Dear Ms. Walli,

RE: Whitby Hydro Electric Corporation
Application for 2012 Electricity Distribution Rates (EB- 2011-0206)
Interrogatory Response – Board Staff

As directed by the Board's Notice of Application and Hearing for this rate proceeding, Whitby Hydro Electric Corporation has provided responses to Board Staff interrogatories dated November 14, 2011. Two paper copies and an electronic copy (CD) will follow via courier. A copy has also been filed electronically through the Board's RESS system.

Respectfully submitted,

Original Signed by

Ramona Abi-Rashed
Treasurer

Shared Tax Savings

1) Ref: 2012 IRM3 Shared Tax Savings Workform, Sheet 3.
Ref: EB-2009-0274, Exhibit 3, p.182

Rate Group	Rate Class	Fixed Metric	Vol Metric	Re-based Billed Customers or Connections A	Re-based Billed kWh B	Re-based Billed kW C
RES	Residential	Customer	kWh	36,927	350,407,180	
GSLT50	General Service Less Than 50 kW	Customer	kWh	1,909	75,150,446	
GSGT50	General Service 50 to 4,999 kW	Customer	kW	435	414,547,692	966,330
USL	Unmetered Scattered Load	Connection	kWh	391	2,493,809	
Sen	Sentinel Lighting	Connection	kW	37	43,361	120
SL	Street Lighting	Connection	kW	11,478	9,090,771	24,361

Board staff was unable to reconcile the figures entered for the billing determinants for the Street Lighting class in Sheet 3 of the Shared Tax Savings Model with the forecasted figures approved by the board in Whitby's 2011 cost of service application (EB-2009-0274).

a) Please confirm the Rebased Billing Connections, Billed kWh, and Billed kW numbers for the Street Lighting class are those established in EB-2009-0274.

Response:
Whitby Hydro confirms that the above figures included in the Shared Tax Savings Workform (Sheet 3), are the same as those approved by the Board in Whitby Hydro's 2011 Settlement Agreement. The 2011 Settlement Agreement addressed the customer and load forecast as follows:

> *The current distribution revenue from rates is premised on a 2011 Customer and Load Forecast, which for settlement purposes was accepted as being identical to the 2010 Customer and Load Forecast presented in the Application.*

As the approved 2011 customer and load forecast is identical to the proposed 2010 customer and load forecast, the figures above can be reconciled to the evidence provided in the original 2010 Cost of Service Application EB-2009-0274, Exhibit 3, p.203. These figures also tie to the revised evidence filed on March 10, 2010 which included a correction to Exhibit 3, p.182 (table 3-2).

b) If not, please provide the rationale for using figures for the above stated billing determinants that diverge from the load forecast in EB-2009-0274.

Response:
Please see the response to 1(a)

2) Ref: 2012 IRM3 Shared Tax Savings Workform, Sheet 6
Ref: Manager's Summary, p.7
Ref: Filing Requirements for Transmission and Distribution Applications, Chapter 3, p. 17

Rate Class	Total Revenue $ by Rate Class A	Total Revenue % by Rate Class B = A / $H	Total Z-Factor Tax Change$ by Rate Class C = $I * B	Billed kWh D	Billed kW E	Distribution Volumetric Rate kWh Rate Rider F = C / D	Distribution Volumetric Rate kW Rate Rider G = C / E
Residential	$12,580,198.9980	63.77%	-$55,949	350,407,180	0	-$0.0002	
General Service Less Than 50 kW	$1,911,497	9.69%	-$8,501	75,150,446	0	-$0.0001	
General Service 50 to 4,999 kW	$4,784,682	24.25%	-$21,279	414,547,692	966,330		-$0.0220
Unmetered Scattered Load	$118,855	0.60%	-$529	2,493,809	0	-$0.0002	
Sentinel Lighting	$3,116	0.02%	-$14	43,361	120		-$0.1155
Street Lighting	$329,408	1.67%	-$1,465	9,104,235	26,227		-$0.0559
	$19,727,757	100.00%	-$87,737				

In the Manager's Summary, Whitby notes that the Z-factor Tax Changes rate rider for General Service Less than 50kW derived by the model is found to be negligible and therefore requests to record the total amount to be refunded in account 1595 so that it can be disposed in the future.

a) Board Staff notes that the rate rider in question is -$0.0001 which is greater (in absolute value) than the $0.0000 considered to be negligible according to the updated Filing Requirements. Does Whitby still intend to record the amount in Account 1595 to be disposed at a later date? If so, please provide justification for why this volumetric rate rider should be considered negligible.

Response:
Whitby Hydro observed that upon completion of the data requirements for the Shared Tax Savings Workform, the Excel model highlighted the rate rider for General Service Less than 50 kW in red (as shown above). Whitby Hydro interpreted the highlighted area as an indication that these amounts would be viewed by the Board as negligible.

Whitby Hydro continues to believe that the disposition of balances and the calculation of rate riders should be done in a manner that is efficient, reasonable and timely but also acknowledges materiality levels which are designed to streamline and reduce the complexity, volume, administration, and understanding of rates for customers. This type of approach is intended to assist customers by attempting to maintain a tariff sheet for rates which is not unnecessarily cumbersome to decipher and balance back to their actual bill. The tariff sheet for rates is a necessary tool for customers who wish to more fully understand their bill, bill calculations, and the types of individual rate riders which support the consolidated line items on their bill.

On this basis, it is Whitby Hydro's view that the amount of the Shared Tax Savings is not materially significant, and it is reasonable to record the amount in subaccount 1595 for future disposition as part of the Group 1 accounts that are subject to materiality reviews on an annual basis.

Revenue to Cost Ratio Adjustment

3) Ref: 2012 IRM3 Revenue to Cost Ratio Adjustment, Sheet 4.
Ref: Manager's Summary, p. 10
Ref: EB-2009-0274, Decision, Appendix – Proposed Settlement Agreement, Appendix C

Rate Class	Current Tariff Service Charge A	Current Tariff Distribution Volumetric Rate kWh B	Current Tariff Distribution Volumetric Rate kW C	Service Charge Rate Adders D	Distribution Volumetric kWh Rate Adders E	Distribution Volumetric kW Rate Adders F
Residential	17.24	0.0141	0.0000	0.00	0.0003	0.0000
General Service Less Than 50 kW	19.80	0.0194	0.0000	0.00	0.0003	0.0000
General Service 50 to 4,999 kW	191.34	0.0000	3.9178	0.00	0.0000	0.1079
Unmetered Scattered Load	9.28	0.0302	0.0000	0.00	0.0003	0.0000
Sentinel Lighting	4.05	0.0000	10.9830	0.00	0.0000	0.0852
Street Lighting	1.36	0.0000	5.4070	0.00	0.0000	0.0834

In the Manager's Summary, Whitby notes that it has removed the Low Voltage (LV) cost recovery portion of volumetric rates in the Revenue to Cost Ratio Adjustment model. Board Staff found the LV rates entered in the model to be consistent with Whitby's last cost of service application.

a) Please provide justification for why these volumetric amounts should be removed from the model.

Response:

Whitby Hydro has a portion of their distribution rates earmarked for LV cost recovery. The LV cost recovery portion is not intended to fund the revenue requirement nor is it intended to be part of the cost allocation and subsequent revenue-to-cost ratio equation. On this basis, Whitby Hydro believes that it was appropriate to remove the LV portion of the distribution rate out prior to calculating the required revenue-to-cost ratio adjustment and utilized Sheet 4 – Removal of Rate Adders (from the Board's Revenue-to-Cost Ratio Excel model) to do so.

Rate Generator

4) Ref: 2012 IRM3 Rate Generator, Sheet 10
Ref: EB-2009-0274, Exhibit 3, p. 182 – 183

Rate Class	Unit	Metered kWh	Metered kW	Billed kWh for Non-RPP Customers	Estimated kW for Non-RPP Customers	Distribution Revenue [1]	1590 Recovery Share	1595 Recovery Share Proportion (2008) [2]	1595 Recovery Share Proportion (2009) [2]
Residential	$/kWh	350,407,180		37,493,568	-	6,458,704	42%		
General Service Less Than 50 kW	$/kWh	75,150,446		11,422,868	-	1,046,759	9%		
General Service 50 to 4,999 kW	$/kW	414,547,692	966,330	361,071,040	841,673	2,343,490	47%		
Unmetered Scattered Load	$/kWh	2,493,809		-	-	44,457	0%		
Sentinel Lighting	$/kW	43,361	120	-	-	1,393	0%		
Street Lighting	$/kW	9,090,771	24,361	9,090,771	24,361	130,829	2%		
Total		851,733,259	990,811	419,078,247	866,034	10,025,632	100%	0%	0%

Total Claim (including Accounts 1521 and 1562)	-$	2,553,367
Total Claim for Threshold Test (All Group 1 Accounts)	-$	1,537,392
Threshold Test [3]	-	0.00181

Board staff was unable to reconcile the figures for Metered kWh and kW for Sentinel Lighting and Street Lighting with those in the last board approved forecast (EB-2009-0274). Board staff was also unable to reconcile Distribution Revenue with those in the approved forecast for all customer classes.

a) **Please confirm the figures for Metered kWh and kW for Sentinel Lighting and Street Lighting are those established in EB-2009-0274.**

Response:
Whitby Hydro confirms that the above figures are those approved by the Board in EB-2009-0274. As indicated in the response to 1(a), revised evidence was filed on March 10, 2010 for the referenced data from EB-2009-0274, Exhibit 3, p.182-183. These revisions included updated information for Streetlighting and Sentinel lighting load forecasts and tie to the above figures.

b) **Please confirm the figures for Distribution Revenue are those established in EB-2009-0274.**

Response:
The distribution revenue figure of $10,025,632 and the breakdown by customer class represents the actual breakdown of PILs revenue collected by customer class. Whitby Hydro proposes that the allocation of account 1562 balances by customer class should follow the same proportions as those from which the PILs revenue was collected. It should be noted that the amount does not include a small portion which was collected from the Large User customer class in 2002. The PILs revenue associated with the only Large User customer in its class represented approximately 2% of the total PILs revenue collected and this customer ceased to be a Whitby Hydro customer when it became a direct market participant at market opening.

c) **If Whitby cannot confirm the figures for Metered kWh, Metered kW, and Distribution Revenue please provide the rationale for the figures provided.**

Response:
Please see response to (a) and (b).

