

1 REVENUE TO COST RATIO ADJUSTMENT

2 **VECC Question # 1**

3 **Reference:** 2012 IRM Revenue Cost Ratio Adjustment Workform

4 **a) Please explain why the Revenue Requirement from Rates, \$7,932,313, reported on**
5 **Sheet 5 (Re-based Revenue from Rates) in the 2012 IRM Revenue Cost Ratio**
6 **Adjustment Workform, differs from the Distribution Revenue Requirement of \$7,703,066**
7 **shown in the Revenue Requirement Work Form for 2011 rates (EB-2010-0145).**

8

9 **Response:**

10

11 The Revenue Requirement from Rates of \$7,932,313 reported on Sheet 5 (Re-based Revenue
12 from Rates) in the 2012 IRM Revenue Cost Ratio Adjustment Workform includes the transformer
13 allowance amount of \$ \$225,913, which when deducted from \$7,932,313 amounts to \$7,706,400.

14

15 Sheet 9 (RC Ratio Revenue) n the 2012 IRM Revenue Cost Ratio Adjustment Workform includes
16 the transformer allowance rate in the calculation in column "k" and calculates a revenue
17 requirement from rates of \$7,706,400.

18

19 The \$3,334 variance between \$7,706,400 and \$7,703,066 as shown in the Distribution Revenue
20 Requirement is due to rounding differences, and is a variance of 0.04%.

21

22

23

INCREMENTAL CAPITAL

VECC Question # 2

Reference: Manager's Summary, Pages 12 -13

Preamble: HONI's economic evaluation results determined that a capital contribution requirement of \$4.1 million plus taxes, was to be provided to HONI by Woodstock.

a) What is the total cost of the project and what is HONI's share of the costs?

Response:

		Total Costs	WHSI Share	HONI/HON Distribution Share
*	Estimated Engineering and Construction Costs Transformation Connection Pool Work	\$ 23,800,000	\$ 11,912,900	\$ 11,887,100
*	Estimated Engineering and Construction Costs - Line Connection Pool Work	\$ 700,000		\$ 700,000
	Estimated Wholesale Meter Costs	\$ 327,330	\$ 327,330	\$ -
	Total Estimated Project Costs - Commerce Way TS	\$ 24,827,330	\$ 12,240,230	\$ 12,587,100

Appendix E-5, page 9, Schedule "B" (Commerce Way TS) of the CCRA , states that the estimated total cost of the transformation connection pool work is \$23,800,000 and the line connection pool work is \$700,000.

Page 12 of WHSI's submission "Woodstock TS Agreement 2011004.pdf", Appendix E-4, states"
"Special Circumstances"...

"b) the understanding that this is a shared project with HON Distribution where Woodstock Hydro and HON Distribution would each be allocated 50% of the capacity of the new station"

Subject to this condition, and also shown on page 38 of WHSI's submission "Woodstock TS Agreement 2011004.pdf", Appendix E-5, 50% of the transformation connection pool work costs (\$11,912,900) were included in the economic evaluation that determined WHSI's \$4.1 Million

1 capital contribution. This capital contribution represents the revenue shortfall between the
2 discounted transmission revenue HONI would receive from WHSI for 50% of the capacity of the
3 new station, and 50% of the construction and operating costs of the station over the 25 year term.

4
5 The actual costs will be provided by HONI 180 days after the Ready for Service Date. WHSI has
6 since been advised by HONI that, based on their updated cost forecast, an additional capital
7 contribution of approximately \$600,000 may be required from WHSI at that time.

8
9
10
11 **b) Woodstock provided a deposit of \$169,500 to HONI in May 2008 when a Letter of**
12 **Agreement was signed (Page 12 Lines 16-18). How is this payment factored into the**
13 **capital contribution to HONI?**

14
15 **Response:**

16 The HST portion of the deposit for \$19,500 was submitted as an ITC through WHSI's monthly
17 HST return. The net deposit of \$150,000 was deducted from the first installment requirement of
18 \$2,500,000. In August 2011, WHSI remitted \$2,350,000 plus HST to HONI. The total amount of
19 the first installment was \$2,500,000 (\$150,000 plus \$2,350,000) .

VECC Question # 3

Reference: Manager's Summary, Page 13

Preamble: The evidence indicates Woodstock submitted Notification to remove these costs from its 2011 COS Application after being informed by HONI that the construction of the TS would be delayed. HONI has since confirmed that the amended Ready for Service Date is December 17, 2012.

a) Please discuss the reasons for the delay.

Response:

In 2010, WHSI was notified by HONI that the construction of the TS would be delayed as a result of matters arising from HONI's Woodstock East Transmission Line Upgrade Project (EB-2009-0079). It was determined that an existing natural gas pipeline located in the transmission right-of-way would need to be moved to the north side of Parkinson Road and was beyond the control of WHSI.

It is our understanding that the Commerce Way TS Project could not commence until these matters were resolved by HONI.

1 **b) Is HONI still able to meet the amended Ready for Service Date? If not, why not?**

2
3 **Response:**

4
5 On November 11, 2011 WHSI received confirmation from HONI of their intent to meet the
6 December 2012 Ready for Service Date, however HONI has identified certain risks surrounding
7 outage planning in the neighbouring HONI area while ensuring quality and consistency of supply
8 for Woodstock area customers. The review and evaluation of construction contracts and
9 complexity of control building ordering are other risks identified by HONI. HONI has committed to
10 providing more clarification to WHSI as to the project status by mid-December, 2011.

1 **VECC Question # 4**

2 **Reference: Manager's Summary, Page 13**

3 a) **Please summarize the results of Woodstock's load forecast review that was used to**
4 **assess the need for this project and to demonstrate the future reliability and capacity**
5 **issues.**

6
7 **Response:**

8
9 WHSI's load forecast as included in *EB- 2009-0079 (HONI_APPL_S92_WoodstockEast_20090501.pdf,*
10 *Exhibit B Tab 6 Schedule 2)*, assessed the need for this project based on a number of factors. Load,
11 reliability and redundancy had all been discussed in the context of both new and existing
12 customer load demands as well as the need for adequate power quality.

13
14 The announcement of the new Toyota MC Assembly plant generated significant interest in the
15 Woodstock area while applying pressure to both transmission and transformation. Based on the
16 Toyota MC forecast demand and subsequent influx of supply companies, Hydro One and
17 Woodstock Hydro determined a significant investment would be required to meet existing needs
18 while ensuring expansion and new manufacturing capacity was in place to meet customer
19 requirements.

20
21 Our load forecast assumed load growth based on Toyota MC requirements, tier 2 and 3
22 manufacturing needs and the ultimate expansion of the plant and supply chain to full capacity.
23 During this time, customers were clear: electrical capacity was a prerequisite to further expansion
24 and sustainability. The 'just in time' production methodology leaves little room for poor planning

1 and customers insisted reliability, capacity and quality are paramount to continued growth in
2 Woodstock.

3

4 The load forecast did not anticipate plant failures (and there have been several in Woodstock), an
5 economic recession, nor the success of conservation and demand management. In retrospect,
6 our load forecast appears to be high, however, economic growth and securing the potential
7 supply for new business development and expansion remains a significant factor in the decision
8 to expand transformation within the Woodstock area.

9

10 Feedback from customers suggest Woodstock suffered from the limitation of a century old
11 transmission and transformation system; that the lack of redundancy and limited margins of
12 demand expansion would potentially cripple the local economy and preclude investment within
13 the area.

14

15 **b) Please discuss these results in the context of Woodstock's current load forecast.**

16

17 **Response:**

18 Although actual loads have not yet met the forecast loads , we firmly believe the combination of
19 redundancy, power quality and capacity for growth justify the investment. Economic development
20 within and around Woodstock continues to attract significant interest from large scale business.
21 These investors research potential investment locations and invariably challenge the City and
22 electrical distribution companies to prove there is sufficient capacity for expansion.

