 MAR 28 2012
 ONTARIO ENERGY BD

Dear Ms. Walli:

**Re: Consultation on Energy Issues Relating to Low Income Consumers
 Enbridge Gas Distribution Inc. ("Enbridge")
 Ontario Energy Board File ("Board") No.: EB-2008-0150
 Winter Warmth 2011 Final Report**

On December 21, 2011, the Board issued a letter to all participants in the above noted proceeding outlining the information to be filed by natural gas distributors, specifically Enbridge in Attachment B, in relation to the Winter Warmth and Low Income Energy Assistance Program ("LEAP") Emergency Financial Assistance programs.

Enbridge's Winter Warmth program will be terminating effective May 31, 2012 however by March 31, 2012 and March 31, 2013, Enbridge is to provide its final Winter Warmth report from its United Way agency for the preceding year's activities

Accordingly, enclosed please find Enbridge's 2011 Winter Warmth final report.

Please contact the undersigned if you have any questions.

Sincerely,

Bonnie Jean Adams

Summary

The Winter Warmth 2010-2011 heating season operated between December 1, 2010 and May 31, 2011. The program was coordinated by a network of social service agencies through the United Way. Winter Warmth is designed for low-income households who are experiencing temporary setbacks and have exhausted all other means of financial support. The Winter Warmth program became an important part of the community and the participating social service agencies served as the place where families could go for assistance.

Winter Warmth was a blessing for many customers who had faced a crisis or a life-changing event that created a backload of debts including their heating bill. Households that received the grants became more financially stable and were better prepared to manage the upcoming utility bills. In addition to the monetary portion of assistance, the clients were provided with the necessary referrals and information about existing programs/services available in the community.

The Winter Warmth program helped families who have already exhausted all of their available resources and had nowhere to turn to. More specifically, Winter Warmth was able to help the families stay together under one roof and lessened the impact of financial strain and helped clients maintain the good credit rating without going into arrears.

Winter Warmth has a set cap of \$500 per utility as insurance to assist as many households as possible. The funds are not allocated for security deposits and connection fees. Even with the determined monetary limit of the household, most of the municipalities expressed concerns about the limited flexibility for the exceptional cases where help is needed and imperative in order to sustain utility and housing.

Section A: Grant Disbursements

The following tables contain final information for grants disbursed in the Winter Warmth 2010/2011 heating season for each community.

⇒ Please refer to the end of Section A for the Table of definitions

Table 1: Enbridge Winter Warmth Disbursements

Enbridge Gas Distribution					
Municipality	Budget (\$)	Less 15% Admin (\$)	Total WW (\$)	Pay-out (\$)	Remaining (\$)

York Region	2,606	2	1,227	156
Total	9,192	66	6,955	1,281

** Municipality did not provide information.

Section E: Reasons for Rejected/Referred Applications

Enbridge Gas Distribution

- Applicant's household income exceeded income eligibility criteria
- Zero balance on the utility bill
- Documentation failed to verify information given by the applicant
- Unable to verify applicant's residency
- Unsustainable housing/utility
- Applicant was not an existing Enbridge customer
- Applicant was unable to make payment arrangements (for applicants whose utility's balance exceeded \$500)
- Applicant resided outside the catchment area
- Agency was out of Winter Warmth funding
- Applicant received assistance from OW or ODSP
- Referred client to OW for community start up benefit

Section F: Referral Source

The following information captures the data on applicants' referral sources:

Enbridge Gas Distribution: Enbridge Call Centre, Winter Warmth flyers/brochures, United Way, social assistance offices (OW/ODSP), housing help centres, Salvation Army, newspaper, Internet, family and friends, community agencies, food banks, Employment Education Centre, media, schools, word of mouth, repeating clients

Section G: Challenges and Recommendations

Grant amounts and repayments

- Increased flexibility within call centre with payment arrangements for the remaining balance (over \$500).

Issues regarding the working relationship with utility

- Enbridge service desk kept referring applicants who live outside Dufferin County.

Communication

- Applicants should be directed to Winter Warmth before their balances exceeded the Winter Warmth allowance. Many applicants waited until their balances were very high and had to be referred to the utility company to make payment arrangements.
- Some applicants were under the impression that if they had been serviced and their grant amount was less than \$500, they could submit subsequent bills to get an additional grant amount up to \$500.

Funding

- Funds were depleted prior to programs end. Increase in program funding is needed as demand is higher.
- Increase in funding for staffing.

Application Process

- Advocating for OW/ODSP clients was time-consuming.

Accomplishments

The Winter Warmth Program provided an extremely valuable form of assistance to the increasing number of low income households who faced the prospect of losing heat in the winter months. Social Service agencies, in collaboration with utility companies helped individuals and families maintain their housing, and enhance their support network when many families were confronted with challenges such as job loss, family breakdown, illness, injuries or death. Given the current economic downturn, this program is more important than ever in helping stabilize the life situations of low-income families who are confronted with short-term financial difficulties.