Account 1521 – Special Purpose Charge (SPC)

5) Ref: Manager's Summary, p.8 - 9

a) **Please confirm Whitby's SPC assessment amount and provide a copy of the original SPC invoice.**

Response:
Whitby Hydro's SPC assessment was $334,343. A copy of the invoice has been included as Appendix A-1.

b) **Please complete the following table related to the SPC.**

Response:
The table has been completed below.

SPC Assessment (Principal balance)	Amount recovered from customers in 2010	Carrying Charges for 2010	December 31, 2010 Year End Principal Balance	December 31, 2010 Year End Carrying Charges Balance	Amount recovered from customers in 2011	Carrying Charges for 2011	Forecasted December 31, 2011 Year End Principal Balance	Forecasted December 31, 2011 Carrying Charges Balance	Total for Disposition (Principal & Interest)
$334,343.00	(230,959.04)	1,160.37	103,383.96	1,160.37	(113,294.47)	103.99	(9,910.51)	1,264.36	(8,646.15)

6) Ref: Manager's Summary, p.9

In the Manager's Summary, Whitby requests to continue using Account 1521 in order to record some small adjustments that may occur to Account 1521 in the future. Whitby proposes that Account 1521 be included in Group 1 Accounts and therefore processed as a Group 1 Account in future applications.

a) When does Whitby anticipate the completion of transactions related to Account 1521?

Response:
Whitby Hydro cannot predict the flow or timing of possible billing adjustments which may be required due to the normal course of business. It is not anticipated that these adjustments will be significant in value however, in order to ensure that Whitby Hydro is not under or over compensated for the Special Purpose Charge (SPC) assessment, it seems reasonable to request that the Board allow distributors to maintain the variance account (1521) that was assigned to track variances associated with the SPC. It that regard, any residual balances could be included in the review of Group 1 accounts on an annual basis and disposition would follow the normal process for Group 1 accounts.

Smart Meter Funding Adder (SMFA)

7) Ref: EB-2011-0206, Manager's Summary, p. 12
EB-2009-0274, Application, Exhibit 9
EB-2009-0274, Decision and Order
EB-2010-0083, Decision and Order

Whitby is proposing that the current SMFA remain unchanged and continue until December 31, 2012. The current SMFA would then be removed in conjunction with the approval of a smart meter cost recovery application, which Whitby plans to file in 2012.

In Whitby's previous cost of service application (EB-2009-0274), Whitby applied for a SMFA of $2.13 based on costs forecasted for 2009 and 2010. The SMFA was deemed appropriate by all parties in the settlement agreement and was approved by the board.

Further, the following example is relevant to Whitby's request in this application. The Board's Decision and Order with respect to Festival's 2011 IRM Rates Application, issued April 21, 2011, states at page 5:

> Since the deployment of smart meters on a province-wide basis is now nearing completion, the Board expects distributors to file for a final prudence review at the earliest possible opportunity following the availability of audited costs. For those distributors that are scheduled to file a cost of service application for 2012 distribution rates, the Board expects that they will apply for the disposition of smart meter costs and subsequent inclusion in rate base. For those distributors that are scheduled to remain on IRM, the Board expects these distributors to file an application with the Board seeking final approval for smart meter related costs. ***In the interim, the Board will approve the requested SMFA of $1.52 per metered customer per month from May 1, 2011 to April 30, 2012. This SMFA adder will be reflected in the Tariff of Rates and Charges, and will cease on April 30, 2012.*** Festival Hydro's variance accounts for smart meter program implementation costs, previously authorized by the Board, shall be continued. [Emphasis added]

Similar wording was contained in the Board's decisions for many rates applications in 2011.

a) Please explain, in detail, the circumstances that justify extension of the SMFA beyond April 30, 2012, in light of the Board's general policy as documented in the decisions in many 2011 rates applications.

Response:
In the Board's June 22, 2011 Chapter 3 of the Filing Requirements for Transmission and Distribution Applications, Section 3.5, it stated

> *The Board also approved a sunset date of April 30, 2012 for the smart meter funding adder for most distributors in their 2011 rate application.*

Whitby Hydro did not have a sunset clause in its approved January 1, 2011 rates. Whitby Hydro also indicated in the original application that the Smart Meter Cost Recovery must be submitted as a separate application and that it expects to complete this application in 2012 using audited financial information. Given that there is no current sunset date for its approved SMFA, Whitby Hydro requests that it be allowed to continue the existing SMFA. Whitby Hydro further provided a smart meter forecast (Appendix M of the original application) which demonstrated that the currently approved SMFA continues to be appropriate.

In addition, Whitby Hydro refers to the 'NOTES' tab of the Smart Meter Model issued on September 13, 2011, where it states:

> *The Board expects that the majority (i.e. 90% or more) of costs for which the distributor is seeking recover will be audited.*

Appendix M (of the original application), provides a Summary of Project Costs which show that the actual costs to the end of 2010 are $4.8M. These audited costs represent 75% of total projected capital costs. Please see excerpt from Appendix M below:

Summary of Project Costs		
Fixed Assets	**Total Projected Costs**	
Smart Meters	5,143,335	
Computer Software	1,061,203	
Computer Hardware	198,159	
	6,402,697	
Accumulated Depreciation		
Smart Meters	(1,003,337)	
Computer Software	(595,046)	
Computer Hardware	(60,629)	
	(1,659,012)	
Addition to Net Fixed Assets	**4,743,685**	
	Total Projected Costs	**% of Costs**
Actual Capital Capital Costs -2010	4,822,697	75%
2011 Projected Costs	1,580,000	25%
Total Projected Capital Costs	6,402,697	100%

b) Whitby identifies that about 25% of its smart meter costs will occur in 2011, and thus are unaudited at this point.

i. What is the nature of the smart meter costs that Whitby is incurring in 2011?

ii. Are these costs for investments and operations expenses that are different than those Whitby has incurred prior to 2011? If so, please explain the differences.

Response:

2011 smart meter costs in the amount of $1,580K represent $1,140K for the cost and installation of meters for commercial customers (GS<50kW) and the remainder of the residential customers. In addition, software costs of $440k will be incurred for the development of the billing system to support TOU rates and associated Smart Meter requirements. Some of the costs for investments and operations expenses are similar to those Whitby Hydro incurred prior to 2011 however, there are some costs (ie. meter and installation costs related to small commercial customers and TOU related costs, etc.) that would not have occurred in any significant manner prior to 2011.

c) Whitby's existing SMFA of $2.13 per month per metered customer was first approved effective January 1, 2011. By December 31, 2012, this SMFA will have been in effect for two years. The SMFA is not intended to be fully compensatory for the revenue requirement for installed smart meters in the historical period.

i. Please provide any evidence or analysis in Whitby's possession as to the appropriateness of the level of the SMFA of $2.13 per month if it is continued from January 1, 2012 to December 31, 2012.

ii. If Whitby proposes an alternative SMFA, please provide detailed documentation on the derivation of its proposal. If the calculations are available through an Excel spreadsheet or model, please provide the spreadsheet or model in working Excel format.

Response:
Please refer to Appendix M of the original filing which provides a calculation for the 2012 Revenue Requirement. The active Excel model has been provided. A summary of the rate rider based on the calculated 2012 Revenue Requirement has been included below. Please note, the 2012 calculated SMFA of $2.69 is greater than the approved SMFA of $2.13 month.

	$	Estimated # Metered Customers	SMFA
2012 Forecast Revenue Requirement	1,292,721	40,000	2.69

In Appendix M of the original application, Whitby Hydro provided a revised forecast of Smart Meter costs and tested the appropriateness of maintaining its currently approved SMFA. The continuance of the SMFA will provide funding for smart meter costs in advance and serve to mitigate the anticipated rate impact of smart meter costs when recovery is applied for and approved by the Board.

Lost Revenue Adjustment Mechanism (LRAM)

8) Ref: Appendix K / Section: Overview

Section 3.4.2 of the Filing Requirements indicates that distributors shall file any outstanding LRAM or SSM applications funded between 2005 and 2010 as part of their 2012 CoS or IRM application. If a distributor does not file for the recovery of LRAM or SSM amounts in its 2012 rate application, it will forego the opportunity to recover LRAM or SSM for this legacy period of CDM activity. Whitby Hydro noted that at this time, it does not intend to file a claim for SSM for the legacy period of 2005-2010.

a) Please discuss whether Whitby Hydro intends to file a claim for SSM in a future rate application.

