2012 IRM application

1

15

- 2 The Applicant is submitting a 2012 IRM application to adjust its current rates which were
- 3 determined by the Applicant's 2010 Cost Of Service Application to the OEB; case
- 4 number EB 2009-0269.
- 5 The Applicant has relied on the OEB's most recent Filing Requirements for Transmission
- 6 and Distribution Applications (updated on June 22, 2011), and various guidelines issued
- 7 by the OEB for treatment of specific items. In completing this IRM application, the
- 8 Applicant has completed and is submitting the following OEB's Excel Models and a
- 9 Schedule of Tariff and Rates:
- a) 2012 3rd Generation IRM Rate Generator Model Exhibit 1
- b) 2012 RTSR adjustment work form Exhibit 2
- 12 c) 2012 IRM 3 Shared Tax Savings Work form Exhibit 3
- d) 2012 Revenue to Cost Ratio Adjustment work form Exhibit 4
- e) Schedule of Tariff and Rates Exhibit 5

16 Background Issues From the 2010 Cost of Service

- 17 The Applicant through its 2010 Cost Service Application:
- 18 a) harmonized distribution rates and service charges for its two service areas;
- b) 2010 Distribution rates were effective January 1, 2011; implemented on March 1, 2011. The Applicant received a Foregone Revenue Rate Adder for lost revenues for the period of January 1, 2011 to February 28, 2011. This rate adder is effective until May 1, 2012.
- 23 c) The PILS component of the revenue requirement was based upon the 2011 effective tax rates.

1 d) Deferral accounts (except PILS) were cleared to Audited Balances of 2 December 31, 2009. Deferral Rate Riders are to be recovered up to May 1, 3 2013. 4 e) A conversion rate of 2.8% was approved to the 15 minute retail billing 5 demand to adjust to hourly intervals for interval metered customers in the 6 GS>50 class. 7 f) Revenue-cost ratio adjustments were made through the Applicants 2010 Cost 8 of Service settlement and implemented through its 2010 distribution rates. 9 No further adjustments are necessary. 10 11 3rd Generation IRM Model Results 12 Based upon completion of the OEB's models, the Applicant is requesting the following 13 adjustments to its distribution rates: 14 a) An adjustment to its current rates as determined by the OEB 3rd Generation IRM Rate Generator model and an adjustment resulting from 15 16 the decrease in Corporate Tax Rates as calculated by the 2012 Tax 17 Savings Work form (exhibit 3). The increase from the 3rd Generation 18 IRM Rate Generator Model is based upon a Price Escalator of 1.3%; 19 Productivity factor listed as .72%; Price Cap Index .18%; and an 20 associated stretch factor value of .4%. This model's output is included as 21 Exhibit 1. 22 b) An adjustment to the retail transmission service rates - Network and 23 Connection Charges based upon results from the Ontario Energy Board's 24 RTSR work form. This Model's output is included in Exhibit 2; 25 c) The Applicant as stated in the 2012 IRM Survey, was not seeking 26 adjustments for Revenue to Cost Ratios, Rate Harmonization, Z factors, 27 Incremental Capital Module Claims or a Renewable Generation or Smart

28

Grid Rate adder.

1	d) Based upon the OEB's 3 rd Generation IRM rate generator model;
2	schedule 10, the Applicant 's 2010 deferral balances does not exceed
3	the materiality threshold. The applicant will not be requesting to clear
4	these accounts at this time.
5	e) On Schedule 9, rows 30 and 31 under column BD of the OEB's 2012 3 rd
6	Generation IRM Rate Generator model, the Applicant has listed the
7	deferral revenues recovered in 2010 that relate to the pre 2010 deferral
8	account recoveries. Note the Applicant in its 2010 Cost of Service
9	Application settled deferral accounts to December 31, 2009. New
10	distribution rates and deferral account recoveries were implemented
11	March 1, 2011. The balances of these deferral accounts recoveries are
12	listed on row 48 under column DB.
13	
14 15	Specific Adjustments to the Rate Riders as calculated by the OEB's 3rd Generation IRM Model.
16	Special Purpose Charge
17	The Applicant is requesting clearance of the Special Purpose Charge credit (i.e.
18	payment to customers) balance of \$10,348 in accordance with the Ontario Board
19	directions.
20	
21	Payments In Lieu of Taxes ("PIL's")
22	While the Applicant is filing information pertaining to the balance in its PILS account
23	(Account 1562), the Applicant is requesting to defer the collection of the anticipated large
24	balance until its next Cost of Service Filing. The reason for this request is that the
25	Applicant does not wish to collect charges from its rate payers now and pay rate payers
26	later as the Applicant anticipates it will likely be in a large net credit position (i.e.
27	payment to customers) in its deferral/variance accounts at the time of its next Cost of
28	Service Application. The Applicant is currently reviewing all of the required PIL's

1 evidence from both its predecessor companies and will be submitting the PIL's evidence 2 to the OEB by the end of December 2011. 3 4 **LRAM** 5 While the Applicant is filing information pertaining to the balance in the LRAM account, 6 the Applicant is requesting to defer the collection of the balance until its next Cost of 7 Service Filing. The reason for this request is that the Applicant does not wish to collect 8 charges from its rate payers now and pay rate payers later as the Applicant anticipates 9 it will likely be in a large net credit position (i.e. payments to customers) in its 10 deferral/variance accounts at the time of its next Cost of Service Application. The 11 Applicant is currently reviewing the documentation sent from the Ontario Power Authority 12 on November 15, 2011 concerning the Applicant's 2010 results. The Applicant will be 13 submitting the LRAM evidence to the OEB by the end of December 2011. 14 15

- 2 OEB's 3rd Generation IRM Model calculation
- 3 As a calculated output by the OEB 3rd Generation IRM model, the monthly increase on a
- 4 residential customer using 800 kWh would be \$.62 or .6%.
- 5 The Applicant has also calculated the bill impacts with the following considerations:
- a) As the Applicant is requesting to defer the collection of the PIL's deferral
 variance account 1562; there has been no additions or changes from
 the approved 2010 deferral rates for comparison purposes.
 - b) The applicant has removed its current Foregone Revenue Rate Adder from the 2011 bill for comparison purposes.
 - c) Bill impacts are calculated before HST.
- 12 Summary of the Applicant's bill impacts are as follows:
