Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
P.O. Box 2319, Floor

2300 Yonge Street
Toronto, ON M4P 1E4
Dear Ms. Walli:

## Re: Peterborough Distribution Incorporated Application for 2012 Electricity Distribution Rates EB-2011-0194

Peterborough Distribution Incorporated ("PDI") is pleased to submit to the Ontario Energy Board (the "Board") its 2012 electricity distribution rate application requesting new rates effective May 1, 2012

The filing requirements indicate that each application should include:

- A Manager's Summary documenting and explaining all rate adjustments applied for.
- A completed Rate Generator model with supplemental filing modules or work forms, provided by the Board, both in electronic (i.e. Excel) and PDF form.
- Lost Revenue Adjustment Mechanism and Shared Savings Mechanism
- A copy of the current Tariff Sheet.
- A copy of the facsimile tariff sheet generated by the Rate Generator.
- A copy of the bill impacts generated by the Rate Generator.

The completed 2012 IRM3 models are attached along with the requested tariff sheet and bill impact information. The Manager's Summary for PDl's 2012 rate application is attached to this letter. The information that is provided in the IRM3 models will not be repeated in the Manager's Summary in order to focus the Manager's Summary on the relevant items.

PDI's 2012 electricity distribution rate application will be sent to you in the following form:
(a) Electronic filing through the Board's web portal at www.errr.oeb.gov.on.ca, consisting of one (1) electronic copy of the application in searchable /unrestricted PDF format and one (1) electronic copy in Microsoft Excel format of the completed IRM3 models;

PDI intends to publish Notice of Application in the Peterborough Examiner, the local community subscription newspaper with a 42,000 circulation and 8,200 digital e-copies. The notice will be published in a Thursday edition of the Examiner as this is a free publication. PDI also intends to publish the Notice of Application in the Lakefield Herald, a regional paid subscription newspaper with a circulation of with a 2,500.

The primary contact for this application is:
Robert Kent
Manager, Finance and Regulatory Compliance
705-748-9301 x 1272
Email rkent@peterboroughutilities.ca
We would be pleased to provide any further information or details that you may require relative to this application.

Yours truly,

Robert Kent, CGA

# Peterborough Distribution Incorporated 

EB-2011-0194

MANAGER'S SUMMARY

## November 9, 2011

Peterborough Distribution Incorporated ("PDI") is a licensed electricity distributor (ED-2002-0504) that owns and operates electricity distribution systems that provide service to the City of Peterborough, the Town of Norwood and the Village of Lakefield. PDI charges electricity consumers within these areas distribution rates and other charges as authorized by the Ontario Energy Board ("Board"). In this application PDI is applying for rates and other charges effective May 1, 2012.

PDI has adhered to the Board's directions in completing the Board approved IRM3 rate models and incorporated the necessary adjustment. This Manager's Summary will address the following items:

- Price Cap Adjustment
- Shared Tax Savings Rate Rider
- Smart Meter Adder
- Deferral Variance Account Disposition
- Lost Revenue Adjustment Mechanism and Shared Savings Cost Claim
- RTSR - Network
- RTSR - Connection
- Current and Proposed Rates
- Customer Impacts
- Conclusion

## Price Cap Adjustment

Under the 3rd Generation IRM plan, PDl's electricity distribution rates for 2012 have been adjusted for three factors: a price escalator, a productivity factor and a stretch factor. For the purposes of preparing the 2012 application, the Board expects PDI to use a proxy for the price cap adjustment. The price cap adjustment is $0.18 \%$. The price cap adjustment is comprised of the price escalator proxy of $1.30 \%$ less a productivity factor of $0.72 \%$ and a stretch factor of $0.40 \%$. PDI understands that when the final price adjustment and stretch factors have been determined the Board will revise the price cap adjustment assumed in the 2012 final rates.

## Tax Changes

The Board has determined that there would be a 50/50 sharing of the impact of currently known legislated tax changes. As part of PDI's 2012 Electricity Rate Application, PDI has completed the 2012 IRM3 Tax Savings Workform and has determined 2012 tax savings of $\$ 537,161$. With the $50 \%$ sharing policy, 2012 distribution rates have been reduced by $\$ 268,580$ to provide half of the savings to customers.

## Smart Meter Adder

PDI has not included a request for the continuation of the $\$ 1.00$ per meter per month rate adder in this application. PDI will be submitting a stand-alone prudence review of its smart meter costs in the near future.

## Deferral and Variance Account Disposition

The 2012 IRM3 Application includes disposition of Group 1 Deferral and Variance accounts, the Special Purpose Charge variance account (1521) and the Deferred PILs variance account (1562).

PDI is proposing rate riders to dispose of December 31, 2010 account balances plus accrued interest to April 30, 2012. The total amount to be refunded over a one-year period is $\$ 1,408,705$. The account balances included in the recovery are shown in the following table.

| Request for Clearance of Deferral and Variance Accounts |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Account Description | Account Number | Principal Amounts | Interest <br> Amounts | Total Claim |
| Group 1 Accounts |  |  |  |  |
| LV Variance Account | 1550 | 60,477 | 2,276 | 62,753 |
| RSVA - Wholesale Market Service Charge | 1580 | $(1,188,552)$ | $(20,405)$ | $(1,208,957)$ |
| RSVA - Retail Transmission Network Charge | 1584 | $(336,815)$ | $(4,876)$ | $(341,691)$ |
| RSVA - Retail Transmission Connection Charge | 1586 | 638,134 | 14,839 | 652,973 |
| RSVA - Power (excluding Global Adjustment) | 1588 | $(284,478)$ | 15,560 | $(268,918)$ |
| RSVA - Power (Global Adjustment sub-account) | 1588 | $(630,293)$ | $(12,615)$ | $(642,908)$ |
| Group 1 Sub-Total |  | $(1,741,527)$ | $(5,221)$ | $(1,746,748)$ |
| Special Purpose Charge Assessment Variance Account | 1521 | $(105,614)$ | 628 | $(104,986)$ |
| Deferred Payments in Lieu of Taxes | 1562 | 378,040 | 64,989 | 443,029 |
| Total Deferral and Variance Account Disposition |  | $(1,469,101)$ | 60,396 | $(1,408,705)$ |