Response:
Whitby Hydro does not intend to file a claim for SSM in the future as it relates to conservation and demand management (CDM) programs up to 2010. Whitby Hydro undertook a review of its eligible programs for the purpose of assessing a SSM request as part of the 2010 cost of service application. As the costs for all CDM related programs must be considered for calculations of the TRC values used for SSM applications, Whitby Hydro determined that an SSM claim would be immaterial and consequently no claim was included. This was largely due to the difficulty in measuring the effects of educational and research based programs, the exclusion of utility-side programs and OPA programs and the additional requirements/costs that would be incurred to substantiate energy savings for custom programs. In light of this previous review and considering that CDM efforts undertaken since the review have been primarily focused on OPA programs (which are ineligible for SSM), Whitby Hydro does not plan to file a claim for SSM for CDM programs up to 2010.

b) If Whitby Hydro does intend on filing a claim for SSM in the future, please provide the rationale for Whitby Hydro not filing a claim for SSM in its 2012 rate application.

Response:
Not Applicable - see part (a).

9) Ref: Appendix K / Section: Eligible Programs

Whitby Hydro noted that it has included persisting impacts from third tranche CDM programs and 2008 OPA and Whitby Hydro funded CDM programs in its LRAM calculation for the years not previously included in its last LRAM application.

a) Please describe in detail the persisting impacts related to CDM activities which were included in the load forecast in Whitby Hydro's 2010 CoS application.

Response:
There were no quantifiable persisting impacts related to CDM activities which were included in the load forecast in Whitby Hydro's 2010 CoS application.

To re-clarify the load forecast process, a multiple regression equation was developed using degree days, economic activity (employment levels), number of days in a month, and a "dummy" variable for off-peak months, as well as a "dummy" variable to account for lower than expected consumption in some months of 2003. The data set (10 years of monthly wholesale consumption) used to help develop/test the multiple regression equation would have inherently had some latent effects of conservation within it. However, the impact of conservation programs implemented by Whitby Hydro would not have had an effect until the later years of the data set and since the analysis to develop the multiple regression equation determined that CDM was not considered to be a statistically significant variable, it can be concluded that there were no persisting impacts related to CDM included in the load forecast prepared for the 2010 CoS application.

b) Please confirm that Whitby Hydro's past CDM activity and future persisting savings associated with previously implemented CDM programs from 2005-2010 were included in Whitby Hydro's most recent load forecast.

Response:
Whitby Hydro cannot confirm this. Please see part (a) for rationale. In addition, data associated with 2009 and 2010 CDM programs would not have been available to include in the previous load forecast given that program timing (after the load forecast was prepared) would not have allowed this to be possible.

c) Please identify which persisting impacts related to Whitby Hydro's past CDM activities were not included in Whitby Hydro's 2010 CoS application.

Response:
It is Whitby Hydro's view that all persisting impacts of Whitby Hydro's CDM activities have not been included in the load forecast presented in the 2010 CoS application. This load forecast was accepted and approved by the Board in settlement for 2011.

10) Ref: Appendix L / Burman Energy LRAM Support Document / Section 2: Scope / Pg. 2

Burman noted that in lieu of OPA published evaluation results for 2010, 2009 program results were used as a best representative estimate for 2010 program year results. It further states that adjustments to these estimates may be required to accurately reflect final OPA program evaluation results for 2010 programs.

a) Please provide a status update on the 2010 OPA evaluation results.

Response:
The OPA released final 2010 detailed CDM results for Whitby Hydro on November 15, 2011. The report was forwarded to Burman Energy (Third Party Evaluator) to update the LRAM schedules and calculations. A copy of Burman Energy's revised LRAM schedules have been included as Appendix B-1.

The updated information has reduced the original LRAM claim from $510,763 to $472,604. The revised breakdown by customer class is provided as follows:

	Lost Revenue	Proration of Carrying Cost (Interest)	Total LRAM
Residential	267,544	3,795	271,338
GS<50 kW	133,029	2,057	135,085
GS>50 kW	65,146	1,034	66,180
	465,718	6,886	472,604

The revised LRAM rate riders have been re-calculated. As identified in VECC's interrogatory response #2 (b) and (c), Whitby Hydro inadvertently used volumes which did not tie to the most recently approved load forecast for the purpose of calculating the LRAM rate riders. The revised calculation below incorporates the updated LRAM claim as well as the correction to volumes used to derive the LRAM rate riders.

	Total LRAM	Annual Recovery	Annual Volume	Additional LRAM Rate Rider	Current Approved LRAM Rate Rider	New LRAM Rate Rider	kWh/kW
Residential	271,338	271,338	350,407,180	0.0008	0.0005	0.0013	kWh
GS<50 kW	135,085	135,085	75,150,446	0.0018	0.0000	0.0018	kWh
GS>50 kW	66,180	66,180	966,330	0.0685	0.0153	0.0838	kW
	472,604	472,604	426,523,956				

Recovery Period (# Years)	1

The Residential rate rider increased from $0.0012/kWh to $0.0013/kWh. The GS<50 kW rate rider decreased from $0.0025/kWh to $0.0018/kWh. The GS>50 kW rate rider decreased from $0.0952/kW to $0.0838/kW. The LRAM rate riders have been updated in Sheet 14 – Proposed Rate Riders in the revised 2012 IRM3 Rate Generator model (see Appendix D-1 and/or the live excel model).

b) If the 2010 OPA evaluation results have been made available to Whitby Hydro, please update the LRAM claim accordingly and make the 2010 OPA evaluation results available for review.

Response:
Please see part (a). The 2006-2010 Final OPA CDM detailed results for Whitby Hydro (distributor specific schedules with results to 2020) have been attached as Appendix C-1.

11) Ref: Manager's Summary, p.11

Whitby is proposing to combine the existing LRAM rate rider (2010) with the one it is currently applying for (2012) and assign this combined rate rider a sunset date of December 31, 2012. Whitby reasons that such a combined rate rider would minimise the number of rate riders which would be simpler for customers and reduce administrative effort for Whitby.

a) Board staff notes that rate riders appear on the tariff schedule and not on the bills of customers. Please, elaborate on how a combined rate rider would be simpler for customers.

Response:
Whitby Hydro acknowledges that the rate riders are not specifically itemized on the customer's bill presentment and therefore, additional rate riders do not change the look of the bill from a customer's perspective. However, Whitby Hydro does believe that customers should be able to understand and verify their bill which requires access to,

and understanding of the tariff schedule for rates. Whitby Hydro has seen the number of rate riders increase especially in more recent years and understands that this increase requires customers to spend more time understanding and reconciling their bill. With the addition of multiple rate riders, customers are also required to understand and adjust for different effective and sunset dates when verifying bill calculations. The avoidance of additional rate riders where it is reasonable to do so, can help to assist the customer in navigating through the tariff schedule and reduce to some degree the detailed reconciliations required for bill verification.

Additionally, where like costs are being recovered through rate riders (ie. LRAM), combining these into one rate rider may provide less obvious benefits without the loss of transparency. Typically customers can be expected to have a more negative visual impression when they see additional rate riders appear on the tariff schedule as it gives the impression that they are being charged for more and more different costs. By combining like recoveries into one rate rider where possible, there may be some benefit in trying to temper some of the perceived negative connotation associated when the volume of rate riders on the tariff schedule increases.

b) Does Whitby expect material cost savings from the reduction of administrative effort if the two rate riders were combined?

Response:
Whitby Hydro does not believe that there will be a material cost savings however, it is expected that streamlining the LRAM recovery into one rate rider would lessen some administrative work so that staff can focus on other important tasks. This approach reduces the creation, maintenance, testing requirements, and tracking associated when new rate riders are introduced to the billing system. It will also have some favourable impacts on the staff time required to understand and explain new rate riders, bill calculations etc. to customers when fielding inquiries.

c) Would the appearance of two LRAM rate riders on Whitby's tariff schedule constrain the implementation of Whitby's billing process?

Response:
The appearance of two LRAM rate riders on the tariff schedule would not constrain the implementation of Whitby's billing process. Whitby Hydro is simply looking to take advantage of an opportunity to simplify rate riders for the customer and streamline the process from a billing and administrative perspective.

Account 1562 – Deferred Payments in Lieu (PILs)

a) Please provide an explanation for the -$663,748 amount in the Variance RRR vs. 2010 Balance column for Account 1562 – Deferred Payment in Lieu of Taxes in the Rate Generator Model.

Response:

In response to interrogatory #16, Account 1562 has been revised and now reflects a balance of -$1,157,754 which results in a variance of $501,589 from the RRR 2010 amount of $1,659,343.

The tables below provide a breakdown of the variances. The major difference is due to the normalization of the 2004-2005 promissory note interest payments in the 2012 submission which results in a variance of $494k (using the tax rates used in the 2010 RRR calculation). As a result, carrying charges have been reduced, but are offset by increases to Deferral Account Variance Adjustments which are predominantly due to changes in tax rates.

Please note, the carrying charges in the 2012 submission includes carrying charges for 2011 resulting in an additional $14k.

	1562 Account Balance			
	2012 IRM	RRR	Difference	
Board approved proxy	9,730,075	9,719,876	10,199

13) Missing Evidence
Ref: Appendix H

Please provide the following missing PILs evidence:

a) Excel 2001, 2002 and 2005 Board-approved PILs proxy models (active) in 2003 Excel compatible format.

Response:
Active Excel PILs proxy models have been provided for 2001, 2002 and 2005.

b) Excel 2001/2002, 2004 and 2005 rate applications (active).