23 In the past, the Woodstock area has been overlooked for investment based the age and limited
24 capacity of transmission and transformation in the area. Transmission tower and station

Filed: November 23 2011

equipment failures (due primarily to end of life conditions) have resulted in long term outages that should have been avoided. Businesses harvest this information and use it to determine areas to avoid. Woodstock was at risk and the recent investments in both transmission and upcoming station improvements will serve the community well for the foreseeable future.

A current load forecast is shown below:

2011 Updated Forecast Woodstock Hydro

	Year	Planned Growth Rate	Spot Loads	WH Peak Load (MW)	Effective Growth Rate	WH Load on WE-TS (MW)
Actual Demand	2004			71.0		-
	2005			79.1	11.4%	-
	2006			82.0	3.7%	-
	2007			75.0	-8.5%	-
	2008			74.0	-1.3%	-
	2009			73.0	-1.4%	-
	2010			75.0	2.7%	75.0
In Service	2011			77.0	2.7%	77.0
	2012	2.0%		78.0	1.3%	78.0
	2013	2.0%		79.6	2.0%	79.6
	2014	2.0%		81.2	2.0%	81.2
	2015	2.0%		82.8	2.0%	82.8

	2033	1.0%		99.0	1.0%	60.0
	2034	1.0%		100.0	1.0%	60.0

VECC Question # 5

Reference: Manager's Summary, Page 15

Preamble: A summary of the anticipated \$327,330 cost for the TS Wholesale Metering is provided on Page 15.

a) Please provide a breakdown of the purchase and installation costs.

Response:

Commerce Way TS will ultimately provide eight 27.6 KV feeders, four allocated to Hydro One and four to Woodstock Hydro. Our intent is to egress from the station structure with four three phase underground, concrete encased feeders beyond the compound perimeter. All four feeders will terminate at pad-mounted Instrumentation Transformers, providing wholesale primary and redundant metering equipment outside of the station compound.

Initial cost estimates were based on distance and design as known at the time and include the following:

	Installation	Purchases	Total
Design and installation of duct bank	\$ 25,466	\$ 25,000	\$ 50,466
Cabling and termination for two circuits	\$ 30,466	\$ 30,000	\$ 60,466
Design and Installation of Metering equipment	\$ 30,466	\$ 35,000	\$ 65,466
Engineering Design and installation of IT equipment	\$ 40,932	\$ 30,000	\$ 70,932
IT Equipment		\$ 80,000	\$ 80,000
Total	\$ 127,330	\$ 200,000	\$ 327,330

VECC Question # 6

Reference: Manager's Summary, Pages 17 to 18

Preamble: Under the Prudence Section of the evidence, Woodstock discusses the business, operational and qualitative factors that were examined and that it considered in deciding whether to self build, pursue shared ownership of a TS with another LDC, or to provide a capital contribution to HONI. Woodstock has provided design and cost details for the HONI ownership alternative.

a) Please provide details on the design, location, associated costs and proposed in-service dates that were considered for the other two alternatives noted above.

Response:

In consideration of the best approach to ensuring sufficient capacity to meet future load requirements, the options available to WHSI were:

1. HONI – Design, Construct, Own and Operate (with capital contribution from WHSI)
2. LDC Consortium – Design, Construct, Own and Operate
3. WHSI – Design, Construct, Own and Operate
4. WHSI – Design, Construct → HONI Own and Operate or Outsourced Operations

Option 1 - HONI – Design, Construct, Own and Operate (with capital contribution from WHSI)

In 2004, as WHSI embarked upon the analysis of the various transmission-planning options available, the successful and proven approach of building a shared TS with Hydro One Networks and Hydro One Distribution was established as the primary option, against which others would be measured.

1 Benefits of Option 1:

2 1. *Lowest Risk / Proven and Successful "Track Record" of HONI*

3

4 Hydro One Networks owns the transmission circuits in the City, and presently owns and
5 operates the transformer station that feeds our service territory (Woodstock TS). Strategic
6 and effective working relationships have been built and maintained over the years between
7 the operations groups at Hydro One and WHSI, and internal systems, IT infrastructure and
8 business processes supporting the daily operation of the feeders in the Woodstock TS which
9 are dedicated to WHSI's distribution system are cost-effective, in place and meeting our
10 needs. This shared approach has been successfully operational and has serviced the past
11 and emerging needs of our ratepayers and the region more broadly for over fifty years.

12

13 WHSI also firmly believes that Hydro One is an industry leader in TS deployment in terms of
14 years of experience and successful project execution.

15

16 2. *Broader Interest Served by a Shared TS*

17

18 In the past, and with only a few exceptions, the former Ontario Hydro owned, constructed,
19 maintained and operated transformer stations serving one or more MEUs (now LDCs). In the
20 past few decades, some regions / LDCs have moved away from this historical model and
21 certain LDCs have privately built and operated TS's. One of the underlying tenets that has
22 governed the electrical industry in Ontario for many years on the matter of transformer
23 ownership is that the transformation pool should not be adversely affected by the decision of
24 an LDC to opt out of the pool. Typically a larger LDC would be in a position to defend the
25 construction of an owned TS that is both robust/right-sized and fully-utilized in servicing the
26 needs of the LDC's customer base, and therefore not negatively impacting cost or
27 performance of the broader transmission pool.

28

29 As reported on Page 12 through Page 18 of the Manager's Summary, WHSI and Hydro One
30 Networks (HONI) have held discussions surrounding joint concerns over current and future

1 reliability and capacity issues, and the construction of a new transformer station to resolve
2 these concerns. Since 2004, WHSI had already been aware that our needs were not specific
3 to our service territory and our organization – a solution was needed for the region. Both the
4 need and prudence of the Commerce Way TS were established by the Board through OEB
5 Decision and Order EB-2009-0079, which recognized that *“the proposed facilities are needed*
6 *to provide adequate transmission capacity and reliability levels for the Woodstock area and to*
7 *meet projected load increases at the associated transformer stations”*. Both Hydro One
8 Distribution and WHSI had projected load increases which needed to be addressed.

9
10 The base cost of transmission station infrastructure includes elements such as real estate,
11 project management and design fees, and the core infrastructure required to operate the
12 station, none of which change significantly based on station capacity. Therefore, the overall
13 cost of a single, larger TS versus two or more independent stations being built for the same
14 collective group of customers, is inherently in the broader interest from a cost perspective as
15 well (see Table below).

16
17 WHSI did not obtain any pricing for a standalone TS. However, for discussion purposes it is
18 reasonable to assume that project management, real estate and engineering costs would
19 likely not be materially different due to differences in capacity requirements. Since formal
20 pricing was not obtained, no estimate has been made for station construction or transformer
21 equipment costs in the model below. However, it is reasonable to assume that the
22 infrastructure and equipment costs would be much higher than half of the same line items for
23 the shared TS.

24

1

	<u>Commerce Way (Shared) TS</u> <u>(Budgeted)</u>	<u>Standalone TS</u> <u>(Estimated)</u>
Project Management and Other Project Costs	7,000,000	7,000,000
Real Estate	750,000	750,000
Engineering	<u>1,250,000</u>	<u>1,250,000</u>
Fixed Costs	9,000,000	9,000,000
Station Construction	3,800,000	Not Estimated
Transformer Equipment	<u>11,750,000</u>	Not Estimated
TOTAL	Budget 24,550,000	

2

3

4 3. *Integration into Broader Transmission Strategy for the Region*

5

6 EB-2009-0079 describes that the Commerce Way TS project includes “rebuilding
7 approximately 4 km from the existing Hydro One single circuit 115 kV transmission line, which
8 is reaching end of life on an existing right of way with a double circuit 230 kV line. Hydro One
9 also proposes to construct a new transformer station (“Commerce Way TS”) at the request of
10 the Local Distribution Companies, to which the rebuilt line will connect”. Since the TS has
11 been planned by HONI, with a full awareness of the broader transmission plans for the
12 region, the transformer equipment within the Commerce Way TS has been procured such
13 that the future evolution from 115 kV to 230 kV will be relatively seamless.