## Special Purpose Charge

As required, PDI's 2012 Electricity Rate Application includes the disposition of the Special Purpose Charge (SPC) variance account 1521. This Rate Application includes a SPC refund in the amount of $\$ 104,986$ including interest. Amounts collected from customers during 2011 are recorded as adjustments during quarter 42010 in column BI, Sheet 9 of the Rate Generator. This results in a variance from RRR in column BX, Sheet 9 .

## PILs Variance Account

As set out in the 2012 IRM filing instructions, PDI is including the disposition of the account 1562, Deferred Payments in Lieu of Taxes (PIL). As provided in the following table, PDI is seeking recovery of \$443,029.

The PIL variance account has been restated from the December 31, 2010 trial balance submission of a credit of $\$ 1,036,843$ to a debit of $\$ 443,029$. This results in a variance from RRR in column BX, Sheet 9 of the Rate Generator. An in-depth review of the account for the years 2001 to 2006 revealed that the 2001 initial PIL ( $\$ 527,668$ ) was not included in the original SIMPIL model summary nor was the 2005 SIMPIL true-up (\$901,602). It is important to note the summary reflects the consolidated results of Peterborough Distribution Inc., Lakefield Distribution Inc. and Asphodel-Norwood Distribution Inc., as these utilities were amalgamated in 2005.

Appended to this summary is a PILs continuity schedule.

## LRAM/SSM Rate Rider

As directed in the 2012 IRM filing instruction, PDI is seeking recovery of historical Lost Revenue Adjustment Mechanism (LRAM) and Shared Saving Mechanism (SSM) amounts related to new and on-going Conservation and Demand Management (CDM) activities for the years 2005 to 2010.

It is requested that these amounts be recovered through a rate rider over a one-year period beginning May 1, 2012. Total amount for recovery is $\$ 743,303$, including carrying charges of $\$ 31,420$. Amounts for SSM and LRAM recovery are summarized in the following table.

| Rate class | LRAM pre- <br> carrying <br> charges | Carrying <br> charges | SSM | Tota1 |
| :--- | ---: | ---: | ---: | ---: |
| Residentia7 | $\$ 465,042$ | $\$ 25,581$ | $\$ 54,890$ | $\$ 545,513$ |
| Genera7 Service < 50 <br> kW | $\$ 106,816$ | $\$ 3,912$ | $\$ 2,062$ | $\$ 112,790$ |
| Genera7 Service 50 - <br> $4,999 ~ k W ~$ | $\$ 83,563$ | $\$ 1,927$ | $(\$ 489)$ | $\$ 85,001$ |
| Tota1 | $\$ 655,421$ | $\$ 31,420$ | $\$ 56,463$ | $\$ 743,303$ |

PDI engaged IndEco Strategic Consulting Inc. to review its CDM program results and to determine the recoverable amounts per the OEB guidelines. IndEco has indicated in their report that the recoverable amounts are valid. The full LRAM/SSM application is submitted
as Exhibit 1. The rate riders have been included in the Rate Generator Model and have been included in the customer impact analysis.

## RTSR - Network

PDI is proposing to adjust the Retail Transmission Services Rates - Network to recover forecast wholesale network costs. The proposed rates were developed using the 2012 RTSR Adjustment Workform. The current and proposed rates by customer class are shown below.

| Retail Transmission Service Rates - Network |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Billing | Current | Proposed <br> Adjustment | Proposed <br> Rates |
| Customer Class | Determinant | Rates | Adjen | 0.0062 |
| Residential | kWh | 0.0001 | 0.0063 |  |
| GS $<50$ | kWh | 0.0056 | 0.0001 | 0.0057 |
| GS $>50$ | kW | 2.2741 | 0.0300 | 2.3041 |
| Large User | kW | 2.6793 | 0.0354 | 2.7147 |
| USL | kWh | 0.0056 | 0.0001 | 0.0057 |
| Sentinel lighting | kW | 1.7269 | 0.0228 | 1.7497 |
| Street lighting | kW | 1.7141 | 0.0226 | 1.7367 |

## RTSR - Connection

PDI is proposing to adjust the Retail Transmission Services Rates - Connection to recover forecast wholesale connection costs. The proposed rates were developed using the 2012 RTSR Adjustment Workform. The current and proposed rates by customer class are shown below.

| Retail Transmission Service Rates - Connection |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Billing <br> Customer Class <br> Determinant | Current <br> Rates | Proposed <br> Adjustment | Proposed <br> Rates |
| Residential | kWh | 0.0044 | 0.0002 | 0.0046 |
| GS $<50$ | kWh | 0.0040 | 0.0001 | 0.0041 |
| GS $>50$ | kW | 1.5619 | 0.0551 | 1.6170 |
| Large User | kW | 1.9134 | 0.0675 | 1.9809 |
| USL | kWh | 0.0040 | 0.0001 | 0.0041 |
| Sentinel lighting | kW | 1.2402 | 0.0437 | 1.2839 |
| Street lighting | kW | 1.2113 | 0.0427 | 1.2540 |

## Conclusion

A copy of the current tariff sheet, the proposed tariff sheet and the customer impacts are provided in Appendix A. In summary, the bill impact for a Residential customer with a monthly electricity consumption of 800 kWh is a decrease of $1.89 \%$ or $\$ 1.97$ per month after HST and Ontario Clean Energy Benefit are applied. The bill impact for a General Service Less Than 50 kW customer with a monthly consumption of $2,000 \mathrm{kWh}$ is a decrease of $1.50 \%$ or $\$ 3.91$ per month after HST and OCEB are applied.

