removing a pole, the act of placing the new pole and removing the old becomes extremely difficult.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 20:**

2 **Reference(s):** **THESL Letter, “Safety is Compromised,” paragraph 5**

3

4 In addition “the drilling of holes through poles to mount wireless communications
5 attachments below the distribution zone incrementally weakens poles and creates stress
6 concentrations in areas where structural integrity must be maintained to support the
7 significant loads exerted by the distribution equipment above”.

8 (a) Does THESL use bolts or through bolts to attach electricity distribution equipment to
9 their poles?

10 (b) Describe what other methods of attachment besides the use of bolts or through bolts
11 are acceptable and approved by THESL for mounting wireline related equipment, such as
12 cable TV power supplies, traffic control equipment, SCADA equipment or other
13 apparatus to the poles.

14 (c) What is THESL’s current approved method for installing messenger cable anchors in
15 the communication space?

16 (d) Would THESL approve any other attachment methods for equipment, e.g. metal
17 bands? If no, why?

18 (e) If through bolts are used for any attachments to THESL poles, what size bolts are
19 required?

20 (f) Does the ESA specify, or provide guidance on, the number of bolt holes permitted in a
21 particular pole? If yes, what is the guidance?

22 (g) How far apart can bolts be spaced on a distribution pole?

23 (h) What is the current engineering calculation used by THESL to determine the effect
24 one or more bolt holes may have on a pole?

25 (i) Based on this engineering calculation and assuming a 5/8” bolt is inserted into a 5/8”

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 hole and tightened properly, can a calculation be made to determine if the hole will have
2 any effect on the load carrying capacity of a pole? If yes, provide an example of this
3 calculation including the percentage decrease in load carrying capacity each bolt hole has
4 on a common wooden utility pole.

5 (j) In contrast to the vertical load placed on the pole by the electricity distributors and the
6 lateral and vertical loads placed on the poles by wireline carriers, please explain how bolt
7 holes would have a material effect on the structural integrity of the pole generally and as
8 it relates to any engineering study, ESA reference or formal calculations along with a
9 summary of the results.

10 (k) Would clamps that are properly torqued to hold a piece of equipment to a pole cause
11 damage to the outside of the pole making it more or less vulnerable than if bolts had been
12 used to hold the same piece of equipment?

RESPONSE:

14 As a general matter, see affidavit of Ms. Byrne at paragraph 45, which states:

15
16
17 “Such “pole clutter” may also increase wear and tear on THESL Poles, which accelerates
18 THESL Pole deterioration. THESL Poles were not designed or installed with bearing the
19 additional load of wireless attachments in mind. Pole attachments, if designed or installed
20 incorrectly, can overload or damage a pole. Further, to the extent that wireless attachers
21 may require holes to be drilled through THESL Poles to mount wireless communications
22 attachments below the distribution zone, this could incrementally weaken those THESL
23 Poles.”

24
25 (a) THESL uses both bolts and through bolts to attach electricity distribution

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 equipment to THESL Poles.

2

3 (b) Banding is the accepted method of attachment. See the THESL Standards
4 provided in CANDAS Byrne IR#1.

5

6 (c) The current approved method for installing messenger cable anchors in the
7 communication space is contained in THESL Standard 23-3100.

8

9 (c) Banding is already an approved method . See (b) above. THESL would review
10 any other proposed attachment methods on a case-by-case basis.

11

12 (e) Where THESL Standards call for bolts to be used, the bill of materials for the
13 Standard contains the details of which bolt is to be used.

14

15 (d) No.

16

17 (g) THESL Standards implicitly provide for equipment spacing on THESL Poles
18 which positions those holes at certain distances from each other. The specific
19 spacing depends on the particular Standard being used, as well as other contingent
20 facts such as the Pole type, Pole clutter, etc.

21

22 (h) THESL does not perform the engineering analysis with respect to bolt holes used
23 in connection with NDAs. Rather, prospective telecommunications attachers
24 undertake a pole loading analysis for the particular THESL Pole as part of their
25 application for an attachment permit from THESL in the ordinary course. The

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 pole loading analysis is designed to certify to THESL that the proposed
2 attachment is safe in reference to applicable legislation and guidelines. Each
3 incremental hole drilled through a pole has the potential to weaken the structural
4 integrity of that pole. See also paragraph 45 of Ms. Byrne's affidavit.

