VECC Question # 1

Reference: Tab1, Schedule 2, Manager's Summary

Preamble: Burlington Hydro's Manager's Summary indicates that the LRAM rate riders are based on the most recent reported load, i.e. 2010 RRR.

Please provide the rationale for using 2010 RRR reported load.

VECC Question # 2

Reference: Tab 5, IndEco Report, LRAM

- a) Appendix A, Table 7: For each program for each year, at the program/measure level, please tabulate the number of units, measure life, LRAM free ridership, annual energy savings (kWh/a), annual peak demand savings (kW/a) and contribution to LRAM.
- b) List and confirm OPA's input assumptions for Every Kilowatt Counts (EKC) 2006 including the measure life, unit kWh savings and free ridership for Compact Fluorescent Lights (CFLs) and Seasonal Light Emitting Diodes (LED). Confirm some of these assumptions were changed in 2007 and again in 2009 and compare the values.
- c) Demonstrate that savings for EKC 2006 Mass Market measures 13-15 W Energy Star CFLs have been removed from the LRAM claim in 2010.
- d) Adjust the LRAM claim as necessary to reflect the measure lives and unit savings for any/all measures that have expired starting in 2010.

- e) Table 4 on Page 7 of IndEco's Report provides the Distribution rates per rate class effective May 1 for 2010 and 2011. Please explain how these rates are applied to calculate the LRAM claim for each year.