The monthly decrease is mainly attributed to the disposition of the following items which result in a "refund" to the customer base of approximately $\$ 936$ thousand.

- Tax sharing, refund \$269 thousand
- Deferral and variance account disposition, refund $\$ 1.41$ million
- LRAM/SSM recovery, recovery $\$ 743$ thousand

The monthly decrease also includes the removal of the $\$ 1.00$ smart meter rate adder, PDI will be submitting a stand-alone prudence review of its smart meter costs in the near future.

Peterborough Distribution Incorporated - EB-2011-0194

The standard Allowance rates have been included as default entries. If you have different rates, please make the appropriate corrections in the below. As well, please enter the current Specific Service Charges below. The standard Retail Service Charges have been entered below. If you rates, please make the appropriate corrections in columns B, D or E as applicable (cells are unlocked).

## ALLOWANCES

Transformer Allowance for Ownership - per kW of billing demand/month

## SPECIFIC SERVICE CHARGES

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule

No charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for the Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

## RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for the Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

| One-time charge, per retailer, to establish the service agreement between the distributor and the retailer | \$ | 100.00 |
| :---: | :---: | :---: |
| Monthly Fixed Charge, per retailer | \$ | 20.00 |
| Monthly Variable Charge, per customer, per retailer | \$/cust. | 0.50 |
| Distributor-consolidated billing charge, per customer, per retailer | \$/cust. | 0.30 |
| Retailer-consolidated billing credit, per customer, per retailer | \$/cust. | (0.30) |
| Service Transaction Requests (STR) |  |  |
| Request fee, per request, applied to the requesting party | \$ | 0.25 |
| Processing fee, per request, applied to the requesting party | \$ | 0.50 |
| Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail |  |  |
| Settlement Code directly to retailers and customers, if not delivered electronically through the |  |  |
| Electronic Business Transaction (EBT) system, applied to the requesting party |  |  |
| Up to twice a year | \$ | no charge |
| More than twice a year, per request (plus incremental delivery costs) | \$ | 2.00 |

Note:
The purposes of this worksheet is to show the movement in Account 1562.
For explanation of Account 1562 please refer to Accounting Procedures Handbook for Electric Distribution Utilities
Please identify if Method 1, 2 or 3 was used to account for the PILs proxy and recovery.
Answer: 3
(1) (i) From the Initial Estimate Column, under Inclusion in Rates, Part III of the TAXCALC spreadsheet for Q4 2001 and 2002.
(ii) If the Board approved different amounts, input the Board-approved amounts in cells C13 and E13.
(iii) Column G - In 2003, the initial estimate should include the Q4 2001 PILs tax proxy and the 2002 PILs tax proxy.
(iv) Column I - The Q4 2001 PILs tax proxy was removed from rates on April 1, 2004 and the 2002 PILs tax proxy remained.
(v) Column K - The 2002 PILs tax proxy applies to January 1 to March 31, 2005, and the new 2005 PILs tax proxy from April 1 to December 31, 2005.
(2) From the Ministry of Finance Variance Column, under Future True-ups, Part IV a, cell I130, of the TAXCALC spreadsheet
(3) From the Ministry of Finance Variance Column, under Future True-ups, Part IV b, cell I179, of the TAXCALC spreadsheet
(4) The correcting entry should be shown in the year the entry was made. The true-up of the carrying charges will have to be reviewed.
(5) This should equal the actual kWhs for the period (including net unbilled at period end), multiplied by the PILs proxy rates from the Q4 2001 and 2002 PILs worksheets for 2002, 2003 and January 1 to March 31, 2004.
In 2004, use the Board-approved 2002 PILs proxy rate for the period April 1 to December 31, 2004 added to the result from the sentence above for January 1 to March 31, 2004
(6) Any interim PILs recovery from the Reg Asset decisions will be recorded in APH Account \# 1590. Final reconciliation of PILs proxy taxes will have to include amounts from 1562 and from 1590.

Note:
The purposes of this worksheet is to show the movement in Account 1562.
For explanation of Account 1562 please refer to Accounting Procedures Handbook for Electric Distribution Utilities
Please identify if Method 1, 2 or 3 was used to account for the PILs proxy and recovery.
Answer: 3
(1) (i) From the Initial Estimate Column, under Inclusion in Rates, Part III of the TAXCALC spreadsheet for Q4 2001 and 2002.
(ii) If the Board approved different amounts, input the Board-approved amounts in cells C13 and E13.
(iii) Column G - In 2003, the initial estimate should include the Q4 2001 PILs tax proxy and the 2002 PILs tax proxy.
(iv) Column I - The Q4 2001 PILs tax proxy was removed from rates on April 1, 2004 and the 2002 PILs tax proxy remained.
(v) Column K - The 2002 PILs tax proxy applies to January 1 to March 31, 2005, and the new 2005 PILs tax proxy from April 1 to December 31, 2005.
(2) From the Ministry of Finance Variance Column, under Future True-ups, Part IV a, cell I130, of the TAXCALC spreadsheet
(3) From the Ministry of Finance Variance Column, under Future True-ups, Part IV b, cell I179, of the TAXCALC spreadsheet
(4) The correcting entry should be shown in the year the entry was made. The true-up of the carrying charges will have to be reviewed.
(5) This should equal the actual kWhs for the period (including net unbilled at period end), multiplied by the PILs proxy rates from the Q4 2001 and 2002 PILs worksheets for 2002, 2003 and January 1 to March 31, 2004.
In 2004, use the Board-approved 2002 PILs proxy rate for the period April 1 to December 31, 2004 added to the result from the sentence above for January 1 to March 31, 2004.
(6) Any interim PILs recovery from the Reg Asset decisions will be recorded in APH Account \# 1590. Final reconciliation of PILs proxy taxes will have to include amounts from 1562 and from 1590.