Response:
Active Excel rate application models have been provided for 2002 (March), 2004 and 2005. Whitby Hydro has provided PDF copies of the 2001 and 2002 (August) rate application given that softcopies were not available.

c) Signed Board decisions for each year that an application was filed requesting PILs to be included in rates.

Response:
Copies of Board decisions have been provided in Appendix G-1.

d) Excel continuity schedule for 2001 to 2012 including interest carrying charge calculations (active).

Response:
The updated continuity schedule for 2001 to 2012 is included as Appendix E-1 and the underlying active Excel model has been provided.

e) Excel PILs recoveries reconciliation and calculation of amounts billed showing rate slivers multiplied by monthly billing determinants (number of customers /kWh/kW) (active).

Response:
An active Excel model for the PILs recovery reconciliation has been provided.

14) Income Tax Returns
Ref: Appendix H

a) Please confirm that all tax years 2001 to 2005 are statute-barred?

Response:
Whitby Hydro confirms that 2001-2005 are statute-barred.

15) CDM expenses– 2005 SIMPIL model
Ref: Appendix H

Whitby's proxy amount for CDM expenses of $438,000 appears on the 2005 SIMPIL model TAXCALC sheet row 45 cell C45. This row does not true-up to ratepayers in column E from rows 99 to 132.

However, actual CDM expenses of $237,406 is recorded on row 26 cell E26 "Material additions from TAXREC" which trues up to ratepayers on row 107 cell E107. This creates a one-sided true-up to ratepayers.

a) Can Whitby suggest a method to avoid a one-sided true-up to ratepayers?

Response:
The 2005 SIMPIL model has been updated (see Appendix F-1) and there no longer is a one-sided true-up to ratepayers. The updated live Excel model has also been provided.

b) Why does the actual expense of $237,406 not appear on the 2005 T2 schedule 1?

Response:
The actual expense of $237,406 is already included in the administration expense on the 2005 T2 schedule 1.

16) Interest Expense
Ref: Appendix H

For the tax years 2001 to 2005:

a) Did Whitby have interest expense related to other than debt that is disclosed as interest expense in its financial statements?

Response:
Yes. Please refer to *Appendix H- Interest Expense Analysis-TAXCALC Tab* in the original filing.

b) Did Whitby net interest income against interest expense in deriving the amount it shows as interest expense? If yes, please provide details to what the interest income relates.

Response:
No.

c) Did Whitby include interest expense on customer security deposits in interest expense?

Response:
Yes. Please refer to *Appendix H- Interest Expense Analysis-TAXCALC Tab* in the original filing.

d) Did Whitby include interest income on customer security deposits in interest expense?

Response:
No.

e) Did Whitby include interest expense on IESO prudentials in interest expense?

Response:
Yes. Please refer to *Appendix H- Interest Expense Analysis-TAXCALC Tab* in the original filing.

f) Did Whitby include interest carrying charges on regulatory assets or liabilities in interest expense?

Response:
No.

g) Did Whitby include the amortization of debt issue costs, debt discounts or debt premiums in interest expense?

Response:
No.

h) Did Whitby deduct capitalized interest in deriving the interest expense disclosed in its financial statements?

Response:
No.

i) Please provide Whitby's views on which types of interest income and interest expense should be included in the excess interest true-up calculations.

Response:
According to Board direction**,** Whitby Hydro has submitted the 1562 disposition using the Halton Hills models which use the interest expense reported on their audited financial statements. This interest expense would include prudential requirements, customer deposit interest and other miscellaneous interest expenses. Whitby Hydro believes these amounts should be excluded from the calculation as the intent of the PILs model was to model long term debt interest.

Furthermore, Whitby Hydro is aware of recent Board submissions that support the use of interest income as an offset to interest expenses. Whitby Hydro has not had the opportunity to review this recent interpretation fully but believes there is merit with the offset of interest income particularly attributable to interest earned on customer deposits. If the Board accepts this approach in the IRM3 process, Whitby Hydro believes that it should be applied consistently across distributors filing for PILs disposition as part of the IRM3 process and respectfully requests that it be allowed update it's calculations accordingly.

j) Please provide a table for the years 2001 to 2005 that shows all of the components of Whitby's interest expense and the amount associated with each type of interest.

Response:
Please refer to *Appendix H- Interest Expense Analysis-TAXCALC Tab* in the original filing.

APPENDIX A-1

SPECIAL PURPOSE CHARGE ASSESSMENT INVOICE

Revised Invoice

Ministry of Energy and Infrastructure
Conservation and Renewable Energy Program Costs

To: Whitby Hydro Electric Corporation
100 Taunton Road East
Whitby, ON L1N 5R8
Attn: Adam MacCarl, A/P

APPENDIX C-1

2006-2010 OPA FINAL CDM DETAIL RESULTS WHITBY HYDRO ELECTRIC CORPORATION

(Distributor Specific Schedules Only – Results to 2020)

OPA Conservation & Demand Management Programs

Allocation Methodology

#	Initiative Name	Program Name	Program Year	Results Status	Allocation Methodology	Notes
1	Secondary Refrigerator Retirement Pilot	Consumer	2006	Final	Measure level allocation based on 2006 residential energy throughput by LDC	
2	Cool & Hot Savings Rebate	Consumer	2006	Final	Measure level allocation based on 2006 residential energy throughput by LDC	
3	Every Kilowatt Counts	Consumer	2006	Final	Measure level allocation based on 2006 residential energy throughput by LDC	
4	Demand Response 1	Business, Industrial	2006	Final	Initiative level allocation based on 2007 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 1 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
5	Loblaw & York Region Demand Response	Business, Industrial	2006	Final	Measure level allocation based on 2007 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Electricity Resources Demand Response can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
6	Great Refrigerator Roundup	Consumer	2007	Final	Actual LDC specific results	
7	Cool & Hot Savings Rebate	Consumer	2007	Final	Measure level allocation based on 2007 residential energy throughput by LDC	
8	Every Kilowatt Counts	Consumer	2007	Final	Measure level allocation based on 2007 residential energy throughput by LDC	
9	***peaksaver***®	Consumer, Business	2007	Final	Actual LDC specific results	
10	Summer Savings	Consumer	2007	Final	Actual LDC specific results	
11	Aboriginal	Consumer	2007	Final	Actual LDC specific results	
12	Affordable Housing Pilot	Consumer Low-Income	2007	Final	Actual LDC specific results	
13	Social Housing Pilot	Consumer Low-Income	2007	Final	Initiative level allocation based on 2007 Residential Energy Throughput	
14	Energy Efficiency Assistance for Houses Pilot	Consumer Low-Income	2007	Final	Initiative level allocation based on 2007 Residential Energy Throughput	
15	Electricity Retrofit Incentive	Business	2007	Final	LDC's respective proportion of province-wide reported gross demand savings.	
16	Toronto Comprehensive	Business	2007	Final	Program run exclusively in Toronto Hydro-Electric System Ltd. service territory	
17	Demand Response 1	Business, Industrial	2007	Final	Initiative level allocation based on 2007 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 1 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
18	Loblaw & York Region Demand Response	Business, Industrial	2007	Final	Initiative level allocation based on 2007 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Electricity Resources Demand Response can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
19	Renewable Energy Standard Offer	Consumer, Business, Industrial	2007	Final	Actual LDC specific results	Program results are based on contracted nameplate capacity and not actual summer coincident peak generation
20	Great Refrigerator Roundup	Consumer	2008	Final	Actual LDC specific results	
21	Cool Savings Rebate	Consumer	2008	Final	Measure level allocation based on 2008 Residential Energy Throughput	
22	Every Kilowatt Counts Power Savings Event	Consumer	2008	Final	Measure level allocation based on 2008 Residential Energy Throughput	
23	***peaksaver***®	Consumer, Business	2008	Final	Actual LDC specific results	
24	Summer Sweepstakes	Consumer	2008	Final	Actual LDC specific results	
25	Electricity Retrofit Incentive	Consumer, Business	2008	Final	LDC's respective proportion of province-wide reported gross demand savings.	While this initiative underwent a thorough evaluation process at the provincial level, individual prescriptive input assumptions were not verified for all measures nor were reported savings from every individual LDC verified. A representative sample of retrofit projects were measured and verified and a province-wide savings total was derived. The province wide verified energy and demand savings were allocated to individual LDCs based on their respective proportion of province-wide reported gross demand savings.
26	Toronto Comprehensive	Consumer, Consumer Low-Income, Business	2008	Final	Program run exclusively in Toronto Hydro-Electric System Ltd. service territory	
27	High Performance New Construction	Business	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	
28	Power Savings Blitz	Business	2008	Final	Actual LDC specific results	
29	Demand Response 1	Business, Industrial	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 1 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
30	Demand Response 3	Business, Industrial	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 3 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
31	Loblaw & York Region Demand Response	Business, Industrial	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Electricity Resources Demand Response can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
32	Renewable Energy Standard Offer	Consumer, Business	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	Program results are based on contracted nameplate capacity and not actual summer coincident peak generation
33	Other Customer Based Generation	Business	2008	Final	Contract level allocation based on 2008 non-residential energy throughput by LDCs	Program results are based on contracted nameplate capacity and not actual summer coincident peak generation
34	LDC Custom - Hydro One Networks Inc. - Double Return	Business, Industrial	2008	Final	Program run exclusively in Hydro One Networks Inc. service territory	
35	Great Refrigerator Roundup	Consumer	2009	Final	Actual LDC specific results	
36	Cool Savings Rebate	Consumer	2009	Final	Measure level allocation based on 2009 Residential Energy Throughput	

OPA Conservation & Demand Management Programs

Allocation Methodology

#	Initiative Name	Program Name	Program Year	Results Status	Allocation Methodology	Notes
37	Every Kilowatt Counts Power Savings Event	Consumer	2009	Final	Measure level allocation based on 2009 Residential Energy Throughput	
38	***peaksaver***®	Consumer, Business	2009	Final	Actual LDC specific results	
39	Electricity Retrofit Incentive	Consumer, Business	2009	Final	LDC's respective proportion of province-wide reported gross demand savings.	
40	Toronto Comprehensive	Consumer, Consumer Low-Income, Business, Industrial	2009	Final	Program run exclusively in Toronto Hydro-Electric System Ltd. service territory	
41	High Performance New Construction	Business	2009	Final	Measure level allocation based on 2009 Non-Residential Energy Throughput	
42	Power Savings Blitz	Business	2009	Final	LDC's respective proportion of province-wide reported gross demand savings.	
43	Multi-Family Energy Efficiency Rebates	Consumer, Consumer Low-Income	2009	Final	LDC's respective proportion of province-wide reported gross demand savings.	
44	Demand Response 1	Business, Industrial	2009	Final	Initiative level allocation based on 2009 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 1 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
45	Demand Response 2	Business, Industrial	2009	Final	Initiative level allocation based on 2009 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 2 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
46	Demand Response 3	Business, Industrial	2009	Final	Initiative level allocation based on 2009 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 3 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
47	Loblaw & York Region Demand Response	Business, Industrial	2009	Final	Initiative level allocation based on 2009 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Electricity Resources Demand Response can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
48	LDC Custom - Thunder Bay Hydro - Phantom Load	Consumer	2009	Final	Program run exclusively in Thunder Bay Hydro Electricity Distribution Inc. service territory.	
49	LDC Custom - Toronto Hydro - Summer Challenge	Consumer	2009	Final	Program run exclusively in Toronto Hydro-Electric System Ltd. service territory

3RD Generation Incentive Regulation Model

Whitby Hydro Electric Corporation - EB-2011-0206

Please note that unlike the Distribution Volumetric Rates, which will be entered in the following two tabs, all current Monthly Fixed Charges, including the base charges, must be entered on this tab. Please enter the descriptions of the current Monthly Fix Charges exactly as they appear on your most recent Board-Approved Tariff of Rates and Charges by using the drop-down menus under the column labeled "Rate Description". If the description is not found in the drop-down menu, please enter the description in the green cells under the correct class exactly as it appears on the tariff. Once a description is selected or entered into the green cells, the input cells for the "Unit", "Amount", and "Effective Date" will appear. Please note that the base Monthly Fixed Charge is identified in the drop-down list as a "Service Charge" to coincide with the description on the tariff. Please do not enter more than one "Service Charge" for each class for which a base monthly fixed charge applies. **Note: Do not enter Standard Supply Service Rate. The rate will appear automatically on the final Tariff of Rates and Charges.

Rate Description	Unit	Amount	Effective Until Date
Residential			
Service Charge	$	17.24	
Smart Meter Funding Adder	$	2.13	
Rate Rider for Recovery of Late Payment Penalty Litigation Costs	$	0.19	April 30, 2012
General Service Less Than 50 kW			
Service Charge	$	19.80	
Smart Meter Funding Adder	$	2.13	
Rate Rider for Recovery of Late Payment Penalty Litigation Costs	$	0.52	April 30, 2012
General Service 50 to 4,999 kW			
Service Charge	$	191.34	
Smart Meter Funding Adder	$	2.13	
Rate Rider for Recovery of Late Payment Penalty Litigation Costs	$	5.09	April 30, 2012
Unmetered Scattered Load			
Service Charge (per connection)	$	9.28	
Rate Rider for Recovery of Late Payment Penalty Litigation Costs	$	0.19	April 30, 2012
Sentinel Lighting			
Service Charge (per light)	$	4.05	
Rate Rider for Recovery of Late Payment Penalty Litigation Costs	$	0.02	April 30, 2012
Street Lighting			
Service Charge (per light)	$	1.36	
Rate Rider for Recovery of Late Payment Penalty Litigation Costs	$	0.01	April 30, 2012

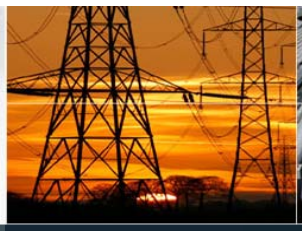
Ontario Energy Board

3RD Generation Incentive Regulation Model

Whitby Hydro Electric Corporation - EB-2011-0206

For each class, please enter the base Distribution Volumetric Rates ("DVR") from your most recent Board-Approved Tariff of Rates and Charges by using the drop-down menus and input cells in columns labeled "Unit" and "Amount".

Rate Description	Unit	Amount
Residential	$/kWh	0.01410
General Service Less Than 50 kW	$/kWh	0.01940
General Service 50 to 4,999 kW	$/kW	3.91780
Unmetered Scattered Load	$/kWh	0.03020
Sentinel Lighting	$/kW	10.98300
Street Lighting	$/kW	5.40700



Ontario Energy Board

3RD Generation Incentive Regulation Model

Whitby Hydro Electric Corporation - EB-2011-0206

Please enter the descriptions of all other current Variable Rates, including any applicable low voltage charges, rate riders, rate adders, etc. from your most recent Board-Approved Tariff of Rates and Charges by using the drop-down menus located under the column labeled "Rate Description". If the description is not found in the drop-down menu, please enter the description of the associated rate in the green cells exactly as it appears on the tariff. Once a description is selected or entered into the green cells, the input cells for the "Unit", "Amount", and "Effective Date" will appear. **Note: Do not enter the WMSR or RRRP Rate below. These rates will appear automatically on the final Tariff of Rates and Charges.

Rate Description	Unit	Amount	Effective Until Date
Residential			
Rate Rider for Deferral/Variance Account Disposition (2010)	$/kWh	(0.00170)	December 31, 2014
Rate Rider for Lost Revenue Adjustment Mechanism (LRAM) Recovery	$/kWh	0.00050	December 31, 2011
General Service Less Than 50 kW			
Rate Rider for Deferral/Variance Account Disposition (2010)	$/kWh	(0.00180)	December 31, 2014

Please complete the following continuity schedule for your Group 1 Deferral / Variance Accounts, Account 1521 and Account 1562. Enter information into green cells only. Lines 51-61 contain footnotes and further instructions.

If you have received approval to dispose of balances from prior years, the starting point for entries in the 2012 DVA schedule below will be the balance sheet date as per your G/L for which you received approval. For example, if in the 2011 EDR process (CoS or IRM) you received approval for the December 31, 2009 balances, the starting point for your entries below should be the adjustment column AV for principal and column BA for interest. This will allow for the correct starting point for the 2010 opening balance columns (for both principal and interest) without requiring entries dating back to the beginning of the continuity schedule ie: Jan 1, 2005.

The following is not included in the total claim but are included on a memo basis:											
Board-Approved CDM Variance Account	1567										
PILs and Tax Variance for 2006 and Subsequent Years (excludes sub-account and contra account below)	1592										
PILs and Tax Variance for 2006 and Subsequent Years - Sub-Account HST/OVAT Input Tax Credits (ITCs)	1592										
PILs and Tax Variance for 2006 and Subsequent Years - Sub-Account HST/OVAT Contra Account	1592					$ -					$ -
Disposition and Recovery of Regulatory Balances[7]	1595					$ -					$ -

For all Board-Approved dispositions, please ensure that the disposition amount has the same sign (e.g: debit balances are to have a positive figure and credit balance are to have a negative figure) as per the related Board decision.

[1] Applicants may wish to propose kWh as the allocator for account 1521 pending a final decision of the Board

[2] Provide supporting statement indicating whether due to denial of costs in 2006 EDR by the Board, 10% transition costs write-off, etc.

[2A] Adjustments Instructed by the Board include deferral/variance account balances moved to Account 1590 as a result of the 2006 EDR and account 1595 during the 2008 EDR and subsequent years as ordered by the Board.

[3] Please provide explanations for the nature of the adjustments. If the adjustment relates to previously Board Approved disposed balances, please provide amounts for adjustments and include supporting documentations.

[4] Although the Global Adjustment Account is not reported separately under 2.1.7, please provide a breakdown in rows 28 and 29.

[5] For RSVA accounts only, report the net variance to the account during the year. For all other accounts, record the transactions during the year.

[6] If the LDC's 2011 rate year started January 1, the projected interest is recorded from January 1, 2011 to December 31, 2011 on the December 31, 2010 balance adjusted for the disposed balances approved by the Board in the 2011 rate decision. If the LDC's 2011 rate year started May 1, the projected interest is recorded from January 1, 2011 to April 30, 11 on the December 31, 2010 balance. The projected interested is recorded from May 1, 2011 to April 30, 2012 on the December 31, 2010 balance adjusted for the disposed balances approved by the Board in the 2011 rate decision.

[7] Include Account 1595 as part of Group 1 accounts (line 31) for review and disposition if the recovery (or refund) period has been completed, and the audited financial statements support the underlying residual balance in account 1595. If the recovery (or refund) period has not been completed, include the balances in Account 1595 on a memo basis only (line 49).