5

6 (i) n/a

7

8 (j) n/a

9

10 (k) THESL believes that a properly installed band would not cause damage. Banding
11 is preferable to bolts as with bands, the risk of damage is lower.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 21:

Reference(s): THESL Letter, “Pole Attachment Space is a Scarce Resource,”
paragraph 2

“In any situation in which power or signal wireline equipment is required to be suspended above ground, there is no feasible alternative to utility poles, particularly as the systems reach their terminal points and homes and other premises”.

(a) In what situations is it not feasible to place wireline facilities and cables underground and why?

(b) Can trenches, dug in the right of way, be considered a viable alternative to utility poles for wireline carriers, and if yes, why?

(c) Do underground installations represent suitable alternatives to utility poles for wireline and electricity distribution poles? Please explain why or why not.

(d) If not, in areas where no utility poles exist, how is electric service and other wireline services provided to customers?

RESPONSE:

(a) This question is answered in the above-quoted excerpt, namely, “In any situation in which power or signal wireline equipment is required to be suspended above ground”. In the CCTA Decision, the Board mandated that THESL provide wireline attachers access to THESL Poles on the basis that such Poles are an “essential facility” for wireline attachers.

(b) Please see the affidavit of Mr. Starkey, at pages 21-23.

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

1 a. Please see (b) above, as well as the response in Tab 4, Schedule 1.

2

3 (d) Please see (c) above.

4

5

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 22:**

2 **Reference(s):** THESL Letter, Appendix 22, paragraph 6, Communications
3 **space**
4

5 (a) Please confirm that a minimum of 5 attachment points on a distribution pole are
6 viable assuming 1 at 0", 2 at 6", 3 at 12", 4 at 18" and 5 at 24".

7 (b) Is there an ESA standard that limits the number of attachments permitted in the
8 communication space of a distribution pole? If yes, please provide the reference for this
9 standard.
10

11 **RESPONSE:**

12 (a) It is not possible to confirm this because it depends on the nature of the
13 attachment(s) being considered.
14

15 (b) No. This question implies that ESA, rather than THESL, standards are the proper
16 point of reference for electrical safety for the distribution system in the City of
17 Toronto. This assumption is incorrect. All THESL standards have been developed
18 in accordance with O.Reg. 22/04. The relevant THESL standards have been
19 provided in the response in Tab 5.1, Schedule 1.
20
21

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 23:

Reference(s): **none provided**

(a) Does THESL limit attachments in the communication space to a certain number? If yes, what is the limit and please explain the rationale for that limit.

(i) Please explain any engineering or other mechanical reasons to limit the number of attachments.

(ii) Please explain any economic reasons the number of attachments are limited.

(b) Are all THESL poles limited to this same number of attachments? If not, please explain any other limitations on the number of attachments.

(c) Is THESL aware of any other Ontario electric utilities limiting the number of attachments in the communications space to 2.5 or 3 or fewer? If so, please identify those electric utilities.

RESPONSE:

(a) See THESL Construction Standards 23-3100 and 3200, attached as Tab 5.1, Schedule 1, Attachment 1. The THESL Standards limit the number of telecommunication attachments per pole to three (within the two feet of communications space).

(i) This number of attachments is an efficient allocation of the communications space, while ensuring that safety requirements such as clearances and separations are met.

(ii) THESL's development of its Standards in this regard is driven by the engineering rationale (see (i) above) as well as the assumptions used in the CCTA Decision for purposes of rate development. Such assumptions include

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 approximately 2.5 attachments per THESL pole within two feet of
2 communications space. THESL has grossed up this number of attachments per
3 THESL pole to 3.

4

5 (b) Yes.

6

7 (c) THESL cannot speak on behalf of other Ontario electric utilities.

8

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 24:

Reference(s): **none provided**

(a) Does THESL limit the communication space to 2 feet?

(i) If yes, is that limitation the same for all poles?

(ii) If not, please explain the different limitations for different poles.

(b) Can the communications space ever be larger or smaller than 2 feet?

(c) Are there any engineering factors requiring the limitation to 2 feet? If yes, please explain.

(d) Are there any safety requirements (including ESA standards) or other guidelines that limit the communications space to 2 feet? If yes, please reference the safety requirements or other guidelines and explain their significance to the 2 foot limitation.

(e) Are there any regulations which limit the communications space to 2 feet?

RESPONSE:

(a) Yes. Please see the response in Tab 5.3 Schedule 9.

(i) Yes.

(ii) n/a

(b) No. Please see the response in Tab 5.3 Schedule 9.