| 8 |  |  |  |  |
| 9 | BACKGROUND |  |  |  |
| 10 | Has the utility reviewed section 149(1) ITA to |  |  |  |
| 11 | confirm that it is not subject to regular corporate |  |  |  |
| 12 | tax (and therefore subject to PILs)? |  | Y/N | Y |
| 13 |  |  |  |  |
| 14 | Was the utility recently acquired by Hydro One |  |  |  |
| 15 | and now subject to s. 89 \& 90 PILs? |  | Y/N | N |
| 16 |  |  |  |  |
| 17 | Is the utility a non-profit corporation? |  | Y/N | N |
| 18 | (If the utility is a non-profit corporation, please contact the Rates Manager at OEB) |  |  |  |
| 19 |  |  |  |  |
| 20 | Are the Capital Tax \& Large Corporations Tax Exemptions shared among the corporate group? |  | Y/N | Y |
| 21 | Please identify the \% used to allocate the exemption in Cell C63 in the TAXCALC spreadsheet. |  |  |  |

Note:
The purposes of this worksheet is to show the movement in Account 1562.
For explanation of Account 1562 please refer to Accounting Procedures Handbook for Electric Distribution Utilities
Please identify if Method 1, 2 or 3 was used to account for the PILs proxy and recovery.
Answer: 3
(1) (i) From the Initial Estimate Column, under Inclusion in Rates, Part III of the TAXCALC spreadsheet for Q4 2001 and 2002.
(ii) If the Board approved different amounts, input the Board-approved amounts in cells C13 and E13.
(iii) Column G - In 2003, the initial estimate should include the Q4 2001 PILs tax proxy and the 2002 PILs tax proxy.
(iv) Column I - The Q4 2001 PILs tax proxy was removed from rates on April 1, 2004 and the 2002 PILs tax proxy remained.
(v) Column K - The 2002 PILs tax proxy applies to January 1 to March 31, 2005, and the new 2005 PILs tax proxy from April 1 to December 31, 2005.
(2) From the Ministry of Finance Variance Column, under Future True-ups, Part IV a, cell I130, of the TAXCALC spreadsheet
(3) From the Ministry of Finance Variance Column, under Future True-ups, Part IV b, cell I179, of the TAXCALC spreadsheet
(4) The correcting entry should be shown in the year the entry was made. The true-up of the carrying charges will have to be reviewed.
(5) This should equal the actual kWhs for the period (including net unbilled at period end), multiplied by the PILs proxy rates from the Q4 2001 and 2002 PILs worksheets for 2002, 2003 and January 1 to March 31, 2004.
In 2004, use the Board-approved 2002 PILs proxy rate for the period April 1 to December 31, 2004 added to the result from the sentence above for January 1 to March 31, 2004.
(6) Any interim PILs recovery from the Reg Asset decisions will be recorded in APH Account \# 1590. Final reconciliation of PILs proxy taxes will have to include amounts from 1562 and from 1590.

# Peterborough Distribution Inc. 

EB-2011-0194<br>LRAM and SSM Claim

November 2011

## Summary

Peterborough Distribution Inc. (PDI) herewith submits an application to the Ontario Energy Board (OEB) for the approval and recovery of historical Lost Revenue Mechanism (LRAM) and Shared Savings Mechanism (SSM) amounts related to new and on-going Conservation and Demand Management (CDM) activities in 2005, 2006, 2007, 2008, 2009 and 2010. It is requested that these amounts be recovered through a rate rider over a one-year period beginning May 1 2012. Total amount for recovery is $\$ 743,303$, including carrying charges of $\$ 31,420$. Amounts for SSM and LRAM recovery are summarized in Table 1.

Table 1: Summary of Requested LRAM and SSM Amounts

| Rate class | LRAM pre- <br> carrying <br> charges | Carrying <br> charges | SSM | Tota1 |
| :--- | ---: | ---: | ---: | ---: |
| Residentia1 | $\$ 465,042$ | $\$ 25,581$ | $\$ 54,890$ | $\$ 545,513$ |
| Genera1 Service <br> kW | $\$ 106,816$ | $\$ 3,912$ | $\$ 2,062$ | $\$ 112,790$ |
| Genera1 Service 50 - <br> 4,999 kW | $\$ 83,563$ | $\$ 1,927$ | $(\$ 489)$ | $\$ 85,001$ |
| Tota1 | $\$ 655,421$ | $\$ 31,420$ | $\$ 56,463$ | $\$ 743,303$ |

## SSM Amounts

All CDM programs for which SSM amounts are sought were undertaken in connection with PDI's Third Tranche CDM spending obligations in 2005, 2006, and 2007.

The total SSM sought for recovery is $\$ 56,463$, which is based on the results of the Total Resource Cost test (TRC test) that PDI used to evaluate the results of its programs. The stream of future net benefits is evaluated using net present value (NPV). In accordance with CDM guidelines, PDI is requesting recovery of $5 \%$ of the net benefits of the CDM programs.

Table 2 on the following page provides the SSM amounts by program and rate class.