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule

No charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for the Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Customer Administration

Arrears certificate	$	15.00
Statement of account	$	15.00
Pulling post dated cheques	$	15.00
Easement letter	$	15.00
Account history	$	15.00
Credit reference/credit check (plus credit agency costs)	$	15.00
Account set up charge/change of occupancy charge (plus credit agency costs if applicable)	$	30.00
Returned cheque charge (plus bank charges)	$	15.00
Special meter reads	$	30.00
Meter dispute charge plus Measurement Canada fees (if meter found correct)	$	30.00
Legal letter charge	$	15.00

Non-Payment of Account

Late Payment - per month	%	1.50
Late Payment - per annum	%	19.56
Collection of account charge - no disconnection	$	30.00
Collection of account charge - no disconnection - after regular hours	$	165.00
Disconnect/Reconnect at meter - during regular hours	$	65.00
Disconnect/Reconnect at meter - after regular hours	$	185.00
Disconnect/Reconnect at pole - during regular hours	$	185.00
Disconnect/Reconnect at pole - after regular hours	$	415.00
Install/Remove load control device - during regular hours	$	65.00
Install/Remove load control device - after regular hours	$	185.00
Service call - customer-owned equipment	$	30.00
Service call - after regular hours	$	165.00
Temporary service install & remove - overhead - no transformer	$	500.00
Temporary service install & remove - underground - no transformer	$	300.00
Temporary service install & remove - overhead - with transformer	$	1000.00

Whitby Hydro Electric Corporation

TARIFF OF RATES AND CHARGES

Effective Date January 1, 2012

Implementation Date January 1, 2012

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

RETAIL SERVICE CHARGES (if applicable)

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for the Ministry of Energy Conservation and Renewable Energy Program, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	$	100.00
Monthly Fixed Charge, per retailer	$	20.00
Monthly Variable Charge, per customer, per retailer	$/cust.	0.50
Distributor-consolidated billing monthly charge, per customer, per retailer	$/cust.	0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	$/cust.	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	$	0.25
Processing fee, per request, applied to the requesting party	$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	$	no charge
More than twice a year, per request (plus incremental delivery costs)	$	2.00

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factor will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor – Secondary Metered Customer < 5,000 kW	1.0454
Total Loss Factor – Primary Metered Customer < 5,000 kW	1.0349

Uncollected PILs

NOTE: The purpose of this worksheet is to show the movement in Account 1562 which establishes the receivable from or liability to ratepayers. For explanation of Account 1562 please refer to Accounting Procedures Handbook for Electric Distribution Utilities and FAQ April 2003.

Please identify if Method 1, 2 or 3 was used to account for the PILs proxy and recovery. ANSWER:

(1) (i) From the Board's Decision - see Inclusion in Rates, Part III of the TAXCALC spreadsheet for Q4 2001 and 2002. Please insert the Q4, 2001 proxy in column C even though it was approved effective March 1, 2002. If the Board gave more than one decision in the year, calculate a weighted average proxy.

(ii) If the Board approved different amounts, input the Board-approved amounts in cells C13 and E13.

(iii) Column G - In 2003, the initial estimate should include the Q4 2001 PILs tax proxy and the 2002 PILs tax proxy.

(iv) Column I - The Q4 2001 PILs tax proxy was removed from rates on April 1, 2004 and the 2002 PILs tax proxy remained.

(v) Column K - The 2002 PILs tax proxy applies to January 1 to March 31, 2005, and the new 2005 PILs tax proxy from April 1 to December 31, 2005.

(vi) Column M - The 2005 PILs tax proxy will used for the period from January 1 to April 30, 2006.

(2) From the Ministry of Finance Variance Column, under Future True-ups, Part IV a, cell I132, of the TAXCALC spreadsheet. The Q4, 2001 proxy has to be trued up in 2002, 2003 and for the period January 1- March 31, 2004. Input the variance in the whole year reconcilation.

(3) From the Ministry of Finance Variance Column, under Future True-ups, Part IV a, cell I132, of the TAXCALC spreadsheet. The true-up will compare to the 2002 proxy for 2002, 2003, 2004 and January 1 to March 31, 2005.

(4) From the Ministry of Finance Variance Column, under Future True-ups, Part IV b, cell I181, of the TAXCALC spreadsheet. The Q4, 2001 proxy has to be trued up in 2002, 2003 and for the period January 1- March 31, 2004. Input the deferral variance in the whole year reconciliation.

(5) From the Ministry of Finance Variance Column, under Future True-ups, Part IV a, cell I181, of the TAXCALC spreadsheet. The true-up will compare to the 2002 proxy for 2002, 2003, 2004 and January 1 to March 31, 2005.

(6) The correcting entry should be shown in the year the entry was made. The true-up of the carrying charges will have to be reviewed.

(7) Carrying charges are calculated on a simple interest basis.

(8) (i) PILs collected from customers from March 1, 2002 to March 31, 2004 were based on a fixed charge and a volumetric charge recovery by class. The PILs rate components for Q4, 2001and 2002 were calculated in the 2002 approved RAM on sheet 6 and sheet 8. In April 2004, the PILs recovery was based on the 2002 PILs tax proxy recovered by the volumetric rate by class as calculated on sheet 7 of the 2004 RAM. The 2005 PILs tax proxy is being recovered on a volumetric basis by class.

(ii) Collections should equal: (a) the actual volumes/ load (kWhs, kWs, Kva) for the period (including net unbilled at period end), multiplied by the PILs volumetric proxy rates by class (from the Q4, 2001and 2002 RAM worksheets) for 2002, 2003 and January 1 to March 31, 2004; plus, (b) customer counts by class in the same period multiplied by the PILs fixed charge rate components.

In 2004, use the Board-approved 2002 PILs proxy, recovered on a volumetric basis by class as calculated by the 2004 RAM, sheet 7, for the period April 1 to December 31, 2004, and add this total to the results from the sentence above for January 1 to March 31, 2004.

In 2005, use the Board-approved 2005 PILs proxy, recovered on a volumetric basis by class as calculated by the 2005 RAM, sheet 4, for the period April 1 to December 31, 2005. To this total, the 2004 volumetric PILs proxy rate by class should be used to calculate the recovery for the period January 1 to March 31, 2005.

(9) Any interim PILs recovery from Board Decisions will be recorded in APH Account # 1590. Final reconciliation of PILs proxy taxes will have to include amounts from 1562 and from 1590.

IN THE MATTER OF the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15 (Schedule B);

AND IN THE MATTER OF an Application by **Whitby Hydro Electric Corporation** for an order or orders approving or fixing just and reasonable rates.

BEFORE: Gordon Kaiser
Vice Chair and Presiding Member

Paul Vlahos
Member

Pamela Nowina
Member

DECISION AND ORDER

Background and Application

In November 2003 the Ontario government announced that it would permit local distribution companies to apply to the Board for the next installment of their allowable return on equity beginning March 1, 2005. The Government also indicated that the Board's approval would be conditional on a financial commitment to reinvest in conservation and demand management initiatives, an amount equal to one year's incremental returns.

Also in November 2003, the Government announced, in conjunction with the introduction of Bill 4, the *Ontario Energy Board Amendment Act, (Electricity Pricing), 2003*, that electricity distributors could start recovering Regulatory Assets in their rates, beginning March 1, 2004, over a four year period.

In February and March, 2004, the Board approved the applications of distributors to recover 25% of their December 31, 2002 Regulatory Asset balances (or additional amounts for rate stability) in their distribution rates on an interim basis effective March 1, 2004 and implemented on April 1, 2004.

On December 20, 2004 the Board issued filing guidelines to all electricity distribution utilities for the April 1, 2005 distribution rate adjustments. The guidelines allowed the applicants to recover three types of costs. These costs concern (i) the rate recovery of the third tranche of the allowable return on equity (Market Adjusted Revenue Requirement or "MARR"), (ii) the 2005 proxy allowance for payments in lieu of taxes ("PILs") and (iii) a second installment of the recovery of Regulatory Assets.

A generic Notice of the proceedings was published on January 25, 2005 in major newspapers in the province, which provided a 14 day period for submissions from interested parties. On February 4, 2005, the Board issued Procedural Order No. 1, providing for an extension for submissions until February 16, 2005 and also providing for reply submissions from applicants and other parties.

The Applicant filed an application for adjustments to their rates for the following amounts:

MARR: $ 1,300,000
2005 PILs Proxy: $ 2,106,122
Regulatory Assets Second Tranche: $ 3,191,450

Submissions

The Board received one submission which addressed the 2005 rate setting process in general. This submission was made by School Energy Coalition (SEC). SEC objected to the guideline which caused the recovery of the 2005 PILs proxy to be reflected only on the variable charge. SEC was also concerned that monthly service charges and overall distribution charges varied significantly between utilities across the province. SEC also raised concerns regarding the consistency of, and access to, information on the applications as filed by the utilities.

Reply submissions to SEC's general submissions were received from the Coalition of Large Distributors, the Electricity Distributors Association, Hydro One Networks, and the LDC Coalition (a group of 7 distributors). These parties generally argued against the recommendations put forward by SEC, by and large indicating that the Board's existing processes for 2006 and 2007 have been planned to address these issues going forward and that these issues should not be added to the 2005 rates adjustment process.

The Applicant was not specifically named in any of these submissions.

The full record of the proceeding is available for review at the Board's offices.