14

15

16

17

1 Option 2 - LDC Consortium

2 Hydro One Distribution is the closest and only contiguous LDC in proximity to the service territory
3 supplied by Woodstock Hydro. It is our understanding that Hydro One Distribution does not own
4 any transformer stations, but in all cases connects only to transformer stations owned by their
5 sister company Hydro One Networks.

6 Erie Thames Powerlines is a neighboring LDC with an expansive, non-contiguous service territory
7 that is surrounded by rural areas serviced by Hydro One Distribution. Erie Thames Powerlines is
8 an embedded distributor and also don't have any impending capacity requirements, and therefore
9 discussions regarding a consortium model were not initiated.

10 Given the geographic realities and complete lack of realistic partnership options, a detailed
11 business case was not pursued for this option.

12 Option 3 – WHSI – Design, Construct, Own and Operate

13 The identified advantages of this option were as follows:

- 14 1. *Design Control* - As the project designer, WHSI would have complete control over all
15 aspects of the TS's design and integration into the distribution infrastructure.
16
- 17 2. *Timeline Control* - As the project manager, WHSI *may* be better able to control the in-
18 service date for the TS.
19
- 20 3. *Cost Control* - As the project designer, WHSI *may* be able to more effectively manage
21 project cost. Had WHSI issued an RFP for a standalone, dedicated TS, suppliers would
22 have competed to provide quotations and there was the potential for these quotations to be
23 at a lower cost than what it would have cost Hydro One to build a similar station or in
24 comparison to the capital contribution amount for the shared station.

25 The identified disadvantages of this option were as follows:

1 1. *Not Our Core Business* - An LDC's decision to build their *first* TS obviously requires a much
2 more detailed business case versus deciding to build *additional* TS assets. WHSI's overall
3 corporate vision espouses a concentrated and focused attention on efficiently and effectively
4 servicing our customers' needs, as a local *distribution* company. As mentioned on Page 19
5 of the Manager's Summary, WHSI consulted LDCs with experience in transmission and
6 trusted business partners/advisors, all of whom counseled WHSI against pursuing the "own
7 and operate" model, citing many of the factors outlined in more detail below.

8
9 2. *Lack of Technical Capability of the LDC*

10 An LDC must possess or be able to retain the technical expertise, capability and staff
11 necessary to plan, construct, operate and maintain the project both during design and
12 subsequent long-term operation. In-house operations expertise expands beyond the
13 operation of the station into the area of interaction with the IESO and the Ontario Grid Control
14 Center. Given our absolute lack of experience in transmission activities, there would have
15 been immediate and significant operating expenses incurred to both ensure an appropriate
16 level of in-house expertise as well as to engage and secure strategic partnerships with
17 professionals to assist us in managing risk and ensuring a successful outcome.

18
19 An additional disadvantage from a technical standpoint is the introduction of differing
20 business processes for the same requirements – i.e. operations personnel would need to
21 understand and implement two sets of processes in order to interact with HONI with respect
22 to the Woodstock TS and internally with respect to the operation of the WHSI-owned TS.
23
24

1

2 3. *Smaller TS Required / Diminished Redundancy and Agility in Comparison to the Shared TS*
3 *Model*

4

5 For WHSI alone, the need for a TS has been established. Available commercial/Industrial
6 real estate within WHSI's defined service territory will generate load growth through economic
7 expansion in the coming years. However, in building a load forecast for an LDC-owned TS,
8 WHSI recognized that any possibility for larger-scale growth was precluded by Hydro One
9 Distribution's protracted unwillingness to sell distribution assets located within the City of
10 Woodstock but outside of WHSI's service territory. The right-sizing of a WHSI-owned,
11 standalone TS would have to take this reality into consideration.

12
13 Hydro One Distribution has consistently stated that it is not their policy to connect their
14 distribution system to a privately-owned transformer station, precluding a joint-use
15 arrangement with an organization that was a long-term partner at the Woodstock TS and in
16 the same situation as WHSI – in need of a new TS in order to provide adequate transmission
17 capacity and reliability levels in the Woodstock area. Therefore, a station dedicated solely to
18 the requirements of WHSI would have been half the size or even smaller than half the size of
19 the Commerce Way TS presently under construction and would have necessitated the
20 construction of another TS to fulfill the future requirements of Hydro One Distribution in the
21 near future. Four of the eight feeder points in the Commerce Way TS have been assigned
22 for WHSI's use.

23
24 At the time when HONI transitions the region from 115 kV to 230 kV, WHSI would either have
25 to retrofit a the transformers in the standalone TS to 230 kV, or purchase today with 230 kV in
26 mind.

27

28 4. *Risk and Cost*

29 In an owned TS model, the LDC would have had to invest in backup capacity to ensure load
30 supply in the event of a full station outage. Replacement parts would have to be secured in

1 order to mitigate the impact of transformer failure. A decision to own the TS leads to the
2 bearing the full responsibility for providing for future capacity additions to supply the needs of
3 our service area. Economic fluctuations and the long-term impact of both conservation
4 initiatives and alternative energy through renewable generation also introduce a higher level
5 of risk to WHSI in determining the appropriate size for a dedicated TS.

6 The potential for project control, and most notably cost control, are the key advantages of this
7 option.

8 While some LDCs may have been able to build a TS more cheaply than the costs associated with
9 a Hydro One TS, the feedback that WHSI received from LDC contacts who had participated in
10 station construction projects with Hydro One was that Hydro One's projects are cost-competitive
11 once all final costs are considered.

12 Shared supply with Hydro One Distribution makes sense from a customer service and expansion
13 perspective, ensures consistent operation and control of the transmission facilities, and will avoid
14 expensive redundancy that would inevitably cost rate payers more in the long term.

15 Given the body of evidence against this option, the corporation did not issue an RFQ/RFP to
16 potential bidders for the design and construction of a standalone TS. WHSI is confident that a
17 standalone TS would not have been in the best interest of the transmission pool or the ratepayers
18 of the geographic region which includes the City of Woodstock. The benefits of any perceived
19 cost reduction that may have been possible from the construction of a standalone TS are vastly
20 outweighed by the disadvantages of such a narrow approach to long-term planning, and would
21 most likely have resulted ultimately in considerable unforeseen costs in the future.

22
23 Option 4 - WHSI – Design, Construct → HONI Own and Operate / Outsourced Operations

24 The difference between Option 3 and Option 4 is simply that WHSI would not have to build up
25 long-term in-house expertise required to *operate* the facility. However, WHSI would still have
26 needed to build up our internal knowledge and capabilities in order to effectively project-manage
27 the design and construction of the TS.

1 Just as in Option 3 above, control over the project would require a compromise to the station size
2 and accessibility. In order to have complete control over project design, cost and in-service
3 timelines, the TS would have had to have been built to meet only WHSI's needs. Complex,
4 multi-million dollar projects involving multiple parties are at high-risk for cost overruns, in-service
5 delays, or outright project failure. In many cases, a project which at the approval stage appears
6 to be optimal from a cost perspective fails due to poor execution or lower-quality inputs.

7 Outsourced operations combined with continued ownership re-introduce the issue of long-term
8 technical knowledge and expertise, as well as risk and cost associated with equipment and/or full
9 station failure.

10 WHSI did not pursue negotiations with Hydro One to determine level of interest in acquiring and
11 operating a TS that had been built by WHSI, and also did not seek out pricing for outsourced
12 operations service offerings. WHSI also did not issue an RFP to ascertain potential costs and
13 design options associated with a standalone station that would ultimately be owned and operated
14 by Hydro One.