Table 2: SSM Amounts by Program and Rate Class

| Program | Year | Residential | General Service < 50 kW | General Service 50 $-4,999 \mathrm{~kW}$ | Net TRC | SSM amount |

## LRAM Amounts

The LRAM adjusts for volumetric variances between actual CDM results and the corresponding quantities used in rate setting. The requested LRAM amounts are derived from savings composed of:

- Third Tranche CDM programs implemented in 2005, 2006, and 2007;
- Ontario Power Authority (OPA) programs implemented in 2006, 2007, 2008, 2009 and 2010.

The lost revenues are calculated from the year of introduction through to April 30, 2012. Energy savings related to OPA programs delivered in 2011 or later have not been captured.

None of the load reductions estimated were factored into the load forecast underpinning 2005, 2006, 2007, 2008, 2009, 2010 or 2011 rates. Therefore, PDI proposed recovery of LRAM amounts related to the entire load reduction, net of free rider quantities. The calculation of the load reduction is based on the energy and demand savings and the lifespan of the technology by rate class. Load losses from CDM programs for the period through April 30, 2012, net of free riders, are shown in Table 3.

The total LRAM amount sought for recovery is $\$ 686,841$ of which $\$ 330,785$ is related to Third Tranche programs and $\$ 356,056$ is a result of OPA programs. These values include $\$ 31,420$ in carrying charges. Carrying charges were calculated using OEB approved rates. Resulting lost revenues are summarized in Table 4.

## Verification and Evaluation of Results

PDI engaged IndEco Strategic Consulting Inc. to review its CDM program results and TRC calculations and aid in the calculation of recovery amounts using OEB guidelines. IndEco reported that the values provided in this application are considered valid. The full report prepared by IndEco is available as Appendix 1.

## Recovery

PDI requests recovery of the LRAM and SSM amounts by way of volumetric rate riders over a one year period, effective May 1 2012, with the foregone revenue from each customer class allocated to that class for recovery. Table 5 sets the corresponding amounts by class, as well as the corresponding rate rider based on 2010 volume.

Impact on customer bills has been included in the Rate Generator Model.

Table 3: Net Energy and Demand Savings By Rate Class through April 302012 from CDM Programs

| Funding source | Program | Year | Residential (kWh) | General Service $<50$ kW (kWh) | General Service $50-4,999 \mathrm{~kW}$ (kW-mo) |
| :---: | :---: | :---: | :---: | :---: | :---: |

## Executive summary

A third party review of the Conservation and Demand Management (CDM) programs run by Peterborough Distribution Inc. (PDI) was required as part of its application to the Ontario Energy Board (OEB) for collection of Lost Revenue Adjustment Mechanism (LRAM) and Shared Savings Mechanism (SSM) claims.

IndEco Strategic Consulting Inc. (IndEco) acted as third party reviewer by examining the participant rates, program costs, equipment specifications, and calculations that enter into the energy savings and Total Resource Costs (TRC) submitted by PDI to the OEB. The review was completed as detailed in the OEB Guidelines for Electricity Distributor Conservation and Demand Management.
The third party review included PDI's CDM activities in 2005, 2006, 2007, 2008 and 2009 and 2010 supported through Third Tranche of Market Adjustment Revenue Requirement (MARR) funding, and Ontario Power Authority (OPA) funding.

Net benefits, calculated using the TRC test, used OEB recommended inputs. For prescriptive programs, inputs were taken from the OEB Total Resource Cost Guide, or program evaluations provided by the OPA. Net TRC benefits totalled over $\$ 1.1$ million dollars.

Lost revenues are calculated using estimated energy savings or monthly peak demand savings using the best available and most current input assumptions. Energy savings for prescriptive programs originally reported in Peterborough Distribution Inc.'s annual filings have been updated to reflect new assumptions available since then. In the span of the LRAM claim, these savings totalled over 38 GWh in the Residential rate class and 11 GWh in the GS $<50 \mathrm{~kW}$ rate class. Savings in the GS 50 to $4,999 \mathrm{~kW}$ rate class totalled approximately 33 MW -months.
IndEco concludes that PDI's electricity rates should be adjusted to reflect LRAM and SSM claims of $\$ 686,841$ and $\$ 56,463$ respectively.

Lost Revenue Adjustment Mechanism and Shared Savings Mechanism claims can benefit a local distribution company (LDC) by removing the disincentive for energy conservation, and by providing it with a portion of net economic benefits from conservation and demand management activities, respectively.

## What is the lost revenue adjustment mechanism (LRAM)

LRAM is designed to ensure that the LDC does not have a disincentive to promote energy efficiency and energy conservation by compensating the LDC for revenues lost as a result of its conservation initiatives. Calculation of lost revenues requires information on what the electricity use would have been in the absence of the LDC initiatives, and what it was with the LDC initiative. Some of the inputs to the calculation include: hours the equipment is used, wattage rating of the old and new equipment, and lifetime of the equipment if it is less than the period over which the LRAM is being claimed. Also required are the number of participants, or pieces of equipment installed, and an estimate of the free-rider rate, which is the fraction of the savings that would have occurred anyway, in the absence of the program. These savings are estimated by rate class, and revenue losses are determined by multiplying those losses by the cost of distribution per unit for each rate class. Carrying charges are calculated using deferral and variance account interest rates prescribed by the OEB. ${ }^{1}$

## What is the shared savings mechanism (SSM)?

The SSM rewards the LDC for its CDM initiatives by sharing a percentage of the net economic benefits that result from the initiatives over their lifetime. For CDM activities by Ontario electricity distributors, that percentage has been set at five percent by the Ontario Energy Board (OEB). Key inputs to the calculation of SSM include all of the LRAM inputs, and in addition, the total lifetime of each technology installed, equipment costs, program costs, projected electricity costs (and water and natural gas if relevant) over that lifetime.