Board Findings

The Board first addresses the general submission of SEC. While SEC raises important issues regarding electricity distribution rates, the Board has put in place a process which will address most of the issues raised by SEC on a comprehensive basis with coordinated cost of service, cost allocation and cost of capital studies for all distributors in 2006, 2007 and 2008. The Board does agree

that unless there are compelling reasons to diverge from the Board's original filing guidelines for the 2005 distribution rate adjustment process, distributors should follow the guidelines in their applications.

The Board finds that the application conforms with earlier decisions of the Board (including approval for the Applicant's Conservation and Demand Management plan), directives and guidelines.

The Board will issue a separate decision on cost awards.

THE BOARD ORDERS THAT:

1) The rate schedule attached as Appendix "A" is approved effective March 1, 2005, to be implemented on April 1, 2005. All other rates currently in effect that are not shown on the attached schedule remain in force. If the Applicant's billing system is not capable of prorating to accommodate the April 1, 2005 implementation date, the new rates shall be implemented with the first billing cycle for electricity consumed or estimated to have been consumed after April 1, 2005.

2) The Applicant shall notify its customers of the rate changes, no later than with the first bill reflecting the new rates and include the brochure provided by the Board.

DATED at Toronto, March 18, 2005

DECISION AND ORDER

On January 15, 2004 the Ontario Energy Board ("the Board") issued filing guidelines to all electricity distribution utilities for distribution rate adjustments related to the recovery of Regulatory Assets, to be effective March 1, 2004 and implemented on April 1, 2004.

The Applicant filed an application for such adjustment. Notice of the proceeding was published on February 5, 2004 in major newspapers in the province.

While the Board had originally intended to approve the disposal of RSVA amounts on a final basis, on analysis of the applications by distributors and the reporting of RSVA amounts in these applications, the Board has now determined that all rate changes should be interim. In the Board's view, it would be premature to set these rates final based on the quality of the data contained in many of the applications and the fact that the audit sampling process by the Board has not been completed.

The Board received some interventions in these proceedings, mainly concerned with Phase Two of the process. The only intervenor to make specific submissions on Phase One of the proceeding was the School Energy Coalition, ("SEC") who objected to any interim increase in rates over and above the RSVA amounts on the basis that appropriate

evidence had not been filed on these amounts. The Board is not convinced by SEC's arguments and sees no reason that Phase One cannot proceed. Phase One only contemplates partial recovery on an interim basis at this time. In Phase Two, the Board will review all applications to ensure that only prudent and reasonably incurred costs are recovered over the four year period mandated by the Minister.

In light of the above, the Board finds that it is in the public interest to order as follows.

THE BOARD ORDERS THAT:

1) The rate schedule attached is approved on an interim basis, effective March 1, 2004, to be implemented on April 1, 2004. All other rates currently in effect that are not shown on the attached schedule remain in force. If the Applicant's billing system is not capable of prorating to accommodate the April 1, 2004 implementation date, the new rates shall be implemented with the first billing cycle for electricity taken or considered to have been taken from April 1, 2004.

2) The Applicant shall notify its customers of the rate changes by including the brochure provided by the Board through a different process, no later than with the first customer bill reflecting the new rates, and provide to the Board samples of any other notices sent by the Applicant to its customers with respect to the rate changes. The Board expects the Applicant to provide notice to all customers about the rate changes, no later than with the first bill reflecting the new rates.

IN THE MATTER OF the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15 (Schedule B);

AND IN THE MATTER OF an Application by Whitby Hydro Electric Corporation for an order or orders approving or fixing just and reasonable rates.

BEFORE: Paul Vlahos
Vice Chair and Presiding Member

George Dominy
Member

DECISION WITH REASONS AND ORDER

On December 21, 2001 the Ontario Energy Board ("the Board") issued filing guidelines to all electricity distribution utilities for the March 1, 2002 distribution rate adjustments. Supplemental instructions were issued on January 18, 2002.

Whitby Hydro Electric Corporation ("the Applicant") filed an Application ("the Application"), dated January 25, 2002, for an order or orders under section 78 of the *Ontario Energy Board Act, 1998* approving or fixing just and reasonable rates for the distribution of electricity, effective March 1, 2002.

The Applicant filed a revised application ("the Revised Application") dated March 1, 2002. In the Board's Decision and Order dated March 25, 2002, the Board found that the Applicant's proposals conformed with the Board's earlier decisions, directives and guidelines and the resulting rates effective March 1, 2002.

On February 15, 2002, Whitby Hydro filed an application to revise its cost of power rate for its large use customer as the existing large user customer rate was not recovering sufficient revenues for the cost of power and requested that revised rates be made retroactive to January 1, 2002.

The Applicant filed revised applications on April 26, 2002 and May 29, 2002. In the May 29, 2002 revision, the Applicant made an additional request to recover cost of power deficiencies related to the Large User class pertaining to the January 1, 2000 to December 31, 2001 time period. The Applicant estimated the total amount of the under-recovery at $687,666 (cost of power deficiency plus associated PILs).

On March 4, 2002, the Applicant filed an application to adjust distribution rates on May 1, 2002 due to the loss of its one Large User Class customer who would become a wholesale market participant. The Applicant proposed to adjust rates for the remaining classes (effective May 1, 2002) to recover the $821,473 in distribution revenue that would be lost when the Large User Class customer would no longer be served by the Applicant. The Board subsequently approved this request in a Decision and Order dated July 26, 2002.

A Notice of Application and Written Hearing was published on June 14, 2002, which included the outstanding matter pending a Board decision. Atlantic Packaging Products Ltd. was the only intervenor.

Procedural Order No. 1 was issued on July 16, 2002. In response to this order, the Intervenor filed a submission on July 29, 2002 disputing the relief sought and the Applicant filed a reply submission on August 12, 2002.

Copies of the applications, submissions and supporting material are available for review at the Board's offices.

While the Board has considered all of the record filed in this proceeding, the Board has only referenced the record to the extent necessary to provide background to its findings.

Board Findings

The Board accepts as reasonable the Applicant's request to revise the cost of power rates for its Large User Class effective January 1, 2002. As the large use customer ceased to be a distribution customer of the Applicant as of May 1, 2002, the revised cost of power rates are applicable for the January 1, 2002 to April 30, 2002 period. During this time, the Applicant incurred a cost of power deficiency of $227,277.72 on sales to the Intervenor. The Board approves the Applicant's request to collect $370,279.77 from the Intervenor ($227,277.72 plus $143,002.05 in related PILs payments).

The Applicant also requested to recover $194,811.56 from the Large User Class for demand charge deficiencies dating from January 1, 2000 to December 31, 2001 and an additional $122,574.49 to recover the related PILs, for a total of $317,386.10. In the Board's view, the requested amount is a request for the Board to vary its previous decision and approve a retroactive, out of period, rate adjustment.

The Board notes that the Applicant had not applied for such revenue adjustment in its initial filing for unbundled rates, which became effective December 31, 2001 as a result of a Board decision dated November 20, 2001.

The Board also notes that this request was not made in the original February 15, 2002 application to recover the cost of power deficiency related to Large User class rates, but first appeared in the May 29, 2002 revised filing.

The Board relies on the applicants to bring their best case forward for prospective rate adjustments, not on a piecemeal and selective basis. The Board cannot be expected to vary its previous decisions because an applicant might have thought that, after the fact (in this case, a long time after the fact), it could have included in its application certain other matters. Fairness and regulatory efficiency require that there be finality to the rate setting process. The Board therefore denies the Applicant's request to recover in this case the claimed lost revenue for any period prior to January 1, 2002.

The Board notes that the Intervenor is seeking an award for costs. The Board expects the parties to negotiate a settlement. If the parties cannot settle, either party may bring the matter before the Board.

THE BOARD ORDERS THAT:

1) The cost of power rates for the Large User Class be revised with an effective date of January 1, 2002 as follows:

cost of power -winter peak	$9.3209/kW
cost of power-summer peak	$6.5499/kW
cost of power-winter peak	$0.0683/kWh
cost of power-winter off-peak	$0.0409/kWh
cost of power-summer peak	$0.0577/kWh
cost of power-summer off peak	$0.0304/kWh

DATED at Toronto, October 25, 2002.

DECISION WITH REASONS AND ORDER

On December 21, 2001 the Ontario Energy Board ("the Board") issued filing guidelines to all electricity distribution utilities for the March 1, 2002 distribution rate adjustments. Supplemental instructions were issued on January 18, 2002.

Whitby Hydro Electric Corporation ("the Applicant") filed an Application ("the Application"), dated January 25, 2002, for an order or orders under section 78 of the *Ontario Energy Board Act, 1998* approving or fixing just and reasonable rates for the distribution of electricity, effective March 1, 2002.

The Applicant filed a revised application dated March 1, 2002. The Board found that the Applicant's proposals in the March 1, 2002 revised application

conformed with the Board's earlier decisions, directives and guidelines and the resulting rates for March 1, 2002 were approved on March 25, 2002.

As the first unbundled rates previously approved by the Board (RP-2000-0216/EB-2000-0459/EB-2001-0164) on November 20, 2001 were effective on December 31, 2001, the Applicant also proposed a mitigation plan for 2002 rates under which the recovery of the 2nd installment of the Market Adjusted Revenue Requirement (MARR) in the amount of $1,349,473 and interim recovery of transition costs in the amount of $44,522 would be effective and implemented on August 1, 2002. These proposals were accepted by the Board in its March 25, 2002 decision.