(c) THESL is responsible pursuant to O.Reg. 22/04 for maintaining the safety of its distribution system. THESLs standards have been developed pursuant to O.Reg. 22/04. This amount of space is considered the acceptable amount to be shared with the telecommunications industry, without incurring additional or more costly

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 electricity distribution assets to be designed, constructed and maintained, and
2 without creating an additional operational or safety burden for the electricity
3 distribution company. THESL Standards in this regard are also developed in
4 consideration of external standards such as CSA 22.3 No. 1, which requires
5 separations and clearances between supply conductors and other equipment
6 attached to poles.

7

8 (d) No, please see (c) above. The CCTA Decision assumes two feet of
9 communications space.

10

11 (e) No, please see (c) above. The CCTA Decision assumes two feet of
12 communications space.

13

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 25:

Reference(s): **THESL Letter, Appendix, paragraph 22-23.**

“In recent years however the number of applications, particularly for wireless communication NDAs, has grown dramatically, due largely to the introduction of “WiFi” networks to the rest of the internet. In 2007, THESL received 392 wireline attachment requests and 0 wireless attachment requests; in 2008 the corresponding figures were 564 and 0; in 2009, 1193 wireline and 250 wireless; and in 2010 wireline requests are projected to reach 1840 with wireless requests reaching 550, for a total in 2010 of 2390 requests.

The surge in requests for attachments has placed a server strain on THESL staff resource and has unavoidably led to longer waiting times for attachment approval. A simple application takes approximately five hours of staff time to process in total; more complicated attachment requests take differing amounts of additional time depending on the complexity. Any requests involving make-ready work on the pole or on existing distribution equipment require significantly more time and planning to execute.”

(a) Since 2007, on a year over year basis, has there been any change in processing time of attachment applications? If yes,

(i) Provide a breakdown of changes in processing time by application type (e.g. wireless, wireline, etc.)

(ii) Describe the metrics and methodology, as well as the data collection methods, used to calculate such changes

(b) Since 2007, on a year over year basis, has there been any change in the time required to perform fieldwork (e.g. “make ready” work) to accommodate attachment applications?

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 If yes,
- 2 (i) Provide a breakdown of changes in processing time by application type (e.g.
- 3 wireless, wireline, etc.)
- 4 (ii) Describe the metrics and methodology, as well as the data collection methods,
- 5 used to calculate such changes
- 6 (c) What methodology does THESL use to prioritize the processing of attachment
- 7 applications, e.g. first in-first out, by application type, by complexity of the application,
- 8 or by entity requesting attachment?

9

10 **RESPONSE:**

- 11 (a) Yes. Please see the response in Tab 6, Schedule 15.
- 12 (i) Please see the response in Tab 5.1, Schedule 16, part (d).
- 13 (ii) n/a
- 14
- 15 (b) Please see the response in Tab 5.1, Schedule 16, part (e) and Tab 6, Schedule 15.
- 16 (i) n/a
- 17 (ii) n/a
- 18
- 19 (c) Please see the response in Tab 5.1, Schedule 16, part (f).

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 28:**

2 **Reference(s):** **none provided**

3

4 (a) Please provide the following information:

5 (i) a list of all wireless attachments that are used in conjunction with electricity
6 distribution, such as SCADA antennas or other SCADA equipment

7 (ii) The geographic location of each wireless attachments that are used in
8 conjunction with electricity distribution

9 (iii) The specific type of wireless attachments that are used in conjunction with
10 electricity distribution

11 (iv) The owner of each wireless attachments that are used in conjunction with
12 electricity distribution

13 (v) The size, weight, dimensions and other physical specifications of each
14 wireless attachments that are used in conjunction with electricity distribution

15 (vi) The attachment location on the pole of each wireless attachments that are
16 used in conjunction with electricity distribution (distribution space,
17 communication space, unusable space, etc.)

18 (vii) The attachment method (e.g. through bolt, metal band, in-line, etc.)

19

20 **RESPONSE:**

21 (a)

22 (i) through (vii) Please see the response in Tab 5.1, Schedule 15.

23

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 30:**

2 **Reference(s):** **none provided**

3

4 In the United States, the FCC has ruled in a manner similar to the Board's holding in the
5 CCTA Order, namely that telecommunications carriers have a right to attach to utility
6 poles. The FCC has also gone on to clarify that this right includes wireless attachments
7 and, just this year, further strengthened the regulations regarding the rights of wireless
8 attachers including the right to receive equitable terms and conditions of attachment
9 access and regulated rates similar to those of wireline carriers.