15

16

17 **b) Please provide copy of the business case supporting Woodstock's decision to have**
18 **Hydro One provide the transformer station.**

19

20

21 **Response:**

22 Please refer to WHSI's response to 7a) above.

23

VECC Question # 7

Reference: Manager's Summary, Page 21

Preamble: The evidence indicates that Woodstock has 2012 forecasted capital expenditures of \$7,377,996 that includes costs for the Commerce Way TS of \$4,427,330.

a) **Please provide a Capital Spending Schedule that sets out, on a comparative basis, 2010 Actual, 2011 approved (EB-2010-0145), 2011 Bridge and 2012 using the spending categories from EB-2010-0145.**

Response:

Two comparative tables have been provided. Table 1 shows 2010 Actual, 2011 Approved, 2011 Bridge and 2012 Test year capital spending on a comparative basis excluding the Commerce Way TS Costs. These amounts exclude the smart meter assets that were brought into the rate base as approved in EB-2010-0145.

Table 2 shows 2010 Actual, 2011 Approved, 2011 Bridge and 2012 Test year capital spending on a comparative basis including the Commerce Way TS Costs.

b) Please provide explanations for any categories where the variance between the 2011 approved and the current 2012 budget spending exceeds plus/minus 5%.

Response:

The overall variance between the 2011 approved and 2012 test year capital expenditures is 1% or \$30,993, excluding the Commerce Way TS Project.

Exclusive of the Commerce Way TS Project costs, the following variances (+/-5%) between the 2011 approved and the current 2012 budget spending for distribution capital is due to the nature Of the planned capital projects compared to the projects included for the 2011 approved amounts.

Distribution system infrastructure

On an overall basis, the net variance for distribution system infrastructure exclusive of services and meters is constant and varies by 2.27% or \$41,171 over the 2011 Approved amounts. Additional details related to this spending are provided in part c) below.

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Distn Stn Equipt-Primary below 50	1820	0	0		0
OH Poles, Towers, Fixtures	1830	602,927	564,741	(38,186)	-6.33%
OH Conductors, Devices	1835	300,873	288,188	(12,685)	-4.22%
UG Conduit	1840	472,513	530,821	58,308	12.34%
UG Conductors, Devices	1845	373,275	314,573	(58,702)	-15.73%
Transformers	1850	507,727	563,667	55,940	11.02%
Capital Contributions	1995	(442,913)	(406,417)	36,496	-8.24%
Total Variance		1,814,402	1,855,573	41,171	2.27%

Distribution Services

Costs for distribution services are 38% higher in the 2012 test year than the 2011 approved amounts and reflects the expected customer growth in 2012 as well as service upgrades and replacements that arise from 2012 planned conversion projects, as provided in part c) below.

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Services	1855	199,814	276,268	76,454	38%

Meter Capital

The 67% increase in meter capital in the 2012 test year over the 2011 approved amounts is due to inclusion of new smart meter installations that are expected to be recognized in the rate base during the 2012 rate year, rather than being recognized in account 1555, Smart Meter Capital Variance Account. This assumption is based on WHSI's intent to make application in 2012 for final disposition of balances in account 1555 and 1556 of audited balances to December 31, 2011 plus forecast additions to April 30, 2012. Upon approval of disposition of this account, it is anticipated that that smart meter additions would be included in account 1860 Meters, thereafter.

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Meters	1860	30,457	50,825	20,368	67%

General Capital

Overall, the general capital amounts for 2011 approved and 2012 test year varied by 12% or \$107,000. This represents 3.6% of the total 2012 Test year capital budget of \$2,950,666 excluding the Commerce Way TS costs.

WHSI plans for general capital additions with a long term perspective in mind to ensure consistency in spending while prioritizing necessary projects according to need. Significant year-to-year variances may occur due to prioritization of certain projects for a specific year, or for infrequent purchases that may cause a temporary "bubble" in capital costs for some categories.

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Buildings & Fixtures	1908	90,000	85,000	(5,000)	-5.56%

WHSI 's planned buildings and fixtures capital for 2012 were slightly lower due to cost variances for specific projects as compared to those included in the 2011 approved amounts.

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Office Furniture & Equip.	1915	25,000	18,000	(7,000)	-28.00%

Office furniture and equipment is 28% lower than the 2011 approved amounts to reflect lower expected purchases for 2012.

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Computer - Hardware	1920	140,000	100,000	(40,000)	-28.57%

The successful installation of WHSI's SAN network in 2011 has resulted in lower computer hardware costs for 2012.

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Transportation	1930	450,000	400,000	(50,000)	-11.11%

The 2011 Approved amount for Transportation equipment included the purchase of a large and a small vehicle. The 2012 Test amount reflects the budgeted purchase of only one large vehicle, which accounts for the \$50K variance.

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Measurement & Testing	1945	10,000	20,000	10,000	100.00%

Measurement and testing equipment for the 2012 Test year is \$10K higher than the 2011 approved amount. Specific equipment purchases are planned in 2012 and mitigated through reductions to other general capital cost categories, including Communications equipment as shown below:

Capital Expenditures by GL		2011 Approved	2012 Test Excluding Commerce Way TS Costs	\$ Variance 2011 Approved VS 2012 Test	% Variance 2011 Approved VS 2012 Test
Communications	1955	20,000	5,000	(15,000)	-75.00%

c) Please identify all spending in the 2012 Capital Budget (apart from Transformer Station) that is meant to address load growth, explain the nature and basis for the anticipated load growth and quantify any discretionary expenditures.

Response

The following table summarizes the 2012 Capital forecast excluding the Transformer Station, and the basis for each project. A discussion of each project follows the table.

1

Subdivisions & New Services \$326,336 – Growth – Customer Demand

The forecast costs for new subdivision developments have been determined using WHSI's economic evaluation model in accordance with the OEB Distribution System Code. Based on discussions with area developers, municipal representatives, and customers, WHSI is forecasting 210 new residential connections and 20 general service customers in 2012. As a result, WHSI's load growth is expected to increase as new customers are brought online.

Commerce Way Egress \$142,100 – Growth – Customer Demand

Commerce Way TS is scheduled to be complete by the end of 2012 and will require the first two 27 KV feeder connections. This project will support the termination to IESO approved metering equipment, travel across the Commerce Way TS and terminate at two new feeder points leading east and west into Woodstock Hydro distribution.

Albert St Conversion \$150,625 - Growth/Replacement – Load Growth

Distribution assets are at end of life as confirmed through inspection results. The project will involve the replacement of all poles and hardware, conversion from 4 KV to 27 KV distribution, transformer replacements and underground secondary where necessary. The 27 KV rebuild will provide additional capacity and load transfer options.

Catharine St Rebuild \$315,010 - Growth/Replacement – Load Growth

Distribution assets are at end of life as confirmed through inspection results. The project will involve the replacement of all poles and hardware, conversion from 4 KV to 27 KV distribution, transformer replacements and underground secondary where necessary. This project is adjacent to the Albert street project and supports the 4 KV conversion process. The 27 KV rebuild will provide additional capacity and load transfer options.

F8-22 Conversion \$535,700 - Growth/Replacement – Load Growth

1 Distribution assets are at end of life as confirmed through inspection results. The project will
2 involve the replacement of all poles and hardware, conversion from 4 KV to 27 KV distribution,
3 transformer replacements and underground secondary where necessary. The 27 KV rebuild will
4 provide additional capacity and load transfer options.

5
6 **Whites Lane Conversion \$223,600 - Growth/Replacement – Load Growth**

7 The City of Woodstock is planning alleyway replacement projects spanning the next three years.
8 Much of our distribution plant in these areas is nearing end of life, or supplied by a combination of
9 4 KV and aging 27 KV plant. To avoid damage to newly restored alleyways, we plan to upgrade
10 our distribution system in tandem with the City rebuild project. This project will also enable
11 customer service improvements going forward.