## Sources of information

Although these input data requirements are sometimes measured, they sometimes use values from published sources, or assumptions provided by the Ontario Energy Board, or other reputable agencies. Collectively all these data are sometimes referred to as "TRC inputs" after the Total Resource Cost test that is used to calculate total economic costs and

[^2]benefits to society. For some types of programs, such as large scale distribution of compact fluorescent bulbs, it would be impractical to measure the hours each bulb is used, for example, and therefore these published sources provide an average value that is typical for this equipment type.
In some cases, estimated values for a particular component of the calculation are available from multiple sources. In these cases, information is taken from the sources highest in the information hierarchy. The information hierarchy (from greatest to least confidence) for LRAM calculations is:

1 Information or results from an OPA conducted or sponsored evaluation of the specific program (e.g. OPA 2010)
2 Information or results from a third-party evaluation of the specific program
3 Information or results from a site-specific assessment of the application of the technology, including on-site measurement or survey of the specific customer
4 Manufacturer specifications for energy use/demand of the specific technology installed
5 Information from the OPA's most current measures and assumptions lists (OPA 2011a, OPA 2011b)
6 Information from earlier OPA measures and assumptions lists
7 Information from the OEB's TRC guide list of measures and assumptions (OEB 2008b).
In principal, we might have consulted values from the literature and adopted these if they could be shown to be more current, specific or otherwise suitable than the values from sources 4 through 7. However, this was not necessary in this case.

In the span of the LRAM claim, these savings totalled over 38 GWh in the Residential rate class and 11 GWh in the GS $<50 \mathrm{~kW}$ rate class. Savings in the GS 50 to $4,999 \mathrm{~kW}$ rate class totalled approximately 33 MW-months.

Net TRC benefits totalled over $\$ 1.1$ million dollars.

This review examines the measures, energy savings, program costs and net TRC benefits for the programs in PDI's third tranche CDM portfolio. These programs ran in 2005, 2006, and 2007. It also includes programs run under contract to the Ontario Power Authority (OPA) in 2006, 2007, 2008, 2009 and 2010. Lost revenues associated with these programs are estimated through April 30, 2012.

In the TRC calculation, benefits and costs are reported in current dollars, which requires a discount rate for future dollars. Even though these activities are at the margin, OEB has dictated that the discount rate to be used is the weighted average cost of capital (WACC). The WACC provided by PDI is as follows:

- 2005: 7.99\%
- 2006: 7.52\%
- 2007: 7.52\%

Because the WACC is only used to calculate present values for TRC calculations for the SSM, it is only required for 2005-2007 since these are the years for which an SSM amount is being claimed.

# TRC inputs, and requested SSM and LRAM amounts 

## TRC inputs

Inputs used to calculate energy savings, TRC costs and TRC benefits for each prescriptive and custom measure were reviewed to ensure accuracy and suitability.

IndEco finds that appropriate measure specifications were used to calculate program energy savings and net TRC benefits. For the calculation of LRAM claims, prescriptive measures used values provided by the 2011 OPA Measures and Assumptions lists (OPA 2011a and OPA 2011b). For the calculation of SSM claims, the best available information at the beginning of the year the program was launched was used. This is consistent with the guidance in section 7.3 of the OEB Guidelines for Electricity CDM (OEB 2008a). Custom measures were substantiated through program-specific documentation and calculations.

Exceptions to the sources of prescriptive measure input assumptions used in the calculation of LRAM claims are as follows:

- The '2006-2009 Final OPA CDM results. Peterborough Distribution Inc.' and the ' 2010 Final CDM Results summary Peterborough Distribution Inc.' were used as sources of inputs for OPA-evaluated programs. These evaluated results have been adopted in accordance with Board recommendations that "The Board would consider an evaluation by the OPA or a third party designated by the OPA to be sufficient." ${ }^{2}$ OPA advises that these estimates are prepared in a manner consistent with OPA current practice, and are the same values used to report progress against provincial conservation targets
A summary list of the assumption sources used for the calculation of the LRAM claim is provided in Table 1.
The measure inputs used to calculate SSM and LRAM claims can be found in Table 9 and Table 10 in Appendix A, respectively.

## Requested SSM amounts

Equipment costs and benefits were calculated by entering the measure assumptions found in Tables 9 and 10 of Appendix A into IndEco's TRC calculator.

SSM amounts were calculated for all third tranche programs, including the 2006 and 2007 EKC programs, for which PDI played a central role, and funded its contribution from third tranche funds.

[^3]The EKC program design was changed in 2008 and PDI's participation was not integral to the program. Therefore no SSM is claimed on net benefits from the 2008, 2009 or 2010 programs.

SSM amounts and TRC benefits net of free riders for all applicable programs are shown in Table 2.

## Requested LRAM amounts

LRAM calculations are to be completed with the best information available at the time of the third party review. As such, the energy savings indicated in PDI's annual reports for programs in PDI's CDM portfolio were recalculated with the assumptions found in Table 10 in Appendix A.
Energy savings for measures installed between 2005 and 31 December 2010 were calculated to April 30, 2012.

Tables 3 and 4 show the net and gross energy savings or demand reductions of each program by rate class. OPA program energy savings in Tables 3 and 4 were acquired directly from spreadsheets provided by the OPA.

Energy savings were converted to LRAM values by using PDI distribution rates. Distribution rates for all three of PDI's service areas -Asphodel-Norwood, Lakefield and Peterborough - were used.
Distribution rates are in Table 5. The percentage breakdown of PDI's service territory by service area is provided in Table 6. This breakdown was used in the allocation of PDI energy savings to the appropriate service area and rate.

The requested LRAM is presented in Table 7.

