Kirsten Walli
Board Secretary
Ontario Energy Board ("OEB")
2300 Yonge Street, Suite 2700
Toronto ON M4P 1E4

Dear Madame:

**Re: EB-2011-0027: Summerhaven Wind, LP ("Summerhaven")
REA Update and Land Matters Update**

As the Board is aware, the Facility (as defined in the Application and Pre-filed evidence filed by Summerhaven on February 23, 2011) is being constructed to connect the Summerhaven Wind Farm. Collectively, the Facility and the Wind Farm are subject to the provincial renewable energy approval ("REA") process. Summerhaven wishes to update the Board regarding the REA process.

Summerhaven filed the REA application with the Ministry of Environment ("MOE") on June 14, 2011. The MOE has screened the REA submission according to the requirements set out in Ontario Regulation 359/09 and the application has been deemed complete. The MOE is now undertaking a technical review of the submission. Copies of the documents supporting the REA application as filed with the MOE have been made available for review at the Haldimand County office in Cayuga at 45 Munsee Street north and electronically on the website <http://www.CanadianWindProposals.com>.

Minor project location changes have been proposed since the time of the REA application on June 14, 2011, however none of these changes affect the Facility.

Yours truly,

McCarthy Tétrault LLP