12 **South Alley Rebuild \$223,600 - Growth/Replacement – Load Growth**

13 The City of Woodstock is planning alleyway replacement projects spanning the next three years.
14 Much of our distribution plant in these areas is nearing end of life, or supplied by a combination of
15 4 KV and aging 27 KV plant. To avoid damage to newly restored alleyways, we plan to upgrade
16 our distribution system in tandem with the City rebuild project. This project will also enable
17 customer service improvements going forward.

18
19 **Dundas St East LTLT Elimination \$ 96,960 - Growth/Replacement – Load Growth**

20 The last 15 Long Term Load Transfers between Woodstock Hydro and Hydro One will be
21 eliminated with this project. In addition, this project will enable 27 KV expansion to the new
22 Commerce Way TS and provide a point of connection between Commerce Way and Woodstock
23 TS stations. This project will be completed under joint use arrangements with Hydro One.

d) For the spending categories/projects not addressed in response to part c), please provide an explanation as to why the budgeted level of spending is required in 2012 and quantify any discretionary expenditures.

Response:

Pole Replacement \$109,195 – Replacement/Reliability

Individual or limited sequential pole replacements that cannot be grouped into larger scale conversion or upgrade activities are covered under this project budget. Pole replacement activities handled under this project are typically related to maintenance and reliability drivers.

Pole/Duct Cleanup \$23,900 – Replacement/Reliability

Capital equipment mounted to poles are inspected and replaced annually following unreported accidents or acts of vandalism.

U/G Vault Lid Maintenance \$35,640 – Replacement/Reliability

Annual replacement of aging or damage vault equipment is necessary to ensure public and worker safety. This activity typically takes place where planned asset replacement is not imminent.

Building & Fixtures \$70,000 - Elevator Replacement – Safety

The original elevator in WHSI's office building, built in the 1960's has to be replaced in order to meet the safety requirements of the Technical Standards & Safety Authority (TSSA) Safety Bulletin 243 10_Single Bulkhead Cylinders.

Rollup Garage Door Replacement \$5,000 – Safety

A rollup garage door in WHSI's parking bay requires replacements due to safety concerns encountered by line crew entering and exiting the truck bay.

Office Furniture and Equipment \$5,000 - Ergonomic Equipment - Safety

In order to ensure a healthy workplace environment office equipment is required for replacement in order to mitigate workplace injuries for office employees. Purchases are based on the results of ergonomic assessments performed by an independent third party.

Tools, Shop and Garage Equipment \$20,000 - Safety/Asset Management

Replacement of existing tools and equipment is required to ensure work is completed in a safe environment, according to changing safety standards.

Buildings and Fixtures \$10,000 - Install Air Conditioning in Lower Server Room – Asset Management

To ensure WHSI's computer equipment in the lower level operates in a safe, climate controlled environment that protects these assets installation of air conditioning, aids in ensuring their useful lives are maintained, and business continuity is protected by mitigating system breakdowns.

Office Furniture and Equipment \$10,000 - Replace Boardroom and Ladies Washroom Furniture – Asset Management

Replacement of general assets that had reached the end of their useful lives several years ago.

Office Furniture and Equipment \$3,000 - New Workstations and Storage Equipment – Asset Management

Purchase of a new workstation that has reached the end of its useful life and new shelving to store stationary and supplies in the main office and second floor billing department. Stationary is

1 currently being stored in the warehouse, where the climate conditions causes stationary to warp
2 which results in paper jams and other delays in the bill print/stuffing/mailing machine process.

3 **Vehicles \$400,000 - Replace 1999 FRHT MCV Chassis/Digger/Derrick – Asset Management**

4 This vehicle reached its end of useful life in 2009 and repair costs continue to increase. This
5 replacement will allow for additional functionality and increased efficiency in the field and part of
6 WHSI's asset management plan.

7 **Stores Equipment \$40,000 - Used Forklift - Asset Management**

8 This purchase was deferred in 2011 pending a possible relocation of WHSI's storage facility in
9 2012. In 2011 we tested a potential forklift on site but it was determined that it would not meet
10 our needs at the current time.

11 **Computer Hardware \$100,000 – Regulatory/Asset Management**

12 Planned additions and replacements of existing computer hardware that has reached its end of
13 useful life as part of WHSI's asset management plan to ensure system efficiency and reliability
14 for regulatory and operational requirements.

15 **Computer Software \$60,000 – Regulatory/Asset Management**

16 Planned additions and upgrades of existing software that has reached its end of useful life as part
17 of WHSI's asset management plan to ensure system efficiency and reliability while meeting
18 regulatory requirements and operational requirements.

19 **Measurement and Testing Equipment \$20,000 – Regulatory/Asset Management**

20 Planned additions and replacements for measurement and testing equipment to be used in asset
21 management activities and day to day operations.

22 **Telephone Equipment \$ 5,000 – Regulatory/Asset Management**

23 Additions and replacements of existing telephone equipment to meet regulatory requirements for
24 reporting, as well as ergonomic requirements for office employees (e.g. wireless headsets).

1 **SCADA \$20,000 – Regulatory/Asset Management**

2 Planned purchase of 2 SCADA radio units to meet ever changing regulatory requirements and to
3 ensure efficient management of assets.

4
5 There are no discretionary expenditures.

6
7
8
9

10

1 **VECC Question # 8**

2 **Reference:** Appendix E, Sheet E1.1

3 Preamble: Sheet E1.1 indicates growth is 0% as the ICM Billing Determinants for Growth –
4 Denominator: 2010 Audited RRR is left blank.

5

6 a) Please explain why the denominator is left blank.

7

8 **Response:**

9

10 As indicated in OEB Staff Interrogatory No. 1, the Incremental Capital Workform was pulling
11 incorrect data into sheet E1.1. The denominator was left blank as a result of this error.

12

13

14 b) Please re-do sheet E1.1 using \$7,932,454 as the revenue requirement from rates for the
15 numerator and the revenue requirement from the 2010 Audited RRR as the denominator.

16

17 **Response:**

18

19 Please refer to WHSI's response to OEB Staff Interrogatory Numbers 1 and 2.

20

VECC Question # 9

Reference: Manager's Summary, Page 25

Preamble: Woodstock proposes the rate riders be established on "Option A" in the 2012 IRM3 Incremental Capital Workform, whereby the revenue requirement is recovered through a fixed rate rider and a volumetric rate rider.

a) Please provide the rationale for using Option A.

Response:

Please refer to WHSI's response to OEB Staff Interrogatory No. 4d).

VECC Question # 10

Reference: Manager's Summary, Page 25

Preamble: Woodstock provides a reconciliation of amounts in the Incremental Capital Module between CGAAP and MIFRS.

a) Please identify and explain any adjustments that are required as a result of the above reconciliation.

Response:

In *EB-2008-0408, Addendum to Report of the Board, Implementation International Financial Reporting Standards in an Incentive Rate Mechanism Environment*, Issue # 2, the Board gave approval for a PP&E deferral account to address the change in accounting standards and provide for the continuity of rate base during the transition from the last approved rebasing in CGAAP until the first rebasing under IFRS.

Given that WHSI's last CGAAP rebasing was for the 2011 rate year, WHSI would be required to recognize net annual adjustments for PP&E items approved during the IRM rate years, until the 2014 rate year, when WHSI makes their first COS application under MIFRS.