1. Rates for general service rate class of customers rated at greater than 50 kW are on a monthly demand basis (kW), not an energy one (kWh). Lost revenue results when the customer's monthly peak demand is lower than it otherwise would be as a result of the CDM initiatives. These are measured in kWmonth, which is the reduction within one month of the peak kilowatt demand. Excluded are peak demand reductions associated with demand response programs, which are not anticipated to impact on revenues.

1. LRAM amounts are for energy (or demand) reductions for the years between the year the program began through April 30, 2012.

## Findings

The third-tranche programs in PDI's CDM portfolio were completed as of December 31, 2007. Although the OEB guidance for this report asks for comments on future program evaluation and improvements to program performance, this expectation is not relevant for these programs that have ended and are not expected to be reinitiated. IndEco has reviewed the input values and custom project justifications used to calculate the energy savings and net TRC benefits resulting from PDI's portfolio as well as those associated with 2006, 2007, 2008, 2009, and 2010 OPA-funded programs.

IndEco has concluded that sufficient detail and documentation exists to recommend increasing Peterborough Distribution Inc.'s distribution rates in order to collect $\$ 686,841$ in LRAM and $\$ 56,463$ in SSM amounts, allocated by rate class as shown in Table 8.

Table 8 - LRAM and SSM amounts by rate class in 2012\$

| Rate class | LRAM | SSM |
| :--- | ---: | ---: |
| Residential | $\$ 490,623$ | $\$ 54,890$ |
| General Service $<50 \mathrm{~kW}$ | $\$ 110,728$ | $\$ 2,062$ |
| General Service $50-4,999 \mathrm{~kW}$ | $\$ 85,490$ | $(\$ 489)$ |
| Total | $\mathbf{\$ 6 8 6 , 8 4 1}$ | $\mathbf{\$ 5 6 , 4 6 3}$ |

| Total technology contribution to SSM |  |  |  |  |  | \$114,805 |  |

The net TRC benefits are the total technology benefits less the total technology costs (net of free riders) less the total program costs. The total net technology benefits and costs are $\$ 2,745,919$ and $\$ 449,824$. The total program cost for all programs is $\$ 1,166,845$. Net TRC benefits are thus $\$ 1,129,250$. The SSM incentive is $5 \%$ of these net TRC benefits, or $\$ 56,463$.

Table 10 - LRAM inputs and contribution to the total LRAM for all measures.

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2010-0109

## RESIDENTIAL SERVICE CLASSIFICATION

Residential class customers are defined as single-family dwelling units for domestic or household purposes. Semidetached and row town-housing will be considered residential class if each individual unit is located on its own registered freehold lot fronting on the public road allowance. Each unit must have it own individual service connection from the road allowance and each main service disconnect is assessable from the unit which it supplies. All other developments are considered to be in the General Service class. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## GENERAL SERVICE LESS THAN 50 kW SERVICE CLASSIFICATION

This classification applies to a non residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW . General Service class customers are defined as all buildings not classified as residential. A customer must remain in its customer class for a minimum of twelve (12) months before being reassigned to another class. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

## GENERAL SERVICE 50 to $4,999 \mathrm{~kW}$ SERVICE CLASSIFICATION

This classification applies to all buildings not classified as residential and having a service connection capable of load delivery equal to or above 50 kW or having an average monthly peak demand equal to or greater than 50 kW over a twelve month period, but less than $5,000 \mathrm{~kW}$. A customer must remain in its customer class for a minimum of twelve (12) months before being reassigned to another class.

Customers who require service connections above $1,000 \mathrm{kVA}$ must supply and own the primary conductors, switchgear and their own transformation above the maximum supplied by Peterborough Distribution Inc. (see Section 3.3 of Conditions of Service). The maximum allowable service connection on the 27.6 kV system is $5,000 \mathrm{kVA}$.

Customers have the option of ownership of transformation at all sizes and are required to own the transformation above the maximum levels supplied by Peterborough Distribution Inc. If a customer decides or is required to own their transformation, the transformer specifications and its loss evaluation require approval from Peterborough Distribution Inc. The customer is required to compensate Peterborough Distribution Inc for transformer losses that exceed the maximum acceptable losses. The customer will receive a transformer allowance as specified in the current rate schedule for privately owned transformation.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## LARGE USE SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service Customers requiring a connection with a connected load or whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, $5,000 \mathrm{~kW}$. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/ documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## SENTINEL LIGHTING SERVICE CLASSIFICATION

This classification covers sentinel lights used for security or other commercial activities. All attempts must be made to connect these loads to a metered service where possible. The customer is required to provide details of the connected load and usage pattern prior to connecting to the distribution system. The customer owns all the equipment and facilities from the load side of the connection to the distribution system. The connection shall be made to the distribution system as approved by Peterborough Distribution Inc. Peterborough Distribution Inc. has operational control of the connection to the distribution system. The customer is responsible for any requirements under the Ontario Electrical Safety Code and is required to have all equipment inspected and approved by the Electrical Safety Authority. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## STREET LIGHTING SERVICE CLASSIFICATION

This classification applies only to street lighting equipment owned by the City of Peterborough, other authorized municipalities or the Province of Ontario and operating within the licenced territory of Peterborough Distribution Inc. Included is decorative and seasonal lighting connected to street lighting facilities owned by the City of Peterborough, other authorized municipalities and the Province of Ontario. The customer owns all equipment and facilities from the load side of the connection to the distribution system. The customer is required to provide details of the connected load and usage pattern prior to connecting to the distribution system. Each streetlight is to be individually controlled by a photocell. Underground connections for street lighting require a main disconnect to be installed by the Customer. The customer is responsible for any requirements under the Ontario Electrical Safety Code and is required to have all equipment inspected and approved by the Electrical Safety Authority. The customer may retain operational control of any disconnects if authorized by Peterborough Distribution Inc. and operated by qualified personnel. Peterborough Distribution Inc. retains operational control of the connections to the distribution system. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## RESIDENTIAL SERVICE CLASSIFICATION

