REQUESTOR NAME: VECC

INFORMATION REQUEST ROUND NO: **#1 - Supplementary**

TO: **Toronto Hydro-Electric System**
      Limited

DATE: **October 19, 2011**

CASE NO: **EB-2010-0142**

APPLICATION NAME: **2011 Electricity Distribution Rate**
      Application – Supplementary Suite
      Metering Evidence

_____

(Note: Numbering continues from the initial Round #1 Interrogatories)

10.0   Reference: 2012 Cost Allocation (Live), Quadlogic Class,
                           Sheets I6.2, E1, E2 and E3

a)   With respect to Sheet I6.2, please indicate the number of "buildings" associated with the 1,992 Quadlogic customers served at secondary voltages.

b)   With respect to Sheets E1, E2 and E3 please confirm that for purposes of allocating the customer related portion (as established by the Minimum System Method) of Accounts 1830-4, 1830-5, 1835-4, 1835-5, 1840-4, 1840-5, 1845-4, 1845-5, 1850-4 and 1850-5, the "customer count" used was the number of residential Quadlogic customers.

c)   If yes, please explain why the "number of residential customers" was used as opposed to the number of buildings (i.e. connections) using Primary and Secondary assets (as it is the number of buildings and not the number of customers that defines the number of connection points with the THES system).

d)   Please provide a revised version the Cost Allocation where the number of "buildings" using Primary and Secondary assets is used for the Quadlogic customer class as the allocator for the customer-related costs associated with these accounts.