Annual net adjustments in this account that would specifically relate to the Incremental Capital Module would recognize the impact from two key factors attributable to the wholesale meter asset purchase and installation:

- change in burden rates for WHSI's direct costs associated with the wholesale meter asset purchase and installation as discussed in pages 28-30 of the Managers Summary;

1 - asset compontization, and change in useful life and depreciation expense as discussed in
2 pages 30-32 in the Manager's Summary,

3 -

			IFRS Deferral Account	
	CGAAP	MIFRS	Incremental Adjustment	Cumulative Balance of Adjustments
Incremental capital additions in ICM	\$ 4,427,330	\$ 4,418,472	\$ (8,857)	\$ (8,857)
2012 less incremental amortization on ICM additions	\$ (178,839)	\$ (173,963)	\$ 4,876	\$ (3,981)
2012 Net book value PPE	\$ 4,248,491	\$ 4,244,509	\$ (3,981)	
2013 less incremental amortization on ICM additions	\$ (178,839)	\$ (173,963)	\$ 4,876	\$ 895
2013 Net book value PPE	\$ 4,069,652	\$ 4,070,546	\$ 895	

4 -

5

6 As shown in the above table, an adjustment of (\$3,981) in 2012 would recognize the net impact of
7 revised burden and amortization rates, and an adjustment of \$4,876 would be made in 2013 to
8 recognize the net impact of revised amortization rates. At the end of fiscal 2013, the cumulative
9 net balance of these adjustments would be \$895.

10

11

12

13

1 LRAM

2 **VECC Question # 11**

3 **References:** Manager's Summary, Page 53

4 Woodstock requests approval in this application for a rate rider to recover revenue for
5 Conservation activities conducted in 2010, over a 12 month period.

6

7 **a) Please provide a summary of the LRAM recoveries and associated CDM programs**
8 **approved by the Board to date for Woodstock.**

9

10 **Response:**

11

12 In EB-2010-0145, WHSI received approval for LRAM recoveries for the years 2005 through to
13 2009 in the total amount of \$ 603,852.89, consisting of \$602,468.07 in LRAM recoveries, and
14 \$1,384.82 in SSM recoveries. Rate riders were approved for recovery over a three-year period
15 with a sunset date of April 30, 2014.

16

17 The LRAM amounts and rate riders for each applicable rate class are shown on page 64 of
18 WHSI's Proposed Settlement Agreement and attached to WHSI's Decision and Order EB-
19 2010-0145.

20

21 **b) Please confirm that the LRAM amounts Woodstock is seeking to recover in this application will**
22 **be for new amounts not included in past LRAM recoveries.**

23

24 **Response:**

25

26 WHSI confirms that the LRAM amounts Woodstock is seeking to recover in this application will be
27 for new amounts not included in past LRAM recoveries.

28

29

1 **VECC Question # 12**

2 **Reference:** Manager's Summary, Page 53 and Attachment B

3

4 Preamble: The evidence indicates "At the time of the application, neither the 2010 preliminary, nor
5 the final results were available."

6

7 a) **When will the OPA results for the 2010 Programs be available and how may this affect**
8 **the LRAM claim?**

9

10

11 **Response:**

12

13 WHSI received the final OPA results for the 2010 Programs on November 15th 2011 and is
14 included in Appendix A and submitted in the excel spreadsheet "2006- 2010 CDM Final OPA
15 CDM Results. Woodstock Hydro Service Inc.xls".

16

17 In the original application, WHSI included the 2009 LRAM amounts as a placeholder until the final
18 results were available. The following table shows the impact on the LRAM claim.

	2010 LRAM Preliminary (2009 LRAM Final Results)	2010 LRAM Final Results	Variance
<u>Third Tranche</u>			
RESIDENTIAL	\$1,718.80	\$3,169.66	\$1,450.86
GENERAL SERVICE < 50 kW	\$5,442.01	\$1,006.11	(\$4,435.90)
UNMETERED SCATTERED LOAD	\$3,186.25	\$6,466.73	\$3,280.48
<u>OPA Programs</u>			
RESIDENTIAL	\$45,365.65	\$75,709.87	\$30,344.22
GENERAL SERVICE <50KW	\$12,185.37	\$26,546.86	\$14,361.49
GENERAL SERVICE >50KW	\$38,498.55	\$16,833.10	(\$21,665.45)
TOTAL	\$106,396.64	\$129,732.33	\$23,335.69

19

b) If 2010 OPA preliminary or final results are available, please update the LRAM claim accordingly.

Response:

The 2010 final OPA results are provided in Appendix A. The updated rate riders have been calculated as follows:

2012 - LRAM and SSM Rider

Rate Class	Amounts (2009 LRAM)		Billing Units (2011)		Rate Riders - 1 year		
	LRAM	SSM			LRAM	SSM	Total
	\$	\$		Metrics	\$/unit (kWh or kW)	\$/unit (kWh or kW)	\$/unit (kWh or kW)
Residential	\$ 78,879.53		126,660,107	kWh	0.0006	0.0000	0.0006
GS < 50 kW	\$ 27,552.97		49,817,450	kWh	0.0006	0.0000	0.0006
GS 50 kW - 999 kW	\$ 12,228.53		395,652	kW	0.0309	0.0000	0.0309
GS>1000 kW	\$ 4,604.57		148,980	kW	0.0309	0.0000	0.0309
Street Lighting			8,539	kW	0.0000	0.0000	0.0000
USL	\$ 6,466.73		615,829	kWh	0.0105	0.0000	0.0105
Total	129,732.33	0.00					

c) Is Woodstock planning to engage a Third Party to review its CDM program results?

Response:

WHSI engaged Burman Energy Consultants Group to review its CDM program results.

d) For the Third Tranche Programs:

- i. Provide a copy of the schedule that shows the breakdown *by year* of the unit kwh savings and net/gross totals for each Residential program at the measure level

Response:

The following table is also included in Appendix B as well as the excel spreadsheet "Attachment A-D - LRAM Application Woodstock 2011 r1.xls – VECC IR #12d tab"

ATTACHMENT E 11
LRAM Input Assumptions

					Per Unit		Total	
Class	Program year	Free Rider Rate	Number of Units	Table Applied	Gross Annual Energy Savings per unit (kWh)	Net Annual Energy Savings per unit (kWh)	Gross Annual Energy Savings per unit (kWh)	Net Annual Energy Savings per unit (kWh)
Program								
Third Tranche								
RESIDENTIAL								
Partnership / Sponsorships								
SLEDs - 5W	2006	5%	316	OPA	13.95	13.2525	4,408	4,188
Lighten Your Electricity Bill								
CFLs	2005	10%	906	OPA	43.32	38.988	39,248	35,323
SLEDs - 5W	2005	5%	65	OPA	13.95	13.2525	907	861
SLEDs - Mini Lights	2005	5%	65	OPA	4.99	4.7405	324	308
Programmable Thermostat - Space Heating	2005	10%	16	OPA	2063	1856.7	33,008	29,707
Programmable Thermostat - Space Cooling	2005	10%	42	OPA	138.00	124.2	5,796	5,216
Timer - Outdoor Light	2005	10%	18	OPA	20.21	18.189	364	327
Timer - Indoor Light	2005	10%	8	OPA	64.39	57.951	515	464
Ceiling Fan	2005	10%	27	OPA	122.58	110.322	3,310	2,979

- ii. confirm the source(s) of the input assumptions for 2010.

Response:

WHSI confirms that the "2011 Prescriptive Measures and Assumptions List Version 1.0 FINAL (April 06, 2011).pdf" were used to calculated 2010 values for Third Tranche Residential Programs.

1
2 e) **List and confirm OPA's input assumptions for Every Kilowatt Counts (EKC) 2006**
3 **including the measure life, unit kWh savings and free ridership for Compact**
4 **Fluorescent Lights (CFLs) and Seasonal Light Emitting Diodes (LED). Confirm some of**
5 **these assumptions were changed in 2007 and again in 2009 and compare the values._**
6

7 **Response:**
8

9 Assumptions used by the OPA for all programs can be found in detail in Appendix B, page
10 "Attachment D – OPA Assumptions".

11 Specific assumptions for 2006-2007 and 2009 EKC are shown below and can be found in
12 "Attachment A-D - LRAM Application Woodstock 2011 r1.xls– VECC IR #12e tab" These
13 assumptions were recognized in the original LRAM claim and therefore has no impact on the
14 values initially filed.