Residential class customers are defined as single-family dwelling units for domestic or household purposes. Semi-detached and row town-housing will be considered residential class if each individual unit is located on its own registered freehold lot fronting on the public road allowance. Each unit must have its own individual service connection from the road allowance and each main service disconnect is assessable from the unit which it supplies. All other developments are considered to be in the General Service class. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

> It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

#### Abstract

This classification applies to all buildings not classified as residential and having a service connection capable of load delivery equal to or above 50 kW or having an average monthly peak demand equal to or greater than 50 kW over a twelve month period, but less than $5,000 \mathrm{~kW}$. A customer must remain in its customer class for a minimum of twelve (12) months before being reassigned to another class. Customers who require service connections above 1,000 kVA must supply and own the primary conductors, switchgear and their own transformation above the maximum supplied by Peterborough Distribution Inc. (see Section 3.3 of Conditions of Service). The maximum allowable service connection on the 27.6 kV system is $5,000 \mathrm{kVA}$. Customers have the option of ownership of transformation at all sizes and are required to own the transformation above the maximum levels supplied by Peterborough Distribution Inc. If a customer decides or is required to own their transformation, the transformer specifications and its loss evaluation require approval from Peterborough Distribution Inc. The customer is required to compensate Peterborough Distribution Inc. for transformer losses that exceed the maximum acceptable losses. The customer will receive a transformer allowance as specified in the current rate schedule for privately owned transformation.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

> It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## Effective Date May 1, 2012

Implementation Date May 1, 2012
This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

## SENTINEL LIGHTING SERVICE CLASSIFICATION

#### Abstract

This classification covers sentinel lights used for security or other commercial activities. All attempts must be made to connect these loads to a metered service where possible. The customer is required to provide details of the connected load and usage pattern prior to connecting to the distribution system. The customer owns all the equipment and facilities from the load side of the connection to the distribution system. The connection shall be made to the distribution system as approved by Peterborough Distribution Inc. Peterborough Distribution Inc. has operational control of the connection to the distribution system. The customer is responsible for any requirements under the Ontario Electrical Safety Code and is required to have all equipment inspected an approved by the Electrical Safety Authority. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

#### Abstract

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

| MONTHLY RATES AND CHARGES - Delivery Component |  |  |
| :--- | ---: | ---: |
| Service Charge (per connection) | $\$$ | 3.71 |

## STREET LIGHTING SERVICE CLASSIFICATION

#### Abstract

This classification applies only to street lighting equipment owned by the City of Peterborough, other authorized municipalities or the Province of Ontario and operating within the licenced territory of Peterborough Distribution Inc. Included is decorative and seasonal lighting connected to street lighting facilities owned by the City of Peterborough, other authorized municipalities and the Province of Ontario. The customer owns all equipment and facilities from the load side of the connection to the distribution system. The customer is required to provide details of the connected load and usage pattern prior to connecting to the distribution system. Each streetlight is to be individually controlled by a photocell. Underground connections for street lighting require a main disconnect to be installed by the Customer. The customer is responsible for any requirements under the Ontario Electrical Safety Code and is required to have all equipment inspected an approved by the Electrical Safety Authority. The customer may retain operational control of any disconnects if authorized by Peterborough Distribution Inc. and operated by qualified personnel. Peterborough Distribution Inc. retains operational control of the connections to the distribution system. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

## MONTHLY RATES AND CHARGES - Delivery Component

## Effective Date May 1, 2012

Implementation Date May 1, 2012
This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

## RETAIL SERVICE CHARGES (if applicable)

## APPLICATION

#### Abstract

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for the Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

| One-time charge, per retailer, to establish the service agreement between the distrik | \$ | 100.00 |
| :---: | :---: | :---: |
| Monthly Fixed Charge, per retailer | \$ | 20.00 |
| Monthly Variable Charge, per customer, per retailer | \$/cust. | 0.50 |
| Distributor-consolidated billing charge, per customer, per retailer | \$/cust. | 0.30 |
| Retailer-consolidated billing credit, per customer, per retailer | \$/cust. | (0.30) |
| Service Transaction Requests (STR) |  |  |
| Request fee, per request, applied to the requesting party | \$ | 0.25 |
| Processing fee, per request, applied to the requesting party | \$ | 0.50 |
| Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail |  |  |
| Settlement Code directly to retailers and customers, if not delivered electronically through the |  |  |
| Electronic Business Transaction (EBT) system, applied to the requesting party |  |  |
| Up to twice a year | \$ | no charge |
| More than twice a year, per request (plus incremental delivery costs) | \$ | 2.00 |

## LOSS FACTORS

> If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factor will be implemented upon the first subsequent billing for each billing cycle.
Total Loss Factor - Secondary Metered Customer < 5,000 kW ..... 1.0487
Total Loss Factor - Secondary Metered Customer > 5,000 kW ..... 1.0171
Total Loss Factor - Primary Metered Customer < 5,000 kW ..... 1.0382
Total Loss Factor - Primary Metered Customer > 5,000 kW ..... 1.0071

(1) The rates above reflect the Peterborough Service Territory

[^0]:    ${ }^{1}$ For Account 1562, the allocation to customer classes should be performed on the basis of the test year distribution revenue allocation to customer classes found in the Applicant's Cost of Service application that was most recently approved at the time of disposition of the 1562 account balance.
    Residual Account balance to be allocated to rate classes in proportion to the recovery share as established when rate riders were implemented
    The Threshold Test does not include the amount in 1521 nor 1562.
