Feb 27/2012

The Ontario Energy Board.

This letter recommends that the Peterborough

Utilities pay for the newly installed "Smart Meters" as the P. U. C. gave the City of Peterborough approximately Ten millions dollars per year for the last few years

I suggest that this money should have paid for "Smart Meters" and not having it customers pay \$1.48 per month for 24 months

As an example the people with Electric heat that cannot convert to another type of fuel, Baseboard heating Radiant heating in ceiling of new homes, cannot not install duct work so we have to pay approximate 10 to 11¢ per kilowatt hour during the day time in the winter due to these "Smart Meters"

There are many homes in Ontario that has this type of heating and it affect many pensioners

Anthony Garton

P.S. I just saw this application on Feb 23/2012 in local paper