10

11 Does THESL believe regulations of wireless attachers similar to the FCC's should be
12 adopted by the Board? If not, please explain why the circumstances in Ontario require a
13 different approach.

14

15 **RESPONSE:**

16 Please see the response in Tab 5.3, Schedule 29.

17

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 32:**

2 **Reference(s):** **Application, para. 10.21**

3 **Responses to CCC 1 and CEA 9-1**

4

5 (a) Produce any and all documents, including contracts, evidencing the terms and
6 conditions upon which THESL (or any affiliate) permitted the “One Zone” network to be
7 attached to its poles.

8 (b) How many of THESL’s (or its affiliates’) poles are currently utilized to hold:

9 (i) TTC communications equipment

10 (ii) “One Zone” communications equipment

11 (iii) Any other telecommunications equipment

12 (c) For each of the equipment identified in operations (b)(i), (ii) and (iii) provide:

13 (i) The identity of the pole (by location and alpha-numerical designation)

14 (ii) A photograph of each pole, with all communications equipment clearly visible

15

16 **RESPONSE:**

17 (a) THESL does not have a contract with One Zone for pole attachments. THESI is
18 not a party to this hearing and declines to provide this information.

19

20 (b) Please see the responses in Tab 5.1, Schedules 2, 3, 15, as well as Tab 5.3,
21 Schedule 6.

22

23 (c) THESL is in the process of gathering this data in the ordinary course, but due to the
24 time-consuming nature of the project, it is not possible to have this data available
25 for the purposes of the present proceeding. In any event, THESL declines this

**RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS
COALITION INTERROGATORIES**

1 interrogatory on the basis that production of the information sought is unduly
2 onerous as compared with its probative value, and/or not relevant.

3

4

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

INTERROGATORY 3:

Reference(s): Yatchew, page 4, lines 10-12

Dr. Yatchew states:

“Unlike wireline companies which require continuous connected corridors through which their cables must pass, and which must attach to myriad poles at short intervals, wireless providers can transmit and receive their signals from a relatively few number of facilities, placed on a range of possible support structures.”

(a) Provide detailed technical details within Dr. Yatchew’s personal knowledge to support the assertions in the above-noted citation. Include specific figures and parameters as they relate to the “short intervals” to attach to “myriad poles” faced by wireline companies and in contrast, the “relatively few number of facilities” to which wireless providers may allegedly attach.

(b) Does Dr. Yatchew agree that in a DAS deployment, the nodes require a continuous, connected corridor through which the cable portion must pass, and which, in addition, must attach to myriad poles at short intervals? If no, why not?

RESPONSE:

a) In previous work conducted for the Canadian Electricity Association and relating to the design of systems of poles to support telephone and power cables, I did give consideration to pole spacing issues and how these would affect costs. One of the reasons that poles need to be closely spaced is to ensure that physical lines remain at safe heights. Line sag varies with ambient temperature and with load and it is essential that minimum clearance standards are met. This requirement is met by placing poles at relatively short intervals.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1

2 As indicated by Mr. Starkey, Public Mobile has approximately 120 to 130 wireless sites
3 in a 25-km radius of the center of Toronto. As stated in the affidavit of Ms. Byrne at
4 paragraph 3, THESL currently owns approximately 140,000 distribution poles across
5 its service area.

6

7 b) The statement is ambiguous as it seems to imply that cables are a portion of the
8 distributed antenna system itself. If this is the intent of the statement, then I do not
9 agree. More precisely, I do not agree that, in the sense that is relevant for this
10 proceeding, cables are a “portion” of the distributed antenna system, and that by
11 virtue of this, their antennas merit attachment to poles.

12

13 I would agree that the deployment of a distributed antenna system may require
14 connection to wireline systems. These wireline systems, and not the DAS antennas,
15 require the aforementioned continuous connected corridors.

16

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 13:**

2 **Reference(s):** Yatchew, page 12, lines 3-6

3

4 Dr. Yatchew states:

5 “Rather than relying upon rights of way along corridors throughout a community,
6 wireless systems require facilities to be installed at a relatively small number of locations.
7 Moreover, the antenna systems themselves can generally be placed on private or on
8 publicly owned structures. As a result, an active siting market has developed.”

9 (a) Define “a relatively small number of locations” in terms of the number of sites per
10 square kilometre.

11 (b) In the case of the smaller cell sites referred to by LCC International, Inc.¹, what is Dr.
12 Yatchew’s understanding of the number of sites required according to standard industry
13 practices per square kilometre to meet current and future needs of a mobile wireless
14 network operator?