APPENDIX A

2010 Final OPA CDM Results

November 14, 2011

Re: Estimated allocation of 2006-2010 provincial conservation results to Local Distribution Company service territories – detailed: Woodstock Hydro Services Inc.

Dear Jay Heaman,

The Ontario Power Authority (OPA) is pleased to provide the enclosed report as a more detailed version to the Final 2010 Conservation and Demand Management (CDM) Summary Results report which was distributed to LDCs on Friday September 16, 2011.

About this report

The report provides an estimated allocation of OPA-funded conservation program results for each LDC's service territory, from 2006, 2007, 2008, 2009 and 2010 programs. One update has been made to the report circulated in September:

- Revisions/Corrections to previous reports:
 - 2009 Great Refrigerator Roundup
 - The results from this initiative have been adjusted for several LDCs due to a linking error that may have resulted in higher or lower savings than actual.
- The allocated project counts for 2010 ERIP have been replaced with the actual number of projects within each LDC territory that were received and entered into OPA processing on or before March 31, 2011. There was no change to the resource savings for each LDC.
- Upcoming updates to this report:
 - 2010 ERIP, MEER, PSB and HPNC
 - An update to this report will be issued to reflect any additional projects that were completed in 2010, but were not included in the 2010 final evaluation.
 - Any 2010 ERIP, MEER, PSB or HPNC projects completed in 2011 will be accounted for in 2011 results.

All results presented herein are considered final.

The results provided in the enclosed report are in accordance with OPA practices and policies for reporting progress against the provincial conservation goals as of September 2011. DR initiatives, for example, have been reported based on the total DR resources that were available (based on contracted nameplate capacity) rather than the actual demand reduction which occurred at the one-hour system peak in a given year. Additionally, customer based generation resources shown for the Renewable Energy Standard Offer Program and Other Customer Based Generation are based on total contracts signed in each year, rather than in-service date.

The OPA welcomes inquiries regarding the determination of these province-wide CDM program results and/or allocation of these results to individual LDC territories. However the OPA is unable to provide any technical or regulatory advice to LDCs regarding specific treatment of these OPA-funded

CDM program savings for the purposes of Lost Revenue Adjustment Mechanism or other filings by LDCs to the OEB. Such inquiries should be directed to the OEB.

Allocation methodologies

The OPA has used four distinct methodologies to estimate the allocation of provincial savings to individual LDC service territories, depending on the conservation program type:

- 1) LDC delivered programs: Savings were allocated based on participation data that was tracked by individual LDCs.

Third-party (non-LDC) delivered programs:

- 2) Where geographic participant data was readily available, savings were allocated to corresponding LDC territory.
- 3) Where geographic participation was not readily available, savings were allocated based on each LDC's share of the provincial energy consumption for the customer class targeted by the program, based on data from the Ontario Energy Board Yearbook of Electricity Distributors for the respective year the program was delivered. For example, if an LDC had 10% of the residential energy consumption of Ontario in 2010, they would have been allocated 10% of the savings from the 2010 province-wide Every Kilowatt Counts Power Savings Event retail coupon initiative (as it is delivered by a third party and does not include LDC-specific participant data).
- 4) Programs run exclusively in a particular LDC territory: All energy and demand savings were allocated to the particular LDC.

Report structure

The structure of the enclosed spreadsheet-based report is consistent with past reports. It includes the following tabs:

- 1) **Allocation Methodology:** Provides an initiative-by-initiative summary of the allocation methodology applied to arrive at your specific Local Distribution Company share of the total provincial results.
- 2) **Summary - LDC:** Provides a portfolio-level summary of the annual resource savings (demand and energy, net and gross for each) for the 2006–2010 program portfolios at your specific Local Distribution Company level.
- 3) **Summary - Prov:** Provides a portfolio-level summary of the annual resource savings (demand and energy, net and gross for each) for the 2006–2010 program portfolios at the provincial level.
- 4) **Annual Net Demand Savings – LDC:** Provides a stacked bar graph of the annual net peak demand savings (MW) that are estimated to occur within your service territory from 2006 through 2050, as a result of 2006–2010 programs.
- 5) **Annual Net Energy Savings – LDC:** Provides a stacked bar graph of the annual net energy savings (MWh) that are estimated to occur within your service territory from 2006 through 2050, as a result of 2006–2010 programs.
- 6) **Annual Net Demand Savings – Prov:** Provides a stacked bar graph of the annual net peak demand savings (MW) that are estimated to occur across the province from 2006 through 2050, as a result of 2006–2010 programs.

- 7) **Annual Net Energy Savings – Prov:** Provides a stacked bar graph of the annual net energy savings (MWh) that are estimated to occur across the province from 2006 through 2050, as a result of 2006–2010 programs.
- 8) **Initiative Level – LDC:** Provides a breakdown of the portfolio-level summary information provided in Summary tab for your specific LDC, by individual initiative and year.
- 9) **Initiative Level – Prov:** Provides a breakdown of the portfolio-level summary information provided in Summary tab at the province level, by individual initiative and year.
- 10) **Measures – LDC:** For each initiative in each year, this tab provides (where available): per unit savings assumptions; gross and net peak demand savings, annual & lifetime energy savings, effective useful life; aggregate net-to-gross adjustment factors; participation numbers and the resulting initiative level resource savings results for the estimated provincial share for your LDC service territory.
- 11) **Measures – Prov:** For each initiative in each year, this tab provides (where available): per unit savings assumptions: gross and net: peak demand savings, annual & lifetime energy savings, effective useful life and aggregate net-to-gross adjustment factors, and participation numbers and the resulting initiative level resource savings results at the provincial level.
- 12) **Local Distribution Companies:** includes the Ontario Energy Board Year Book of Electricity Distributors data from 2006-2010 that was used for results allocation amongst LDCs.

Third-party evaluation reports

Third-party evaluation reports for evaluated 2010 initiatives will be available in the next month on the OPA website. <http://www.powerauthority.on.ca/evaluation-measurement-and-verification/evaluation-reports>.

We hope that you find this report both informative and useful. If you have any questions, please do not hesitate to contact us at LDC Support (LDC.Support@powerauthority.on.ca)

