**Hydro One Distribution Rate Application EB-2007-0681**  
**Wecast Interrogatories for Hydro One**

**Wecast Interrogatory # 1**

**Issue Number: 1.7**

**Issue:** Are the proposed Distribution Loss Factors appropriate?

Ref: G1/Tab 10/Sch 1/Page 5

- a) In situations where the customer is supplied at two meter points on the same feeder, on which the customer is the only customer supplied by the feeder, would Hydro One accept an engineering study for the purpose of assigning a specific loss factor for the customer?
- b) If the engineering study is completed after the 2008 rates come into effect, will Hydro One repay the difference in amounts collected between the calculated losses and the current 3.4% rate?

**Wecast Interrogatory # 2**

**Issue Number: 6.1**

**Issue:** Is the proposal for the amounts, disposition and continuance of Hydro One's existing Deferral and Variance accounts (Regulatory Assets) appropriate?

Ref: F1/Tab 1/Sch 1/Page13/Table 8

Preamble: Since Nov 1, 2007, Wecast Industries and other companies connected to the Hydro One distribution system have been placed at a cost disadvantage compared to transmission – connected competitors with respect to Transmission Connection charges.

- a) Please identify the amount in the variance account that has accrued from the Nov 1, 2007 change in RTSRs.
- b) Please identify how these over-charges will be repaid to customers.