15 (i) Would Dr. Yatchew’s answer differ depending on whether the mobile wireless
16 network operator is one of the three established incumbent mobile wireless
17 carriers in Canada or one of the new entrant mobile wireless carriers? If so,
18 distinguish between these two cases in the answer provided by Dr. Yatchew.

19

20 **RESPONSE:**

21 a) A wireline system deployed on poles and serving the Toronto area requires at least
22 two orders of magnitude more attachment sites than the number of antenna sites
23 required for a wireless system.

24

25 For example, Public Mobile has evidently been able to launch its service using

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 approximately 130 sites in the Toronto area. Even the proposed DAS deployment
2 would have required less than 800 pole-based sites. In comparison, and as stated in
3 the affidavit of Ms. Byrne at paragraph 3, THESL currently owns approximately
4 140,000 distribution poles across its service area.

5
6 b) If wireless networks become increasingly dependent on short-radius antennas, there
7 will be increasing demand for siting facilities. It is in part this aspect that causes me
8 great concern about the precedential consequences of granting the CANDAS request
9 for access under the CCTA decision.

10
11 Once access is granted to CANDAS even though poles are not an essential facility
12 for CANDAS, there does not appear to be a bright line which would separate those
13 that seek access because of necessity and those that seek access because of
14 convenience. What would prevent applicants, be they new entrants, incumbents or
15 organizations seeking to establish local or community networks, from seeking access
16 to thousands of poles under that same CCTA decision?

17
18 The obvious and preferred solution would be to allow the siting market to operate
19 and evolve and to have utilities participate in that market as they see fit.

20
21

ⁱ LCC International, Inc., Outdoor Distributed Antenna Systems and their Role in the Wireless Industry, filed 1 September 2011 by the Canadian Electricity Association in OEB File No. EB-2011-0120.

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

1 **INTERROGATORY 14:**

2 **Reference(s):** Yatchew, page 12, lines 14-20

3

4 Dr. Yatchew states:

5 “Distributed antenna systems have multiple wireless components. However, they are not
6 wireline systems in the traditional sense of the term. Indeed, the requisite wireline
7 facilities may not even be owned by the DAS owner.”

8 (a) What are the material differences between fibre optic cable attachments used for
9 wireless services and fibre optic cable attachments used for wireline services?

10 (b) Explain why electricity distribution networks and cable distribution network have a
11 greater need to be placed in continuous corridors relative to a smaller cell wireless
12 deployment, as referred to in the LCC International, Inc. report.

13 (c) Is it Dr. Yatchew’s opinion that electricity and cable do not service discrete points?

14

15 **RESPONSE:**

16

17 a) Wireline services require physically continuous corridors for their very existence.
18 Wireless service providers, like many other users of fibre optic cable, require
19 connection to such cable. Users of fibre optic cable do not typically attach to
20 distribution poles. Further, it would be flawed logic to conclude that one user of
21 fibre cable deserves preferential access to distribution poles simply because of
22 their use of that cable.

23

RESPONSES TO CANADIAN DISTRIBUTED ANTENNA SYSTEMS COALITION INTERROGATORIES

- 1 b) As wireless transmissions to and from antennas do not travel through physical
2 cables but along different frequencies of the radio spectrum, continuous corridors
3 for physical assets are not required for the wireless antennas.
4
5 c) No. Electricity and cable do service discrete points, but in order to do, so physical
6 corridors are required.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 5:**

2 **Reference(s):** **none provided**

3

4 With respect to the letter from THESL to the Board of August 13, 2010, please provide
5 copies of all reports, analyses, and communications, including correspondence and
6 emails, in support of the contention that wireless attachments impair operational
7 efficiency and present incremental safety hazards to electricity distributors.

8

9 **RESPONSE:**

10

11 THESL declines this interrogatory. This interrogatory is not on THESL's evidence and
12 no specific reference to the evidence is provided. In any event, production of the
13 materials and information sought is unduly onerous in relation to its probative value,
14 and/or the information and materials sought are privileged as communications between
15 solicitor and client and/or being in contemplation of litigation.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 6:**

2 **Reference(s):** **Affidavit of Mary Byrne**

3

4 In paragraph 28 of her Affidavit, Ms Byrne states that, pursuant to the CCTA Order,
5 THESL has granted wireline attachers access to THESL poles on the basis of those
6 attachments fitting within the communications space on THESL poles and assuming 2.5
7 attachments per pole.

8 a) Please set out the process THESL followed in determining whether a wireless pole
9 attachment application would be granted.