With kind regards,

Sorana Ionescu
Director, Evaluation and Awareness

OPA Conservation & Demand Management Programs

Allocation Methodology

#	Initiative Name	Program Name	Program Year	Results Status	Allocation Methodology	Notes
1	Secondary Refrigerator Retirement Pilot	Consumer	2006	Final	Measure level allocation based on 2006 residential energy throughput by LDC	
2	Cool & Hot Savings Rebate	Consumer	2006	Final	Measure level allocation based on 2006 residential energy throughput by LDC	
3	Every Kilowatt Counts	Consumer	2006	Final	Measure level allocation based on 2006 residential energy throughput by LDC	
4	Demand Response 1	Business, Industrial	2006	Final	Initiative level allocation based on 2007 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 1 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
5	Loblaw & York Region Demand Response	Business, Industrial	2006	Final	Measure level allocation based on 2007 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Electricity Resources Demand Response can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
6	Great Refrigerator Roundup	Consumer	2007	Final	Actual LDC specific results	
7	Cool & Hot Savings Rebate	Consumer	2007	Final	Measure level allocation based on 2007 residential energy throughput by LDC	
8	Every Kilowatt Counts	Consumer	2007	Final	Measure level allocation based on 2007 residential energy throughput by LDC	
9	peaksaver®	Consumer, Business	2007	Final	Actual LDC specific results	
10	Summer Savings	Consumer	2007	Final	Actual LDC specific results	
11	Aboriginal	Consumer	2007	Final	Actual LDC specific results	
12	Affordable Housing Pilot	Consumer Low-Income	2007	Final	Actual LDC specific results	
13	Social Housing Pilot	Consumer Low-Income	2007	Final	Initiative level allocation based on 2007 Residential Energy Throughput	
14	Energy Efficiency Assistance for Houses Pilot	Consumer Low-Income	2007	Final	Initiative level allocation based on 2007 Residential Energy Throughput	
15	Electricity Retrofit Incentive	Business	2007	Final	LDC's respective proportion of province-wide reported gross demand savings.	
16	Toronto Comprehensive	Business	2007	Final	Program run exclusively in Toronto Hydro-Electric System Ltd. service territory	
17	Demand Response 1	Business, Industrial	2007	Final	Initiative level allocation based on 2007 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 1 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
18	Loblaw & York Region Demand Response	Business, Industrial	2007	Final	Initiative level allocation based on 2007 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Electricity Resources Demand Response can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
19	Renewable Energy Standard Offer	Consumer, Business, Industrial	2007	Final	Actual LDC specific results	Program results are based on contracted nameplate capacity and not actual summer coincident peak generation
20	Great Refrigerator Roundup	Consumer	2008	Final	Actual LDC specific results	
21	Cool Savings Rebate	Consumer	2008	Final	Measure level allocation based on 2008 Residential Energy Throughput	
22	Every Kilowatt Counts Power Savings Event	Consumer	2008	Final	Measure level allocation based on 2008 Residential Energy Throughput	
23	peaksaver®	Consumer, Business	2008	Final	Actual LDC specific results	
24	Summer Sweepstakes	Consumer	2008	Final	Actual LDC specific results	
25	Electricity Retrofit Incentive	Consumer, Business	2008	Final	LDC's respective proportion of province-wide reported gross demand savings.	While this initiative underwent a thorough evaluation process at the provincial level, individual prescriptive input assumptions were not verified for all measures nor were reported savings from every individual LDC verified. A representative sample of retrofit projects were measured and verified and a province-wide savings total was derived. The province wide verified energy and demand savings were allocated to individual LDCs based on their respective proportion of province-wide reported gross demand savings.
26	Toronto Comprehensive	Consumer, Consumer Low-Income, Business	2008	Final	Program run exclusively in Toronto Hydro-Electric System Ltd. service territory	
27	High Performance New Construction	Business	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	
28	Power Savings Blitz	Business	2008	Final	Actual LDC specific results	
29	Demand Response 1	Business, Industrial	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 1 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
30	Demand Response 3	Business, Industrial	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Demand Response 3 can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
31	Loblaw & York Region Demand Response	Business, Industrial	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	1) Although the program is managed internally and actual participant data is available, the small participant population of Electricity Resources Demand Response can lead to participant confidentiality issues if disclosed on an actual LDC share basis. 2) Program results are based on contracted nameplate capacity at the end of the calendar year and not actual summer coincident peak demand reduction.
32	Renewable Energy Standard Offer	Consumer, Business	2008	Final	Initiative level allocation based on 2008 non-residential energy throughput by LDCs	Program results are based on contracted nameplate capacity and not actual summer coincident peak generation
33	Other Customer Based Generation	Business	2008	Final	Contract level allocation based on 2008 non-residential energy throughput by LDCs	Program results are based on contracted nameplate capacity and not actual summer coincident peak generation
34	LDC Custom - Hydro One Networks Inc. - Double Return	Business, Industrial	2008	Final	Program run exclusively in Hydro One Networks Inc. service territory	
35	Great Refrigerator Roundup	Consumer	2009	Final	Actual LDC specific results	
36	Cool Savings Rebate	Consumer	2009	Final	Measure level allocation based on 2009 Residential Energy Throughput

446	25	Electricity Retrofit Incentive	Consumer, 2008	Final	282 Custom Project - Industrial Sector
447	26	Toronto Comprehensive	Consumer, 2008	Final	1 Toronto Hydro-Electric System Limited - Commercial Project
448	26	Toronto Comprehensive	Consumer, 2008	Final	2 Toronto Hydro-Electric System Limited - Take A Load Off Project
449	26	Toronto Comprehensive	Consumer, 2008	Final	3 Toronto Hydro-Electric System Limited - Keep Cool Project
450	26	Toronto Comprehensive	Consumer, 2008	Final	4 Toronto Hydro-Electric System Limited - TABIA SLED Exchange Project
451	26	Toronto Comprehensive	Consumer, 2008	Final	5 Toronto Hydro-Electric System Limited - Low-Income Project
452	26	Toronto Comprehensive	Consumer, 2008	Final	6 City of Toronto - Commercial Project
453	26	Toronto Comprehensive	Consumer, 2008	Final	7 City of Toronto - Multi-Family Project
454	26	Toronto Comprehensive	Consumer, 2008	Final	8 Building Owners & Managers Association Project - Commercial Project
455	27	High Performance New Construction	Business, 2008	Final	1 Custom Project
456	28	Power Savings Blitz	Business, 2008	Final	1 B Fixture With Electronic Ballast
457	28	Power Savings Blitz	Business, 2008	Final	2 Energy Star® rated LED Exit Sign
458	28	Power Savings Blitz	Business, 2008	Final	3 Energy Star® rated CLF
459	28	Power Savings Blitz	Business, 2008	Final	4 Electric Water Heater Tank Wrap
460	28	Power Savings Blitz	Business, 2008	Final	5 Electric Water Heater Pipe Insulation
461	28	Power Savings Blitz	Business, 2008	Final	6 Aerator
462	28	Power Savings Blitz	Business, 2008	Final	7 Halogen
463	28	Power Savings Blitz	Business, 2008	Final	8 Other
464	29	Demand Response 1	Business, I 2008	Final	1 Voluntary Load Shedding Project

Measure Name	
	Gross Summer Peak Demand Savings (kW)
Energy Star® Compact Fluorescent Light Bulb - Spring Campaign	0.000
Energy Star® Compact Fluorescent Light Bulb - Autumn Campaign	0.000
Seasonal Light Emitting Diode Light String - Autumn Campaign	0.000
15 W CFL	0.001
20+ W CFL	0.002
Seasonal LED Light String	0.000
Project Porchlight CFL	0.001
Energy Star Qualified Compact Fluorescent - Spring Campaign - Participant Rebated	0.001
ENERGY STAR Decorative CFLs - Spring Campaign - Participant Rebated	0.001
Installed CFLs - Spring Campaign - Participant Spillover	0.003
Energy Star Qualified Compact Fluorescent - Spring Campaign - Non-Participant Rebated	0.001
ENERGY STAR Decorative CFLs - Spring Campaign - Non-Participant Rebated	0.001
Energy Star Qualified Compact Fluorescent - Autumn Campaign - Participant Rebated	0.001
ENERGY STAR Specialty CFLs - Autumn Campaign - Participant Rebated	0.001
ENERGY STAR Fixtures - Autumn Campaign - Participant Rebated	0.004
Energy Star Qualified Holiday LED Lights - Autumn Campaign - Participant Promoted	0.000
Energy Star Qualified Compact Fluorescent - Autumn Campaign - Non-Participant Rebated	0.001
ENERGY STAR Specialty CFLs - Autumn Campaign - Non-Participant Rebated	0.001
ENERGY STAR Fixtures - Autumn Campaign - Non-Participant Rebated	0.001
Energy Star Qualified Holiday LED Lights - Autumn Campaign - Non-Participant Promoted	0.000
Installed Energy Star® CFL Bulbs - Rewards for Recycling Campaign - Spillover	0.001

Unit Savings Assumptions								
Gross Annual Energy Savings (kWh)	Gross Lifetime Energy Savings (kWh)	Net Summer Peak Demand Savings (kW)	Net Annual Energy Savings (kWh)	Net Lifetime Energy Savings (kWh)	Aggregate Net-to-Gross Adjustment (%)	Effective Useful Life (EUL)	Activity Results (#)	Gross Summer Peak Demand Savings (kW)