On February 15, 2002, Whitby Hydro filed an application (and two revisions on April 26, 2002 and May 29, 2002) to revise its cost of power rate for its Large User Class customer as the existing large user customer rate was not recovering sufficient revenues for the cost of power. The Applicant estimated the amount of the under-recovery at $687,666 (cost of power deficiency plus associated PILs) and requested that the revised rates be made retroactive to January 1, 2002. This application was given Board file RP-2002-0066/EB-2002-0259 and will be considered in due course.

On March 4, 2002, the Applicant filed an additional application to adjust distribution rates on May 1, 2002 due to the loss of its one Large User Class customer when the electricity market opened. The applicant proposed to adjust rates for the remaining classes (effective May 1, 2002) to recover the $821,473 in distribution revenue that would be lost when the Large User Class customer would no longer be served by the Applicant. The Board's March 25, 2002 decision stated that this application would be considered in due course.

As part of this application, the Applicant applied to adjust its electricity distribution rates (effective August 1, 2002) to recover the 2nd installment of the Market Adjusted Revenue Requirement (MARR) in the amount of $1,309,005 and an interim recovery of transition costs in the amount of $44,522. The MARR amount was reduced from the original $1,349,473 amount approved during initial distribution rate setting (RP-2000-0216) because the loss of the Large User Class customer reduced the working capital requirement portion of the ratebase used to determine MARR in the initial application.

On April 15, 2002, the Applicant filed an amendment to this application to request that the May 1, 2002 rates be approved on an interim basis pending the outcome of a cost allocation study.

A Notice of Application and Written Hearing was published in the newspapers on June 14, 2002. There were no intervenors.

On June 14, 2002, the Applicant filed an amendment to its application to recover the lost distribution revenue through a retroactive rate adder as revised rates could not be approved in time for the proposed May 1, 2002 effective date.

The Copies of the Applications and supporting material are available for review at the Board's offices.

While the Board has considered all of the evidence filed in this proceeding, the Board has only referenced the evidence to the extent necessary to provide background to its findings.

Board Findings

The Board finds that the Applicant's proposals to recover the 2nd MARR installment of $1,309,005 and transition costs of $44,522 conform with the Board's earlier decisions, directives and guidelines.

The Board also finds that the Applicant's proposal to adjust distribution rates for the loss of the Large User Class customer to be acceptable since the loss of this customer does not result in stranded distribution assets.

The Board notes that the Applicant requested interim rates pending the outcome of a cost allocation study. The Board does not expect the Applicant to undertake such a study until second generation PBR guidelines are released. Consequently, revised rates will be approved as final rates, not interim rates.

The Board notes that the application to revise cost of power rates for the Large User Class customer filed by the Applicant on February 15, 2002 (RP-2002-0066/EB-2002-0259) indicated that only the cost of power rates would be affected by the proposed revisions (i.e. distribution revenue would remain at the same level as originally approved in the rate unbundling application (RP-2000-0216/EB-2000-0459) and used in the March 4, 2002 application.) The Board notes, however, that these applications indicate different amounts for the Large User Class distribution revenue. The Applicant filed two revisions to the February 15, 2002 application (on April 26, 2002 and May 29, 2002) to resolve these discrepancies and to request other adjustments related to the proposed cost of power revisions (this latter request will be considered in due course). Given this, the Board does not consider the Applicant's March 4, 2002 application to have been complete until May 29, 2002. The Board needs a reasonable amount of time to review, analyse, assess, decide and process rates applications,

especially if they contain unusual issues as this application did. Consequently, the Board denies the Applicant's request to make the revised rates effective as of May 1, 2002. The Board finds that August 1, 2002 is a reasonable effective date for the new rates.

THE BOARD ORDERS THAT:

1) The rates set out in Appendix "A" of this Order are approved effective August 1, 2002.

2) The Applicant shall notify its customers of the rate changes coincident with the first bill reflecting the new rates.

DATED at Toronto, July 26, 2002.

IN THE MATTER OF the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15 (Schedule B);

AND IN THE MATTER OF an Application by Whitby Hydro Electric Corporation for an order or orders approving or fixing just and reasonable rates.

BEFORE: Paul Vlahos
Vice Chair and Presiding Member

George Dominy
Vice Chair and Member

DECISION AND ORDER

On December 21, 2001 the Ontario Energy Board ("the Board") issued filing guidelines to all electricity distribution utilities for the March 1, 2002 distribution rate adjustments. Supplemental instructions were issued on January 18, 2002.

Whitby Hydro Electric Corporation ("the Applicant") filed an Application ("the Application"), dated January 25, 2002, for an order or orders under section 78 of the *Ontario Energy Board Act, 1998* approving or fixing just and reasonable rates for the distribution of electricity, effective March 1, 2002.

The Applicant filed a revised application ("the Revised Application") dated March 1, 2002.

The Board published a generic Notice in newspapers across Ontario informing ratepayers of the distribution rate adjustments to be effective March 1, 2002 and providing the opportunity for ratepayers to participate in the proceeding or comment on the utility's application. In response to the Board's generic Notice, the Board received a total of 148 submissions in the form of a letter, facsimile, or e-mail. The total may be apportioned to the following four categories:

- 100 were copies of a template submission seeking an oral hearing, wanting to make oral submissions, claiming that rates are not just and reasonable. Another 9 were of the same template but indicated they did not wish to make an oral submission.

- 10 indicated that there should be an oral hearing and wanted to make a submission.

- 11 indicated that there should be an oral hearing but did not wish to make an oral submission.

- 18 made substantive submissions.

In some cases the submission named a specific electricity distributor, in other cases it did not. The Applicant was not named in any of the submissions.

By letter dated February 11, 2002 the Board directed electricity distributors to serve the Notice to the municipal corporation in the distributors' service area. No submissions were received.

The Applicant applied to adjust its distribution rates effective March 1, 2002, for the following:

- Input Price Inflation (IPI) and Productivity Factor as provided for in the Performance Based Regulation (PBR) Plan.

- the 2001 deferred Payments in Lieu of Taxes (PILs), $506,397.

- the 2002 Payments in Lieu of Taxes (PILs), $1,962,630.

As the first unbundled rates previously approved by the Board (RP-2000-0216/EB-2000-0459/EB-2001-0164) on November 20, 2001 were effective on December 31, 2001, the Applicant also proposed a mitigation plan for 2002 rates under which the recovery of the 2nd installment of the Market Adjusted Revenue Requirement (MARR) in the amount of $1,349,473 and interim recovery of transition costs in the amount of $44,522 be effective and implemented on August 1, 2002.

On March 4, 2002, the Applicant filed an additional application to adjust distribution rates on May 1, 2002 due to the loss of their one Large User Class customer when the electricity market opens.

The Copies of the Applications and supporting material are available for review at the Board's offices.

While the Board has considered all of the evidence filed in this proceeding, the Board has only referenced the evidence to the extent necessary to provide background to its findings.

Board Findings

As noted above, a number of persons have written to the Board requesting that the Board hold an oral hearing in the matter of the applications by electricity distributors.

Under subsection 5.1(2) of the *Statutory Powers Procedure Act*, the Board shall not hold a written hearing where a party satisfies it that there is good reason not to hold a written hearing, in which case the Board will proceed by way of an oral or electronic hearing. Good reasons for proceeding by way of an oral hearing may include the existence of questions of credibility in which the Board will be assisted by the ability to observe the demeanor of witnesses or the complexity of evidence which parties should have the ability to test through cross-examination. Another good reason may be where an oral hearing would allow the Board to more expeditiously deal with an application.

The persons who have requested an oral hearing have not cited any such reasons but have in most cases merely stated that "the rates are not just and reasonable" and that they "would like the opportunity to present to the Board on this matter".

The current proceeding is an extension of the process undertaken by the Board to restructure Ontario's electricity distribution industry. To facilitate this work, the Board developed a regulatory framework that was the result of extensive consultation and public hearings. The current applications are the result of this framework, which is largely formulaic and includes for the first time the provision for the legislative requirement of PILs.

Persons have received an opportunity to make their concerns known to the Board through the published Notice which invited written submissions on the applications. The Board notes that a written hearing is a public process in which all documents received by the Board are available to the public. The Board further notes that most of the issues raised by the submissions of the persons requesting an oral hearing are outside of the scope of the Board's jurisdiction in this proceeding. For example, some persons raised issues of privatization of electricity services and limitations in international trade agreements on the ability of the government to make changes to Ontario's electricity system in the future. These are not relevant to the Board's duty in this proceeding to approve just and reasonable rates for an individual distributor regulated by the Board.

Therefore, the Board has decided not to hold an oral hearing in this matter.

The Board accepts the Applicant's mitigation plan to recover certain transition costs and to phase-in the second of three installments of the incremental MARR commencing August 1, 2002. In the interest of expediency, and in view of the March 4, 2002 application to adjust rates as of May 1, 2002 to reflect the loss of the Large User Class customer, the Board will approve rates in this Decision that will apply on March 1, 2002. The Board will process the Applicant's other requests in due course. The Board notes that the Applicant has acknowledged that it will forego the uncollected distribution revenue related to the incremental MARR from March 1, 2002 to August 1, 2002.

The Board finds that the Applicant's proposals in the March 1, 2002 Revised Application conform with the Board's earlier decisions, directives and guidelines and the resulting rates for March 1, 2002 are just and reasonable.

THE BOARD ORDERS THAT:

1) The rates set out in Appendix "A" of this Order are approved effective March 1, 2002.

2) The Applicant shall notify its customers of the rate changes coincident with the first bill reflecting the new rates.

DATED at Toronto, March 25, 2002.