10 b) Does THESL have the discretion to reject an application? If so, what criteria are
11 applied in deciding to reject an application?

12 c) Please indicate how many applications for wireless attachments have been rejected?

13 d) Please provide copies of all documentation related to each such rejection.

14

15 **RESPONSE:**

16 a) Please see affidavit of Ms. Byrne, Paragraph 18.

17

18 b) Yes. The specific criteria are provided in the agreement between THESL and the
19 particular attacher.

20

21 c) 69.

22

23 d) THESL declines this interrogatory on the basis that the requested information is not
24 relevant to this proceeding, and in any event contains confidential customer
25 information.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 7:**

2 **Reference(s):** **Affidavit of Mary Byrne**

3

4 In paragraph 40 of the Affidavit, Ms Byrne asserts that “wireless attachments create
5 unique issues that affect the safety, adequacy, reliability and quality of electricity
6 service”. In paragraphs 42 to 46, inclusive, Ms Byrne provides details of those issues.

7

8 For the period from the CCTA Order to August 13, 2010, please provide all reports,
9 analyses, and communications, including correspondence and emails, describing or
10 reporting on the issues described in paragraphs 42 to 46, inclusive, of Ms Byrne’s
11 Affidavit.

12

13 **RESPONSE:**

14

15 Please see the responses in Tab 1, Schedules 15, 16 and 22, as well as Tab 1, Schedules
16 32, 34, 35, 36, 37 and 38; and Tab 6, Schedule 15. To the extent that this interrogatory
17 seeks further information and material, THESL declines on the basis that production is
18 unduly onerous relative to its probative value, and/or the information and materials
19 sought are privileged as communications between solicitor and client and/or being in
20 contemplation of litigation.

21

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

INTERROGATORY 8:

Reference(s): Affidavit of Mary Byrne

In paragraphs 47 to 50, inclusive, of her Affidavit, Ms Byrne describes what she refers to as “cost concerns with hosting wireless”.

a) For the period from the CCTA Order to August 13, 2010, please provide all reports, analyses, and communications, including correspondence and emails, with respect to the cost concerns referred to in paragraph 47 to 50, inclusive, of Mr. Byrne’s Affidavit.

b) For the period from the CCTA Order to August 13, 2010, please provide the additional costs attributable to attaching wireless communication equipment to THESL’s poles.

RESPONSE:

a) Please see the response in Tab 6, Schedule 15. To the extent that this interrogatory seeks further information and material, THESL declines on the basis that production is unduly onerous relative to its probative value, and/or the information and materials sought are privileged as communications between solicitor and client and/or being in contemplation of litigation.

b) THESL does not track processing cost by type of attachment. Please see also the affidavit of Ms. Byrne at paragraphs 47-50; and the responses at Tab 1, Schedules 15 and 16 and Tab 6, Schedule 15.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 9:**

2 **Reference(s):** **Affidavit of Mary Byrne**

3

4 In paragraph 47 of her Affidavit, Ms Byrne asserts that “the additional complexities
5 posed by wireless attachments discussed above means that THESL staff and crews must,
6 in general, spend more time and effort making special accommodations for those wireless
7 attachments on THESL poles. This inevitably increases our operating expenses.”

8 a) What is THESL’s estimate of the unit cost of each attachment of wireless
9 communication equipment to one of its poles? Please provide a breakdown of the
10 components of that cost.

11 b) What is the cost differential between attaching a wireline attachment and a wireless
12 attachment? Please provide a detailed breakdown for each type of attachment,
13 including all assumptions.

14 c) What are the annual operating costs associated with each type of attachment?

15

16 **RESPONSE:**

17 a) THESL does not track processing cost by type of attachment. Please see also the
18 affidavit of Ms. Byrne at paragraphs 47-50; and the responses at Tab 1, Schedules 15
19 and 16 and Tab 6, Schedule 15.

20

21 b) Please see (a) above.

22

23 c) THESL does not track its costs in this manner. Please see the affidavit of Ms. Byrne
24 at paragraphs 19-21; and the responses in Tab 6, Schedule 15 and Tab 1, Schedule 22.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 11:**

2 **Reference(s):** **Affidavit of Mary Byrne**

3

4 If the Board mandated a policy whereby THESL would be required to attach wireless
5 units, what process would THESL propose to process the applications?

6

7 **RESPONSE:**

8 It is premature for THESL to comment on the terms and conditions of hypothetical access
9 (including the application process that THESL would follow), as this is dependent on
10 factors including the wording of the hypothetical decision that the CCC refers to in this
11 interrogatory.

12

**RESPONSES TO CONSUMERS COUNCIL OF CANADA
INTERROGATORIES**

1 **INTERROGATORY 12:**

2 **Reference(s):** **Affidavit of Mary Byrne**

3

4 In paragraph 56 of the Affidavit, Ms Byrne refers to allegations made by CANDAS.

5

6 Please identify the allegations referred to, and please provide THESL's response to those
7 allegations.

8

9 **RESPONSE:**

10 Please see the response in Tab 5.3, Schedule 1.

11

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 15:**

2 **Reference(s):** **Affidavit of Mary Byrne**

3

4 THESL's current charge for wireline attachers is \$22.35/pole/per year. In addition,
5 THESL has historically charged prospective telecom attachers a \$95 application charge
6 to recover the costs of processing those applications.

7 a) Do these charges fully recover the costs associated with the attachments? If not,
8 please explain the extent to which other customers subsidize the attachments.

9 b) For 2008, 2009, and 2010 please list the number of wireline and wireless attachments
10 on THESL's system and the associated revenue received for each type for each year.
11 What was the estimated annual cost for each type of attachment in each of those
12 years?

13

14 **RESPONSE:**

a) The hosting costs driven by wireless attachments can be divided into two categories: non-incremental asset carrying and maintenance costs related to existing poles, and incremental administrative, application processing, and make ready costs. These costs can also be further divided into two categories depending on whether they are one-time costs or ongoing.

In the CCTA Decision, the formula used to derive the charge of \$22.35 per pole per year predominantly reflected non-incremental costs, or what the Board termed Indirect Costs. Indirect or non-incremental costs are those which do not (materially) vary with the presence of wireless attachments. These were the asset carrying costs including depreciation, return, and taxes, as well as pole maintenance

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

costs. 'Indirect Costs' constituted \$20.43 out of a total of \$22.35, or more than 91% of the total. Of the indirect costs, asset carrying costs were \$18.76, and maintenance costs were \$1.67. 'Direct Costs' or incremental costs were set at \$1.92.

INDIRECT (NON-INCREMENTAL) COSTS

The principle underlying the predominant portion of the \$22.35 rate was that of the sharing of non-incremental costs among pole occupants, rather than recovery of the incremental costs of hosting attachments. The sharing of these costs was based on the proportions of pole occupancy.

Asset Carrying Costs: Although the component parts of the asset carrying costs have varied in different directions since the CCTA Decision, THESL believes that the \$18.76 figure significantly understates the proportion of asset carrying costs that should be borne by wireless attachments, both because: (a) the asset carrying costs for utilities are higher than those represented by the proxy for provincial average costs employed at the time; and (b) the pole occupancy assumed in the formula understates that of wireless attachments. In particular, due to the much greater size and (non-uniform) configuration of wireless ancillary equipment attachments compared to wireline attachments, the assumption of approximately 2.5 attachments per pole is not realistic or appropriate.

If necessary and at the appropriate time, THESL will bring evidence as to its carrying costs and the occupancy factor that it believes should apply to wireless attachments.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

Pole Maintenance Costs: These costs (including tree trimming) may to some degree be affected by the presence of wireless attachments. However, even if it is assumed there are no incremental pole maintenance costs due to wireless attachments, they should nevertheless be shared based on proportions of pole occupancy. While this general principle was reflected in the CCTA Decision, THESL believes that the proxy figure incorporated in the formula understates the share of costs that should be borne by wireless attachments due to the understatement of their pole occupancy. Further, pole maintenance costs themselves may also be higher than those reflected in the proxy figure used in the CCTA Decision. In particular, because wireless attachments were not contemplated in the CCTA Decision or CCTA proceeding, the \$1.67 figure did not take account of the additional complexities posed by the presence of wireless attachments on utility poles, and in particular, the way in which those attachments can lengthen and complicate maintenance work in the ordinary course (see affidavit of Ms. Byrne at paragraphs 40-50).

DIRECT (INCREMENTAL) COSTS

Incremental costs of hosting attachments include items such as application processing, records management, billing and payment processing, and ongoing asset administration costs related to pole management (i.e., relocation of poles etc). In addition, circumstances at individual poles may dictate that make ready work is necessary, ranging from the relocation of existing attachments to pole replacement.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

Incremental costs (excluding make ready work) are reflected to an inadequate extent in the CCTA Decision. That formula reflected a total of \$1.92 per pole per year for ‘Administration Costs’ and ‘Loss in Productivity’. THESL’s position is that, *de facto*, this portion of the rate clearly excludes the considerable costs incurred by THESL to process wireless attachment applications.

A categorical breakdown of these attachment hosting costs is given in the table below.

Cost Type/ Category	INCREMENTAL	NON- INCREMENTAL
ONGOING	Record Keeping, Billing & Payment Processing, Pole Management	Pole Maintenance*, Asset Carrying Costs
ONE-TIME	Application Processing, Make-Ready Costs	

** assumes that incremental pole maintenance costs are not material*

Of the One-Time costs, make-ready costs are charged directly to attachers on a cost-recovery basis in the same manner as other demand-billable work. With respect to application processing costs, THESL sets out below the shortfalls it has experienced between the revenues generated (and credited to customers through revenue offsets) by the \$95 application charge.

	2008	2009	2010
Permit	\$39, 710	\$107,825	\$95,755

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

administration charge (\$95) revenue			
Staff costs to process permits	\$160,781.84	\$114,595.84	\$695,798.80

SUMMARY

THESL believes incremental, ongoing costs exceed the \$1.92 per pole per year provided for in the current rate. Similarly, the actual non-incremental, ongoing asset carrying and pole maintenance costs exceed the amounts of \$18.76 and \$1.67 per pole per month respectively as currently set.

- b) The table below provides information on the number of permits processed, revenue from permit administration, and associated staff costs of the permitting function. It also provides the number of invoiced attachments and the corresponding revenue from the attachment rate. However, THESL has not completed, and cannot complete within the timeline for this proceeding, an exhaustive analysis of the categorical costs set out in a) above that correspond to the attachment revenue. Further, any such cost analysis would be dependant on future contingent factors, such as the Board's decision in this proceeding.

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

Wireless and Wireline Attachments			
	2008	2009	2010
Number of permits	418	1,135	1,029
Number of attachments invoiced	75,462	77,550	79,590
Total revenue from invoices (taxes not included)	\$1,686,576	\$1,733,243	\$1,778,837

RESPONSES TO CONSUMERS COUNCIL OF CANADA INTERROGATORIES

1 **INTERROGATORY 16:**

2 **Reference(s):** **Affidavit of Mary Byrne**

3

4 Please explain what the impacts on THESL's distribution customers would be if the
5 Board were to grant the relief requested by CANDAS. Please explain what measures
6 THESL would take to mitigate any negative impacts of that decision on its customers.

7

8 **RESPONSE:**

9 Were the relief sought by CANDAS to be granted by the Board, THESL and other
10 distributors could expect a surge in applications to mount wireless communications
11 equipment. A significant direct subsidy would flow from ratepayers to the private, profit-
12 seeking companies operating in that market. Furthermore, ratepayers would sustain a
13 significant opportunity cost arising from the fact that the value of service provided would
14 not be reflected in revenue offsets applied to reduce rates, even if those rates reflected the
15 full cost of service, which they do not at present. Please see the response in Tab 6,
16 Schedule 15.

17

18 It is premature for THESL to comment on the measures that THESL would take, as this
19 is dependant on factors including the wording of the hypothetical decision that the CCC
20 refers to in this interrogatory.

Corrected Interrogatories

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 30:**

2 **Reference(s):** Affidavit of Mary Byrne
3 **Section 46: “Further, THESL’s experience is that wireless**
4 **companies prefer to have their attachment antennas mounted**
5 **on THESL Pole tops. However, installing wireless antennas on**
6 **pole tops above energized electric facilities, creates a number**
7 **of additional safety and operational concerns, including: a.**
8 **pole top attachments require workers to pass through**
9 **energized lines to work on those attachments, posing a safety**
10 **risk to those workers operating on THESL Poles”**
11

12 In the case of such installations, is the construction work done by THESL’s staff or by a
13 contractor working on behalf of the communications company?
14

15 **RESPONSE:**

16 This type of work has not occurred to THESL’s knowledge. THESL has reviewed its
17 records and could find no evidence that THESL poles have antennas installed any
18 antenna on or above the separation space. Please also see the response in Tab 5.1,
19 Schedule 11.

RESPONSES TO ONTARIO ENERGY BOARD STAFF INTERROGATORIES

1 **INTERROGATORY 31:**

2 **Reference(s):** Affidavit of Mary Byrne
3 **Section 46: “Further, THESL’s experience is that wireless**
4 **companies prefer to have their attachment antennas mounted**
